

PALA INVESTMENTS – SHAREHOLDING IN INTEGRA

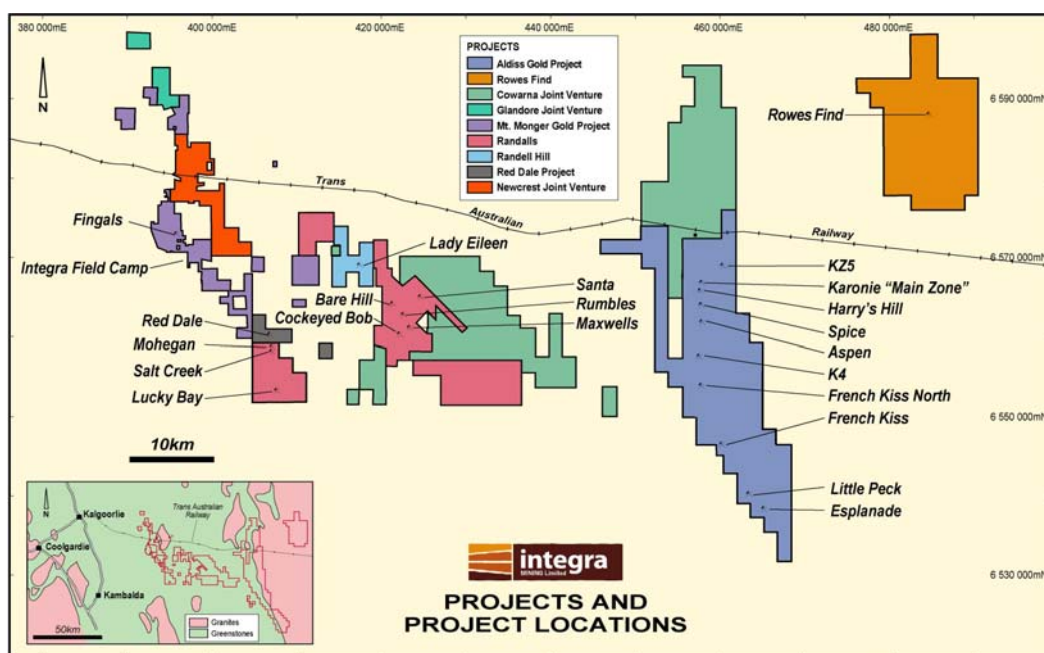

During its periodic monitoring of share register movements, Integra Mining Limited (ASX: IGR – “Integra”) has become aware that Zug, Switzerland-based resources industry investor Pala Investments, which holds 22.51% of Avoca Resources Ltd (“Avoca”), has recently become the fourth largest shareholder in Integra with an interest of 3.3%.

The Board of Integra believes this information is potentially material given the advanced stage of Integra’s feasibility work at the Randalls Gold Project, located 60 kilometres east of Kalgoorlie, and in light of Avoca’s current bid for Dioro Exploration NL, which holds a number of nearby assets.

As per previous advice to the market, the Randalls Gold Project Feasibility Study is in the final stages of completion. The outcomes of the study will be released to the market once it is complete.

Yours sincerely,

Chris Cairns
Managing Director

Integra Tenement and Project Locations.
