TZ Executes Letter Of Intent with Multinational Fortune 500 Company in the Computing Industry

CHICAGO, ILLINOIS, USA – 3 March 2009 – TZ has signed a LOI with a major player in the computing industry to include TZ Intevia[®] technology into a new computer that will launch in 2009. At the request of the customer, the name of the company will be disclosed at the time of the product launch.

“This is another important validation of the market direction we have chosen to focus on in selling our products into this industry”, stated Andrew Sigalla, Executive Chairman of TZ Limited. “If we are successful in the implementation of TZ Intevia[®] into this product, it will give us the opportunity to further expand the sale of devices in the product platform, and can also open the door to cross selling opportunities within the customer’s other business units as well as other computer manufacturers.”
