

8 April 2020

## Amended Interim Release (no change to financial results)

Comvita Limited ("CVT") has been notified by the Ministry for Primary Industries (MPI) that they feel our recent Half Year Results release dated 27 February 2020 breached the Food Act 2014 and the Australia New Zealand Food Standards Code as companies are not permitted to use performance claims for products classed as food.

From Comvita's perspective, the release was never intended to be advertising, as such we are pleased to make the following amendment to the Half Year Results release.

These changes do not have any impact on the Half Year results released.

Revised Half Year Results release and Investor Presentation enclosed with the following amendments made.

- Core products Propolis and Mānuka honey (over 90% of revenue) have known anti-viral and immunity benefits Propolis and Olive Leaf Extract are known to support immunity. Propolis and Mānuka honey together make up over 90% of revenue.
- Where people are shopping, we are seeing strong demand for our Propolis products, which are known to support immunity, and Mānuka honey products which are known to support immunity. Propolis and Mānuka honey have known anti-viral, anti-microbial and immunity benefits and represent over 90% of our revenue.
- Comvita is pleased to be part of a solution to help consumers build support immunity and have been increasing inventory of Propolis products in-market to ensure we can capture elevated demand once shopper habits return to normal. Historically we have seen a significant uplift in sales in the winter months as consumers boost immunity following an outbreak of flu look to support their immunity with these products.

Ends.
