(g) WIA's EBITDAF before subvention payment is presented to provide further information on its operating performance. The Board and management consider it is a useful non-GAAP financial measure for investors as it shows the contribution to earnings prior to non-cash items such as depreciation and amortisation, impairment losses, fair value adjustments, and before the cost of financing, subvention payments and taxation. EBITDAF before subvention payment is used by management in conjunction with other performance measures to monitor financial performance. It is calculated by adjusting net profit after taxation for the year for subvention payments and for items that are nonoperating such as interest, taxation, depreciation, revaluations, and impairments. The adjustments in the reconciliation table below have been subject to audit and are set out in Note A1 to the audited financial statements of WIA.

	2024 \$000	2023 \$000
Net profit/(loss) after taxation <sup>1</sup>	(28,844)	25,243

The net profit after taxation has been prepared in accordance with New Zealand generally accepted accounting
practice and the New Zealand equivalents to International Financial Reporting Standards. The reported profit
information has been taken from the audited financial statements of WIA.
