## Longtom gas project Offshore system ready for first gas

---

Nexus Energy Limited ("Nexus") is pleased to advise that the TSMarine *Rem Etive* dive support vessel has completed all hook-up activities for the pipeline and control systems for the Longtom gas project (VIC/L29) in the Gippsland Basin offshore Victoria. The total offshore system has been completed and tested, and gas production is anticipated to commence in the coming week following co-ordination of start-up with Santos Ltd's ("Santos") onshore Orbost gas plant. A further announcement will be made once gas production has commenced.

Nexus' managing director Ian Tchacos said, "we are very pleased with the work undertaken by the *Rem Etive* and associated contractors to complete the final hook-up of the Longtom project in a safe and efficient manner. We now look forward to working with Santos to co-ordinate start-up of the gas production for the project".
