Stock Exchange Announcement Statement of Annual Results TEMPLETON EMERGING MARKETS INVESTMENT TRUST PLC ("TEMIT" or "the Company") Legal Entity Identifier 5493002NMTB70RZBXO96

Templeton Emerging Markets Investment Trust plc

Annual Report and Accounts to 31 March 2023

Company Overview

Launched in June 1989, Templeton Emerging Markets Investment Trust plc ("TEMIT" or the "Company") is an investment trust that invests principally in emerging markets companies with the aim of delivering capital growth to shareholders over the long term. While the majority of the Company's shareholders are based in the UK, shares are traded on both the London and New Zealand stock exchanges.

TEMIT has a diversified portfolio of around 80 high quality companies, actively selected for their long-term growth potential and sustainable earnings, and with due regard to Environmental, Social and Governance ("ESG") attributes. TEMIT's research-driven investment approach and strong long-term performance has helped it to grow to be the largest emerging markets investment trust in the UK, with assets of £2.0 billion as at 31 March 2023. From its launch to 31 March 2023, TEMIT's net asset value ("NAV") total return was +3,845.7% compared to the benchmark total return of +1,707.2%.

The Company is governed by a Board of Directors who are committed to ensuring that shareholders' best interests, considering the wider community of stakeholders, are at the forefront of all decisions. Under the guidance of the Chairman, the Board of Directors is responsible for the overall strategy of the Company and monitoring its performance.

TEMIT at a glance

- (a) A glossary of alternative performance measures is included in the full Annual Report.
- (b) Source: MSCI. The Company's benchmark is the MSCI Emerging Markets Index, with net dividends reinvested.
- An annual ordinary dividend of 5.00 pence per share for the year ended 31 March 2023 has been proposed. This comprises the interim dividend of 2.00 pence per share paid by the Company on 27 January 2023 and the proposed final dividend of 3.00 pence per share.

Strategic Report

The Directors present the Strategic Report for the year ended 31 March 2023, which incorporates the Chairman's Statement, and has been prepared in accordance with the Companies Act 2006.

The aim of the Strategic Report is to provide shareholders with the ability to assess how the Directors have performed in their duty to promote the success of the Company for shareholders' collective benefit, and having regard for the interests of all stakeholders, by bringing together in one place key information about the Company's strategy, the risks it faces, how it is performing and the outlook.

Financial Summary

2022-2023

Chairman's Statement

Market overview and investment performance

Our financial year started shortly after the Russian invasion of Ukraine and I would like to repeat the sympathy of the Board and of all of those involved with the management of TEMIT for all victims of the Russian invasion of Ukraine. Market conditions were challenging throughout the year. The war caused a surge in commodity prices. Rapid increases in prices generally result in pressure from individuals to increase their pay, with a risk that inflation then becomes entrenched. Governments and central banks around the world have sought to contain inflation by raising interest rates but need simultaneously to avoid choking economic growth. This is a difficult balance to achieve and only time will tell whether their actions have been successful.

In recent years China has become an important engine for world economic growth as well as a key element of the emerging markets investment universe. For a large part of our financial year there were concerns over the Chinese economy due to the government's continued pursuit of lockdowns to control the spread of COVID-19 as well as its interventions in private companies and political tension with the rest of the world, particularly the United States. The approach to COVID-19 was suddenly and unexpectedly reversed and this, along with more positive regulatory developments, helped to spur the recovery in the country and in other emerging markets. In other countries the higher level of inflation has caused a variety of issues, although some companies have benefited from higher commodity prices, most notably in the energy sector.

The year under review was a volatile period for TEMIT's shares. The second half of our financial year was better than the first; at the half year stage we reported a decline of -8.3% whereas in the second half returns turned around and we ended the financial year with a small positive return over 12 months of +0.8% (a), outperforming the benchmark index which produced a total return of -4.5% (a).

(a) See Glossary of Alternative Performance Measures included in the full Annual Report.

Revenue and dividend

Net revenue earnings increased markedly to 5.72 pence per share. At the half year stage we announced an increase in the interim dividend from 1.00 pence to 2.00 pence per share. The Board is proposing a final dividend of 3.00 pence per share which, if approved by shareholders at the Annual General Meeting ("AGM") will result in a total dividend for the year of 5.00 pence per share. This will be an increase in the total dividend of 32% compared with the previous financial year. I have regularly emphasised that the primary focus of our Investment Manager is on capital growth. Nevertheless, it is encouraging to see such a strong increase in revenues.

Borrowing

TEMIT has fixed borrowing of £100 million, and a revolving credit facility under which up to £120 million in flexible debt may be drawn down. The revolving facility matured on 31 January 2023 and was extended for a further year. The Investment Manager continues to take a cautious view on borrowing in difficult markets. As at the financial year end, net of cash in the portfolio, TEMIT was not geared.

Share rating

Our managers remain very active in promoting TEMIT's shares to existing and potential investors via a variety of traditional and online channels. As I mentioned in the half yearly report, the Board was delighted that TEMIT won the award in the "Emerging Markets Equity - Active" category in the prestigious AJ Bell Fund and Investment Trust Awards in September 2022 for the third consecutive year. The award is made on the basis of voting by private investors from a shortlist of open-ended funds, ETFs and investment trusts drawn up by investment experts.

The challenging market conditions naturally led to pressure on the discount. The Board remains consistent in its view that share buybacks are a key tool in managing the balance between supply and demand for the shares. In total over the year, £29.2 million was spent on share buybacks and, as all buybacks were at a discount to the prevailing NAV, this resulted in an increase in the NAV of 0.23% to the benefit of remaining shareholders.

31 March 2023 marked the end of the fourth year of the assessment period for the Conditional Tender Offer, under which the Board undertook to arrange a tender for up to 25% of the Company's shares if the NAV total return underperforms that of the benchmark index over the five years to 31 March 2024. After four years, the return was ahead of the benchmark index over the measurement period by approximately 4 percentage points, but we are aware that returns, both absolute and relative to the benchmark, can be volatile. The Conditional Tender Offer is described in detail in the full Annual Report.

Environmental, Social and Governance

Throughout TEMIT's history, governance of investee companies has been a key part of the investment process and in recent years there has been a growing focus on sustainability. A description of the Investment Manager's process is included in the full Annual Report, along with a summary of the approach to Environmental, Social and Governance matters. Last year the Investment Manager published the first dedicated Stewardship Report for TEMIT and this received favourable comments from shareholders and industry experts. The second report was published simultaneously with this Annual Report and is available to download at www.temit.co.uk.

The Board

As previously announced, Beatrice Hollond retired from the Board at last year's AGM in July 2022 and Simon Jeffreys assumed the position of Senior Independent Director.

Abigail Rotheroe was appointed as a Director with effect from 1 November 2022. Abigail has over 20 years of investment experience, most recently as the Investment Director at Snowball Impact Management, a sustainable and impact-focused asset manager. Previously Abigail managed retail and institutional Asia Pacific portfolios in Hong Kong and London for Schroders, HSBC Asset Management and Columbia Threadneedle Investments. She is a CFA Charterholder and has experience in manager selection, sustainability, and impact measurement.

I will complete nine years as a director on 1 August 2024, shortly after next year's AGM. My colleagues have started the process of identifying the next Chairman of the Company and expect to make an announcement later this year.

Annual General Meeting

I am pleased to be able to invite all shareholders to attend our AGM on 14 July 2023 at Barber-Surgeons' Hall in London. We look forward to welcoming shareholders at the meeting.

Whether you intend to attend the meeting in person or not, you are strongly encouraged to submit your votes on the AGM resolutions in advance of the meeting. Submitting votes by proxy does not preclude you attending the meeting or changing your vote if you attend the AGM.

If you have any questions, please send these by email to temitcosec@franklintempleton.com or via www.temit.co.uk./investor/contact-us in advance of the meeting. You can also use these contact details should you have a question at any other time. Any questions that we receive will be considered and responses will be provided on our website www.temit.co.uk.

Outlook

Recent evidence suggests that the problems stemming from the pandemic and then the Russian invasion of Ukraine have started to abate and attention has returned to the prospects for growth. Nevertheless, difficulties remain particularly in the developed world which is challenged by high levels of inflation and debt. The reopening of the Chinese economy is a positive development but equally important are efforts to stimulate growth in several parts of the emerging world.

Our Investment Manager expects a recovery in earnings in the second half of 2023 and this is likely to be helped by efforts by governments to stimulate demand. The long-term case for investing in emerging markets is founded on a higher level of economic growth supported by young populations, increasing domestic consumption as the middle-class population expands rapidly and some world-leading companies. Key to investment performance will be identifying the companies best able to capitalise on these factors. Our Investment Manager points to a wide variety of opportunities around the world and, despite the obvious challenges, we continue to look to the long term with some optimism.

Paul Manduca

Chairman

9 June 2023

The Investment Manager

TEMIT's Investment Management is delegated to Templeton Asset Management Ltd ("TAML") and Franklin Templeton Investment Management Limited ("FTIML"). Portfolio managers from TAML and FTIML form part of the wider Franklin Templeton Emerging Markets Equity group ("FTEME"). FTEME have managed the portfolio since TEMIT's inception and are pioneers in emerging markets equity investing. They bring more than 30 years of experience and local knowledge from over 70 investment professionals, based in 13 countries around the world.

The team has a collaborative investment process where all analysts and portfolio managers work together to contribute to investment returns. They meet regularly, both formally and informally, to debate and exchange ideas, investment themes and enrich their understanding of the markets by drawing on local insights to build a global perspective and context to their thinking. They also benefit from the broader resources available throughout Franklin Templeton.

The portfolio managers for TEMIT, Chetan Sehgal (lead) and Andrew Ness are senior executives in FTEME.

Portfolio Managers

Chetan Sehgal, CFA

Chetan is the lead portfolio manager of TEMIT and is based in Singapore.

As part of his broader responsibilities within FTEME, Chetan is also the director of portfolio management. In this capacity, he is responsible for the overall Global Emerging Markets strategies, providing guidance and thought leadership, coordinating appropriate resources and coverage, and leveraging the group's expertise to add value across products within the strategies.

Chetan joined Franklin Templeton in 1995 from Credit Rating Information Services of India Ltd, where he was a senior analyst.

Chetan holds a B.E. Mechanical (Hons) from the University of Bombay and a postgraduate diploma in Management from the Indian Institute of Management in Bangalore, where he specialised in finance and business policy and graduated as an institute scholar. Chetan speaks English and Hindi and is a Chartered Financial Analyst ("CFA") Charterholder.

Andrew Ness, ASIP

Andrew Ness is a portfolio manager of TEMIT and is based in Edinburgh.

Prior to joining Franklin Templeton in September 2018, Andrew was a portfolio manager at Martin Currie. He began his career at Murray Johnstone in 1994 and worked with Deutsche Asset Management in both London and New York before joining Scottish Widows Investment Partnership in 2007.

Andrew holds a B.A. (Hons) in Economics and an MSc in Business Economics from the University of Strathclyde in the UK. He is an Associate Member of the UK Society of Investment Professionals and a member of the CFA Institute.

The Investment Manager's Report

Review of performance

Emerging markets ("EMs") as measured by our benchmark index declined over the 12 months under review. For a large part of the year, rising inflationary pressures and resultant rate hikes, the ongoing Russian invasion of Ukraine and supply chain challenges depressed consumer and investor sentiment. However, several bright spots emerged towards the end of the year under review-signs of receding inflation, policy support to spur domestic consumption and China's pivot away from zero-COVID restored investor confidence and helped to cap losses. The MSCI Emerging Markets Index returned -4.5% in the 12-month period under review, whilst TEMIT delivered a net asset value total return of +0.8% (all figures are total return in sterling). Full details of TEMIT's performance can be found in the full Annual Report.

By region, EMs in Asia fared relatively better than their peers in Latin America and Europe, Middle East and Africa. However, all three regions witnessed declines in some of their underlying markets. Stocks in China contributed to regional gains after the dismantling of the country's zero-COVID policy and measures to spur the economy, such as support for the property sector. Weakening global demand for consumer electronics weighed on technology-heavy markets in South Korea and Taiwan, and the Indian market corrected from its strong performance previously. China's gains at the end of 2022, together with tourism-reliant Thailand (which benefited from optimism from a rebound in tourism), helped to support the emerging Asia region. Latin America was dragged down by the emergence of political concerns which weighed on equity prices. Emerging Europe lost ground due to the fallout from Russia's invasion of Ukraine and the dislocations in regional energy markets. Towards the end of the year, share prices in the Middle East-which had been through a boom-declined as oil prices moderated and liquidity conditions tightened in some of the markets. As at 31 March 2023 TEMIT held three Russian securities which remained fair-valued at zero in view of restrictions around trading these shares and a lack of any price discovery mechanism to provide indications of residual value. We continue to monitor the developments and will look to realise value in the best interests of shareholders, whenever possible.

China was TEMIT's largest market exposure, although the portfolio remained underweight relative to the benchmark. China gained almost 2% in sterling terms over the 12-month period. Regional lockdowns related to the country's zero-COVID policy, prolonged regulatory uncertainty and a reeling real estate market dominated headlines for a large part of the year and capped gains. However, Chinese equities rebounded sharply near the end of the period as the country reopened, and the government reiterated its growth priorities. The Chinese government has clearly defined its agenda in terms of support of common prosperity and the curtailment of monopolies. With this, we see the internet sector now adjusting to the new normal. China's pursuit of higher quality growth with a focus on technology advancement and self-sufficiency will likely shift investment and growth to newer emerging technologies. We expect the opening up of the Chinese economy to spur local and overseas demand as there has been a significant increase in household savings accumulated during the pandemic.

TEMIT's second-largest market position was in **South Korea**, where the portfolio was overweight versus the benchmark. South Korean equities declined by more than 8% during the reporting period, as the technology-heavy market continued to struggle throughout the year on weakening demand for technology products, including consumer electronics which had seen excess demand during the pandemic. Although a downtrend in the global technology sector weighed heavily, expectations of a trough and hopes of a visible end in the destocking cycle started to manifest in March 2023. South Korea has some of the most competitive and innovative companies which span several sectors including semiconductors, electric battery, automobile and renewable energy industries which augur well for future growth.

The **Taiwanese** market ended the reporting period with a loss of more than 7%. The technology-heavy and export-oriented market experienced a lower demand for its technology exports and a fallout from the demand shortfall in many consumer electronic industries. TEMIT's slight overweight allocation to Taiwan was largely attributable to exposure to the island's semiconductor industry and TEMIT's largest portfolio holding, which is in Taiwan Semiconductor Manufacturing ("TSMC"), the world's leading manufacturer of advanced chips.

India was TEMIT's fourth-largest exposure at the end of March 2023. Indian equities fell by 6% over the 12-month period as global volatility, rising inflation and soaring energy prices diminished investor sentiment for most of 2022. India also had a weak start to 2023 over concerns of a consumption slowdown and the impact of the decline in the share prices of different companies in the Adani Group following a negative research report; none of these were held in TEMIT. However, India has the ability to rely on domestic consumption and its massive increase in infrastructure capital expenditure bodes well for further development of the economy. It has also benefited from the diversification of global supply chains away from China alongside a pick-up in manufacturing investments. In the long-term, the diversification of India's power sources into renewables should eventually ease pressure from imported energy and inflation.

Equities in **Brazil** fell 13% over the reporting period. Brazilian equities were volatile due to political and economic uncertainty after its presidential elections in October 2022. Former president Luiz Inacio Lula da Silva won the election by a narrow margin, beating the incumbent president Jair Bolsonaro. In the immediate aftermath of the election, widespread protests that lasted for more than two months plagued the country. A delay in announcing the composition of the new cabinet also caused uncertainty. This backdrop of domestic unrest and post-election uncertainty on future government policy hung over positive developments such as an improvement in economic growth and softening inflation.

Investment strategy, portfolio changes and performance attribution

The following sections show how different investment factors (stocks, sectors and geographies) accounted for TEMIT's performance over the period. We continue to emphasise our investment process that selects companies based on their individual attributes and ability to generate risk-adjusted returns for investors, rather than taking a high-level view of sectors, countries or geographic regions to determine our investment allocations.

Our investment style is centred on finding companies with sustainable earnings power and whose shares trade at a discount relative to their intrinsic worth and to other investment opportunities in the market. We also pay close attention to risks.

We continue to utilise our research-based and active approach to help us to find companies which have high standards of corporate governance, respect their shareholders and also allow us to understand the local intricacies that may determine consumer trends and habits. Utilising our large team of analysts, we aim to maintain close contact with the board and senior management of existing and potential investments and believe in engaging constructively with our investee companies.

All of these factors require us to conduct detailed analyses of potential returns versus risks with a time horizon of typically five years or more.

Our well-resourced, locally-based teams remain a key competitive advantage and it has certainly been helpful having teams on the ground particularly in the benchmark heavyweight countries of Brazil, China and India. This local presence allows us to understand business models, competitive dynamics and supply chain issues. We also obtain insights into regulatory conversations and management capabilities, which are factored into our analysis. We view our locally-based teams, which are armed with vast knowledge of the respective countries' macroeconomic issues and views on the ground as vital sources of input into the investment process.

In the portfolio, we remain positioned in long-term themes including consumption premiumisation, digitalisation, health care and technology. We focus on companies reflecting our philosophy of owning good quality businesses, with long-term sustainable earnings power and share prices at a discount to intrinsic worth. We see high levels of leverage as a risk and continue to avoid companies with weak balance sheets.

- (a) For the period 31 March 2022 to 31 March 2023.
- (b) Security not included in the MSCI Emerging Markets Index as at 31 March 2023.
- This security, listed on a stock exchange in a developed market, has significant exposure to operations from emerging markets.

ICICI Bank, India's second largest private sector bank, gained during the period following several consistently strong quarters of loan growth, net interest margins and non-interest income. The bank remains well positioned with its healthy capital adequacy ratios and strong franchise.

Prosus is a leading global investment company and the largest shareholder of Tencent, a Chinese technology company. Its share price tracked Tencent's, which ended the period higher on hopes of China's reopening, better-than-expected third quarter results for 2022 and easing of restrictions for the Chinese internet industry.

Shares of **Brilliance China Automotive**, a Chinese car maker noted for its association with German luxury car maker BMW, moved higher after trading resumed in October 2022 following a suspension of one-and-a-half years. It also paid out a special dividend of the proceeds from a stake sale in its affiliate BMW Brilliance Automotive, but uncertainties over further dividends weighed on the stock price in the later part of the period.

- (a) For the period 31 March 2022 to 31 March 2023.
- (b) Security not held by TEMIT as at 31 March 2023.
- (c) Security not included in the MSCI Emerging Markets Index as at 31 March 2023.
- This security, listed on a stock exchange in a developed market, has significant exposure to operations from emerging markets.

NAVER is the leading internet search and advertising company in South Korea. The share price was negatively impacted by slower growth in a post-COVID environment. Concerns over expansion into unprofitable new businesses in uncertain macroeconomic conditions and weak earnings (which fell short of consensus estimates) pressured the share price. However, we believe that NAVER is in a good position to build a thriving ecosystem integrating search, e-commerce, payments and digital content based on its solid foundation in search and advertising.

Americanas is a Brazilian e-commerce company and operator of convenience stores. Disappointing results for the third quarter of 2022, news of accounting inconsistencies and the departure of its new leadership team pressured its share price. High inflation and elevated interest rates also made for a difficult environment. We divested our position in the stock in January 2023.

Banco Bradesco is Brazil's leading private sector bank. Weak fourth quarter results and exposure to Americanas weighed on stock prices.

⁽a) For the period 31 March 2022 to 31 March 2023.

Favourable stock selection in the **financials** sector added to TEMIT's performance relative to the benchmark index in the period of review. ICICI Bank (described above) and Banco Santander Mexico were both examples of financial companies which aided relative returns. In addition, Banco Santander Mexico is an off-benchmark holding, which is testament to the investment team's knowledge of local companies stemming from our experience and on-the-ground presence. Stock selection in the **materials** sector also aided relative performance. Contribution within this sector was led by South Korea-based steel product manufacturer POSCO. Stock selection in the **consumer discretionary** sector was also another contributor to relative returns.

In contrast, only one sector, **information technology** detracted (marginally) primarily due to an overweight allocation. Semiconductor firms TSMC and Samsung Electronics were key detractors, as they suffered from a cyclical downturn in demand for semiconductors.

⁽a) For the period 31 March 2022 to 31 March 2023.

By markets, stock selection in **China**, **India** and **South Africa** were key contributors. Several holdings in China such as Brilliance China Automotive and polysilicon manufacturer Daqo New Energy helped relative returns. In India, ICICI Bank was a key contributor to TEMIT's returns relative to the index. South Africa's contribution was led by general merchandise retailer Massmart.

Brazil was the top detractor from relative performance. The detraction was caused by stock selection with Americanas and Banco Bradesco leading the declines. An overweight position in **Thailand** was a positive contributor to performance but this was negated by poor stock performance. A lack of exposure to **Turkey** also detracted as Turkish equities rallied in 2022. Investors increased their equity allocation within the country to hedge against inflation and a low-yield environment. Turkey has since given up some of its gains in the first quarter of 2023.

⁽b) No companies included in the MSCI Emerging Markets Index in this country as at 31 March 2023.

Largest holdings

The largest portfolio holding is in computer chip maker **TSMC**. After rising in 2021 on the basis of a positive outlook for the semiconductor industry, TSMC suffered with a weakness in demand at some of its end customers. Although its profits for 2022 were ahead of initial estimates, the slowdown in demand meant that estimates for 2023 profit growth are much more muted. However, we are confident on the resilience of the business model of TSMC as it continues to lead on its business model of being "everyone's foundry".

The second largest portfolio holding is in **Alibaba**, a Chinese e-commerce company. Most recently, Alibaba announced an organisational revamp, resulting in a split into six units. Alibaba has seen a slowdown in growth in the past couple of years due to increased regulations, competition and prolonged COVID-19 lockdowns. With China's economic reopening and the industry's adjustment to the new regulatory environment, we expect growth to resume, albeit at a slower pace. Whilst the e-commerce businesses of Alibaba should deliver steady growth, its other businesses such as cloud, fintech, local commerce and content have significant potential. This could either offer growth opportunities or the possibility of an improvement in profitability. We remain positive on the strength of the e-commerce ecosystem of Alibaba and its ability to generate strong cash flows. In addition, Alibaba's strong buyback policy is another driver of earnings growth.

Global semiconductor manufacturer **Samsung Electronics** was the third-largest holding in the portfolio. Although TEMIT has reduced its holdings in the company due to a cyclical fall in earnings, we continue to believe that Samsung Electronics will be at the forefront of the industry and will benefit from any subsequent revival in demand.

- Developed market exposure represented by companies listed in United Kingdom and United States which have significant exposure to operations in emerging markets.

Outlook for emerging markets

Heading into 2023, while we remain watchful for developments that could change our overall outlook, including China's relationship with Taiwan and the United States, we find many reasons to be positive about EMs. Many countries are towards the end of the rate tightening cycle. Most markets in Latin America have traditionally had a significant real interest rate and their economic potential has been curtailed because of the need for macroeconomic stability.

We expect any policy pivot in EMs to revive consumption and spur economic growth as inflation slows. In addition, after a slowdown in earnings in 2022, there is the prospect of a recovery in earnings growth in 2023, with China being the last major country to emerge from the pandemic. However, in the short-term, earnings are likely to remain weak with subdued consumption and inventory digestion and a recovery is expected more towards the second half of 2023. A pickup in earnings revisions in EMs would signify better times ahead for equity markets.

Although the current global outlook remains weak, economies with a greater focus on domestic demand are better placed to weather this in the near term. Many emerging markets such as China, India, Indonesia and Brazil have huge domestic consumption bases and are well-positioned to remain resilient from external demand shortfalls. In addition, policy makers in several markets are providing incentives to manufacturing companies to expand operations in order to remain self-sufficient and competitive. For example, India is driving investments through its Production Linked Incentive program. South Korea plans to offer tax breaks to semiconductor and other technology companies investing within the country whilst reforming stock market regulations. Thailand has also approved a budget to boost tourism in the country, one of its biggest growth drivers.

The long-term structural tailwind of consumption growth in EMs via expansion of the middle class and premiumisation of buying patterns is now more significant than ever. Some US\$2.6 trillion in Chinese bank deposits were amassed in 2022^(a) and middle-class households are looking to spend on experiences, products and services. In our view, China's reopening could benefit many markets as the country has strong trade links with many EMs. Chinese tourism has also been a vital source of revenue for many countries.

(a) Source: People's Bank of China

After the removal of most COVID-related constraints, we have seen economic activity in China starting to recover in the first quarter of 2023, where retail sales, industrial production and investment in fixed assets increased. More importantly, companies are now able to operate their businesses without COVID protocols which removes the pressure of unplanned outages and improves overall efficiency.

Markets in Eastern Europe will benefit from the normalisation of energy dislocations, although the conflict in Ukraine will continue to be an overhang. Markets in the Middle East continue to see a boom in initial public offering activity which bodes well for future capital market developments in the region.

These uncorrelated drivers of returns in EM economies present an investment opportunity which our team's deep experience, local expertise and a bottom-up investment approach can uncover.

EMs also continue to make strides towards climate goals and with the cost of renewable energy expected to fall in 2023, we might well see EMs make further climate commitments.

It is an interesting time to be looking at the emerging world today. We believe that the breadth of opportunity, growth, innovation, sustainability of business models and the much stronger institutional resilience compared to decades past when considered together create an attractive future for EMs.

The Investment Manager's Process

Investment philosophy and approach

FTEME's long-term approach is driven by the 3 S's, seeking *Structural* growth opportunities in emerging markets, investing in businesses with *Sustainable* earnings power at a discount to intrinsic worth, and believing in responsible *Stewardship* of client capital. FTEME seeks to capture the growth potential of emerging market companies and believes that this is best achieved by employing a bottom-up and fundamental security selection process. FTEME conducts in-depth proprietary company research with a long-term and independent perspective. FTEME believes in the responsible stewardship of clients' capital and that governance and sustainability factors create risks and opportunities for companies. ESG analysis is therefore integrated alongside fundamental bottom-up analysis.

TEMIT's performance in different market environments

FTEME's approach aims for outperformance over the long term. The investment strategy tends to produce stronger performance when company fundamentals are the primary driver for stock returns, where a focus on stock selection should produce superior results. Performance may be less strong in highly sentiment-driven

market environments, when investors focus more on the overall economic picture rather than company fundamentals. This can also be the case when the market is overly short-term oriented, and rewards companies driven by what FTEME views as unsustainable factors such as short-term demand/supply imbalances or inorganic growth.

Investment process

The three broad stages of FTEME's investment process comprise: idea generation, stock research, and portfolio construction and management; with governance and sustainability considerations and risk management fully integrated at all stages.

1. Idea generation

The key source of idea generation is FTEME's team of over 70 analysts and portfolio managers located around the globe. Their experience and expertise allow them to identify trends which they may want to explore further through company research. In addition, FTEME's local presence, network and understanding of local dynamics may help to identify trends and opportunities that other market participants may filter out through standard quantitative screens. FTEME analysts speak the local language and are part of the local culture and fabric of the countries where they conduct research.

2. Stock research

FTEME analysts conduct rigorous analysis to assess whether a company has sustainable earnings power, and to establish a proprietary estimate of its intrinsic worth. By integrating ESG analysis with traditional business and financial analysis, FTEME seeks to gain insights into the quality and risks of companies. FTEME's research platform currently has coverage of over 700 companies across emerging markets using a proprietary and rigorous bottom-up research approach, along with extensive knowledge of the wider investment universe.

FTEME's research analysts form detailed views of companies by collecting and analysing a variety of information. The team conducts detailed quantitative financial analysis by building in-depth company models to evaluate financial strength and profitability, and to project future earnings and cash flow. Industry demand and supply models are incorporated in the analysis, as well as country and currency macro considerations. FTEME has a strong emphasis on qualitative assessment.

The assessment of ability to sustain stable or growing economic profits over time is typically driven by a combination of factors, including (i) sound business models; (ii) sustainable competitive advantages; (iii) management foresight; and (iv) low debt levels. Earnings power is the demonstrable ability to generate sustainable economic profit into the future in areas which could be beyond the current scope of operations. The analysts look for real earnings growth by focusing on economic earnings and cash flows rather than reported earnings, and differentiating between operational earnings and financial earnings. They evaluate internal versus external drivers to earnings and prefer companies with earnings which can be affected through management

action. A key element of earnings power is therefore quality, as signified by (i) products and services with low regulatory and macro risk; (ii) financial strength; and (iii) management strength.

Each research recommendation may incorporate several valuation methods extending typically over a three to five-year horizon. FTEME aims to clarify the risk/reward balance of a company by conducting sensitivity analysis, stress-testing, and scenario analysis. It seeks to identify what the market consensus expectations are for a stock and how the team's fundamental views may differ.

3. Portfolio construction

FTEME seeks to build a high-conviction stock-centric portfolio that is primarily driven by company-specific factors and focused on the long term. A bottom-up approach to stock selection is used, with country and sector allocations a residual of this process.

Portfolio Style and Characteristics

The strategy typically displays the following characteristics:

- Core style: The strategy aims to deliver outperformance irrespective of market direction. The portfolio construction process leads to the majority of active risk being focused.
- Quality and growth but not at excessive valuation levels: The philosophy typically leads to a portfolio with higher quality and growth than the aggregate of the benchmark index.
- High conviction portfolio: The top-10 holdings typically account for over 40% of the portfolio which overall is well-diversified across the market cap spectrum.
- Low turnover: FTEME's high conviction and long-term approach means that the typical annual portfolio turnover is less than 20%.

Buy and Sell Discipline

FTEME's buy discipline is primarily designed to ensure that the portfolio managers buy when they have both conviction in a business and it is trading below its intrinsic value; FTEME's sell discipline is designed to capture the opposite. All holdings are regularly reviewed to ensure that analyst recommendations are up to date and accurately reflect any changes in company fundamentals. In this way, ongoing fundamental research drives all buy and sell decisions.

Investment risk management

Investment in emerging markets equities inevitably involves risk in a volatile asset class. Franklin Templeton uses a comprehensive approach to managing risks within its managed portfolios and this approach is inherent in all aspects of the investment process. Investment risks are to be identified and intentional, not minimised. Risk management is embedded through all stages of the investment process, in collaboration with dedicated resources from Franklin Templeton's Investment Risk Management Group of over 80 risk management professionals, which is independent from the portfolio management team. Various risk management tools are used to predict and decompose the portfolio's active risk in order to understand and manage the portfolio's active risk profile.

For additional information with respect to the AIFM risk management framework, please read the Investor Disclosure Document on our website (www.temit.co.uk).

FTEME's approach to stewardship

FTEME's focus is on a total sustainability approach including business, economic, environmental and social sustainability. How FTEME monitors and manages client assets is not just about focusing on governance and sustainability factors. It demands a holistic approach incorporating proactive long-term engagement with the managers of the companies which FTEME invests in, on behalf of TEMIT and its other clients.

Part of being a responsible steward of clients' assets is acknowledging that governance and sustainability factors create risks and opportunities for companies. It therefore makes sense to integrate these factors alongside fundamental bottom-up analysis and engage with companies as active owners on behalf of clients. Responsible stewardship is not a single act but a continuous process that includes engagement and voting. Being responsible stewards of our clients' capital is reflected in:

How we act as investors

- ESG integration
- Company engagement
- Policy advocacy

How we treat our clients

- Putting clients first
- Being responsible fiduciaries of our clients' capital

How we behave as a business

- Building relationships
- Achieving quality results
- Working with integrity

Integrating ESG factors

Analyses of governance and sustainability factors are embedded components of our rigorous fundamental bottom-up research. The driving factors of the decision to purchase or sell a stock centre on the following:

• Its sustainable earnings power and whether its price is at a discount to intrinsic worth; and

• The sustainability of its business model, which is critical to maintaining its competitive positioning.

Our proprietary three-pillar ESG framework is a key component of how we aim to achieve our goal of being an emerging market leader in sustainable investing.

Intentionality

Assessing companies' intentionality toward managing material ESG factors with our proprietary scoring system and linking ESG factors into our valuation models.

Alignment

Mapping the alignment of companies' products and services to positive social and environmental outcomes and UN Sustainable Development Goals (SDGs).

Transition

Identifying companies' transition potential linked to their incremental progress, using our on-the-ground capabilities and experience as active owners to foster positive change. We have summarised one of our case studies from the full Stewardship Report to give TEMIT shareholders a snapshot of the typical analysis undertaken.

Soulbrain - a prominent South Korean player in the electronic materials and chemicals industry.

ESG Topic: Environmental Footprint

Materiality and Risk: Companies operating in the materials processing sector have the potential to cause significant environmental damage if they are not managed properly. The reliability of service and safe operation of company assets is key.

Analysis:

To minimise leaks of hazardous materials in the event of disasters such as fires, earthquakes, or floods, measures such as explosion-proofing equipment, negative pressure equipment, and ventilation have been implemented to standards exceeding those required by South Korea's Ministry of Environment.

Wastewater and sewage from plants are pooled in collecting wells and processed at an on-site treatment facility operated by the government. Soulbrain not only complies with legal water quality standards, but also treats water pollutants as much as possible and sends the remaining wastewater for further treatment at an industrial complex that is operated by the government.

ESG Thesis: As a chemical product manufacturer, Soulbrain focuses on the management of environmental issues, whilst also contributing to nearby communities. The company has expressed active commitment to the protection of the environment through the establishment of its own Environmental Health, Safety and Energy Management Policy. We note that the company has been exposed to fires in the past. Post these incidents the company has implemented an Emergency Response System and other prevention measures such as regular monthly prevention exercises. The CEO has since been replaced with one who is specialised in health and safety of factory operations. With some history of disruption and environmental impact in the past, we have applied a discount to our valuation but are confident in the new management's ability to manage future fire risk in its operations.

Climate change

Within emerging markets, the landscape varies considerably, ranging from countries that have announced meaningful carbon targets to those that have yet to declare any significant policies. FTEME's objective is to understand the climate commitments of investee companies incorporating both local and global perspectives, recognising that the pace of decarbonisation and the associated strategies will differ across countries and cultures.

Where material, FTEME integrates climate change/carbon analysis into its bottom-up research process, focusing on assessing the impact on long-term business values. This is part of the holistic approach of integrating ESG analysis with traditional financial analysis so that FTEME can gain valuable insights into the quality and risks of businesses which FTEME invests in.

FTEME's analysts and portfolio managers look at climate risks and opportunities closely for relevant sectors and geographies where climate change plays an important role. FTEME closely tracks climate related factors into estimates, models and valuations for those businesses materially exposed to the issue.

Our portfolio managers also seek to understand the carbon risk profile at a portfolio level to understand its carbon risk exposures. The data helps with the engagement agenda.

TEMIT's portfolio carbon risk is concentrated amongst a small number of companies, with the top 5 companies in terms of carbon intensity representing 7.2% of the portfolio and accounting for 69.0% of the portfolio WACI. From a sector perspective, 48.2% of the portfolio WACI contributions come from the materials sector. On a relative basis, portfolio selection in materials contributes positively, whilst the utilities sector also contributes positively to WACI, as TEMIT is underweight in this sector. China Resources Cement and LG, exhibit the largest carbon intensities in TEMIT's portfolio, representing 3.2% of the portfolio and accounting for 48.8% of the portfolio WACI. TSMC's carbon intensity is low, however due to it representing 11.6% of the portfolio, it is third in terms of contribution to the portfolio WACI.

We emphasise that the data does not always fully represent the actual carbon risk of the portfolio.

We remain willing to invest in companies in carbon-intensive sectors, such as cement, steel and extractive industries. This is because we are pragmatic investors who understand that not every company can have a perfect sustainability profile today.

In the full Stewardship Report, available on our website (www.temit.co.uk), we spotlight and focus this year on the steel industry. The transition to a low-carbon economy will require a change in the way we manufacture steel. Accounting for nearly 8% of global emissions from the energy sector, the steel industry will play an important role in mitigating climate change by reducing the CO2 emissions in the production process.

As investors in the steel industry in TEMIT, we profile our observations with POSCO, one of the largest steel producers in the world, headquartered in South Korea.

POSCO
ESG observations and analysis:
 POSCO is one of the most efficient and cost competitive steel makers globally, but it has recognised that the "survival" of steel companies depends on net-zero carbon.
• In order to achieve their net-zero by 2050 target, the company plans to optimise low-carbon solutions that are already in use such as hydrogen reduction steelmaking, expansion of renewable energy and carbon capture and storage.
 POSCO has a clear timeline in place for the commercialisation of their hydrogen reduction steelmaking technology. Clear progress has been made over recent years, but the technology in its current state is not sufficient to enable fast enough progress for low-carbon steelmaking.
Our thesis:
POSCO is a market leader in terms of ESG disclosures and efforts to move towards net-zero steel production. We acknowledge the significant steps that POSCO's management has undertaken to improve the company's environmental initiatives with the implementation of clear disclosures, documentation, and establishment of timelines.
There are several steps that the company will have to take to fully utilise its hydrogen-reduction technology. POSCO is supported by a strong financial position and has committed a substantial capital investment, which has been factored into our valuation.

Active ownership

As investors with a significant presence in emerging markets, FTEME's active ownership efforts are a key part of the overall approach to stewardship. FTEME analysts conduct almost 2,000 company meetings a year across the investment platform using its industry-leading research footprint across emerging markets, where FTEME seek to gain a number of fundamental and sustainability insights. We believe that our engagement efforts are

key to developing a detailed understanding of companies and improving outcomes for shareholders as well as stakeholders more broadly.

Engagement statistics

FTEME's analysts are in a continual dialogue with companies on a range of topics including sustainability and governance. There are also companies that FTEME identify where dedicated discussion on ESG topics are necessary. Active engagements with companies in the TEMIT portfolio for the year ended 31 March 2023 are summarised below:

ESG discussion by engagement type	Number of interactions	% of interactions
Environmental	12	34
Carbon risk and climate change	6	17
Environmental consideration	6	17
Social	4	11
Human and social capital	4	11
Governance	20	55
Corporate governance	14	39
Strategic risk and communication	6	16
Total	36	100

	Number of	% of
ESG discussion outcome	interactions	interactions
No progress	1	3
Feedback noted by company	17	47
Company plans to make changes	7	19
Company has made changes	11	31
Total	36	100

Below is an ESG engagement example with an investee company headquartered in South Korea.

KT Skylife

ESG engagement topic: Governance - to recommend a more transparent and attractive payout policy. Objectives:

Pay-tv is a mature market in South Korea and the business generates significant cash. Thus, we continue to engage with the company on their shareholder return policy, encouraging management to align its policy with minority shareholder interests.

Outcome: Company plans to make changes

- We engaged with the management to highlight that, despite previous engagements, KT Skylife's dividend distribution remained low despite cash levels matching the company's market capitalisation at one point in time.
- We also noted that in 2021, the company acquired a cable TV operator, a low growth business, at a valuation that was at a significant premium to its own valuation. However, we believed that a share buyback would have added more value than the acquisition.
- The company responded with confirmation that they would actively consider a new dividend policy, and
 that while share buybacks may be considered, they preferred to prioritise strengthening their dividend
 payout.
- Management confirmed that, once finalised, they would share the company's strategy and vision for the year ahead with us.

Proxy voting

In the year ended 31 March 2023, FTEME voted on over 900 management proposals at annual and special general meetings for TEMIT.

Most of the proposals which FTEME voted on related to companies' director appointments, routine business proposals and capital structures. Of the voteable management proposals, FTEME voted "For" proposals 84% of the time.

FTEME voted "Against" management proposals in 13% of cases. By proposal category, as a percentage of votes within each category, votes against were largely concentrated on capital structure, non-salary compensation and management-related proposals.

FTEME views votes against proposals as a formal way to communicate our views to management, and FTEME undertakes them based on the investment team's assessment of each motion in line with clients' best interests.

"Other" votes were cast in 3% of cases. These were mainly related to director votes in Brazil, where FTEME abstained from voting when they did not support the candidates put forward for election, or where the company bundled several proposals into one, preventing voting on individual items.

The number of resolutions proposed by shareholders is increasing around the world, particularly on environmental and social issues, although they remain relatively uncommon in emerging markets. FTEME will continue to closely examine the merits of views raised by fellow shareholders.

We encourage you to download the full TEMIT Stewardship Report from www.temit.co.uk for further, detailed information.

Business Review

Strategy and Business Model

Company purpose and objective

TEMIT's purpose is to provide both private and institutional investors with the opportunity for capital appreciation via a professionally managed vehicle focused on listed equity investments in emerging markets.

The objective of TEMIT is to provide long-term capital appreciation via exposure to global emerging markets, supported by a culture of both strong customer service and corporate governance.

Investment policy

The Company seeks long-term capital appreciation through investment in companies listed in emerging markets or companies which earn a significant amount of their revenues in emerging markets but are domiciled in, or listed on, stock exchanges in developed countries ("Emerging Markets Companies").

It is expected that the majority of investments will be in listed equities. However, up to 10% of the Company's assets may be invested in unlisted securities. In addition, while it is intended that the Company will normally invest in equity instruments, the Investment Manager may invest in equity-related investments (such as convertibles or derivatives) where it believes that it is advantageous to do so.

The portfolio may frequently be overweight or underweight in certain investments compared with the MSCI Emerging Markets Index (the "Benchmark") and may be concentrated in a more limited number of sectors or geographical areas than the Benchmark. Investments may be made in Emerging Markets Companies outside the Benchmark that meet the investment criteria.

Whilst there are no specific restrictions on investment in any one sector or geographic area, the portfolio will be managed in a way which aims to spread investment risk. The portfolio will typically contain between 50 and 100 individual stocks but may, at times, contain fewer or more than this range. No more than 12% of the Company's assets will be invested in the securities of any one issuer at the time of investment, save that any investment in unlisted securities of any one issuer will be limited to no more than 2% of the Company's assets, measured at the time of investment.

The maximum borrowing will be limited to 20% of the Company's net assets, measured at the time of borrowing.

No more than 10%, in aggregate, of the value of the Company's assets will be invested in other listed closed-ended investment funds.

In accordance with the Listing Rules, the Company will not make any material change to its published investment policy without the prior approval of the UK's Financial Conduct Authority ("FCA") and the approval of its shareholders by ordinary resolution.

Distribution policy

The Company will ensure that its total annual dividends will be paid out of the profits available for distribution under the provisions of the relevant laws and regulations and will be at least sufficient to enable it to qualify as an investment trust under the UK Income and Corporation Taxes Act. If the Company has received an exceptional level of income in any accounting year, the Board may elect to pay a special dividend. The primary focus of the investment policy is on generating capital returns, the Company does not target a particular level of income and there is no guarantee that dividend levels will be maintained from one year to the next.

The Company will normally pay two dividends per year, an interim dividend declared at the time when the half yearly results are announced, and a final dividend declared at the time when the annual results are announced. The final dividend will be subject to shareholder approval at the AGM each year.

The Company may also distribute capital by means of share buybacks when the Board believes that it is in the best interests of shareholders to do so. The share buyback programme will be subject to shareholder approval at each AGM.

Business model

The Company has no employees and all of its Directors are non-executive. The Company delegates its day-to-day activities to third parties.

Since 1 October 2021, Franklin Templeton Investment Trust Management Limited ("FTITML", "AIFM" or the "Manager") has been the Company's AIFM and Company Secretary.

The Board is responsible for all aspects of the Company's affairs, including the setting of parameters for the monitoring of the investment strategy and the review of investment performance and policy. It also has responsibility for overseeing all strategic policy issues, namely dividend, gearing, share issuance and buybacks, share price and discount/premium monitoring, corporate governance matters and engagement with all the Company's stakeholders.

Strategy

The Company seeks to achieve its objective by following a strategy focused on the following:

Performance

At the heart of the strategy is the appointment and retention of capable investment management professionals, whose aim is to identify value and achieve superior long-term growth for shareholders. The Investment Manager, under the leadership of Chetan Sehgal, continues to apply the same core investment philosophy that has driven TEMIT's performance since the Company's launch. The investment team aims to achieve long-term capital appreciation for shareholders seeking exposure to global emerging markets by investing in companies that they believe offer long-term sustainable growth and good value, combined with strong management and sound governance.

Environmental, Social and Governance ("ESG") matters

As TEMIT is an investment trust, the key ESG consideration is the stewardship of its portfolio of investments. The Board has reviewed and fully supports the Investment Manager's approach to stewardship, which is described under "FTEME's approach to stewardship" in the full Annual Report. It receives regular reports on Franklin Templeton's policies and controls.

TEMIT has no greenhouse gas emissions to report from the operations of the Company, as all of its activities are outsourced to third parties. While as an investment trust TEMIT is exempt from disclosures recommended by the Task Force on Climate-related Financial Disclosures ("TCFD"), Franklin Templeton continues to develop metrics for our carbon footprint. Further information on our approach to climate change can be found under "FTEME's approach to stewardship" above and in more detail in the full Stewardship Report, available on our website (www.temit.co.uk).

TEMIT has no employees and is not an organisation that provides goods or services as defined in the Modern Slavery Act 2015 and thus the Company considers that the Act does not apply. The Company's own supply chain consists predominantly of professional services advisers.

Culture and values

The Board believes in a culture of openness and constructive challenge in its interactions with the Manager and other service providers. The Board aims to maintain open and regular communication with shareholders, as set out under Communication in the full Annual Report.

The Company is committed to acting professionally, fairly and with integrity in all of its business dealings and relationships. The Board has a zero-tolerance policy towards bribery and looks to ensure that its service providers and associated persons have effective policies and procedures designed to actively prevent bribery which are proportionate, and risk based. In relation to the corporate offence of failing to prevent tax evasion, it is the Company's policy to conduct all business in an honest and ethical manner. The Company takes a zero-tolerance approach to any facilitation of tax evasion whether under UK law or under the law of any foreign country. The Board notes that the Manager has a robust whistleblowing policy in place.

Information on the Company's approach to Diversity is set out in the Directors' Report in the full Annual Report.

Liquidity

The shares issued by the Company are traded on the London and New Zealand stock exchanges. The Company has engaged Winterflood Securities as financial adviser and stockbroker, and to act as a market maker in the shares of the Company.

Gearing

Fixed term loan

On 31 January 2020, the Company entered into a five-year £100 million loan at a fixed rate of 2.089% with Scotiabank Europe plc. The fixed term loan is denominated in pounds sterling and will remain in place until 31 January 2025. Full details of the loan are set out in Note 11 of the Notes to the Financial Statements.

Revolving credit facility

On 31 January 2020, the Company entered into a three-year £120 million unsecured multi-currency revolving loan facility with The Bank of Nova Scotia, London Branch. Drawings may be in sterling, US dollars or Chinese renminbi ("CNH"). The total amount which may be drawn down in CNH is 45% of the combined limit of the fixed rate loan and of the revolving loan facility. On 31 January 2023 the agreement was amended to extend the maturity date to 30 January 2024. Further details of the facility are set out in Note 10 of the Notes to the Financial Statements.

The Investment Manager has been granted discretion by the Board to draw down the revolving loan facility as investment opportunities arise, subject to overall supervision by the Board, and subject to the overall gearing limit in TEMIT's investment policy.

The Company has no other debt. The net gearing position was 0.0% (net of cash in the portfolio) at the year-end (2022: 1.1%) which means that the cash held by the Company is equal to or higher than the total bank loans.

The Board continues to monitor the level of gearing and currently considers gearing of up to 20% to be appropriate, measured at the time of borrowing.

Affirmation of shareholder mandate

In accordance with the Company's Articles of Association, the Board must seek shareholders' approval every five years for TEMIT to continue as an investment trust. This allows shareholders the opportunity to decide on the long-term future of the Company. The last continuation vote took place at the 2019 AGM, when 99.95% of the votes cast were registered as votes in favour. The next continuation vote will take place at the 2024 AGM.

Stability - Share buybacks and Conditional Tender Offer

The Company has powers to buy back its shares as a discount control mechanism and when this is in the best interests of the Company's shareholders and in 2019 introduced a Conditional Tender Offer. The share price discount to net asset value is discussed under Key Performance Indicators in the full Annual Report.

Under the Conditional Tender Offer, if over the five-year period from 31 March 2019 to 31 March 2024 the Company's net asset value total return fails to exceed the benchmark total return, the Board will put forward proposals to shareholders to undertake a tender offer for up to 25 per cent of the issued share capital of the Company, at the discretion of the Board. Any such tender offer will be at a price equal to the then prevailing net asset value less two per cent (and less the costs of the tender offer). There will be no tender offer if the Company's net asset value total return exceeds the benchmark total return (MSCI Emerging Markets Index) over the five-year period. Any tender offer would take place following the Company's 2024 AGM and will also be conditional on shareholders approving the continuation vote in 2024 which is described under "Affirmation of shareholder mandate" above.

A key point in the Investment Manager's mandate is to take a long-term view of investments and one of the advantages of a closed-end fund is that the portfolio structure is not disrupted by large inflows or outflows of cash. However, the Board and the Investment Manager recognise that the returns experienced by shareholders are in the form of movements in the share price, which are not directly linked to NAV movements, and the shares may trade at varying discounts or premiums to NAV. Many shareholders, both professional and private investors, have expressed a view that a high level of volatility in the discount is undesirable and that the Company should continue its active share buyback programme. A less volatile discount, and hence share price, is seen as important to investors. For this reason, TEMIT uses share buybacks selectively with the intention of limiting volatility in the share price and where buybacks are in the best interests of shareholders. Details of the share buybacks are included in the following table. All shares bought back in the year were cancelled, with none being placed in treasury. As at 31 March 2023, the Company held 103,825,895 shares in treasury (2022: 103,825,895 shares in treasury).

	2023	2022
Shares bought back and cancelled during the year	19,758,613	2,331,670
Proportion of share capital bought back and cancelled	1.7%	0.2%
Total cost of share buybacks	£29.2m	£3.6m
The benefit to NAV	£4.6m	£0.5m
The percentage benefit to NAV	0.23%	0.03%

Discount management is reviewed regularly by the Board to ensure that it remains effective in the light of prevailing market conditions. The Conditional Tender Offer will not affect the Board's current approach to discount management. The Board will continue to exercise the Company's right to buy back shares when it believes this to be in shareholders' interests and with the aim of reducing volatility in the discount.

Communication

The Board works to ensure that investors are informed regularly about the performance of TEMIT and of emerging markets through clear communication and updates. The Board is fully committed to TEMIT's marketing programme. There is a substantial annual marketing and communication budget, and expenditure by TEMIT is matched by a contribution to costs from the Manager.

TEMIT won the prestigious Best Campaign Award at the AIC Shareholder Awards 2022 in recognition of the quality of the "Your future is emerging" campaign undertaken to attract new shareholders. The innovative use of

broadcast media has helped to increase TEMIT's profile, advertise the benefits of the Company and communicate the growth story of emerging markets to a wider audience.

A new corporate identity was launched in January 2022 providing TEMIT with a unique brand for the first time.

TEMIT seeks to keep shareholders updated on performance and investment strategy through its regular annual and half yearly reports, along with monthly factsheets and commentaries. These are available on the TEMIT website (www.temit.co.uk) which also contains portfolio holdings information, updates from the Investment Manager and other important documents that will help shareholders to understand how their investment is managed. We also communicate via @TEMIT on Twitter and continue to develop the Company's presence across social media platforms. The Board encourages registration to our monthly email that keeps subscribers appraised of the latest performance, insights and announcements.

TEMIT has an active public relations programme. Our Investment Manager provides comments to journalists, hosts media briefings and publishes articles on issues relevant to investing in emerging markets.

The Investment Manager meets regularly with professional investors and analysts and hosts interactive webinars. At each AGM the Investment Manager makes a presentation with the opportunity for all shareholders to ask questions.

The Chairman regularly meets major shareholders to discuss investment performance and developments in corporate governance. We try to engage with a wide spectrum of our shareholders and aim to address their concerns as far as practically possible. Shareholders are welcome to contact the Chairman or the Senior Independent Director at any time via temitcosec@franklintempleton.com.

Section 172 Report - Promoting the success of the Company

The Companies (Miscellaneous Reporting) Regulations 2018 require directors to explain how they have discharged their duties under Section 172(1) of the Companies Act 2006 in promoting the success of their companies for the benefit of "members as a whole" and having regard for all stakeholders.

In addition to the primary focus of the Board, and with due regard to its obligations under Section 172 of the Companies Act 2006, the following important and non-routine matters were considered at Board meetings during the year:

- Recruitment of Abigail Rotheroe as a non-executive Director;
- Changes to the risk matrix, monitoring such changes carefully and introducing alternative
 mitigating controls where necessary and practicable to support the operation of an effective control
 environment;
- Pandemic risks affecting the Company's investments and business operations;
- Risks resulting from the Russian invasion of Ukraine and the valuation of Russian assets;
- Rebalancing dividend payments by increasing the interim dividend;
- Review of the marketing plan with the Manager;
- Review of the share buyback programme; and
- Review of the gearing facility.

The Board considers the main stakeholders in the Company to be its shareholders and its service providers, the principal one of which is its Manager, along with its investee companies. A summary of the key areas of engagement undertaken by the Board with its main stakeholders in the year under review and how Directors have acted upon this to promote the long-term success of the Company are set out in the following table.

Manager	Communication between the Board and the Manager	The relationship of the Board with the Manager is very important.	The Manager attends all Board meetings where it reviews and discusses performance reports, changes in the portfolio composition and risk matrix. The Board receives timely and accurate information from the Manager and engages with the Investment Manager and the Company Secretary between meetings as well with other representatives of the Manager as and when it is deemed necessary.	The Board operates in a supportive and open manner, challenging the activity of the Manager and its results. The Board believes that the Company is well managed and the Board places great value on the experience of the Investment Manager to deliver superior long-term returns from investments and on the other functions of the Manager to fulfil their roles effectively.
Third-party service providers	Engagement with service providers	The Board acknowledges the importance of ensuring that the Company's service providers are delivering a suitable level of service, that the service level is sustainable and that they are fairly remunerated for their service.	As an investment company all services are outsourced to third-party providers. The Board considers the support delivered by service providers including the quality of the service, succession planning and any potential interruption of service or other potential risks.	The Manager maintains the overall day-to-day relationship with the service providers and the Board undertakes an annual review of the performance of the Company's service providers. This review also includes the level of fees paid. The Board meets with service providers as and when considered necessary.
Investee companies	Engagement with investee companies	The relationship between the Company and the investee companies is very important.	On behalf of the Company the Investment Manager engages with investee companies implementing corporate governance principles and discusses the portfolio with the Board on a quarterly basis.	The Investment Manager has a dedicated research team that is employed in making investment decisions and when voting at shareholder meetings of investee companies.

Key Performance Indicators

The Board considers the following to be the key performance indicators ("KPIs") for the Company:

- Net asset value and share price total return over various periods, compared to its benchmark;
- Share price discount to net asset value;
- · Dividend and revenue earnings; and
- Ongoing charges ratio.

The Ten Year Record of the KPIs is shown in the full Annual Report.

Net asset value and share price total return(a)

Net asset value and share price total return data is presented within the Company Overview along with the Ten Year Record in the full Annual Report.

The Chairman's Statement and the Investment Manager's Report in the full Annual Report include further commentary on the Company's performance.

Share price discount to net asset value(a)

Details of the Company's share price discount to net asset value are presented within the Financial Summary in the full Annual Report. On 24 May 2023, the latest practicable date for which information was available, the discount was 14.8%.

(a) A glossary of alternative performance measures is included in the full Annual Report.

The Company has powers to buy back its shares as a discount control mechanism when it is in the best interests of the Company's shareholders and has a Conditional Tender Offer mechanism. These are described under "Stability - Share buybacks and Conditional Tender Offer" in the full Annual Report.

Dividend and revenue earnings

Total income earned in the year was £80.6 million (2022: £54.3 million) which translates into net revenue earnings of 5.72 pence per share (2022: 3.44 pence per share), an increase of 66.3% over the prior year. The increase in revenue earnings per share was attributable to the increase in underlying revenues, mainly dividends earned from Petroleo Brasileiro.

The Company paid an interim dividend of 2.00 pence per share on 27 January 2023. The Board is proposing a final dividend of 3.00 pence per share, making total ordinary dividends for the year of 5.00 pence per share.

Ongoing charges ratio(a) ("OCR")

The OCR rose to 0.98% for the year ended 31 March 2023, compared to 0.97% in the prior year. This was driven by the reduction in average net assets during the year, offsetting the AIFM fee reduction effective from 1

July 2022. The OCR has been calculated in line with the Association of Investment Companies ("AIC") recommended methodology.

Costs associated with the purchase and sale of investments are taken to capital and are not included in the OCR. Transaction costs are disclosed in Note 8 of the Notes to the Financial Statements in the full Annual Report.

(a) A glossary of alternative performance measures is included in the full Annual Report.

Principal and emerging risks

At least quarterly, the Board reviews with the AIFM and the Investment Manager a wide range of risk factors that may impact the Company. A full review of risks and internal controls is held every September by the Audit and Risk Committee. These reviews include a robust assessment of the principal and emerging risks facing the Company, including those that would threaten its business model, future performance, solvency or liquidity. These are summarised in the table below.

Further explanation of the monitoring of risk and uncertainties is covered within the Report of the Audit and Risk Committee in the full Annual Report. Information on the risks that TEMIT is subject to, including additional financial and valuation risks, are also detailed in Note 15 of the Notes to the Financial Statements.

Due to the nature of the Company's business, investment risk is a key focus and is reviewed on an ongoing basis by the Investment Manager as part of every investment decision. Further information on this process is detailed in the full Annual Report.

Principal risk

Market and geopolitical

Market risk arises from volatility in the prices of the Company's investments, from the risk of volatility in global markets arising from macroeconomic and geopolitical circumstances and conditions. Many of the companies in which TEMIT invests are, by reason of the locations in which they operate, exposed to the risk of political or economic change. In addition, sanctions, exchange controls, tax or other regulations introduced in any country in which TEMIT invests may affect its income and the value and the marketability of its investments. Emerging markets can be subject to greater price volatility than developed markets.

Geopolitical risk was highlighted by the Russian invasion of Ukraine in February 2022 and the escalating trade war between the United States and China and military tensions over the Taiwan Strait. All

Mitigation

The Board reviews regularly and discusses with the Investment Manager the portfolio, the Company's investment performance and the execution of the investment policy against the long-term objectives of the Company. The Manager's independent risk team performs systematic risk analysis, including country and industry specific risk monitoring, as well as stress testing of the portfolio's resilience to geopolitical shocks. The Manager's legal and compliance team monitors sanctions. Where TEMIT is affected, adherence to all sanctions and restrictions is ensured by this team. The Board also regularly reviews reports from the Manager's risk, legal and compliance teams.

these factors have depressed investor sentiment and the Russian invasion of Ukraine has impacted global trade posed by supply shocks, sanctions, higher levels of inflation and volatility in asset prices.

Pandemic

issues and their aftermaths, such as the outbreak of COVID-19, first detected in China in December 2019 and later spreading globally, could have a significant adverse impact on the Company's operations (including the ability to find and execute suitable investments) and The risks associated with a pandemic affect all areas of therefore, the Company's potential returns.

Restrictive measures implemented to control such outbreaks could adversely affect the economies of individual nations or the entire global economy, the financial condition of individual issuers or companies (including those that are held by, or are counterparties or service providers to, the Company) and capital markets in ways that cannot necessarily be foreseen, and such impact could be significant and long term.

Technology

Failure or breach of the security of information technology systems of the Company's service providers may entail risk of financial loss, disruption to operations or damage to the reputation of the Company.

Concentration

Concentration risk arises from investing in relatively few holdings, few sectors or a restricted geographic area. Performance may be more volatile than with a greater number of securities.

Sustainability and climate change

The Company's portfolio, and also the Company's service providers and the Investment Manager, are exposed to risks arising from governance and sustainability factors, including climate change. To the extent that such a risk occurs, or occurs in a manner that is not anticipated by the Investment Manager, there may be a sudden, material negative impact on the value place on ESG matters. The Board has reviewed and of an investment, and the operations or reputation of the Investment Manager.

Foreign currency Currency exchange rate movements may affect TEMIT's performance. In general, if the value of sterling increases compared with a foreign currency, an not hedge currency risk. investment traded in that foreign currency will be

worth less in sterling terms. This can have a negative

effect on the Company's performance.

Discount Risk

The discount/premium at which the Company's shares trade relative to its net asset value can change. The risk of a widening discount, and/or related volatility, could

The spread of infectious illnesses or other public health The Board has regularly reviewed and discussed the situation with the Investment Manager, including a review of the portfolio, risk management and business continuity.

> the Company's investments as well as operations. Mitigation strategies apply as detailed within the specific areas of risk.

> A global network of analysts and operations and a flexible technology setup (including the ability to "work from home") at the Investment Manager ensure operational business continuity and continuous analyst coverage. The Board has also received updates on its key service providers' business continuity plans.

> The Company benefits from Franklin Templeton's technology framework designed to mitigate the risk of a cyber security breach.

> For key third-party providers, the Audit and Risk Committee receives regular independent certifications of their technology control environment.

The Board reviews regularly the portfolio composition/ asset allocation and discusses related developments with the Investment Manager and the independent risk management team. The Investment Compliance team of the Investment Manager monitors concentration limits and highlights any concerns to portfolio management for remedial action.

The Investment Manager considers that sustainability risks are relevant to the returns of the Company. The Manager has implemented a policy in respect of the integration of sustainability and climate change risks in its investment decision making process. The Board receives regular reports on the policies and controls in fully supports the Franklin Templeton Stewardship Statement and its Sustainable Investing Principles and Policies.

The Board monitors currency risk as part of the regular portfolio and risk management oversight. TEMIT does

The Board monitors the level of discount/premium at which the shares trade and has an active investor relations programme. The Company has authority to

reduce shareholder returns and confidence in the Company.

buy back its existing shares when deemed by the Board to be in the best interests of the Company and its shareholders.

Operational and custody

Like many other investment trust companies, TEMIT has no employees. The Company therefore relies upon the services provided by third parties and is dependent upon the control systems of the Investment Manager and of the Company's other service providers. The security, for example, of the Company's assets, dealing procedures, accounting records and maintenance of regulatory and legal requirements depends on the effective operation of these systems.

The Manager's systems are regularly tested and monitored and an internal controls report, which includes an assessment of risks together with an overview of procedures to mitigate such risks, is prepared by the Manager and reviewed by the Audit and Risk Committee.

J.P. Morgan Europe Limited is the Company's depositary. Its responsibilities include cash monitoring, safe keeping of the Company's financial instruments, verifying ownership and maintaining a record of other assets and monitoring the Company's compliance with investment limits and borrowing requirements. The depositary is liable for any loss of financial instruments held in custody and will ensure that the custodian and any sub-custodians segregate the assets of the Company. The depositary oversees the custody function performed by JPMorgan Chase Bank. The custodian provides a report on its key controls and safeguards (SOC 1/SSAE 16/ISAE 3402) that is independently reported on by its auditor, PwC.

The Board reviews regular operational risk management reporting provided by the Investment Manager.

Key personnel

The ability of the Company to achieve its objective is significantly dependent upon the expertise of the Investment Manager and its ability to attract and retain suitable staff.

The Manager endeavours to ensure that the principal members of its management teams are suitably incentivised, participate in strategic leader programmes and monitor key succession planning metrics. The Board discusses this risk regularly with the Manager.

Regulatory

The Company is an Alternative Investment Fund ("AIF") and is listed on both the London and New Zealand stock exchanges. The Company operates in an increasingly complex regulatory environment and faces framework reduces the likelihood of breaches numerous regulatory risks. Breaches of regulations could lead to a number of detrimental outcomes and reputational damage.

The Board, with the assistance of the Manager, ensures that the Company complies with all applicable laws and regulation and its internal risk and control happening.

Emerging risks

The key emerging risk faced by the Company during the year under review was the continuing ramifications of the Russian invasion of Ukraine, discussed under market and geopolitical risk above. The extent of this risk will depend on the length of the conflict, impacts on commodity prices and associated inflationary pressure. In addition, the Board and Investment Manager discussed the growing tensions between the United States and China. The Board is also monitoring the potential risks on the portfolio and investee companies posed by the dramatic progress of Artificial Intelligence (AI).

Viability Statement

The Board considers viability as part of its continuing programme of monitoring risk. In preparing the Viability Statement, in accordance with the UK Corporate Governance Code and the AIC Corporate Governance Code, the Directors have assessed the prospects of the Company over a longer period than the 12 months required by the 'Going Concern' provision.

The Board has considered the Company's business and investment cycles and is of the view that five years is a suitable time horizon to consider the continuing viability of the Company, balancing the uncertainties of investing in emerging markets securities against having due regard to viability over the longer term.

In assessing the Company's viability, the Board has performed a robust assessment of controls over the principal risks. The Board considers, on an ongoing basis, each of the principal and emerging risks as noted above and set out in Note 15 of the Notes to the Financial Statements. The Board evaluated various scenarios of possible future circumstances including a material increase in expenses and a continued significant and prolonged fall in emerging equity markets. The Board also considered the latest assessment of the portfolio's liquidity. The Board monitors income and expense projections for the Company, with the majority of the expenses being predictable and modest in comparison with the assets of the Company. The Company foresees no issues with meeting interest payments and other principal obligations of the borrowing facilities. A significant proportion of the Company's expenses is the ad valorem AIFM fee, which would naturally reduce if the market value of the Company's assets were to fall.

Considering the above, and with careful consideration given to the current market situation, the continuing ramifications of the Russian invasion of Ukraine, growing tensions between the United States and China over trade and the Taiwan Strait and the challenges posed by climate change, the Board has concluded that there is a reasonable expectation that, assuming that there will be a successful continuation vote at the 2024 AGM, the Company will be able to continue to operate and meet its liabilities as they fall due over the next five years.

Future Strategy

The Company was founded, and continues to be managed, based on a long-term investment strategy that seeks to generate superior returns from investments, principally in the shares of carefully selected companies in emerging markets.

The Company's results will be affected by many factors including political decisions, economic factors, the performance of investee companies and the ability of the Investment Manager to choose investments successfully as well as the current challenges.

The Board and the Investment Manager continue to believe in investment with a long-term horizon in companies that are undervalued by stock markets, but which are fundamentally strong and growing. It is recognised that, at times, extraneous political, economic and company-specific and other factors will affect the

performance of investments, but the Company will continue to take a long-term view in the belief that patience will be rewarded.

By order of the Board **Paul Manduca** 9 June 2023

Statement of Directors' Responsibilities

In respect of the Annual Report and the Financial Statements

The Directors are responsible for preparing the Annual Report and the Financial Statements in accordance with applicable law and regulations. Details of the Directors and members of the committees are reported in the full Annual Report.

Company law requires the Directors to prepare Financial Statements for each financial year. Under that law the Directors are required to prepare the Financial Statements in accordance with UK adopted International Accounting Standards.

Under company law the Directors must be satisfied that the Financial Statements give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for the period. In preparing these Financial Statements, International Accounting Standard 1 requires that Directors:

- Properly select and apply accounting policies;
- Present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- Provide additional disclosures when compliance with the specific requirements of UK adopted International Accounting Standards are insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance; and
- Assess the Company's ability to continue as a going concern.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the Financial Statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website (www.temit.co.uk). Legislation in the United Kingdom governing the preparation and dissemination of Financial Statements may differ from legislation in other jurisdictions.

Responsibility Statement

Each of the Directors, who are listed in the full Annual Report, confirms that to the best of their knowledge:

- The Financial Statements, which have been prepared in accordance with UK adopted International Accounting Standards, give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company for the year ended 31 March 2023; and
- The Chairman's Statement, Strategic Report and the Report of the Directors include a fair review of the information required by 4.1.8R to 4.1.11R of the FCA's Disclosure Guidance and Transparency Rules; and
- The Annual Report and Audited Financial Statements, taken as a whole, are fair, balanced and
 understandable and provide the information necessary for shareholders to assess the Company's
 position and performance, business model and strategy, and include a description of the principal
 risks and uncertainties.

As at 31 March 2023

1 Accounting Policies

(a) Basis of preparation

The Financial Statements of the Company have been prepared in accordance with UK adopted International Accounting Standards. The Financial Statements have also been prepared in accordance with the Statement of Recommended Practice ("SORP") for investment trusts issued by the Association of Investment Companies ("AIC") in July 2022 insofar as the SORP is compatible with International Accounting Standards.

The Financial Statements have been prepared on the historical cost basis, except for the measurement at fair value of certain financial instruments. All financial assets and financial liabilities are recognised (or derecognised) on the date of the transaction by the use of "trade date accounting". The principal accounting policies adopted are set out below.

Adoption of new and revised Accounting Standards

At the date of authorisation of these Financial Statements, the following standard was assessed to be relevant and is effective for annual periods beginning on or after 1 January 2022:

• Annual Improvements to IFRS Standards 2018 - 2020: IFRS 9 Amendment. This amendment relates to situations where there is a substantial change in the terms of a financial liability.

The amendment listed above did not have any impact on the amounts recognised in the current reporting period.

At the date of authorisation of these Financial Statements, the following standards and interpretations which have not been applied in these Financial Statements were in issue but not yet applicable:

	Effective date for annual
Accounting Standards	periods beginning on or after
IAS 1 Amendments: Disclosure of Accounting Policies	1 January 2023
IAS 8 Amendments: Definition of Accounting Estimates	1 January 2023

The Directors expect that the amendments listed above will have either no impact or that any impact will not be material to the Financial Statements of the Company in the next reporting periods.

Going concern

The Directors have a reasonable expectation that the Company has sufficient resources to continue in operational existence for the period to 31 March 2025, which is at least 12 months from the date of the approval of the Financial Statements. The Directors reviewed income forecasts covering the next two financial years, including interest and fees arising from the debt facility. The Directors considered the principal and emerging risks and uncertainties disclosed in the full Annual Report in particular those relating to the continuing ramifications of the Russian invasion of Ukraine.

At 31 March 2023, the Company had net current assets of £134,472,000 (31 March 2022: net current assets of £85,065,000). In addition, the Company holds a portfolio of largely liquid assets that, if required, can be sold to maintain adequate cash balances to meet its expected cash flows, including debt servicing. The repayment of the principal balance of the Company's £100 million fixed term loan does not fall due until 31 January 2025. The Directors also reviewed scenarios of a significant drop in value of the assets and noted that in those scenarios they would still be significantly higher than the Company's liabilities. They have also confirmed the resiliency of the Company's key service providers and are satisfied that their contingency plans and working arrangements are sustainable.

The Board has established a framework of prudent and effective controls performed periodically by the Audit and Risk Committee, which enable risks to be assessed and managed. Therefore, the going concern basis has been adopted in preparing the Company's Financial Statements. The Going Concern statement is set out in the full Annual Report.

Functional currency

As the Company is a UK investment trust, whose share capital is issued in the UK and denominated in sterling, the Directors consider that the functional currency of the Company is sterling.

Estimates, assumptions and judgements

Significant estimates and assumptions have been used to fair value the Level 3 Russian investments held by the Company. Further details are given in the fair value section of Note 15 and in the Report of the Audit and Risk Committee. There have been no other significant judgements, estimates or assumptions for the year.

In preparing these Financial Statements, the Directors have considered the impact of climate change as a principal risk as set out in the full Annual Report and have concluded that there was no further impact of climate change to be considered as the investments are valued based on market pricing. In line with UK adopted International Accounting Standards the investments are valued at fair value, which for the Company are the bid prices quoted on the relevant stock exchange at the date of the Statement of Financial Position and therefore reflect market participants' views of climate change risk on the investments held.

(b) Presentation of Statement of Comprehensive Income

In order to reflect better the activities of an investment trust company and in accordance with guidance issued by the AIC, supplementary information which analyses the Statement of Comprehensive Income between items of a revenue and capital nature has been presented within the Statement of Comprehensive Income. In accordance with the Company's Articles of Association, net capital profits may not be distributed by way of dividend. Additionally, the net revenue is the measure that the Directors believe appropriate in assessing the Company's compliance with certain requirements set out in Section 1158 of the Corporation Tax Act 2010.

(c) Income

Dividends receivable on equity shares are treated as revenue for the year on an ex-dividend basis. Where no ex-dividend date is available, dividends are recognised on their due date. Provision is made for any dividends not expected to be received.

Where the Company has elected to receive its dividends in the form of additional shares rather than in cash, the amount of the cash dividend is recognised in the revenue column of the Statement of Comprehensive Income. Any excess in the value of the shares received over the amount of the cash dividend forgone is recognised in the capital column of the Statement of Comprehensive Income.

Special dividends receivable are treated as repayment of capital or as revenue depending on the facts of each particular case. Interest on bank deposits is recognised on an accrual basis.

Stock lending income is shown gross of associated costs and recognised in revenue as earned.

(d) Expenses

All expenses are accounted for on an accrual basis and are charged through the revenue and capital sections of the Statement of Comprehensive Income according to the Directors' expectation of future returns except as follows:

- Expenses relating to the purchase or disposal of an investment are treated as capital. Details of transaction costs on purchases and sales of investments are disclosed in Note 8; and
- Expenses are treated as capital where a connection with the maintenance or enhancement of the
 value of the investments can be demonstrated. 70% of the annual AIFM fee has been allocated to
 the capital account.

(e) Finance costs

Finance costs relating to bank loans are accounted for on an accrual basis using the effective interest method in the Statement of Comprehensive Income according to the Directors' expectations of future returns. Finance costs relate to interest and fees on bank loans and overdrafts. 70% of the finance costs, except for interest and fees on overdrafts, have been allocated to the capital account.

(f) Taxation

The tax expense represents the sum of current and deferred tax. Tax receivables will be recognised when it is probable that the benefit will flow to the entity and the benefit can be reliably measured. In line with the recommendations of the SORP, the allocation method used to calculate tax relief on expenses presented against capital returns in the supplementary information in the Statement of Comprehensive Income is the "marginal basis". Under this basis, if taxable income is capable of being offset entirely by expenses presented in the revenue return column of the Statement of Comprehensive Income, then no tax relief is transferred to the capital return column.

Deferred taxation is recognised in respect of all taxable temporary differences that have originated but not reversed at the year-end date, where transactions or events that result in an obligation to pay more tax in the future or rights to pay less tax in the future have occurred at the year-end date. This is subject to deferred tax assets only being recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. Deferred tax assets and liabilities are measured at the rates applicable to the legal jurisdictions in which they arise.

Due to the Company's status as an investment trust company, and its intention to continue to meet the eligibility conditions of Section 1158 of the Corporation Tax Act 2010 and the ongoing requirements of The Investment Trust (Approved Company) (Tax) Regulations 2011, the Company has not provided deferred tax in respect of UK corporation tax on any capital gains and losses arising on the revaluation or disposal of investments. Where

appropriate, the Company provides for deferred tax in respect of overseas taxes on any capital gains arising on the revaluation of investments.

The carrying amount of deferred tax assets is reviewed at each year-end date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

(g) Investments held at fair value through profit or loss

The Company classifies its equity investments based on their contractual cash flow characteristics and the Company's business model for managing the assets. The Company's business is investing in financial assets with a view to profiting from their total return in the form of revenue and capital growth. This portfolio of financial assets is managed, and its performance evaluated on a fair value basis, in accordance with a documented investment strategy, and information about the portfolio is provided internally on that basis to the Company's Directors and other key management personnel. Equity investments do not meet the contractual cash flows test so are measured at fair value. Accordingly, upon initial recognition, all of the Company's non-current asset investments are held at "fair value through profit or loss". They are included initially at fair value, which is taken to be their cost excluding expenses incidental to the acquisition.

Subsequently, the investments are valued at "fair value", which is measured as follows:

The fair value of financial instruments at the year-end date is, ordinarily, based on the latest quoted bid price at, or before, the US market close (without deduction for any of the estimated future selling costs), if the instrument is held in active markets. This represents a Level 1 classification under IFRS 13. For all financial instruments not traded in an active market or where market price is not deemed representative of fair value, valuation techniques are employed to determine fair value. Valuation techniques include the market approach (i.e. using recent arm's length market transactions adjusted as necessary and reference to the market value of another instrument that is substantially the same) and the income approach (i.e. discounted cash flow analysis making use of available and supportable market data as possible).

Gains and losses arising from changes in fair value are included in the net profit or loss for the period as a capital item in the Statement of Comprehensive Income.

(h) Foreign currencies

Transactions involving foreign currencies are translated to sterling (the Company's functional currency) at the spot exchange rates ruling on the date of the transactions. Assets and liabilities in foreign currencies are translated at the rates of exchange at the year-end date. Foreign currency gains and losses are included in the Statement of Comprehensive Income and allocated as capital or income depending on the nature of the transaction giving rise to the gain or loss.

(i) Financial instruments

Cash comprises cash in hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash that are subject to an insignificant risk of changes in value.

Bank loans are classified as financial liabilities at amortised cost. They are initially measured as the proceeds net of direct issue costs and subsequently measured at amortised cost. Interest payable on the bank loan is accounted for on an accrual basis in the Statement of Comprehensive Income. The amortisation of direct issue costs is accounted for on an accrual basis in the Statement of Comprehensive Income using the effective interest method.

(j) Share capital and reserves

Equity Share Capital - represents the nominal value of the issued share capital. This reserve is undistributable.

Capital Redemption Reserve - represents the nominal value of shares repurchased and cancelled. This reserve is undistributable.

Capital Reserve - gains and losses on realisation of investments; changes in fair value of investments which are readily convertible to cash, without accepting adverse terms; realised exchange differences of a capital nature; changes in the fair value of investments that are not readily convertible to cash, without accepting adverse terms; and the amounts by which other assets and liabilities valued at fair value differ from their book value are within this reserve. Additionally, 70% of the annual AIFM fee and finance costs are charged to this reserve in accordance with accounting policies 1(d) and 1(e).

Purchases of the Company's own shares are funded from the realised component of the Capital Reserve. The Company's Articles of Association preclude it from making any distribution of capital profits by way of dividend.

If treasury shares are subsequently cancelled, the nominal value is transferred out of Equity Share Capital and into the Capital Redemption Reserve.

Special Distributable Reserve - reserve created upon the cancellation of the Share Premium Account and Capital Redemption Reserve. This reserve is fully distributable.

Revenue Reserve - represents net income earned that has not been distributed to shareholders. This reserve is fully distributable.

Income recognised in the Statement of Comprehensive Income is allocated to applicable reserves in the Statement of Changes in Equity.

2 Income

		2023		2	022

On 1 October 2021, FTITML replaced Franklin Templeton International Services S.à r.l as the Company's AIFM and Company Secretary. The contract with FTITML may be terminated at any date by either party giving one year's notice of termination.

The AIFM fee is paid monthly and based on the month end total net assets of the Company. From 1 July 2022, the AIFM fee was reduced to 1% of the first £1 billion of net assets, 0.75% of net assets between £1 billion and £2 billion, and 0.50% of net assets over £2 billion. The previous fee structure was 1% of net assets up to £1 billion and 0.80% of net assets above £1 billion.

70% of the annual AIFM fee has been allocated to the capital account.

- Dividends not subject to corporation tax	(13,152)	(7,924)
- Overseas capital gains tax paid	2,693	1,352
- Excess management expenses	2,539	3,101

As at 31 March 2023 the Company had unutilised management expenses and non-trade deficits of £295.5 million carried forward (2022: £284.4 million). These balances have been generated because a large part of the Company's income is derived from dividends which are not taxed. Based on current UK tax law, the Company is not expected to generate taxable income in a future period in excess of deductible expenses for that period and, accordingly, is unlikely to be able to reduce future tax liabilities by offsetting these excess management expenses. These excess management expenses are therefore not recognised as a deferred tax asset of £73.9 million (2022: £54.0 million) based on a prospective corporation tax rate of 25% (2022: 19%). The UK corporation tax rate is currently 25% with effect from 1 April 2023.

Revolving credit facility

On 31 January 2020, the Company entered into a £120 million multi-currency unsecured revolving credit facility (the "facility") for a period of three years with The Bank of Nova Scotia, London Branch. The agreement was amended on 31 January 2023 extending the maturity date to 30 January 2024. The commitment fee on unutilised commitments was also amended to a flat fee of 0.40% per annum. The previous fee structure was 0.40% per annum charged on undrawn balances in excess of £60 million and 0.35% per annum on any undrawn portion below £60 million.

Under the facility balances can be drawn down in GBP, USD or CNH. The interest margin was increased to 1.20% from 1.125% following the amendment of the agreement as follows: USD drawdowns bear interest at 1.20% per annum over the daily secured overnight financing rate ("SOFR") administered by the Federal Reserve Bank of New York, while any GBP drawdowns bear interest at 1.20% per annum over the daily sterling overnight index average ("SONIA") published by the Bank of England. The rate for any CNH drawdowns is 1.20% per annum over the Hong Kong Interbank Offered Rate. GBP drawdowns were also charged a credit adjustment spread, but this has been removed following the amendment of the agreement on 31 January 2023.

Under the terms of the facility, the net assets shall not be less than £1,015 million and the adjusted net asset coverage to all borrowings shall not be less than 3.5:1.

On 19 October 2022, the Company fully repaid the £50 million revolving facility drawdown (2022: £50 million was outstanding under the revolving credit facility).

Any facility drawdown is shown at amortised cost and revalued for exchange rate movements. Any gain or loss arising from changes in exchange rates is included in the capital reserves and shown in the capital column of the Statement of Comprehensive Income. Interest costs are charged to capital (70%) and revenue (30%) in accordance with the Company's accounting policies.

11 Other payables falling due after more than one year

	2023	2022
	Book value	Book value
	£'000	£'000
Fixed term loan	100,000	100,000
	100,000	100,000

Fixed term loan

On 31 January 2020, the Company entered into a term loan (the "term loan") for a period of five years with Scotiabank Europe plc for £100 million. With effect from 28 September 2022, the term loan was transferred by novation from Scotiabank Europe plc to The Bank of Nova Scotia, London Branch. All other contractual terms and conditions remain the same.

The term loan bears interest at the fixed rate of 2.089%. Under the conditions of the term loan, the net assets shall not be less than £1,015 million and the adjusted net asset coverage to all borrowings shall not be less than 3.5:1.

The facility is shown at amortised cost. Interest costs are charged to capital (70%) and revenue (30%) in accordance with the Company's accounting policies.

Ordinary shares held in treasury	£'000	Number	£'000	Number
Opening ordinary shares of 5 pence	5,191	103,825,895	5,191	103,825,895 ^(a)
Closing ordinary shares of 5 pence	5,191	103,825,895	5,191	103,825,895
Total ordinary shares in issue and held in				_
treasury at the end of the year	63,148	1,262,964,267	64,136	1,282,722,880

(a) Comparative figures for the year ended 31 March 2022 have been retrospectively adjusted following the sub-division of each existing ordinary share of 25 pence into five ordinary shares of 5 pence each on 26 July 2021.

The Company's shares (except those held in treasury) have unrestricted voting rights at all general meetings, are entitled to all of the profits available for distribution by way of dividend and are entitled to repayment of all of the Company's capital on winding up.

During the year, 19,758,613 shares were bought back for cancellation at a cost of £29,207,000 (2022: 2,331,670 shares were bought back for cancellation at a cost of £3,604,000). All shares bought back in the year were cancelled, with none being placed in treasury (2022: no shares were placed into treasury).

13 Dividends

	2023		2022	
	Rate		Rate	
	(pence)	£'000	(pence)	£'000
Declared and paid in the financial year				
Dividend on shares:

Interim dividends for the six-month periods ended 30				
September 2022 and 30 September 2021	2.00	23,261	1.00	11,811
Total	4.80	56,202	3.80	44,885
Proposed for approval at the Company's AGM				
Dividend on shares:				
Final dividend for the year ended 31 March 2023	3.00	34,599		

⁽a) Comparative figures for the year ended 31 March 2022 have been retrospectively adjusted following the sub-division of each existing ordinary share of 25 pence into five ordinary shares of 5 pence each on 26 July 2021.

Dividends are recognised when the shareholders' right to receive the payment is established. In the case of the final dividend, this means that it is not recognised until approval is received from shareholders at the AGM. The proposed final dividend of 3.00 pence per share will be funded from the revenue reserve and the payment of this dividend will not threaten the going concern or viability of the Company.

14 Related party transactions

There were no transactions with related parties, other than the fees paid to the Directors and the AIFM during the financial years ended 31 March 2023 and 31 March 2022 respectively, which have a material effect on the results or the financial position of the Company. Details of fees paid to the Directors are included in the full Annual Report and details of the fee paid to the AIFM are included in the full Annual Report.

15 Risk management

In pursuing the Company's objective, as set out in the full Annual Report, the Company holds a number of financial instruments which are exposed to a variety of risks that could result in either a reduction in the Company's net assets or a reduction in the profits available for dividends.

The main risks arising from the Company's financial instruments are investment and concentration risk, market risk (which comprises market price risk, foreign currency risk and interest rate risk), liquidity risk and counterparty and credit risk.

The objectives, policies and processes for managing these risks, and the methods used to measure the risks, are set out below. These policies have remained unchanged since the beginning of the year to which these Financial Statements relate.

Investment and concentration risk

The Company may invest a greater portion of its assets than the benchmark in the securities of one issuer, securities of a particular country, or securities within one sector. As a result, there is the potential for an increased concentration of exposure to economic, business, political or other changes affecting similar issues or securities, which may result in greater fluctuation in the value of the portfolio. Investment risk and a certain degree of concentration risk is a known and necessary effect of the stated investment approach in line with the investment policy. The Directors regularly review the portfolio composition and asset allocation and discuss related developments with the Investment Manager. Security, country, and sector concentrations are monitored by the Manager's risk and compliance teams on a regular basis and any concerns are highlighted to the Investment Manager for remedial action and brought to the attention of the Directors.

Market price risk

Market risk arises mainly from uncertainties about future prices of financial instruments held. It represents the potential loss that the Company might suffer through holding market positions in the face of price movements.

The Directors meet quarterly to consider the asset allocation of the portfolio and to discuss the risks associated with particular securities, countries or sectors. The Investment Manager selects securities in the portfolio in accordance with the investment policy, and the overall asset allocation parameters described above, and seeks to ensure that individual stocks also meet the intended risk/reward profile.

The Company does not use derivative instruments to hedge the investment portfolio against market price risk as, in the Investment Manager's opinion, such a process could result in an unacceptable level of cost and/or a reduction in the potential for capital growth.

100% (2022: 100%) of the Company's investment portfolio is listed on stock exchanges. If share prices as at 31 March 2023 had decreased by 30% (2022: 30% decrease) with all other variables remaining constant, the Statement of Comprehensive Income capital return and the net assets attributable to equity shareholders would have decreased by £597,833,000 (2022: £637,359,000). A 30% increase (2022: 30% increase) in share prices would have resulted in a proportionate equal and opposite effect on the above amounts, on the basis that all other variables remain constant.

Foreign currency risk

Currency translation movements can significantly affect the income and capital value of the Company's investments, as the majority of the Company's assets and income are denominated in currencies other than sterling, which is the Company's functional currency.

The Investment Manager has identified three principal areas where foreign currency risk could affect the Company:

- Movements in rates affect the value of investments;
- · Movements in rates affect short-term timing differences; and
- Movements in rates affect the income received.

The Company does not hedge the sterling value of investments that are priced in other currencies. The Company may be subject to short-term exposure to exchange rate movements, for instance where there is a difference between the date on which an investment purchase or sale is entered into and the date on which it is settled.

The Company receives income in currencies other than sterling and the sterling values of this income can be affected by movements in exchange rates. The Company converts all receipts of income into sterling on or near the date of receipt. However, it does not hedge or otherwise seek to avoid rate movement risk on income accrued but not received.

The fair value of the Company's items that have foreign currency exposure at 31 March are shown below:

2023

2022

Currency	Trade and other receivables £'000	Cash at bank £'000	Trade, bank loans, and other payables £'000	Total net foreign currency exposure £'000	Investment at fair value through profit or loss £'000
Korean won	6,523	-	-	6,523	486,879
Hong Kong dollar	19	-	(219)	(200)	376,797
Taiwan dollar	3,791	2,069	(2,069)	3,791	363,488
US dollar	53	-	(1,000)	(947)	252,082
Indian rupee	-	323	-	323	188,326
Other	6,473	116	(23)	6,566	427,793

The above tables are based on the currencies of the country where shares are listed rather than the underlying currencies of the countries where the companies earn revenue.

As at 31 March 2023, 68.8% (2022: 65.4%) of the investments shown as US dollar and Hong Kong dollar are Chinese companies with exposure to the Chinese yuan. The total exposure to Chinese yuan was £616.3 million (2022: £604.9 million), out of which £109.4 million (2022: £158.5 million) were investments denominated in Chinese yuan.

Foreign currency sensitivity

The following table illustrates the foreign currency sensitivity on the revenue and capital return. The revenue return impact represents the impact on total income (which is mainly comprised of dividend income) had sterling strengthened relative to the top 5 currencies by 10% throughout the year. The capital return impact represents the impact of the financial assets and liabilities of the Company if sterling had strengthened by 10% relative to the top 5 currencies on the reporting date. With all other variables held constant, the revenue and capital return would have decreased by the below amounts.

	2023	2022		
	Revenue Return £'000	Capital Return £'000	Revenue Return £'000	Capital Return £'000
Hong Kong dollar	657	41,990	482	37,660
Korean won	1,008	40,153	1,083	48,688
Taiwan dollar	1,226	31,791	955	36,349
US dollar	917	23,258	994	25,108
Indian rupee	241	22,604	169	18,865
Total	4,049	159,796	3,683	166,670

A 10% weakening of sterling against the above currencies would have resulted in an equal and opposite effect on the above amounts.

Interest rate risk

The Company is permitted to invest in interest bearing securities. Any change to the interest rates relevant to particular securities may result in income either increasing or decreasing, or the Investment Manager being unable to secure similar returns on the expiry of contracts or the sale of securities. In addition, changes to prevailing rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held and the interest payable on bank loans when interest rates are reset.

The fixed term loan incurs a fixed rate of interest and is carried at amortised cost rather than fair value. Hence, movements in interest rates will not affect net asset values, as reported under the Company's accounting policies.

Interest rate risk profile

The exposure of the financial assets and liabilities to floating interest rate risks at 31 March is shown below:

	2023	2022
	£'000	£'000
Cash	132,988	125,855
Revolving credit facility	-	(50,000)
Net exposure at year end	132,988	75,855

Exposures vary throughout the year as a consequence of changes in the make-up of the net assets of the Company. Cash balances are held on call deposit and earn interest at the bank's daily rate. The Company's net assets are sensitive to changes in interest rates on borrowings. There was no exposure to fixed interest investment securities during the year or at the year end.

Interest rate sensitivity

If the above level of cash was maintained for a year (2022: level of cash and revolving credit facility were maintained for a year) and interest rates were 100 basis points higher or lower, the net profit after taxation would be impacted by the following amounts:

	2023		2022	
	100 basis points increase	points points 100 basis po	100 basis points decrease	
	in rate £'000	in rate £'000	in rate £'000	in rate £'000
Revenue	1,330	(1,330)	1,109	(1,109)
Capital	-	-	(350)	350
Total	1,330	(1,330)	759	(759)

Liquidity risk

The Company's assets comprise mainly securities listed on the stock exchanges of emerging economies. Liquidity can vary from market to market and some securities may take a significant period to sell. As a closed ended investment trust, liquidity risks attributable to the Company are less significant than for an open-ended fund.

The risk of the Company not having sufficient liquidity at any time is not considered by the Board to be significant, given the large number of quoted investments held in the portfolio and the liquid nature of the portfolio of investments.

The Investment Manager reviews liquidity at the time of making each investment decision and monitors the evolving liquidity profile of the portfolio regularly.

The below table details the maturity profile of the Company's financial liabilities as at 31 March 2023, based on the earliest date on which payment can be required and current exchange rates as at the balance sheet date:

	In one year or less	More than one year and not later than two years	More than two years and not later than three years	More than three years	Total
As at 31 March 2023	£'000	£'000	£'000	£'000	£'000
Fixed term loan	2,089	102,095	-	-	104,184
Revolving credit facility	401	-	-	-	401
Other payables	6,059	-	-	-	6,059
Total	8,549	102,095	-	-	110,644

As at 31 March 2022	In one year or less £'000	More than one year and not later than two years £'000	More than two years and not later than three years £'000	More than three years £'000	Total £'000
		£ 000		£ 000	
Fixed term loan	2,089	2,089	102,095	-	106,273
Revolving credit facility	51,117	-	-	-	51,117
Other payables	7,117	-	-	=	7,117
Total	60,323	2,089	102,095	-	164,507

Counterparty and credit risk

Certain transactions in securities that the Company enters into expose it to the risk that the counterparty will not deliver the investment (purchase) or cash (in relation to sale or declared dividend) after the Company has fulfilled its responsibilities. The Company only buys and sells through brokers which have been approved by the Investment Manager as an acceptable counterparty. In addition, limits are set as to the maximum exposure to any individual broker that may exist at any time. These limits are reviewed regularly. The amounts under trade and other receivables and cash and cash equivalents shown in the Statement of Financial Position represent the maximum credit risk exposure at the year end.

The Company has an ongoing contract with its custodian (JPMorgan Chase Bank) for the provision of custody services.

As part of the annual risk and custody review, the Company reviewed the custody services provided by JPMorgan Chase Bank and concluded that, while there are inherent custody risks in investing in emerging markets, the custody network employed by TEMIT has appropriate controls in place to mitigate those risks, and that these controls are consistent with recommended industry practices and standards.

Securities held in custody are held in the Company's name or to its accounts. Details of holdings are received and reconciled monthly. Cash is actively managed by Franklin Templeton and is typically invested in overnight time deposits in the name of TEMIT with an approved list of counterparties. Any excess cash not invested will remain in a JPMorgan Chase interest bearing account. There is no significant risk on debtors and accrued income or tax at the year end.

During the year, the Company participated in a securities lending programme through JPMorgan as the lending agents. All securities on loan are Level 1 financial instruments, and their value is determined by reference to the trading prices on the stock market. As at 31 March 2023, the market value of the securities on loan and the corresponding collateral received were as follows:

	31 March 2023			h 2022
		Market value		
	of securities	of collateral	of securities	of collateral
	on loan	received	on loan	received
Counterparty	£'000	£'000	£'000	£'000
Merrill Lynch International	543	739	2,908	4,047
Citigroup	17	22	382	558
Total	560	761	3,290	4,605

The maximum aggregate value of securities on loan at any time during the year was £9,470,125. Full details of the collateral received is noted in the full Annual Report.

Fair value

Fair values are derived as follows:

- Where assets are denominated in a foreign currency, they are converted into the sterling amount using period end rates of exchange;
- Investments held by the Company on the basis set out in the accounting policies included in Note 1;
- Cash at the denominated currency of the account; and
- Other financial assets and liabilities at the carrying value which is a reasonable approximation of the fair value.

The tables below analyse financial instruments carried at fair value by valuation method. The different levels have been defined as follows:

Level 1 Quoted prices (unadjusted) in active markets for identical assets and liabilities;

Level 2 Inputs other than quoted prices included with level 1 that are observable for the asset or liability, either directly (prices) or indirectly (derived from prices); and

Level 3 Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The hierarchy valuation of listed investments through profit and loss are shown below:

		31 March 2023			31 March 2022			2	
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total	
	£'000	£'000	£'000	£'000	£'000	£'000	£'000	£'000	
Listed investments	1,992,775	-	_(a)	1,992,775	2,103,727	-	20,803 ^{(a)(b)} 2	2,124,530	

- (a) Russian investments in LUKOIL, Sberbank of Russia, and Yandex continue to be fair valued at zero as at 31 March 2023 as a result of trading being suspended on international stock exchanges in February 2022. These investments were transferred from Level 1 to Level 3 during the financial year ended 31 March 2022.
- Trading in Brilliance China Automotive shares on the Hong Kong stock exchange was suspended from 31 March 2021 and, as a result, the stock was fair valued using a beta model (which applied an index movement to observed trade prices) until 5 October 2022 when trading resumed. The fair value as at 31 March 2022 was £20,803,000 and the stock was disclosed as Level 3. After the shares resumed trading, the stock has been transferred from Level 3 to Level 1.

Given the current market conditions and the inability of the Company to access the local Moscow equity markets and the very limited access to the over-the-counter market, the Russian investments continued to be valued based on a liquidity discount of 100% to the last traded price for an exit price of zero.

The following table presents the movement in Level 3 investments for the year ended:

	31 March 2023	31 March 2022
	000£	£000
Opening balance	20,803	-

Transfers from Level 1 into Level 3	-	149,593
Transfers from Level 2 into Level 3	-	50,954
Transfers from Level 3 into Level 1	(17,734)	
Disposal proceeds - sale of Level 3 assets(a)	(1,613)	
Net losses on investments at fair value	(1,456)	(179,744)
Level 3 closing balance	-	20,803

(a) Represents the sale of the holdings in Gazprom on 25 April 2022 for £617,000, and the sale of VK on 9 March 2023 for £996,000.

The fixed term loan is shown at amortised cost within the Statement of Financial Position. If the fixed term loan was shown at fair value the impact would be:

31 March 2023 31 March 2022

	£000	£000
Fixed term loan at amortised cost	100,000	100,000
Fixed term loan at fair value	94,470	100,390
Increase/(decrease) in net assets	5,530	(390)

The fair value of the fixed term loan included in the table above is calculated by aggregating the expected future cash flows which are discounted at a rate comprising the sum of SONIA rate plus a static spread. The fixed term loan at fair value is considered to be classed as Level 2.

16 Significant holdings in investee undertakings

As at 31 March 2023 and 2022, TEMIT had no significant holdings of 3% or more of any issued class of security within the portfolio whose shares are admitted to trading.

17 Contingent liabilities

No contingent liabilities existed as at 31 March 2023 or 31 March 2022.

18 Contingent assets

19 Financial commitments

No financial commitments existed as at 31 March 2023 or 31 March 2022.

20 Capital management policies and procedures

The Company's objective is to provide long-term capital appreciation for private and institutional investors seeking exposure to global emerging markets, supported by a culture of both strong customer service and corporate governance.

The Board monitors and regularly reviews the structure of the Company's capital on an ongoing basis. This review includes the investment performance and outlook, discount management mechanisms including share buybacks, gearing and the extent to which revenue in excess of that which is required to be distributed under the investment trust rules should be retained.

The Company's investment policy allows borrowing of up to 20% of net assets, measured at the time of borrowing.

As at 31 March 2023, the Company had share capital and reserves of £2,017,503,000 (31 March 2022: £2,100,390,000). The Company's policies and procedures for managing capital are consistent with the previous year.

21 Events after the reporting period

The only material post balance sheet event is in respect of the proposed final dividend, which is disclosed in Note 13.

The statutory accounts for the period ended 31 March 2023 received an audit report which was unqualified, did not include a reference to any matters to which the Auditors drew attention by way of emphasis without

qualifying the report, and did not contain statements under section 498(2) and (3) of the Companies Act 2006, and will be delivered to the Registrar of Companies.

The Annual Report and Accounts will be sent to Shareholders shortly. Copies will be uploaded and available for viewing on the National Storage Mechanism, copies will also be posted to the website www.temit.co.uk and may also be requested during normal business hours from Client Dealer Services at Franklin Templeton Investment Management Limited on freephone 0800 305 306.
