Exploration Results for Kurgan 1 Gold Prospect, Kyrgyz Republic

Kentor Gold Limited (ASX Code: KGL) (Kentor or the Company) has now received final assay results from the 2009 exploration programme at Kurgan 1 gold prospect on the Kurgan Exploration Licence in the Kyrgyz Republic. A re-interpretation of the geology of the area by Kentor’s local exploration team, followed by a programme of geophysics, geochemistry, trenching and channel sampling has lead to the identification of 6 gold-bearing lodes averaging 4.5 metres in width and 150 metres in length. The best intersections to date from channel sampling are:

- 3 metres at 7.3 g/t of gold
- 5 metres at 7.3 g/t of gold
- 17 metres at 1.5 g/t of gold
- 5 metres at 3.1 g/t of gold

Two adjacent areas of similar size showing anomalous geochemistry are scheduled for further exploration in 2010. Whilst the focus in 2010 is on the development of the Andash project, it is also proposed to drill the 6 gold-bearing lodes identified at Kurgan during 2010.

Kurgan 1 prospect is situated at an altitude of about 2,000 metres on a south-facing slope of the Talas Range in the Kyrgyz Tien Shan Mountains. Road access is easy, and the moderate altitude and south-facing slope combine to provide good working conditions over an extended field season relative to many other areas of the Kyrgyz Republic.

The Kurgan prospect is owned 100% by CJSC Kentor. CJSC Kentor is 80% owned by Kentor Gold and 20% by the Kyrgyz Geophysical Expedition.

About Kentor Gold

Kentor Gold Limited (ASX Code: KGL) is an Australian-based company formed in 1998 as a specialist gold explorer. The Company was listed on the Australian Securities Exchange (ASX) in March 2005 and has diversified into exploration for gold, geothermal energy and base metals in Central Asia where it has highly regarded, established local management.

Kentor is working on the development of two gold mines in the Kyrgyz Republic –

At Andash where Kentor has an 80% interest. Andash is a larger gold-copper project targeted for production in 2011 at the rate of 60,000 oz gold and 5,000 tonnes copper in concentrate per year for eight years.

At Savoyardy over which Kentor has an option to purchase 100% of the project. Kentor is planning further exploration to increase the existing JORC-compliant resource before development.

Competent Persons Statement:

The exploration results in this report are based on information compiled by Simon Milroy, who is a member of the Australasian Institute of Mining and Metallurgy and a full time employee of Kentor Gold Limited. Mr. Milroy has sufficient experience which is relevant to the style of the mineralisation and the type of deposit under consideration and to the activity to which he is undertaking, to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr. Milroy has consented to the inclusion of this information in the form and context in which it appears in this report.
