

## PACIFIC EDGE APPOINTS MARK GREEN AS INDEPENDENT DIRECTOR

Cancer diagnostics company, Pacific Edge Limited (NZX: PEB) is pleased to welcome Mark Green as an Independent Director, effective from 10 May 2021.

Mark is an experienced corporate finance professional, with approximately 25 years of experience in the Australasian capital, corporate and financial markets. He was an Executive Director for Investment Banking at Goldman Sachs where he worked for nearly 20 years and has been involved in many large prominent New Zealand transactions including the IPOs of Meridian, Mighty River Power and Vector. Mark is a Director of a number of entities including being Chair of Astrolab VC Investment Committee and a Director of Mariposa Holdings (a large charitable organisation).

Mark said: "Pacific Edge is an exciting New Zealand company seeking to lead the way in cancer diagnostics. It is a company that has sought to protect its intellectual property and to add value not only to its shareholders and other corporate stakeholders but also to New Zealand. It is a privilege to be involved with such a company."

Chair of Pacific Edge, Chris Gallaher, commented: "We are very pleased to welcome Mark to the Board which continues the Board rejuvenation process that we have underway. He has significant capital markets and corporate finance experience gained over a long career with Goldman Sachs and has recently returned from Tokyo where his family was based for the last two and a half years.

Mark's appointment fills a skills need identified by the Board and he will be a strong contributor to both the Board and the company as we continue on our growth pathway."

Mark Green has been appointed by the current Pacific Edge Directors, as permitted under Pacific Edge's constitution. He will hold office until Pacific Edge's 2021 Annual Meeting at which time he will offer himself for election by shareholders. The Board has determined that Mark is an Independent Director.

### **OVERVIEW** [www.pacificedge.co.nz](http://www.pacificedge.co.nz) [www.pacificedgedx.com](http://www.pacificedgedx.com)

Pacific Edge Limited (NZX: PEB) is a New Zealand publicly listed, cancer diagnostic company specialising in the discovery and commercialisation of diagnostic and prognostic tests for better detection and management of cancer. Its Cxbladder suite of non-invasive, simple to use and accurate diagnostic tests provide actionable results, and better detection and management of urothelial cancer. The company is developing and commercialising its range of Cxbladder bladder cancer tests globally through its wholly owned central laboratories in New Zealand and the USA. The company's products have been tested and validated in international multi-centre clinical studies.

### **ABOUT Cxbladder Triage** [www.cxbladder.com](http://www.cxbladder.com)

Cxbladder Triage combines the power of the genomic biomarkers with additional phenotypic and clinical risk factors to accurately identify patients with haematuria who have a low probability of bladder cancer and may not require a more extensive urological evaluation. Cxbladder Triage is a tool for use by clinicians and physicians in primary evaluation of patients with haematuria and is intended to reduce the need for an expensive and invasive work-up in patients who have a low probability of having urothelial carcinoma.

**ABOUT Cxbladder Detect** [www.cxbladder.com](http://www.cxbladder.com)

Cxbladder Detect enables the non-invasive detection of bladder and other urinary tract cancers from a small volume of a patients' urine. Cxbladder Detect provides clinicians with a quick, cost effective and accurate measure of the presence of the cancer as an effective adjunct to cystoscopy.

**ABOUT Cxbladder Monitor** [www.cxbladder.com](http://www.cxbladder.com)

Cxbladder Monitor allows urologists to monitor bladder cancer patients for recurrence of the disease. Bladder cancer has a recurrence rate of 50-80% and requires life-long surveillance. Cxbladder Monitor accurately identifies patients with a prior history of urothelial cancer (UC) whose Cxbladder Monitor score shows that they have a low probability of recurrent urothelial carcinoma. Cxbladder Monitor is designed to be used as the preferred adjunct test to cystoscopy in the management of patients for ongoing evaluation of recurrent bladder cancer.

**ABOUT Cxbladder Resolve** [www.cxbladder.com](http://www.cxbladder.com)

Cxbladder Resolve identifies those patients who are likely to have aggressive or more advanced bladder cancer. Cxbladder Resolve, when used as part of the primary evaluation of haematuria and/or in conjunction with other Cxbladder tests (Triage, Detect), is designed to assist clinicians by accurately identifying patients with a high probability of having high grade or late stage bladder cancer, for whom alternative or expedited treatment options may be warranted, or who can be prioritised for further investigation in high throughput settings.
