

Results Presentation and Investor Discussion Pack

For the half year ended 31 December 2022

Important information

The material in this presentation is general background information about the Group and its activities current as at the date of the presentation, 15 February 2023. It is information given in summary form and does not purport to be complete. Information in this presentation is not intended to be relied upon as advice to investors or potential investors and does not take into account the investment objectives, financial situation or needs of any particular investor. Investors should consider these factors, and consult with their own legal, tax, business and/or financial advisors in connection with any investment decision.

This presentation contains certain forward-looking statements with respect to the financial condition, capital adequacy, operations and business of the Group and certain plans and objectives of the management of the Group. Such forward-looking statements speak only as at the date of this presentation and undue reliance should not be placed upon such statements. Although the Group currently believes the forward-looking statements have a reasonable basis, they are not certain and involve known and unknown risks and assumptions, many of which are beyond the control of the Group, which may cause actual results, conditions or circumstances to differ materially from those expressed or implied in such statements. Readers are cautioned not to place undue reliance on forward-looking statements particularly in light of current economic uncertainties, disruption caused by the ongoing impacts of the COVID-19 pandemic in addition to the conflict in Ukraine and geo-political uncertainty.

Forward-looking statements can generally be identified by the use of forward-looking words such as “may”, “will”, “would”, “could”, “expect”, “intend”, “plan”, “aim”, “estimate”, “target”, “anticipate”, “believe”, “continue”, “objectives”, “outlook”, “guidance” or other similar words, and include statements regarding the Group’s intent, belief or current expectations with respect to the Group’s business and operations, market conditions, results of operations and financial condition, capital adequacy and risk management. To the maximum extent permitted by law, responsibility for the accuracy or completeness of any forward-looking statements, whether as a result of new information, future events or results or otherwise, is disclaimed. The Group is under no obligation to update any of the forward-looking statements contained within this presentation, subject to applicable disclosure requirements.

The material in this presentation does not constitute an offer to sell, or a solicitation of an offer to buy, any securities in the United States or in any other jurisdiction in which such an offer would be illegal. Any securities of the Group to be offered and sold have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (U.S. Securities Act), or the securities laws of any state or other jurisdiction of the United States. Accordingly, any securities of the Group may not be offered or sold, directly or indirectly, in the United States unless they have been registered under the U.S. Securities Act or are offered and sold pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and any other applicable U.S. state securities laws.

Readers should also be aware that certain financial data in this presentation may be considered “non-GAAP financial measures” under Regulation G of the U.S. Securities and Exchange Act of 1934, as amended, and “non-IFRS financial measures” under Regulatory Guide 230 ‘disclosing non-IFRS financial information’ published by ASIC, including Net Profit After Tax (“statutory basis”), Net Profit After Tax (“cash basis”), earnings per share (“cash basis”), dividend payout ratio (“statutory basis”), dividend payout ratio (“cash basis”), dividend cover (“statutory basis”) and dividend cover (“cash basis”). The disclosure of such non-GAAP/IFRS financial measures in the manner included in this presentation may not be permissible in a registration statement under the U.S. Securities Act. Although the Group believes that these non-GAAP/IFRS financial measures provide a useful means through which to examine the underlying performance of the business, such non-GAAP/IFRS financial measures do not have a standardised meaning prescribed by Australian Accounting Standards or International Financial Reporting Standards (IFRS) and therefore may not be comparable to similarly titled measures presented by other entities. They should be considered as supplements to the financial statement measures that have been presented in accordance with the Australian Accounting Standards or IFRS and not as a replacement or alternative for them. Readers are cautioned not to place undue reliance on any such measures.

This presentation includes credit ratings. A credit rating is not a recommendation to buy, sell or hold any securities and may be changed at any time by the applicable credit ratings agency. Each credit rating should be evaluated independently of any other credit rating. Credit ratings are for distribution only to a person (a) who is not a “retail client” within the meaning of section 761G of the Corporations Act 2001 (Cth) and is also a sophisticated investor, professional investor or other investor in respect of whom disclosure is not required under Part 6D.2 or 7.9 of the Corporations Act, and (b) who is otherwise permitted to receive credit ratings in accordance with applicable law in any jurisdiction in which the person may be located. Anyone who is not such a person is not entitled to receive this presentation and anyone who receives this presentation must not distribute it to any person who is not entitled to receive it.

The release of this announcement was authorised by the Continuous Disclosure Committee.

Statutory vs Cash NPAT¹

Statutory NPAT up 10%,
broadly in line with Cash NPAT growth

\$m	1H22	2H22	1H23
Statutory NPAT – continuing operations	4,741	4,932	5,216
Non-cash items:			
– Transaction costs and gain on disposals ²	11	(41)	51
– Hedging & IFRS volatility ³	(16)	124	12
Cash NPAT – continuing operations	4,746	4,849	5,153

• Includes CommInsure General Insurance, Commonwealth Financial Planning, and other previously announced divestments and closures

• Primarily related to gains and (losses) on economic hedges³ from interest rate and FX volatility

1. Presented on a continuing operations basis. 2. Includes gains and losses net of transaction costs associated with the disposal of previously announced divestments.
3. Includes unrealised accounting gains and losses arising from the application of "AASB 139 Financial Instruments: Recognition and Measurement".

1H23 result ¹

Cash NPAT up 9%,
Operating performance up 18%

	1H23 \$m	1H23 vs 1H22	1H23 vs 2H22
Operating income ²	13,593	12.3%	12.7%
Operating expenses ²	5,773	5.2%	4.0%
Operating performance	7,820	18.2%	17.7%
Loan impairment expense	511	Large	Large
Cash NPAT	5,153	8.6%	6.3%

1. Presented on a continuing operations basis. Comparative information has been restated to conform to presentation in the current period. 2. 2H22 excludes one-off items (Operating income: \$516m gain on sale of ~10% HZB shareholding. Operating expenses: \$389m of accelerated software amortisation).

Operating income¹

Margin recovery and volume growth, partly offset by lower other operating income

1. Presented on a continuing operations basis. Comparative information has been restated to conform to presentation in the current period. 2. Excluding liquids. 3. Includes NZ and other business loans. 4. Excluding CMPF.

Group margin

In line with expectations – benefits from rising rates partly offset by competitive pressures

- 2H23 considerations**
- Intensity of home loan and deposit price competition
 - Rate of customer deposit switching
 - Higher wholesale funding costs and BRP
 - Terminal cash rate, replicating portfolio & equity hedge

1. Average non-lending interest earning assets held by the Group for liquidity purposes.

Operating expenses¹

Inflation driving cost growth, with underlying uplifts offset by productivity savings

1. Presented on a continuing operations basis. Comparative information has been restated to conform to presentation in the current period. 2. Cost to income is on a headline basis. 3. Includes associated increases in on-costs and revaluation of leave provisions, impact from superannuation guarantee contribution uplift and increases in payroll tax rates. 4. Excludes remediation costs.

Credit risk

Further improvements in key credit quality indicators – impairment expense normalising

Loan impairment expense

Loan loss rate (bpts)¹

	1H22	2H22	1H23
Consumer	0	(15)	11
Corporate	(7)	16	13
Total	(2)	(7)	11

Arrears²

90+ days

TIA

\$bn

1. Loan impairment expense as a percentage of average Gross Loans and Acceptances (GLAA) (bpts) annualised. 2. Group consumer arrears including New Zealand. 3. Excludes Reverse Mortgage, Commonwealth Portfolio Loan and Residential Mortgage Group loans.

Provisioning¹

Increased provisions, buffer to central scenario maintained

1. The Group uses four alternative macro-economic scenarios to reflect a range of possible future outcomes in estimating the ECL for significant portfolios, scenarios are updated based on changes in both the macroeconomic and geopolitical environment. 2. Assuming 100% weighting holding all assumptions including forward looking adjustments constant and includes individually assessed provisions.

3. Central Scenario is based on Group's internal economic forecasts and market consensus forecasts as well as other assumptions used in business planning and forecasting.

4. The downside scenario contemplates the potential impact of possible, but less likely, adverse macroeconomic conditions, resulting from significant inflationary pressures exacerbated by supply chain disruptions, shortages of goods and labour, and heightened energy prices compounded by geopolitical risks.

Funding

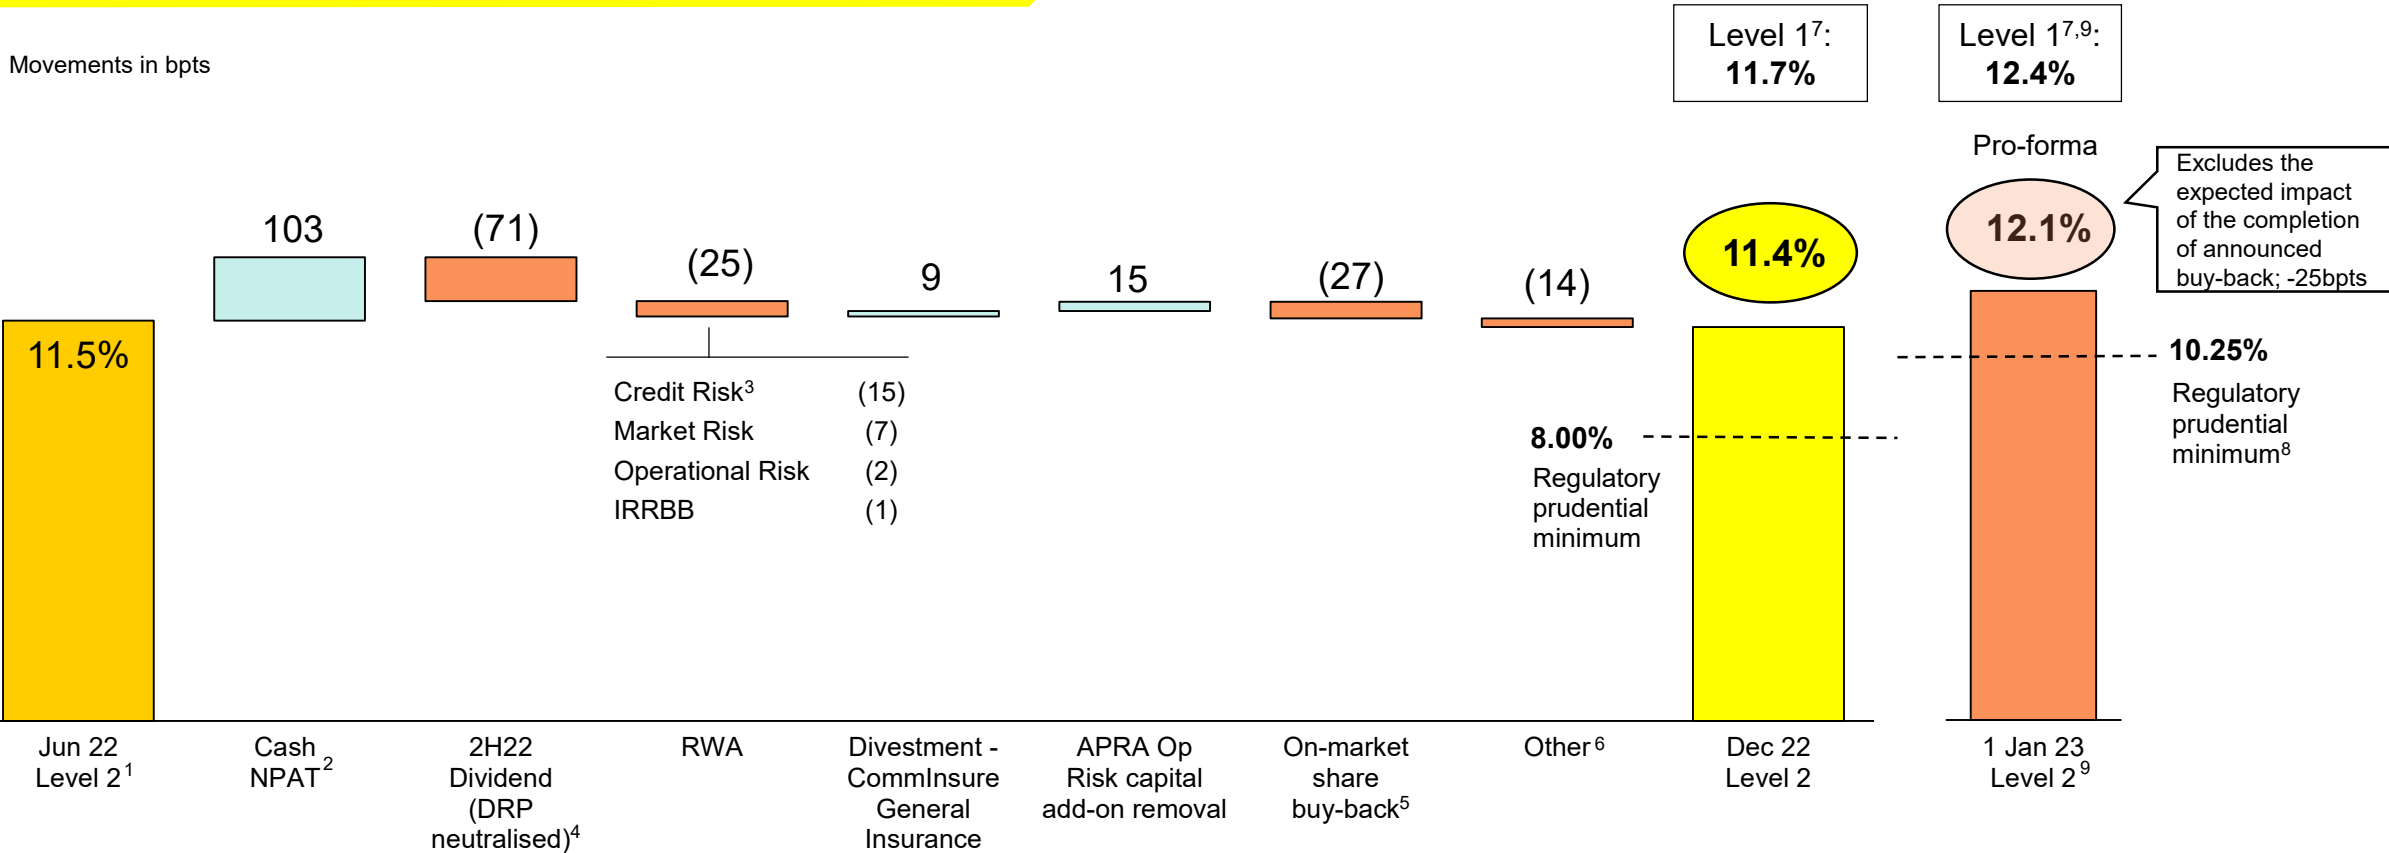

Conservative funding position maintained as financial conditions tighten

1. Long-term wholesale funding balances including entire Term Funding Facility. 2. Represents the Weighted Average Maturity (WAM) of outstanding long-term wholesale debt with a residual maturity greater than 12 months as at reporting date. 3. Figures include 'other short-term liabilities'. 4. Quarterly average. 5. LCR numerator excludes the size of CBA's available Committed Liquidity Facility (CLF). 6. NSFR numerator (Available Stable Funding) excludes the size of CBA's TFF drawdowns. Denominator (Required Stable Funding) increases weighting for CLF and TFF collateral by 55%, such that it receives the 65% RSF weighting applicable to unencumbered residential mortgages.

Capital

Strong capital position maintained ahead of new APRA capital framework effective 1 Jan 23 – pro-forma CET1 ratio of 12.1%

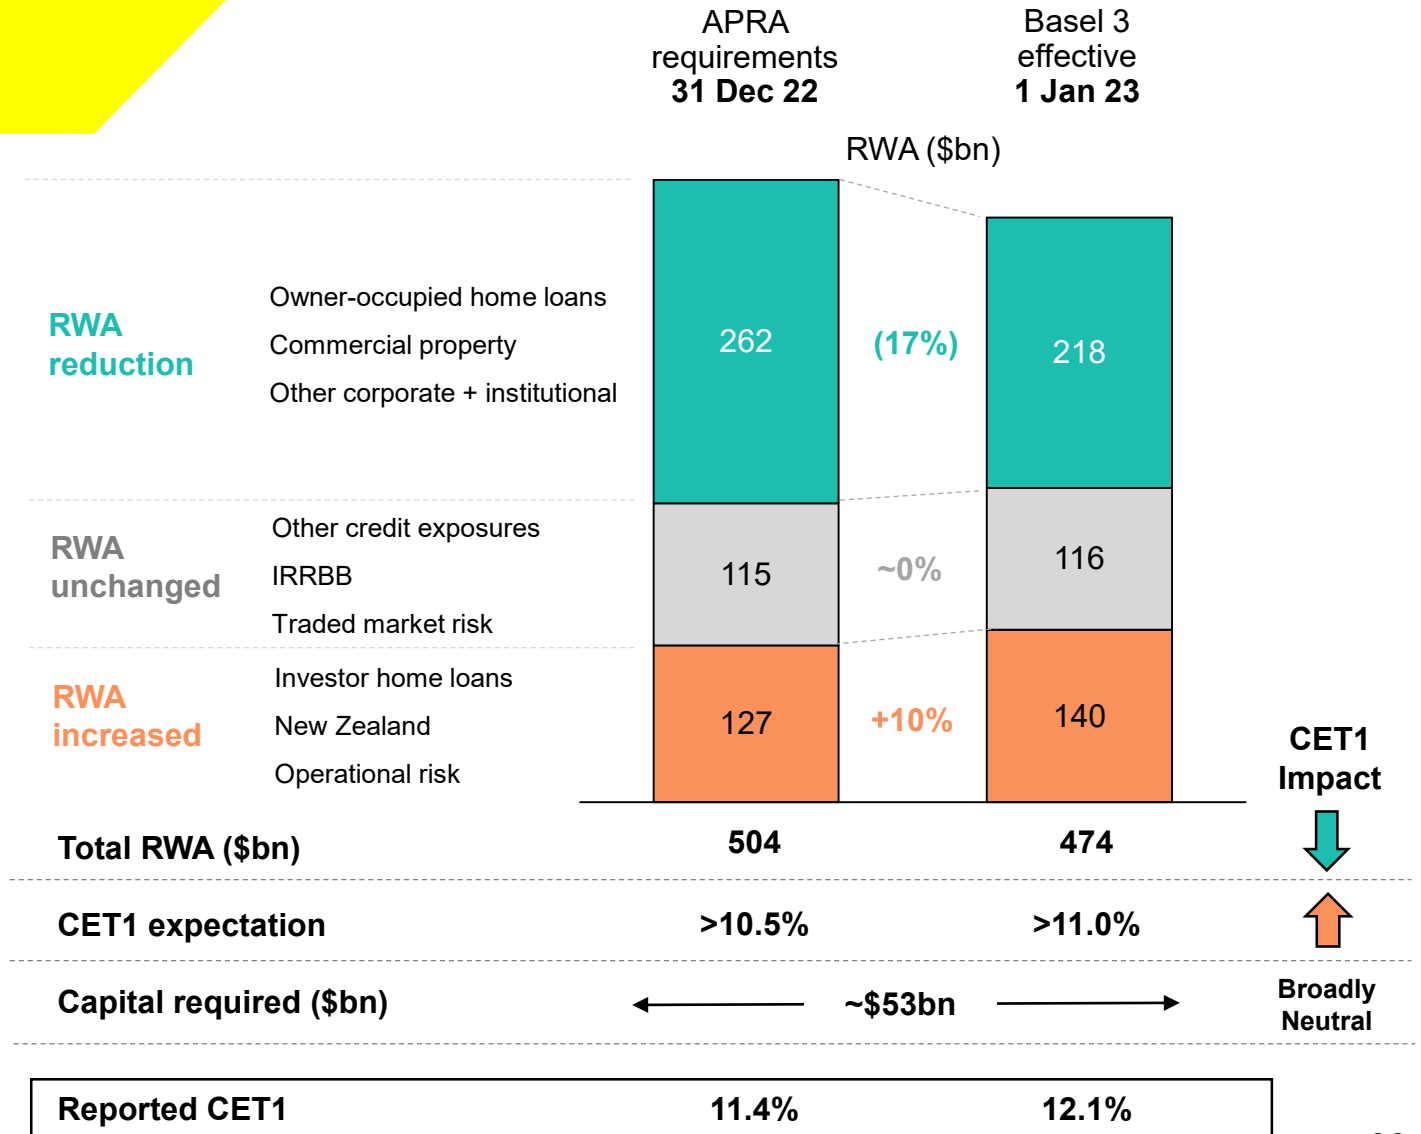

1. Level 2 is the consolidated banking group including banking subsidiaries such as ASB Bank, PT Bank Commonwealth (Indonesia) and CBA Europe N.V. 2. Excludes net equity accounted profits/losses from associates as they are capital neutral with offsetting changes in regulatory capital deductions. 3. Excludes impact of FX movements, which is included in 'Other'. 4. 2022 final dividend included the on-market purchase of shares in respect of the DRP. 5. \$1.8 billion of the previously announced \$2 billion on-market share buy-back program has been completed as at 31 Dec 2022 (17,977,434 shares acquired at an average price of \$100.01). 6. Includes the impact of intangibles, FX impact on Credit RWA, equity accounted profit/losses from associates, movements in reserves and other regulatory adjustments. 7. Level 1 is the CBA parent bank, offshore branches and extended licence entities approved by APRA. 8. Effective 1 Jan 23 - 10.25%, inclusive of 1% default countercyclical capital buffer which may be varied by APRA in the range of 0% - 3.5%. 9. Represents 1 Jan 23 pro-forma CET1 ratio under the revised framework.

Capital framework reform

Revisions to prudential framework effective
1 January 2023

- Required capital broadly unchanged
- Greater risk discrimination in home loans
- Closer alignment of non-retail commercial property to international standards
- Close alignment to RBNZ rules for New Zealand bank regulated subsidiaries
- Standardised calculation of operational risk based on revenue
- CBA expects to operate with a post-dividend CET1 ratio of >11.0%, except in circumstances of unexpected capital volatility

Dividends

Long term sustainable returns

- Interim dividend of \$2.10, 20% increase on 1H22 dividend, driven by strong earnings and reduction in share count from share buy-backs
- Payout ratio for the half of 69% (~70% normalising for long run loan loss rates)
- DRP no discount and expected to be fully neutralised
- The Bank will continue to target a full year payout ratio of 70-80% Cash NPAT and an interim payout ratio of ~70% of Cash NPAT to deliver predictable and sustainable returns to shareholders

Sustainable returns

Dividend per share (cents)

1. Cash NPAT inclusive of discontinued operations. 2. Cash NPAT and dividend payout ratio normalised to reflect long run loan loss rates.

Economic outlook

Downside risks to Australian economy building from a strong starting position

- Solid fundamentals for Australian economy
 - Low unemployment, low underemployment, high participation rates
 - Strong exports and non-mining investment
 - Net overseas migration returning quickly
- Australian economy moderating due to higher interest rates
 - Falling home prices and savings ratio
 - Cost of living pressures – electricity, gas, groceries
 - Resilient consumer spend, slowing in pockets – expected to weaken
- Downside risk building in Australia due to higher interest rates
 - Further cash rate increases expected – lagged impact in flow through
 - Economic growth and consumption to slow
 - Uncertain global outlook – Australia relatively well positioned

Summary

Strong result driven by customer engagement, strength of franchise

- Strong result reflects core franchise strength
- Focus on customer relationships and engagement
- Consistent, disciplined execution
- Capital and balance sheet strength, conservative settings
- Supporting our customers through rising rates, higher cost of living

Investing in technology and capability

Modernised systems, digitised end-to-end

- Driving efficiencies while maintaining security through the automation and standardisation of APIs¹
- Using AI to improve customer personalisation and risk management processes (fraud, scams, KYC)
- Continuing to simplify our technology estate, leading to a 4% reduction in business applications in 1H23

World-class engineering

- Continued hiring of engineer expertise across Australia with an expected ~1,100 hires in 2023 (480 in 1H23)
- Launched Melbourne and Brisbane Technology Hubs to attract domestic talent, following our Adelaide Hub
- Creating a world-class engineering environment with improved tools, education and innovation opportunities

Operational excellence

- Delivering world-class data capability to create personal, contextual and real-time experiences for customers
- Protecting our customers by enhancing our security posture in response to evolving cyber threats
- Implemented Behavioural Security on NetBank to protect customers against scams and fraud
- Implemented in-app security alerts to flag with customers transactions or logins that appear suspicious

Group margin – 12 months

In line with expectations – benefits from rising rates partly offset by ongoing competitive pressures

- 2H23 considerations**
- Intensity of home loan and deposit price competition
 - Rate of customer deposit switching
 - Higher wholesale funding costs and BRP
 - Terminal cash rate, replicating portfolio & equity hedge

1. Average non-lending interest earning assets held by the Group for liquidity purposes.

Deposit switching

Group margin

Increased hedge earnings from higher rates

Replicated Portfolio (RP) & Equity Hedge

- In 1H23, RP and equity hedge earnings benefitted from higher rates
- Earnings outlook continues to improve with higher exit tractor rates

	Dec 22 Balance \$bn	1H23 Avg. Tractor ¹	Exit Tractor ¹ Rate	Investment term
Domestic Equity Hedge	53	1.30%	1.50%	3 years
Deposit Hedge	108	1.48%	1.63%	5 years

Liquidity & Basis Risk

Liquidity

- Every additional \$10bn of liquid assets is expected to reduce Group NIM by ~2bpts

Basis Risk

- Increased sensitivity to basis risk in 1H23 with mix reversion back to variable rate home loans and term deposits driving higher exposure to basis risk
- Dec 22 average BBSW/OIS spread = 2bpts
- As at Dec 22², every 11bpts = ~1bpt of Group NIM, this ratio will reduce as exposure to basis risk increases

1. Tractor is the moving average hedge rate on equity and rate insensitive deposits. Exit Tractor rate represents average rate for Dec 2022. 2. Based on average exposure to Basis Risk in December 2022.

Margins by division¹

Benefits from rising rates partly offset by ongoing competitive pressures

RBS²

Improved deposit margins from rising rate environment, partly offset by lower home loan margins reflecting increased competition and impact of cash and swap rates on pricing

BB

Improved deposit margins from rising rate environment and favourable portfolio mix, partly offset by lower lending margins

IB&M

Higher funding costs in the Fixed Income, Commodities and Institutional Lending portfolios and unfavourable assets mix, partly offset by higher earnings on equity

NZ (ASB)³

Higher deposit margins from rising rate environment partly offset by unfavourable home lending margins

1. Comparative information has been restated to conform to presentation in the current period. 2. RBS excluding General Insurance. 3. NIM is ASB Bank only and calculated in NZD.

Other operating income¹

Impacted by divestments and lower equity accounted profits, partly offset by increased trading income

1. Presented on a continuing operations basis and 2H22 excludes one-off item of \$516m relating to gain on sale of ~10% shareholding in Bank of Hangzhou. Comparative information has been restated to conform to presentation in the current period. 2. Includes funds management and insurance income.

Sequential operating income¹

Margin recovery, volume growth and three additional days, partly offset by lower other operating income

1. Presented on a continuing operations basis excluding one-off item of \$516m relating to gain on sale of ~10% shareholding in Bank of Hangzhou. Comparative information has been restated to conform to presentation in the current period. 2. Excluding liquids. Headline AIEA growth is +5.2% incl. liquids. 3. Includes NZ and other business loans. 4. Excluding CMPF.

Sequential operating expenses¹

Inflation and seasonality driving cost growth, underlying uplifts offset by productivity savings

1. Presented on a continuing operations basis excluding the impact of the \$389m accelerated software amortisation in 2H22. Headline operating expenses -2.8% including this item. 2. Includes associated increases in on-costs and revaluation of leave provisions. Also includes impact from superannuation guarantee contribution uplift and increases in payroll tax rates. 3. Excludes remediation costs.

1. Relates to remediation programs in domestic divisions. 2. Includes historical Aligned Advice remediation primarily associated with ongoing service fees charged where no service was provided. 3. Includes an estimate of customer refunds (including interest) relating to advice quality, the Consumer Credit Insurance products, certain superannuation and other products. 4. Includes Retail and Business Banking, package fees, interest and fee remediation. 5. As at 31 December 2022, the Group had materially completed all case assessments. Consequently, an increase/(decrease) in the refund rate of all remaining cases by 1% would result in an increase/(decrease) in the provision (including interest) by approximately \$3 million (30 June 2022: \$20 million).

Provisions¹

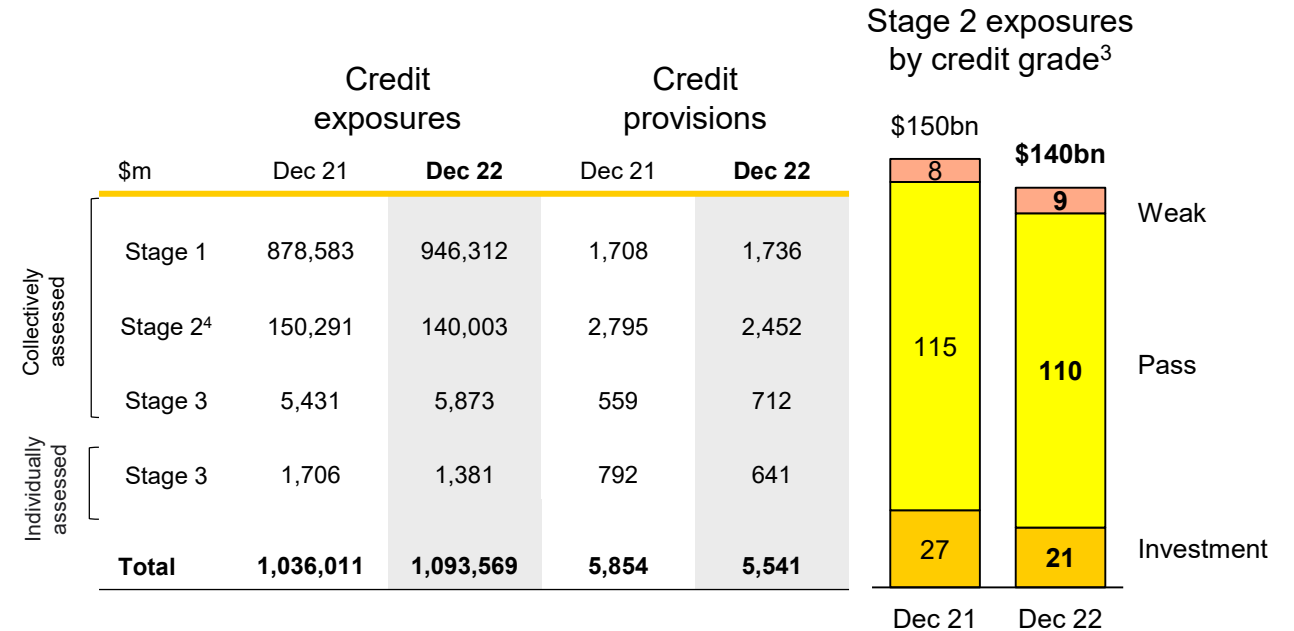

Provision coverage of 1.38%

Provision coverage²/CRWA

Provisions by stage

1. AASB 9 classifies loans into stages; Stage 1 – Performing, Stage 2 – Performing but significantly increased credit risk, Stage 3 – Non-performing. Performing relates to Stage 1 and Stage 2. Non-performing relates to Stage 3. Stage 2 is defined based on a significant deterioration in internal credit risk ratings, as well as other indicators such as arrears. Assessment of Stage 2 includes the impact of forward-looking adjustments for emerging risk. 2. Excludes estimated impairment provisions for derivatives at fair value. 3. Segmentation of loans in retail and risk rated portfolios is based on the mapping of a counterparty's internally assessed PD to S&P Global ratings (refer Pillar 3 Note 6.4 table 9b), reflecting a counterparty's ability to meet their credit obligations. 4. The assessment of significant increase in credit risk includes the impact of forward looking multiple economic scenarios in addition to adjustments for emerging risks at an industry, geographic location or particular portfolio segment level, which are calculated by stressing an exposure's internal credit rating grade at the reporting date. This accounts for approximately 59% of Stage 2 exposures as at 31 December 2022 (30 June 2022 : 62%, 31 December 2021: 65%).

Home loan impairments

Impaired home loans stable in 1H23

Overview

- Relatively stable impaired home loans year to date with small increase in ASB impairments (+\$46m) offset by improvement in Australian home loan impairments (-\$39m)

Process for identification of impairments¹

- Impairment assessments are carried out at 90 days past due for not well secured loans or at observed events e.g. bankruptcy
- Impairment is triggered where refreshed security valuation is less than the loan balance by $\geq \$1$
- Impairment assessment takes into account cross-collateralisation
- Impaired accounts 90+ days past due are included in 90+ arrears reporting
- Where the shortfall is greater than or equal to \$20,000 an Individually Assessed Provision (IAP) is raised

1. CBA including Bankwest. Excludes ASB.

Sector focus – commercial property

Portfolio weighted to NSW – impaired exposures low

- Exposure diversified across sectors and by counterparty, with the top 20 counterparties representing 14% of the portfolio
- Net movement in investment grade was predominantly driven by internal property model recalibration
- Impaired exposures remain low at 0.03% of portfolio
- Retail exposure and origination criteria primarily represented by assets with non-discretionary retailers as anchor tenants
- Office exposures weighted toward Premium/A' and B' Grade office property with credit metrics better than the Bank's minimum requirements
- Apartment development¹ exposures are 55% below the last peak (December 2016)
- Construction completion on apartment developments being proactively managed. Whilst delays have been seen on a number of projects beyond original completion timeframes this is not impacting pre-sale sunset clauses in those projects
- Ongoing projects have not been impacted by recent insolvencies in the construction industry. The level of exposure to Land Bank and pre-development sites is immaterial at < 1% of exposure to the sector
- Maintaining close portfolio oversight and actively managing origination criteria

Group exposure

Profile

1. Apartment developments ≥ \$20m.

Sector focus – transport & storage

Conditions remain challenging

Airlines & aircraft lessors

- Strengthening demand following the opening up of domestic and international travel is supporting recovery of airlines across the industry. Portfolio amortisation has been partially offset by select transactions to strong counterparties or flag carriers
- Over 70% of our airline portfolio exposure is to strong counterparties; state-owned, flag carriers, investment grade or well secured. Largest exposure is to state-owned counterparties

Aircraft operating leases

- The Group recognises ~\$1.0bn of aircraft operating leases on balance sheet. In FY23 a net reversal of impairments of \$4.2m has been recognised as aircraft valuations stabilise following lease restructures/new leases for specific assets owned

Airports

- Our exposure to domestic and overseas airports continued to be well supported by strong sponsors
- There has been a noticeable improvement in passenger traffic following the removal of quarantine and lockdown measures and most airports in the Bank's portfolio are approaching 80% of pre-COVID-19 passenger levels. This has in turn improved cash flow and credit metrics across the airport sector
- 76% of our airport exposures are in Australia/NZ, 22% in UK, and 2% in the US

Group exposure¹

Air transport and services¹

1. Excludes aircraft recognised on the Group's balance sheet and leased out to airlines.

Sector focus – entertainment, leisure & tourism

Improving trends evident despite uncertainty

- Diverse industry with many sub-sectors with distinct challenges
- Pubs, clubs and restaurants are experiencing positive trends in performance nearing pre-Omicron impacted levels
- Accommodation benefitted from heightened domestic travel and improving business demand despite subdued inbound international tourism
- Recent trading remains mixed with many operators across all sectors reporting challenges with labour; availability, retention and absenteeism, coupled with rising input costs
- Stronger operators increased prices, with little consumer reaction, while others have varied menus and/or portion sizes to preserve margins
- Portfolio growth is weighted toward well diversified pub groups in NSW
- Cost of living pressures and increasing interest rates are expected to dampen demand but we are yet to see this across the portfolio in any material way
- Household Spending Intentions – Entertainment index fell 4.4% Nov 22 and 2.4% for the 12 months to Nov 22

Group exposure

Profile

1. Fully secured: includes performing home loans and other exposures where the ratio of exposure to the estimated value of collateral (LVR) is less than or equal to 100%; partially secured: Includes defaulted home loans and other exposures where the LVR exceeds 100% but is not more than 250%; unsecured: includes personal loans, credit cards and other exposures where the LVR exceeds 250%.

Sector focus – retail trade

Household spending remains high despite cost of living pressures

- CBA's data shows household spending remains elevated, though trajectory is expected to ease with softening consumer sentiment as interest rates rise and inflation take effect
- Household Spending Intentions (HSI) Retail index rose by 6.4% in Nov 22 and is up 4.8% for the 12 months to Nov 22
- Higher inflation and tightening monetary policy will require many households to moderate discretionary spending
- There also continues to be the risk of overstocked inventory positions of non-perishable goods as a hangover from COVID-19 logistics disruptions which saw some retailers stockpile
- The portfolio remains weighted to non-discretionary sub-sectors

Group exposure

Profile

Sector focus – construction

Sector remains challenged

- Pressures relating to supply chains and materials cost inflation have eased, however site productivity continues to be hindered by labour constraints and adverse weather. This has caused instances of larger than expected losses for FY22 and downward revisions to forecasts for FY23
- Given the prevalence of fixed price contracts, increased costs are not easily passed on. Contract negotiation and management is key, with some customers also diversifying supply lines to reduce single supplier and country risk
- Close management of the portfolio and appetite settings designed to moderate the origination of core debt has contributed to low migration to TIAs. However, we have seen an increase in the number of TIAs in FY23 and continue to watch the portfolio very closely

Group exposure

Profile

Sector focus – mining, oil & gas

Managing sub-sector exposures in line with strategy, stable portfolio performance

- Exposures of \$7.5bn (0.5% of Group TCE); overall exposure remained largely unchanged with further reductions in oil & gas facilities
- Stable performance over the past 6 months:
 - Investment grade stable at 68% of portfolio
 - Diversified by commodity/customer/region
 - Focus on quality, low cost projects with strong fundamentals and sponsors
- Oil & gas extraction is the largest sub-sector (43% of total), 85% investment grade
- Impaired level down to 0.7%

Group exposure

Group exposure by sector

1. 'Oil & gas extraction' includes businesses that are predominantly involved in oil and gas production as well as LNG terminals. Group exposure is based on the ANZSIC classification.

2. Comparatives have been restated to reflect the ANZSIC code reclassification (from metals mining to coal mining) of an existing client during the period. Please see our Environmental and Social Framework www.commbank.com.au/policies and our 2022 Climate Report <https://www.commbank.com.au/ClimateReport2022> to learn more about our sector-level commitments and 2030 sector-level targets.

3. Includes all exposure with black coal mining as the ANZSIC classification. Includes 100% of CBA's exposure to diversified miners that derive the largest proportion of their earnings from black coal mining. Total includes non-black coal mining related exposures within these diversified miners.

CET1 Divestments +248bpts

1. Represents partial divestments. CBA's retained shareholdings are ~5.6% of HZB, 45% of CFS and ~42% of Lendi (merged with AHL). 2. Represents 1 Jan 23 pro-forma CET1 ratio under the revised framework, excluding the expected impact of the completion of announced buy-back.

Capital

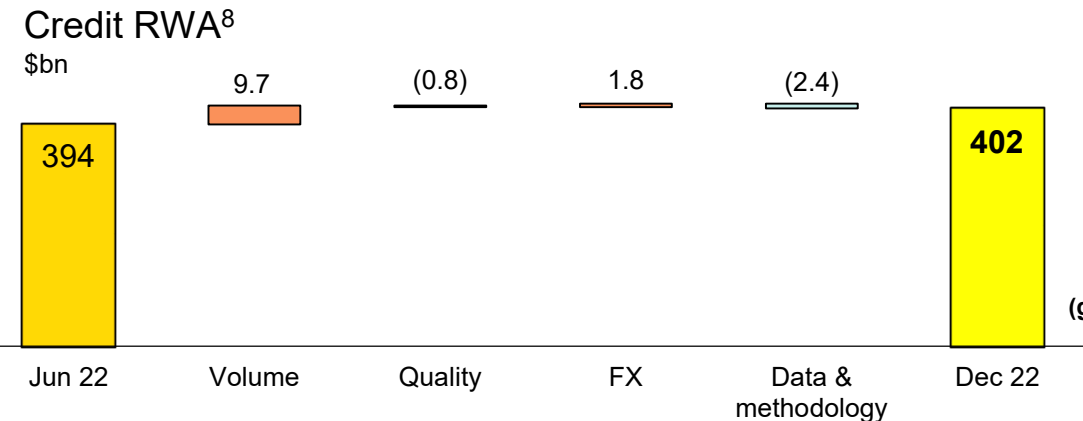

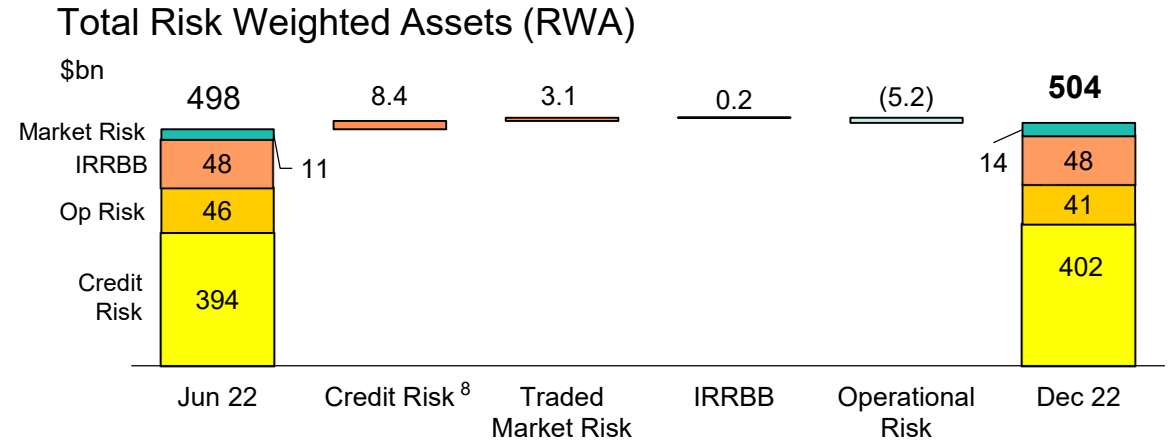

Lower share count supports higher shareholder returns and dividends compared to peers

1. Historical share count data sourced from Bloomberg, using the last trading day in September of each year. 2. CBA and Peers shares on issue as at 31 December 2022. 3. Source: Bloomberg. 4. Reflects final dividend for peers and interim for CBA. 5. Net tangible assets per share as reported. FY00 – FY04 net tangible assets have not been normalised for the impact of the transition to AIFRS in 2005. 6. Peer average is the average of our major bank peers.

Capital drivers

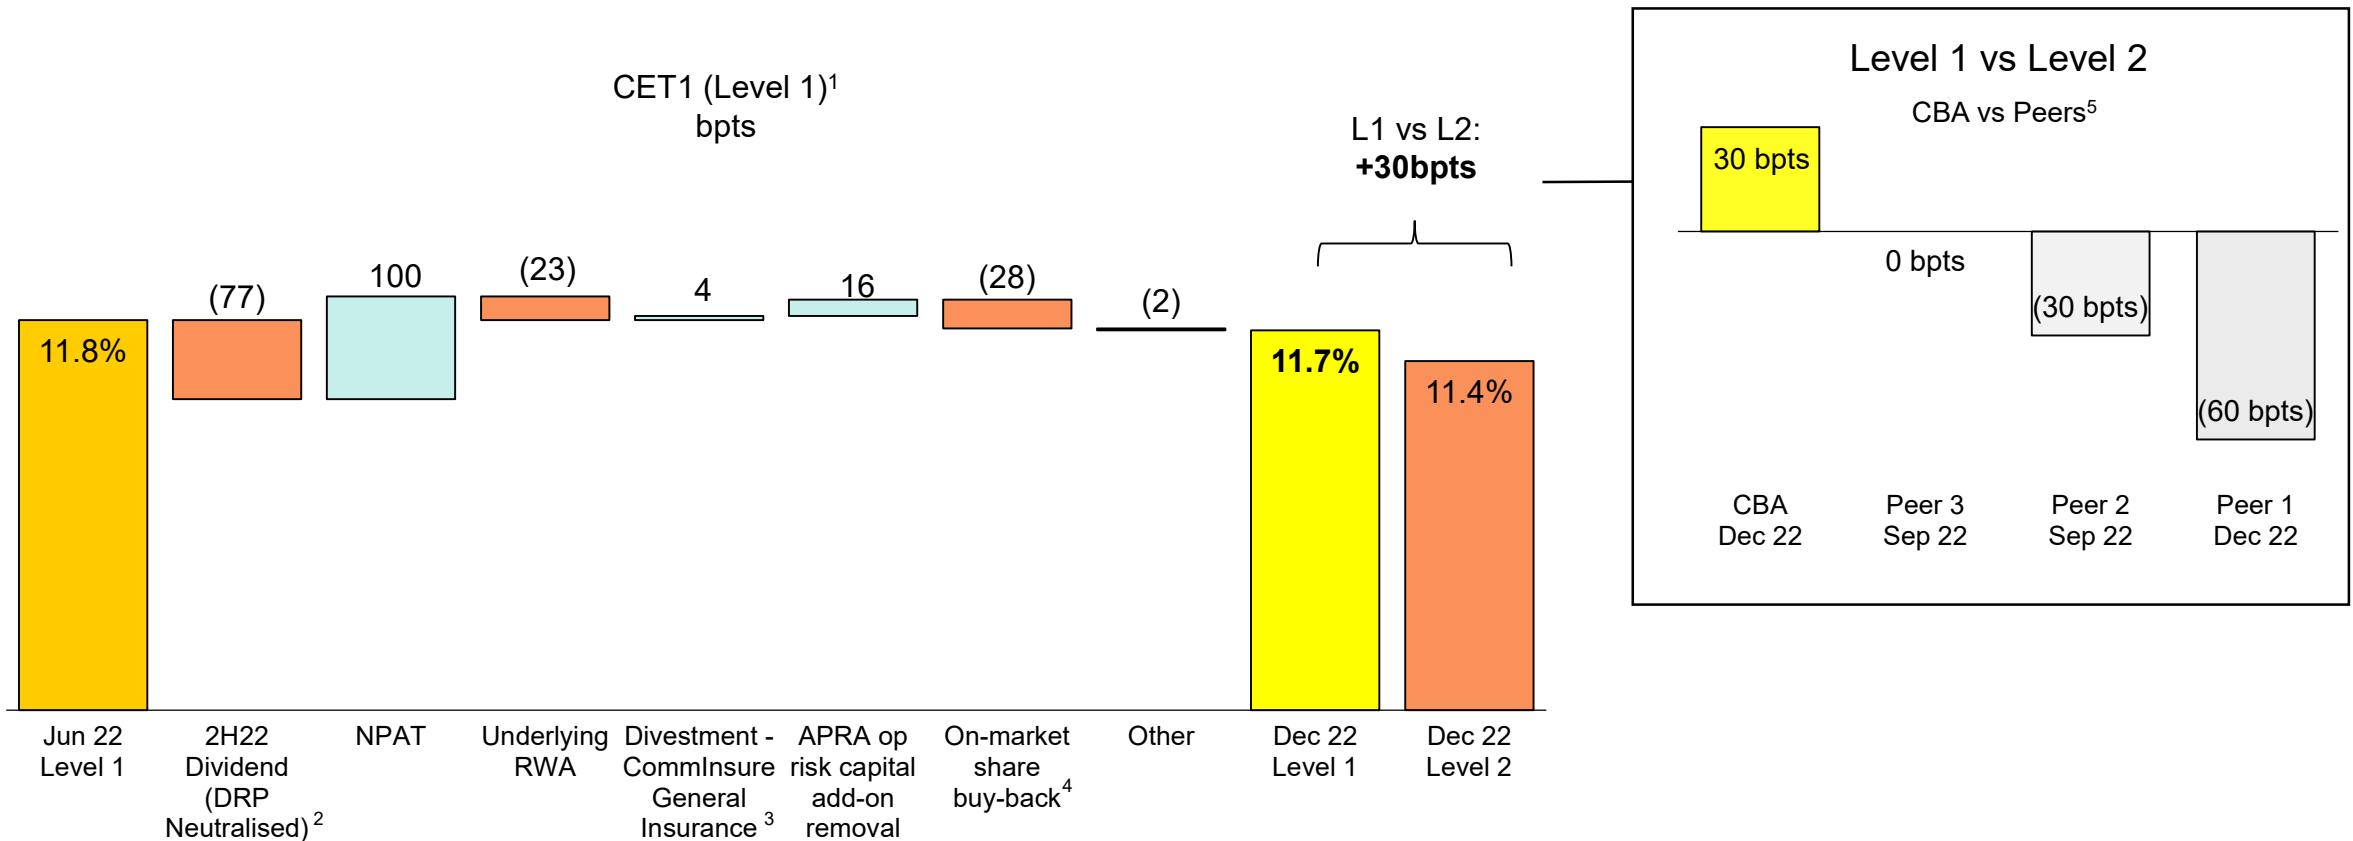

Risk weighted assets (RWA) higher this half – driven by higher Credit & Market RWA growth

1. Level 2 is the consolidated banking group including banking subsidiaries such as ASB Bank, PT Bank Commonwealth (Indonesia) and CBA Europe N.V. 2. 2022 final dividend included the on-market purchase of shares in respect of the DRP. 3. Excludes net equity accounted profits/losses from associates as they are capital neutral with offsetting changes in regulatory capital deductions. 4. Excludes FX movements on Credit RWA - which is included in 'Other'. 5. Excludes the impacts of the APRA Op risk capital add-on removal. 6. \$1.8 billion of the previously announced \$2 billion on-market share buy-back program has been completed as at 31 Dec 2022 (17,977,434 shares acquired at an average price of \$100.01). 7. Includes the impact of intangibles, FX impact on credit RWA, equity accounted profit/losses from associates, movements in reserves and other regulatory adjustments. 8. Total RWA: credit risk includes FX. Due to rounding, numbers presented in this section may not sum precisely to the totals provided. 9. Basis points contribution to APRA CET1 ratio.

CET1 (Level 1)

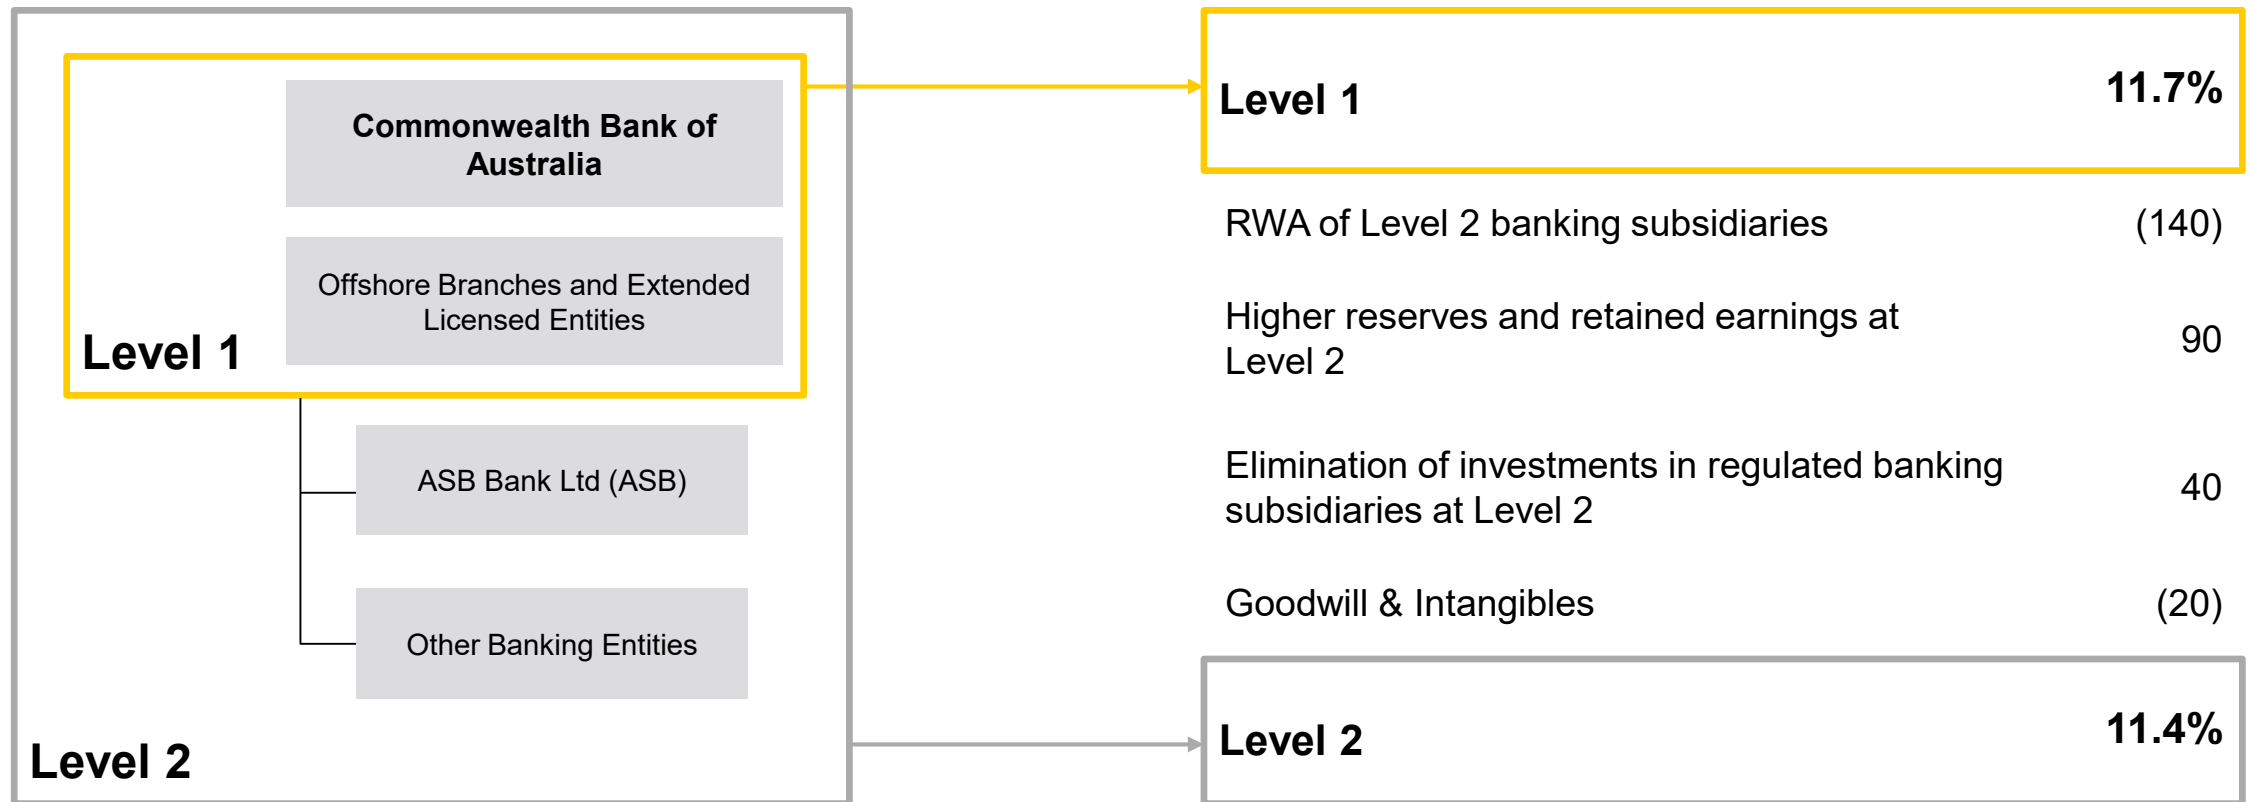

CET1 Level 1 of 11.7%, 30bpts above Level 2

1. Level 1 is the CBA parent bank, offshore branches, and extended license entities approved by APRA. 2. Included the on-market purchase of shares in respect of the DRP. 3. Divestment of CommInsure General Insurance (4bpts), completed on 30 September 2022. 4. \$1.8 billion of the previously announced \$2 billion on-market share buy-back program has been completed as at 31 December 2022 (17,977,434 shares acquired at an average price of \$100.01). 5. CBA & Peer 1 CET1 ratio as at Dec 22, Peers 2 & 3 CET1 ratio as at September 22.

1. CET1 expected loss (EL) adjustment that represents the shortfall between the calculated EL and Eligible Provisions (EP) with respect to credit portfolios which are subject to the Basel advanced capital IRB approach. The adjustment is assessed separately for both defaulted and non-defaulted exposures. Where there is an excess of EL over EP in either assessments, the difference must be deducted from CET1. For non-defaulted exposures where the EL is lower than the EP, this may be included in Tier 2 capital up to a maximum of 0.6% of total credit RWAs. 2. Includes transfer from collective provision to specific provisions (December 22: \$544m; June 22: \$578m; December 21: \$495m). 3. Specific provisions includes partial write offs (December 22: \$189m; June 22: \$211m; December 21: \$356m). 4. Shortfall of eligible provisions for both defaulted and non-defaulted exposures are subject to deduction from CET1 capital. 5. Excess of eligible provisions for non-defaulted exposures are included in Tier 2 capital, subject to a maximum of 0.6% of credit RWA under the IRB approach.

Glossary

Cash Profit, Capital & Other

Cash Profit	The Profit Announcement (PA) discloses the net profit after tax on both a statutory and cash basis. The statutory basis is prepared in accordance with the Corporations Act 2001 (Cth) and the Australian Accounting Standards, which comply with International Financial Reporting Standards (IFRS). The cash basis is used by management to present a clear view of the Bank's operating results. It is not a measure based on cash accounting or cash flows. The items excluded from cash profit, such as hedging and IFRS volatility and losses or gains on acquisition, disposal, closure and demerger of businesses are calculated consistently with the prior year and prior half disclosures and do not discriminate between positive and negative adjustments. A list of items excluded from cash profit is provided on page 3 of the Group's 31 December 2022 PA, which can be accessed at our website: www.commbank.com.au/results
Credit Value Adjustment (CVA)	The market value of the counterparty credit risk on the derivative portfolio, calculated as the difference between the risk-free portfolio value and the true portfolio value that takes into account the possibility of a counterparty's default.
Derivative Valuation Adjustments (XVA)	A number of different valuation adjustments are made to the value of derivative contracts to reflect the additional costs or benefits in holding these contracts. The material valuation adjustments included within the CBA result are CVA and FVA.
Funding Valuation Adjustment (FVA)	The expected funding cost or benefit over the life of the uncollateralised derivative portfolio.
Internationally Comparable Capital	The Internationally Comparable CET1 ratio is an estimate of the Group's CET1 ratio calculated using rules comparable with our global peers. The analysis aligns with the APRA study entitled "International capital comparison study" (13 July 2015).
Leverage Ratio	Tier 1 Capital divided by Total Exposures, expressed as a percentage. Total exposures is the sum of On Balance Sheet items, derivatives, securities financing transactions (SFTs), and Off Balance Sheet items, net of any Tier 1 regulatory deductions that are already included in these items.
Risk Weighted Assets (RWA)	The value of the Group's On and Off Balance Sheet assets are adjusted by risk weights calculated according to various APRA prudential standards. For more information, refer to the APRA website.

Customer Metrics

Main Financial Institution (MFI) Share - Consumer	MFI Share measures the proportion of Banking and Finance MFI Customers that nominated each bank as their MFI. MFI definition: In the Roy Morgan Single Source Survey MFI is a customer determined response where one institution is nominated as the primary financial institution they deal with (when considering all financial products they hold). Peers include ANZ Group, NAB Group and Westpac Group (including St George Group). CBA Group includes Bankwest. Source: Roy Morgan Single Source survey conducted by Roy Morgan, Australian population 14+ (12 month averages to December 2022), excl. unable to identify MFI. Roy Morgan has re-calibrated the results from April 2020 to March 2021 to take into account methodology changes since COVID-19. This has resulted in small differences to some of the previously published figures.
MFI Share - Business	DBM Business MFI Share. Data on a 6 month roll weighted to the Australian business population. MFI Customer Share is the proportion of all businesses with any business banking, that nominate the FI as their main financial institution. Share based on grouped brands as follows: CBA Group includes CBA and Bankwest, ANZ Group includes ANZ, NAB Group includes NAB, Westpac Group includes Westpac, St George, BankSA and Bank of Melbourne.

Funding & Risk

Committed Liquidity Facility (CLF)	The RBA provided the CLF to participating ADIs under the LCR, as a shortfall in Commonwealth government and semi-government securities existed in Australia. ADIs could draw under the CLF in a liquidity crisis against qualifying securities pledged to the RBA. In September 2021, APRA announced a sector-wide phased reduction in usage of the CLF to zero by the end of 2022.
Corporate Troublesome	Corporate Troublesome includes exposures where customers are experiencing financial difficulties which, if they persist, could result in losses of principal or interest, and exposures where repayments are 90 days or more past due and the value of security is sufficient to recover all amounts due.
High Quality Liquid Assets (HQLA)	As defined by APRA in Australian Prudential Standard APS210: Liquidity. Qualifying HQLA includes cash, government and semi-government securities, and RBNZ eligible securities.
Liquidity Coverage Ratio (LCR)	The LCR is the first quantitative liquidity measure that is part of the Basel III reforms. It was implemented by APRA in Australia on 1 Jan 2015. It requires Australian ADIs to hold sufficient liquid assets to meet 30 day net cash outflows projected under an APRA-prescribed stress scenario.
Net Stable Funding Ratio (NSFR)	The NSFR is the second quantitative liquidity measure of the Basel III reforms, in addition to the LCR. It was implemented by APRA in Australia on 1 Jan 2018. It requires Australian ADIs to fund their assets with sufficient stable funding to reduce funding risk over a one year horizon. APRA prescribed factors are used to determine the stable funding requirement of assets and the stability of funding.
Total Committed Exposure (TCE)	Total Committed Exposure is defined as the balance outstanding and undrawn components of committed facility limits. It is calculated before collateralisation and excludes settlement exposures.
Troublesome and Impaired Assets (TIA)	Corporate troublesome and Group gross impaired exposures.
