

CPT GLOBAL LIMITED (ASX: CGO)

Update of Business Trading

CPT Global Limited (CPT) announces that difficult trading conditions have continued for the first six months of the 2010 financial year resulting in reduced revenue against the comparable period last year, lower margins and a projected loss for the period.

While there are signs that business prospects are improving in Australia, new client revenue has so far failed to offset a reduction in consultant numbers engaged with the Company's largest client as it completes a major project. Margins continue to come under pressure and business development activities and cost control remain a high priority.

Internationally the number of prospective clients with which CPT is engaged continues to grow in Europe and North America. However current international financial conditions are slowing the progress in converting these prospects into long term anchor clients. CPT's experience is that the development of these relationships is time consuming and timing of resulting revenue is difficult to forecast but that attractive rewards are generated when clients more fully utilise our services. Additionally revenue during this period has been adversely impacted by the transition of some anchor clients from a risk reward to time and materials engagement model.

Based on the opportunities in hand and action being taken, CPT is positive about the outlook for the second half of the 2010 financial year and its balance sheet remains strong. CPT will release its audited results for the first half of the 2010 financial year on Friday, 26 February 2010.
