Alan – *Non-executive
director/
Company
Secretary*
Alvin Tan – *Non-executive
director*

About ASW:

Advanced Share Registry Limited provides registry services to listed and unlisted clients on a national basis. The business has built its registry operations through its reputation and delivery as an efficient, cost effective service provider, especially for smaller companies. The Company has a track record of profits and pays a 6 monthly franked dividend. In April 2010, the Company opened its Sydney office and will continue to look towards national expansion.

www.advancedshare.com.au

The Company advises that it anticipates the pre-tax profit for the financial year ending 30 June 2010 to be in excess of \$2,200,000 (2009: \$1,254,991). This is an increase of \$945,009 or 75.3% over the same period last year.

Subject to this profit being confirmed by year end financial statements, it is the intention of the directors to recommend a fully franked final dividend of 1.8 cents per ordinary share, giving a total yearly dividend of 3.55 cents.

This profit has been achieved on a higher sales revenue which has been attained due to the increased trading activity on the Australian Securities Exchange and the migration of new clients to Advanced Share Registry Limited to utilise the Company's updated and cost effective services.

The Directors and management have also been very conscious of prudent cost controls in the current economic climate and this is also reflected in the profit result.

The Company continues to focus on a value proposition for its client base by improving its service and service offerings to a wide range of clients.

As previously announced, the Company opened its Sydney office in April 2010.

The company has maintained profitability in every month of operation.

As part of its future expansion plans, the Directors are constantly looking for opportunities which may have synergies with the Company's profit activities.

The Directors are confident of the future growth and profitability of the Company.
