FRANCES DILWORTH NO. 3H**

**Project:** Yellow Rose  
**Well:** Frances Dilworth No. 3H  
**Working Interest:** 75%  
**Location:** McMullen County, Texas  
**Operator:** San Isidro Development Company (25%)

Antares is pleased to announce Halliburton has concluded fracture stimulation operations on the Frances Dilworth No. 3H. Halliburton successfully pumped a 14 stage, hydraulic fracture stimulation treatment on the 4,650 ft Eagle Ford shale interval. The 14 stages represent over 3,700,000 pounds of proppant and approximately 4,000,000 gallons of fracture stimulation fluid. Antares will now begin flowback operations on the well with the expectation of achieving an initial production rate in approximately one week.

**Halliburton pump truck fleet and command center on location at the Frances Dilworth No. 3H**

The Frances Dilworth No. 4H is currently drilling ahead at 10,200 ft where angle is being built to take the wellbore from vertical to horizontal. The Eagle Ford shale will be encountered at approximately 10,900 ft at which point a 4,000 ft lateral will be drilled within the shale until reaching a measured depth of approximately 14,900 ft.

**Matt Gentry**  
**Director & Chief Operating Officer**
