Z Energy weekly volume data

In response to requests for greater clarity around current market trading conditions Z Energy (NZX:ZEL ASX:ZEL) (Z) is providing weekly volume data during the Covid-19 pandemic.

Data includes retail volumes for the Z network including Foodstuffs, the Caltex network and for the domestic supply arrangements that Z supports. The data includes all fuel volumes for the prior week up to 11.59pm on Sunday.

Z is also disclosing commercial volume data, specifically Truckstop volumes including private Truckstops that Z supplies to our large commercial customers and Mini-Tankers. We are also providing Commercial Jet, Marine and 'Other' volumes.

Total volume for the week ended 31 May 2020 decreased by ~3% compared to the prior week, with commercial and other domestic supply volume decreasing offset by increases in retail volume. Volumes for the week are down ~30% (~20% excluding Jet) compared to pre-lockdown levels.⁵

All numbers in litres	⁽⁵⁾ Average weekly volume	Week ended 24 May 2020	Week ended 31 May 2020
Z Network (inc. Foodstuffs) ⁽¹⁾			
- Retail fuel (91 & 95)	15,185,786	11,833,557	12,898,019
- Diesel	6,366,233	5,565,377	5,724,705
Caltex Retail Fuel			
- Retail fuel (91 & 95)	6,477,111	5,049,247	5,464,804
- Diesel	2,756,245	2,370,783	2,380,596
Other domestic retail supply ⁽²⁾	11,566,013	9,568,902	7,962,787
Truckstops ⁽³⁾	14,707,396	14,260,818	13,505,738
Other commercial fuels			
- Jet	14,206,445	4,117,002	4,059,377
- Marine	3,769,609	1,704,370	975,326
- Other ⁽⁴⁾	604,124	476,889	333,792

(1) Z volumes will be retail fuel sales volumes including the Foodstuff network

(2) Domestic retail supply volume is the total bulk fuel delivered to distributor customers

(3) Truckstops include Z and Caltex branded Truckstops, private Truckstops and Mini-Tankers

(4) Other includes General Aviation and Lubricants

(5) Average weekly volume is the average volume for the four weeks preceding the Level 4 lockdown, specifically Monday 24 February to Sunday 22 March 2020
