

NZX Release

10th July 2018

Blis Technologies performance update

Blis Technologies Limited interim results (unaudited) for the first quarter ending 30 June 2018 (Q1 FY19). Trading revenue for the quarter was up 179% to \$1.64 m (Q1 FY18 \$0.59 m), with an EBITDA loss of \$92 k (Q1 FY18 loss of \$892 k).

All regions saw an increased revenue compared with the same period last year.

This result further reinforces the recovery we have experienced over the last three quarters and evidence that the sales downturn in the first half of FY18 was a one-off impact.

Guidance for the full financial year ending 31 March 2019 is for revenue in excess of \$7.0 m, an EBITDA in excess of \$0.6 m and a small profit emphasising the steady business growth we have experienced over the last four years.
