The Company will not apply to ASX for Official Quotation of the Partly Paid Shares, however the Company will apply to the ASX for Official Quotation of the Shares allotted pursuant to full payment of the uncalled amount on the Partly Paid Shares if the Company's Shares are listed on the ASX at that time.

4.12 Issue of Securities

The Shares, New Options and Partly Paid Shares will be issued and an uncertificated holding statement sent to the Applicant as soon as practicable after the Closing Date. The statement will be posted to the Applicant at the address appearing on their Application Form.

No Shares, New Options or Partly Paid Shares will be allotted on the basis of this Prospectus later than 13 months after the date of this Prospectus.

The company retains an absolute discretion in allocating Shares, New Options and Partly Paid Shares under the Offer and reserves the right to allot to any Applicant a lesser number of Shares, New Options or Partly Paid Shares than the number for which the Applicant applies, or to reject an Application. Where the number of Shares, New Options or Partly Paid Shares is less than the number applied for, or where no allotment is made, surplus application monies will be refunded without interest to the Applicant as soon as practicable after the Closing Date. The acceptance of Applications and the allocation of Shares, New Options and Partly Paid Shares are at the absolute discretion of the Directors.

Pending the issue and allotment of the Shares, New Options and Partly Paid Shares or payment of refunds (if applicable) pursuant to this Prospectus, all application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on such bank account and each Applicant waives the right to claim any such interest.

4.13 Privacy

You can access, correct and update the personal information that we hold about you. Please contact the Share Registry if you wish to do so.

Collection, maintenance and disclosure of certain personal information is governed by legislation including the Privacy Act 1988 (as amended), the Corporations Act and certain rules such as the ASTC Settlement Rules. You should note that if you do not provide the information required on the relevant Application Forms, the Company may not be able to accept or process your Application.

SECTION 5 PURPOSE AND EFFECT OF THE ISSUE

5.1 Purpose of the Issue

The purpose of the Issue is to raise \$1,887,000 (before expenses) to further the Company's exploration activities, the identification of any potential new projects and to provide working capital.

5.2 Use of Funds

Pursuant to the Issue, the Company is seeking to raise \$1,887,000. It is proposed that these funds will be utilised as follows:

Expenses of the Issue	130,000
Working capital, including identification of new projects	<u>1,757,000</u>
	<u>\$1,887,000</u>

The information set out in the above table is a statement of intention as at the date of this Prospectus. The exact quantum of funds expended by the Company on any particular item will be dependant on many factors that cannot be ascertained with complete accuracy at the date of this Prospectus.

5.3 Principal Effects

The principal effects on the Company of the Issue are as follows:

- (a) The Company will issue 94,000,000 Shares and the number of Shares on issue will increase from 203,550,002 to 297,550,002.
- (b) The Company will issue 94,000,000 New Options.
- (c) The Company will issue 70,000,000 Partly Paid Shares. There are no Partly Paid Shares on issue at present.
- (d) Following the issue of Shares, New Options and Partly Paid Shares, the cash reserves of the Company will increase by approximately \$1,887,000 (less expenses of the Issue which are estimated to be \$130,000).
- (e) If all the 5,500,000 New Options currently on issue and the 94,000,000 New Options proposed to be issued are ultimately exercised and the Partly Paid Shares are paid up in full, the number of Shares on issue will increase by 169,500,000. On the basis of the current Share capital and including the issue of Shares pursuant to the Share Placement Issue this will increase the number of Shares on issue from 297,550,002 to 467,050,002. The Company will receive \$0.035 for each New Option exercised and \$0.0199 for each Partly Paid Share paid up, and assuming all New Options are exercised and all Partly Paid Shares are paid up, this will raise \$4,875,500. In respect to the New Options, the likelihood of the Company raising this additional capital through the exercise of the New Options is dependent on the price of the Shares from time to time up to the expiry date of the New Options.

5.4 Pro-forma Balance Sheet

The principal financial effect of the Issue will be to increase the cash reserves of the Company by approximately \$1,757,000 (net of expenses of the Issue). Set out below is an unaudited pro-forma consolidated balance sheet of the Company after the completion of the Issue prepared on the basis of the audited accounts of the Company as at 30 June 2009.

SECTION 6 RISK FACTORS

6.1 Introduction

This Section identifies the areas the Directors regard as the major risks associated with participation in the Share Placement Issue and the Partly Paid Share Issue. Investors should be aware that an investment in the Company involves many risks, which may be higher than the risks associated with an investment in other companies. Intending investors should read the whole of this Prospectus in order to fully appreciate such matters and the manner in which the Company intends to operate before any decision is made to apply for Shares and New Options or Partly Paid Shares.

There are numerous widespread risks associated with investing in any form of business and with investing in the share market generally. There is also a range of specific risks associated with the Company's business and its involvement in the mining industry. These risk factors are largely beyond the control of the Company and its Directors because of the nature of the proposed business of the Company. The following summary, which is not exhaustive, represents some of the major risk factors which potential investors need to be aware of.

6.2 Risk Factors

(a) General

The Shares, New Options and Partly Paid Shares offered under this Prospectus are considered speculative, and involve investors being exposed to risk. The Directors recommend potential applicants examine the contents of this Prospectus and consult their professional advisers before deciding whether to apply for Shares and New Options or Partly Paid Shares offered pursuant to this Prospectus.

The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Company's quoted securities.

(b) Economic Risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

Further, share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- general economic outlook;
- interest rates and inflation rates;
- currency fluctuations;
- changes in investor sentiment toward particular market sectors;
- the demand for, and supply of, capital; and
- terrorism or other hostilities.

(c) Market Conditions

The market price of quoted securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(d) *Exploration and Mining Risks*

The business of mineral exploration and mining involves risks and hazards. For example, in an exploration context no assurance can be given that ore bodies will be detected with preferred or desirable tonnages or grades. High risk and substantial expense can be incurred without the requisite or expected degree of reward. Even if commercial quantities of ore are discovered unforeseen risks can arise in the development and production phase including mining or processing issues, environmental hazards, industrial accidents, labour forced disruption, the unavailability of materials and equipment, unusual or unexpected geological formation, pit failures, changes in the regulatory environment and weather conditions. Such occurrences could result in damage to, or destruction of, mineral properties or production facilities, personal injury or death, environmental damage, delays in mining, monetary losses and possible legal liability.

(e) *Uncertainty of Exploration and Development Programs*

Exploration for minerals is highly speculative in nature, involves many risks and is frequently unsuccessful. Among the many uncertainties inherent in any exploration and development program are the location of ore bodies, the development of appropriate metallurgical processes, the receipt of necessary governmental permits, access to permits and the construction of mining and processing facilities. Assuming the discovery of an economic deposit, several years may lapse from the initial phases of drilling until commercial operations commence and, during such time, the economic feasibility of production may change. Accordingly, the Company's exploration and development program may not result in any new economically viable mining operations.

(f) *Resource Estimates*

Resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. Actual ore reserves and resources (including grade and quantity) may differ from those estimated at an earlier time which may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

(g) *Tenement Title Risk*

Interests in exploration and mining tenements in Australia are governed by State and Territory legislation, which covers the granting of leases and licences. Each lease or licence is for a specific term and carries with it annual expenditure, reporting, compliance or compulsory reduction conditions. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure requirements. If a tenement is not renewed for any reason, the Company may suffer significant damage through loss of opportunity to discover and develop and material resources on that tenement.

All of the tenements in which the Company has an interest will be subject to application for renewal from time to time and the renewal term is subject to applicable legislation. However, the Directors are not aware of any reason why renewal of the term of any tenement should not be granted.

(h) *Volatility of Demand and Prices*

There is no assurance that the discovery of significant mineral ore bodies will be accompanied by (or at least by the time of production) the existence of a profitable market for sales. For a variety of reasons, prices may experience strong falls or volatility in prices now or during future exploration or production.

(i) Country Risk

The Company holds assets located in Western Australia but may acquire assets in foreign countries in the future. There are risks associated with exploration and mining activities and investments generally in foreign countries that may adversely affect the business, costs, expenditure and profitability of the Company. These risks include:

- changes in foreign country government, government policies, regulatory regime, economic change, civil instability, attitudes towards foreigners or their businesses in their country;
- land access and environmental regulation may be adverse or beneficial; and
- the applicable legal regime including investment into and repatriation of revenue out of the foreign country.

(j) Environmental Risks

The Company's projects are subject to relevant environmental legislation and will themselves have varying levels and types of potential impact on the natural environment.

(k) Competition for Projects

The Company competes with other companies, including mineral exploration and production companies. Some of these companies have greater financial and other resources than the Company. As a result, such companies may be in a better position to compete for future business opportunities and there can be no assurance that the Company can effectively compete with these companies. In the event that the Company is not able to secure new projects or business opportunities this may have an adverse effect on the operations of the Company, its possible future profitability and the trading price of its securities, including the Shares, New Options and the Partly Paid Shares offered under this Prospectus.

(l) Insurance Risk

Insurance against all risks associated with mineral exploration is not always available or affordable. The Company intends to maintain insurance where it is considered appropriate for its needs; however, it will not be insured against all risks either because appropriate cover is not available or because the Directors consider the required premiums to be excessive having regard to the benefits that would accrue.

(m) Commodity Price Volatility and Exchange Rate Risk

If the Company achieves success leading to mineral production, the revenue it will derive through the sale exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

(n) Reliance on Key Management

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

(o) ***Additional Requirements for Capital***

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, it is likely that the Company will require further financing in addition to amounts raised under this Prospectus. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be.

(p) ***Access to Land***

Significant delays may be experienced in gaining access to privately owned freehold or leasehold land. Delays may be caused by weather, deference to landholders' activities such as cropping, harvesting, calving and mustering, and other factors.

(q) ***Cultural Heritage***

Delays may be experienced if evidence of Aboriginal cultural heritage exists on any land to which the Company requires access.

When exercising a right or permission for access to any land, it is an offence, to disturb physical evidence of human occupation of prehistoric or historic significance without statutory permission. This restriction applies to any activity including minerals exploration and production.

The Company has not undertaken the comprehensive research, investigations or enquiries which would be necessary to enable it to form an opinion with certainty as to whether any such evidence exists on any land covered by Aurium's wholly-owned or optioned tenements.

6.3 Speculative Nature of Investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Shares, New Options and the Partly Paid Shares offered under this Prospectus.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Shares and New Options or Partly Paid Shares in the Company.

SECTION 7 RIGHTS AND LIABILITIES ATTACHING TO SHARES, OPTIONS AND PARTLY PAID SHARES

7.1 Rights and Liabilities Attaching to Shares

The Shares issued pursuant to this Prospectus or on the exercise of New Options or payment in full of the Partly Paid Shares will rank *pari passu* with all other Shares presently on issue or on issue at the date of the exercise of the New Option or payment in full of the Partly Paid Shares. The Shares when issued will be credited as fully paid. The following is a broad summary (though not necessarily an exhaustive or definitive statement) of the rights and liabilities attaching to all Shares:

a) Voting

At a general meeting, every member present in person or by proxy, attorney or representative has one vote on a show of hands and on a poll, one vote for each Share held. On a poll, partly paid shares confer a fraction of a vote *pro-rata* to the amount paid on the share.

b) General Meetings

Each member is entitled to receive notice of and, except in certain circumstances, to attend and vote at general meetings of the Company and receive all financial statements, notices and other documents required to be sent to members under the Constitution of the Company, the ASX Listing Rules or the Corporations Act.

c) Dividends

Subject to any special terms and conditions of issue, the profits of the Company which the Directors from time to time determine to distribute by way of dividend are divisible amongst the members in proportion to the amounts paid up on the shares held by them.

d) Transfer of Shares

Holders of Shares may transfer them by a proper transfer affected in accordance with the business rules of the Security Clearing House and the ASX and as otherwise permitted by the Corporations Act. The Directors may decline to register a transfer of Shares where the transfer is not in registrable form or where the refusal to register the transfer is permitted under the ASX Listing Rules. If the Directors decline to register a transfer the Company must give the party lodging the transfer written notice of the refusal and the reason for refusal.

e) Winding Up

Subject to any special or preferential rights attaching to any class or classes of shares, members will be entitled in a winding up to share in any surplus assets of the Company in proportion to the shares held by them irrespective of the amount paid up or credited as paid up, less any amounts which remain unpaid on these shares at the time of distribution.

f) Dividend reinvestment plan

The Constitution contains a provision allowing Directors to implement a dividend reinvestment plan.

g) *Alteration of Constitution*

The Constitution can only be amended by a special resolution passed by at least three quarters of members present and voting at a general meeting of the Company. The Company must give at least 28 days written notice of its intention to propose a resolution as a special resolution.

h) *Share buy backs*

The Company may buy back shares in itself in accordance with the provisions of the Corporations Act.

i) *Variation of Rights*

Pursuant to Section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of shareholders vary or abrogate the rights attaching to shares. If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or nor the Company is being wound up may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution of the Company, a copy of which can be inspected, free of charge, at the Company's registered office, Level M, 35-37 Havelock Street, West Perth, Western Australia, during normal business hours.

7.2 Terms and conditions of New Options

The terms and conditions of the Options are as follows:

- (a) Each Option entitles the holder to subscribe for and be allotted one ordinary fully paid share in the company.
- (b) The Options are exercisable at \$0.035 each.
- (c) The Options will expire on 30 September 2012 (the "**Expiry Date**").
- (d) The Options are exercisable at any time on or prior to the Expiry Date by notice in writing to the directors of the company accompanied by payment of the exercise price.
- (e) The Options are freely transferable.
- (f) All shares issued upon exercise of the Options will rank pari passu in all respects with the company's then existing ordinary fully paid shares. The company will apply for Official Quotation by the ASX of all shares issued upon exercise of the Options.
- (g) There are no participating rights or entitlements inherent in the Options and holders will not be entitled to participate in new issues of capital offered to shareholders during the currency of the Options. However, if from time to time on or prior to the Expiry Date the company makes an issue of new shares to the holders of ordinary fully paid shares, the company will send a notice to each holder of Options at least nine (9) Business Days before the record date referable to that issue. This will give Optionholders the opportunity to exercise their Options prior to the date for determining entitlements to participate in any such issue.

- (h) If from time to time on or prior to the Expiry Date the company makes an issue of shares to the holders of ordinary fully paid shares in the company by way of capitalisation of profits or reserves (a **bonus issue**), then upon exercise of their Options, Optionholders will be entitled to have issued to them (in addition to the shares which would otherwise be issued to them upon such exercise) the number of shares of the class which would have been issued to them under that bonus issue (**bonus shares**) if on the record date for the bonus issue they had been registered as the holder of the number of shares of which they would have been registered as holder if, immediately prior to that date, they had duly exercised their Options and the shares the subject of such exercise had been duly allotted and issued to them. The bonus shares will be paid up by the company out of profits or reserves (as the case may be) in the same manner as was applied in relation to the bonus issue and upon issue will rank pari passu in all respects with the other shares allotted upon exercise of the Options.
- (i) There is no right to a change in the exercise price of the Options or to the number of shares over which the Options are exercisable in the event of a new issue of capital (other than a bonus issue) during the currency of the Options.
- (j) In the event of any reorganisation of the issued capital of the company on or prior to the Expiry Date, the rights of an Optionholder will be changed to the extent necessary to comply with the applicable ASX Listing Rules in force at the time of the reorganisation.

7.3 Rights and Liabilities attaching to Partly Paid Shares

The Partly Paid Shares will be issued at an issue price of \$0.0001 each and convertible to ordinary fully paid shares in the capital of the company on payment of a further \$0.0199 per partly paid share.

In addition to the rights and liabilities conferred on holders of Partly Paid Shares as detailed in section 7.1, the following additional rights and liabilities attach to a Partly Paid Share pursuant to the Constitution of the Company:

- (a) The Company shall not make a call on the Partly Paid Shares for a period of 12 months from the date of issue.
- (b) Subject to (i), the maximum call per annum from date of issue shall be \$0.005 per Partly Paid Share.
- (c) A holder of Partly Paid Shares may make full payment of any uncalled amount, at their sole discretion, at any time, subject to a minimum conversion of 500,000 Partly Paid Shares or such lesser number where the balance held is less than 500,000 Partly Paid Shares.
- (d) Subject to the Corporations Act and the terms on which the Partly Paid Shares are issued, the Directors may make a call on the holders of the partly paid shares for any money unpaid on them.
- (e) The Partly Paid Shares are freely transferable.
- (f) The Company must comply with the Corporations Act and the ASX Listing Rules in relation to the dispatch and content of notices to members on whom a call is made and a member to whom notice of a call is given must pay to the Company the amount called in accordance with the notice.
- (g) If an amount called is not paid on or before the due date, the person liable to pay the amount must also pay interest on the amount from the due date to the time of actual payment and all expenses incurred by the Company as a consequence of the non-payment.

- (h) To the extent permitted by the ASX Listing Rules, the Company has a first and paramount lien on every partly paid share which is presently payable to the Company.
- (i) The Directors may at any time after a call becomes due and payable and remains unpaid serve a notice on the member to pay the unpaid amount, interest and all expenses accrued.
- (j) If a member does not comply with a notice served then any or all of the partly paid shares in respect of which the notice was given may be forfeited. On forfeiture, shares become the property of the Company and forfeited shares must be, if the ASX Listing Rules permit sold, disposed of, or cancelled on terms determined by the Directors or offered by public auction.
- (k) The interest of a person who held shares which are forfeited is extinguished but subject to the ASX Listing Rules remains liable to pay all money that was payable at the date of forfeiture.
- (l) Subject to the terms on which a partly paid share is on issue, the net proceeds of any sale made to enforce a lien or on forfeiture will be applied in the following order; in payment of the costs of sale; in payment of all amounts secured by the lien or all money that was payable in respect of the forfeited share; and where the share was forfeited, in payment of any surplus to the former member whose share was sold.
- (m) In the event of any reorganisation of the issued capital of the Company on or prior to the conversion to an ordinary fully paid share, the rights of a partly paid shareholder will be changed to the extent necessary to comply with the applicable ASX Listing Rules in force at the time of the reorganisation.
