

NZX AND MEDIA RELEASE

RESULTS FOR THE SIX MONTHS TO 31 DECEMBER 2019

Core Geo revenue stable amid platform relaunch

- Group half year revenues^[1] fall by 15.3% versus PCP^[2] to \$2.1 million with stable core *Geo* platform revenue diluted by weaker *Geo for Sales* product revenue
- MRR^[3] from the core *Geo* platform (80% of revenues) is stable, in line with PCP (\$1.7m, -3.0%)
- Sales and marketing efforts for the new Geo platform show early encouraging results
- Revenue from the *Geo for Sales* product (20% of revenues) reduces by 42.8% versus PCP to \$0.4 million reflecting regulatory changes to the field sales market in Victoria
- EBITDA^[4] loss increases by 88.0% to \$1.2 million, reflecting lower revenues from *Geo for Sales* (\$0.3m) and increased investment in sales and marketing activity to launch the new *Geo* platform (\$0.5m)
- Statutory net loss improves by 64.4% to \$1.6 million versus PCP reflecting the impact of a prior-year write down of *Geo for Sales* intangible assets
- Underlying average monthly cash burn^[5] increases by 22% to \$0.2 million
- Cash at hand of \$0.2m with the undrawn convertible note facilities as at 31 December 2019 are anticipated to be adequate to fund operations through to Q4 of calendar 2020
- New Chief Executive Officer and Chief Revenue Officer appointed after balance date, with a clear expectation of improved revenue growth and financial performance

GEO (NZX.GEO) today announces financial results for the half year to 31 December 2019 showing the effects of the previously-flagged delay to the launch of its core Software-as-a-Service (SaaS) mobile workforce platform *Geo* and a poor performance in the half year by its *Geo for Sales* product.

However, the Company also reports early positive indications in customer recruitment to the new *Geo* platform following its launch in the half year period.

Group revenue for the six months to 31 December 2019 fell 15.3% to \$2.1 million from \$2.5 million in the PCP largely reflecting a fall in the revenue contribution from the *Geo for Sales* product. *Geo for Sales* subscription revenue fell 42.8% to \$0.4 million from \$0.7 million from PCP following the previously flagged changes to the field sales market in Victoria.

Subscription revenue for the core Geo platform remained broadly stable at \$1.7 million (-3% versus PCP).

EBITDA^[4] losses increased to \$1.2 million from \$0.6 million in PCP, reflecting the weaker *Geo for Sales* revenue and a \$0.5 million increase in sales and marketing activity to launch the new *Geo* platform.

Statutory net losses narrowed by 64.4% to \$1.6 million due to the prior year write down of *Geo for Sales* intangible assets.

 $^{[1] \ \ \}text{All figures are for the six-month period ending 31 December 2019 unless otherwise stated}.$

^[2] Prior Corresponding Period

^[3] Monthly Recurring subscription Revenues

^[4] Earnings before Interest, Tax, Depreciation and Amortisation

^[5] Underlying average monthly cash burn is actual Operating and Investing Cash Flows for the period noted, with government grant receipts then spread equally across all months in the period (rather than the actual annual receipt). This provides for easier comparability over periods and the directors and management believe that this measure provides useful information on the underlying performance of the company.

The Company ended the period with net cash of \$0.2 million. The convertible note facility of up to \$2.0 million to be provided by North Ridge Partners Pty Limited last year is anticipated to be adequate to fund operations through to the fourth quarter of the current calendar year.

As previously flagged, the Company is focussed on scaling its new Geo platform, which was launched during H1 with positive customer acceptance. This drove a ~100% increase in weekly average new Geo licences in Q4 CY19 over Q1 to Q3 levels, with annualised Geo licence growth reaching 13% during Q4^[6].

The Company's programme to increase Geo prices to market rates saw ARPUs^[7] for the period increase by a further 8.4% across the licence base to \$17.50. New Geo licences are now being onboarded at an average of 5 27.50. Licence numbers have stabilised at 16 ,000.

1. BASIS OF PREPARATION

These unaudited interim financial statements of Geo Limited (the "Company") and its subsidiaries ("Geo" or "the Group") included in the Preliminary announcement have been prepared in accordance with New Zealand Generally Accepted Accounting Practice (NZ GAAP) and comply with New Zealand Equivalent to International Accounting standard 34: *Interim Financial Reporting*.

The company is registered under the New Zealand Companies Act 1993 and listed on the New Zealand Stock Exchange (NZX: GEO) and is required to be treated as an FMC Reporting Entity under the Financial Market Conducts Act 2013 and Financial Reporting Act 2013.

The financial statements are presented in thousands of New Zealand dollars and are unaudited.

Theses consolidated interim financial statements were approved by the Board of Directors on 24 February 2020.

2. ACCOUNTING POLICIES

The unaudited interim financial statements do not include all the notes of the type normally included in an annual financial report. Accordingly, the interim financial statements should be read in conjunction with the Group's Annual Report for the year ended 30 June 2019.

The same accounting policies and methods of computation are followed in these interim financial statements as were applied in the preparation of the Group's financial statements for the year ended 30 June 2019 with the exception of NZ IFRS 16: Leases as set out below. Accounting policies are selected and applied in a manner that ensures that the resulting financial information satisfies the concepts of relevance and reliability, thereby ensuring that the substance of the underlying transactions or other events is reported.

a) Going Concern

These interim financial statements have been prepared using the going concern assumption.

Recent Financial Performance

For the six months ended 31 December 2019, subscription revenue was down 14.9% to \$2,118,000 (31 December 2018: \$2,490,000). The Company remains in the development phase of its operations, recording a net loss before tax of \$1,612,000 for the period ended 31 December 2019 (31 December 2018: \$4,522,000). The net loss reduced by 64.4% reflecting a prior period write down of intangible assets of \$3,200,000. The net cash outflow from operations for the period was \$457,000 (31 December 2018: \$584,000).

The financial performance in the reported half largely reflects the decline in *Geo for Sales* subscription revenues and the go-to-market testing stage for the recently launched updated *Geo* product. Directors expect financial performance to progressively improve in the future, and note the following factors that inform this assumption:

- the Geo product now represents >80% of the subscription revenues of the Company;
- the focus during the reported period on optimising marketing channels and customer acquisition journey for *Geo* delivered encouraging initial results and improving trends in Q2;
- the Company has recently appointed a Chief Revenue Officer with two decades of leadership experience in building and running digital marketing businesses who will have direct responsibility for optimising these processes; and
- the technology roadmap includes further feature rollouts that will continually improve the customer value proposition.

Capital Position

On 23 August 2019 Geo entered a convertible note agreement to obtain additional funding of \$1,500,000 (up to \$2,000,000 by agreement) via a convertible note. At 31 December 2019 Geo has drawn down \$332,000 with a further \$623,000 drawn down post reporting date.

Directors currently expect that the maximum funding available under the Convertible Note Facility, in conjunction with expected Research & Development cash grant receipts, will be sufficient to fund the business through to Q4 CY20.

The Company notes that it has historically funded its operations and the investment in building out its technology products via capital raisings conducted through the public equity markets. The Directors have cause to believe that equity market funding will continue to be available in the future.

The early stage of go-to-market with the new *Geo* product and likely reliance on future capital raisings gives rise to a material uncertainty which may cast doubt over the consolidated entity's ability to continue as a going concern. Having regard to the factors noted above that would lead to improved financial performance, Directors have concluded there are reasonable grounds to believe that the consolidated entity will be able to pay is debts as and when they become due. On this basis the financial report has been prepared on a going concern basis.

b) Application of New Accounting Standard – NZ IFRS 16: Leases

NZ IFRS 16 is effective for reporting period beginning on or after 1 January 2019. The Group applied NZ IFRS 16 from 1 July 2019. The standard introduces new requirements with respect to lease accounting. It presents significant changes to the lessee accounting by removing the distinction between operating and finance leases and requiring the recognition of a right-of-use asset and a lease liability at the lease commencement for all leases, except for short-term leases and leases of low value assets.

The impact of the adoption of NZ IFRS 16 on the Group's consolidated financial statements is described below.

Impact on Lessee Accounting

NZ IFRS 16 changes how the Group accounts for leases, previously classified as operating leases under NZ IAS 17, which were off-balance-sheet.

Applying NZ IFRS 16, for all leases Geo:

- recognises right-of-use assets and lease liabilities in the consolidated statement of financial position, initially
 measured at the present value of future lease payments;
- recognises depreciation of right-of-use assets and interest on lease liabilities in the consolidated statement of profit or loss and other comprehensive Income;
- separates the total amount of cash paid into a principal portion (presented within financing activities) and interest (presented within financing activities) in the consolidated statement of cash flows; and
- recognises short-term and low value leases in the consolidated statement of profit or loss and other comprehensive Income as rental costs.

Lease incentives (e.g. free rent period) are recognised as part of the measurement of the right-of-use assets and lease liabilities whereas under NZ IAS 17 they resulted in the recognition of a lease incentive liability, amortised as a reduction of rental expense on a straight-line basis.

Under NZ IFRS 16, right-of-use assets are tested for impairment in accordance with NZ IAS 36 Impairment of Assets. This replaces the previous requirement to recognise a provision for onerous lease contracts.

Recognition and measurement of Geo Group's leasing activities

Geo has adopted NZ IFRS 16 using the modified retrospective transition approach. Under this approach, the cumulative effect of initially applying NZ IFRS 16 is recognised as an adjustment to opening retained earnings.

Since the cumulative impact of the leases adjustment on opening retained earnings at 1 July 2019 was not material (\$2,000), Geo has not adjusted the opening retained earnings at the date of transition.

In applying NZ IFRS 16 for the first time, Geo has used the following practical expedients permitted by the standard:

- use of a single discount rate to leases with reasonably similar characteristics;
- use of hindsight in determining a lease term; and
- reliance on previous assessments on whether leases are onerous.
- Short-term leases and low value lease exemption as allowed under the standard

Under NZ IFRS 16, all qualifying leases are recognised as a right of use asset and a corresponding liability at the date at which the leased asset is available for use. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the consolidated statement of profit or loss and other comprehensive income over the lease period. The right-of-use asset is depreciated over the asset's lease term on a straight-line basis.

The lease payments are discounted using the market borrowing rate, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Geo has leases for property and office equipment. With the exception of short-term leases and leases of low-value underlying assets, each lease is reflected on the balance sheet as a right-of-use asset and a lease liability. The consolidated interim statement of comprehensive income includes operating expenses of \$2,000 which relates to short term leases or leases of low value.

The impact of adoption of NZ IFRS 16 on the Group's consolidated interim financial position is summarised in the table below:

| | 31 Dec 2019 Unaudited (\$000s) | 1 July 2019 Unaudited (\$000s) |

6. Segment Reporting

The directors of the company have chosen to organise the Group around differences in products and services. The Group operates two main products being Geo and Geo for Sales.

Geo is a mobile workforce management and costing solution that helps users create, schedule and assign jobs to field workers in real time. On site, workers can generate quotes, record job details and attach photos, signatures and files immediately. Once the jobs have been completed, workers can send invoices and organise fast payment. All customer records are available anywhere, at any time.

Geo for Sales is a field sales management solution, it was introduced to Geo's product suite in 2016 through the acquisition of Interface IT. It allows managers to allocate selling regions to staff, provides detailed geographic and demographic information and monitor sales performance in real time.

On 23 August 2019, Geo Limited entered into a facility agreement in the form of a convertible note of up to \$1,500,000 extendible to \$2,000,000 with its significant shareholder, North Ridge Partners Pty Limited to fund the company's working capital requirements.

The facility is unsecured with a three-year term, with six monthly conversion windows unless redeemed for cash or converted to equity sooner. Interest on the loan is 6% annualised, compounded daily and payable quarterly in arrears. If the Company completes an equity raise, the principal and any capitalised interest may be paid by way of the issue of shares at \$0.10 per share (subject to shareholder approval). At any point prior to the conversion date, Geo Limited may elect to repurchase the convertible notes at premium.

The company has recognised a loan facility fee and payable to North Ridge Partners Pty Ltd of \$16,000 as at balance date in respect of funding drawn.

14. Events after reporting period

The following events occurred after 31 December 2019:

- a) A further \$623,000 of convertible loan was drawn down post reporting date.
- b) On 1 January 2020, Geo appointed Scott Player as Chief Revenue Officer to lead Geo's sales and marketing team to drive revenue growth, planning and execution strategies.
- c) On 10 February 2020, Geo appointed Tim Molloy as the Chief Executive Officer (CEO) to replace Kylie O'Reilly who resigned on the same date.
- d) On 21 January 2020, Geo signed an agreement acknowledging New Zealand Markets Disciplinary Tribunal's (NZMDT) public censure, resulting in a determination that in NZX's view GEO did not comply with NZ IFRS and breached NZX Listing Rules 10.3.2, 10.4.2 and 10.5.1. The determination relates to company's decision not to impair its Geo for Sales unit until it announced its 2018 full year results in August 2018. While Geo have settled this matter with the NZDMT by agreeing to pay a financial penalty of \$40,000 and NZX's costs of \$30,000, it is to be noted that Geo has not admitted liability, and NZMDT has accepted this position

There were no other significant events after reporting date.
