

Media Release and ASX announcement Melbourne 20 January 2009

CPT GLOBAL LIMITED (ASX: CGO) Announces approval as a GSA Schedule Contractor for the US General Services Administration.

CPT Global Limited announced today that our US subsidiary CPT Global, Inc. has been approved as a General Services Administration (GSA) Contractor for supply of IT services to all US government agencies. GSA issued contract number GS-35F-0172V to CPT Global, which includes a five year base period and three five year option periods. GSA is a US Federal Government procurement agency created to improve government efficiency and help Federal agencies provide a better service. GSA on behalf of Federal agencies assists in the procurement of equipment, telecommunications, information technology, supplies and related services. GSA comprises 14 000 associates serving the US economy at large.

The GSA schedule will allow CPT to provide IT services under a master contract agreement with the US Government.

Gerry Tuddenham, CPT Global Limited (ASX: CGO) Managing Director stated:

"CPT Global is extremely pleased to hold a GSA Schedule contract. The approval expands our prospective client base considerably and enables us to work with clients which have previously been excluded. The GSA Schedule can be thought of as a collection of Government approved vendors which Procurement Managers have instant access to when requiring goods & services. The GSA admission process was very onerous to complete but we consider it a sound investment of time and effort. A key success factor for achieving this was our reputation in the commercial sector already established in the US as well as our government experience in Australia. The fact that we were awarded reflects well on CPT Global and the challenge will now be to convert the investment into returns for shareholders."
