Nkwe extends Option over Bushveldt Platinum Project

Last year, International Goldfields Limited ("**IGC**") and Nkwe Platinum Limited ("**Nkwe**") signed an Option Agreement ("Agreement") providing Nkwe exclusive rights to negotiate a transaction with IGC regarding its South African platinum assets or shares in IGC.

In February this year Nkwe advised that it wished to extend the Option Agreement between itself and IGC, for a further six months.

Under the terms of the original Option Agreement between Nkwe and IGC, announced to the market on 7 August 2008, Nkwe secured the exclusive right to negotiate with IGC to acquire its 15% stake in the Tubatse Project, located in the Bushveldt Platinum region of South Africa, for a period of six months.

Under the terms of the initial agreement, Nkwe could extend the option for a further six months by providing notice to IGC of its intent to extend and by issuing 2.5M Ordinary shares to IGC. Nkwe has taken up its right to extend the agreement for a further six months.

IGC acknowledges receipt of 2.5m Nkwe ordinary shares.

IGC is earning a 15 per cent interest in three farms within the Bushveldt platinum region, Hoepakrantz 291KT, Nooitverwacht 324KT, and Eerste Geluk 327KT, which together comprise the Tubatse Project, by spending US\$10 million on exploration.

The JORC-compliant resource on portions of Nooitverwacht 324KT and Eerste Geluk 327KT was recently upgraded from 12.4Moz to 20.4Moz (3PGE + Au). The mineralisation potential of the entire Tubatse Project is independently estimated at approximately 60Moz and 67Moz 3PGE + Au (this includes the 20.4Moz JORC-compliant inferred resource).

Nkwe has recently exercised its option to acquire a 59 per cent interest in the Tubatse Project, with South African black empowerment company, Genorah Resources (Pty) Ltd, holding the remaining 26 per cent interest in the project.

Nkwe also holds a 74 per cent working interest in the two farms directly adjacent (north) to the Tubatse Project and has a stated goal of becoming a platinum producer with its joint venture partner Xstrata, producing a steady rate of 1Moz of PGM per annum.

Finalised Project Valuation Terms

During the quarter, International Goldfields Limited finalised project valuation terms for the proposed merger with Nkwe Platinum Limited, expected to occur via a Scheme of Arrangement pursuant to the Australian Corporations Act (the "Scheme").

Under the terms of the proposal, Nkwe will offer to buy all IGC Ordinary shares on the basis of IGC's cash at bank at the time of the implementation of the Scheme plus a valuation of IGC's interest in the Tubatse Project of AUD\$60m ("Offer price").

The final Offer price for the IGC Ordinary shares will be determined by the total number of shares on issue at the time the Scheme is implemented, divided by the Offer price.

Nkwe has agreed with IGC's AUD\$60m project valuation and looks forward to completing the exercise and acquisition over the coming months.

Proposed Nkwe/IGC Merger Update

On approval of the terms by the Nkwe board, the proposed merger would be subject to a number of conditions, most notably the receipt of all necessary governmental, regulatory shareholder and third party approvals and consents. The merger would also be subject to Nkwe successfully completing a debt/royalty financing to fund the proposed merger.

Key steps to be undertaken to implement the merger include:

- Nkwe sign off to the merger terms;
- lodgement of Scheme documents with ASIC;
- obtaining Court approval to hold the Scheme meeting for shareholders to vote on the Scheme;
- obtaining IGC shareholder approval of the Scheme;
- NKWE completing a debt/royalty financing; and
- If IGC shareholders approve the Scheme, Court ratification of the Scheme.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
