## PACIFIC EDGE APPOINTS CHIEF FINANCIAL OFFICER

Pacific Edge Limited (NZX: PEB) is pleased to announce the appointment of Grant Gibson as Chief Financial Officer, effective from 16 December 2019.

Grant is an experienced financial executive and chartered accountant, who brings significant financial experience to the role. He was most recently Chief Financial and Operating Officer for Dunedin-based company, TracMap, where he was responsible for leading the financial management and operations across the company as it grew from 5 to 55 people with commercial subsidiaries in three international markets. Prior to that, Grant worked in executive finance roles at Westpac, including as Head of Finance for Westpac New Zealand. He was the head of the finance team for New Zealand's largest financial transaction, the local incorporation of Westpac New Zealand, a complex and heavily regulated transaction involving billions of dollars.

CEO of Pacific Edge, David Darling, commented: "We look forward to welcoming Grant to the team. Along with his accounting and financial expertise, he has extensive experience assisting with technology company growth into overseas markets, particularly the USA. This will be of particular value to Pacific Edge as we drive towards commercial success in our target markets of New Zealand, Australia, Singapore and the USA."

Pacific Edge would like to thank Kate Rankin for her significant contribution as Chief Financial Officer for the past five years.

### **OVERVIEW** [www.pacifedge.co.nz](http://www.pacifedge.co.nz) [www.pacifedgedx.com](http://www.pacifedgedx.com)

Pacific Edge Limited (NZX: PEB) is a New Zealand publicly listed, cancer diagnostic company specialising in the discovery and commercialisation of diagnostic and prognostic tests for better detection and management of cancer. Its Cxbladder suite of non-invasive, simple to use and accurate diagnostic tests provide actionable results, and better detection and management of urothelial cancer. The company is developing and commercialising its range of Cxbladder bladder cancer tests globally through its wholly owned central laboratories in New Zealand and the USA. The company's products have been tested and validated in international multi-centre clinical studies.

### **ABOUT Cxbladder Triage** [www.cxbladder.com](http://www.cxbladder.com)

Cxbladder Triage combines the power of the genomic biomarkers with additional phenotypic and clinical risk factors to accurately identify patients with haematuria who have a low probability of bladder cancer and may not require a more extensive urological evaluation. Cxbladder Triage is a tool for use by clinicians and physicians in primary evaluation of patients with haematuria and is intended to reduce the need for an expensive and invasive work-up in patients who have a low probability of having urothelial carcinoma.

**ABOUT Cxbladder Detect** [www.cxbladder.com](http://www.cxbladder.com)

Cxbladder Detect enables the non-invasive detection of bladder and other urinary tract cancers from a small volume of a patients' urine. Cxbladder Detect provides clinicians with a quick, cost effective and accurate measure of the presence of the cancer as an effective adjunct to cystoscopy.

**ABOUT Cxbladder Monitor** [www.cxbladder.com](http://www.cxbladder.com)

Cxbladder Monitor allows urologists to monitor bladder cancer patients for recurrence of the disease. Bladder cancer has a recurrence rate of 50-80% and requires life-long surveillance. Cxbladder Monitor accurately identifies patients with a prior history of urothelial cancer (UC) whose Cxbladder Monitor score shows that they have a low probability of recurrent urothelial carcinoma. Cxbladder Monitor is designed to be used as the preferred adjunct test to cystoscopy in the management of patients for ongoing evaluation of recurrent bladder cancer.

**ABOUT Cxbladder Resolve** [www.cxbladder.com](http://www.cxbladder.com)

Cxbladder Resolve identifies those patients who are likely to have aggressive or more advanced bladder cancer. Cxbladder Resolve, when used as part of the primary evaluation of haematuria and/or in conjunction with other Cxbladder tests (Triage, Detect), is designed to assist clinicians by accurately identifying patients with a high probability of having high grade or late stage bladder cancer, for whom alternative or expedited treatment options may be warranted, or who can be prioritised for further investigation in high throughput settings.
