CPT Global Limited and Controlled Entities

ABN 16 083 090 895

Preliminary Final Report

for the year ended 30 June 2010

Chairman's Statement

Dear Fellow CPT Global Shareholder,

CPT Global had a disappointing 2010 financial year recording its first ever annual loss. Revenues in all three of our trading regions were lower than the prior year due to client specific factors, lower new business and the continuing impact of the Global Financial Crisis. Our Australian business continued to experience challenging trading conditions while a number of potentially rewarding international opportunities were delayed. The Company remains in a sound financial position and has taken action to enhance its business development and management capabilities.

Despite establishing a number of new client relationships the revenue from our Australian operations was lower and margins remained under pressure. In Victoria revenues fell as new business failed to offset the reduced demand by a major client for our services as a significant project neared completion. In the ACT our business was adversely impacted by the completion of a large Government engagement which resulted in lower revenue. The revenues of our NSW operations showed a modest increase but are yet to achieve a satisfactory result for our recent efforts. During the year significant changes were made to our business development team in Australia resulting in the development of a number of new client relationships. Our efforts to increase revenue, improve margins and control costs will be a major focus this financial year.

CPT's revenue from its international operations fell from the higher levels seen in the prior year as the continuing economic uncertainty caused many companies to delay decisions. In Europe, despite many exciting prospects, revenues slipped but the forward pipeline remains healthy. Revenues were also down in the US with delays in decision making and the postponement of contract start dates adversely impacting on our performance. A bright spot was the development of a growing presence in the Canadian market and the employment of more local resources in North America. Despite ongoing difficult trading conditions in the international markets, two of CPT's largest five global clients are based in the US and Germany and just prior to the financial year-end we commenced work in the US with one of the world's largest financial institutions and in Europe at one of the world's largest mainframe sites.

Our revenue fell by 14.1 % in 2010 with all major regions experiencing declines due to lower new business and the difficult trading conditions. CPT recorded a net loss after tax of \$3.1m (including a \$2.4m impairment charge to the book value of our Australian operations due to a write-down of Goodwill) compared to a profit of \$2.1m in the prior year. However CPT's trading performance improved in the second half with a net profit after tax of \$0.1m (prior to the impairment charge) as against a first half loss of \$0.8m. At year end CPT remained in a sound financial position with cash of \$523k.

While CPT continues to engage with many prospective clients in both Australia and internationally our 2010 revenue fell well short of that required to generate satisfactory returns for our shareholders given our current cost base. In past years the performance of our various geographic regions has tended to provide some balance to our results, reduce overall risk and allow better utilisation of our staff. However our loss in 2010 reflects lower new business and the severity of global economic conditions, and overshadows the ongoing business development activities which still continue to offer the prospect of significant new revenue. Our challenge is to convert this potential into revenue in a timely fashion, While at times this has been a frustratingly slow process, especially in the international markets, your Board continues to believe that the rewards will ultimately more than justify our efforts and CPT therefore remains committed to these markets despite the shorter term negative impact on our results.

CPT's ongoing strategy must be to continue to grow revenue in all regions, improve margins and control costs. In Australia we have re-energised our business development activities, sharpened our focus on service delivery and enhanced our capacity to attract quality staff and to offer the best resources to our clients. Internationally a concerted effort from our business development teams in both Europe and North America, ably supported by the more active involvement of our Managing Director Gerry Tuddenham, is being made to drive revenue in these regions. Recent signs have emerged that these efforts are beginning to generate more significant revenue but there is still much to be done

While the difficulties over the past year have impacted on the returns we can provide to our shareholders it has also challenged our staff. CPT has a strong team of technically skilled and loyal staff and consultants who

Chairman's Statement

serve their clients' interests regardless of the economic conditions. I would like to thank my fellow directors and all our staff, under the energetic leadership of our Managing Director, Gerry Tuddenham, for maintaining their effort through another difficult year. In the year ahead I trust that the ongoing efforts of the CPT Global team to generate attractive shareholder returns through the profitable expansion of our operations both in Australia and internationally will be realised more fully.

Fred S. Grimwade
Chairman

Managing Director's Review

Fellow Shareholders,

CPT Global has had a disappointing year, recording its first ever annual loss. This can be ascribed to numerous factors with the main cause being lower Revenue due to client specific factors, reduced new business and the continuing global economic downturn.

Revenue was down in all regions.

Operating and Financial Review

Australian Revenue reduced by 10% with all regions being adversely affected by worsening economic conditions. Victoria and ACT experienced reductions of 6% and 36% respectively, with NSW returning a modest increase of 8%.

International Revenue reduced by 27% in Australian dollar terms, with the USA and Europe reducing by 20% and 31% respectively.

CPT Global's revenue for the year ended 30 June 2010 was \$37.7 million, a 14% decrease on the previous year's revenue of \$43.9 million.

CPT Global's net loss after tax for the year ended 30 June 2010 was \$3.13 million after a \$2.4m impairment charge, a 244% decrease on the 30 June 2009 profit of \$2.1 million.

No final dividend has been declared.

Basic earnings per share amounted to -8.53 cents per share.

CPT Global's balance sheet reflected net tangible assets of \$5,718m as at 30 June 2010 (\$8,088m 30 June 2009), cash of \$523k as at 30 June 2010 (\$1,245k 30 June 2009).

On a positive note, we have made a number of organisational changes in strengthening our Australian marketing and sales teams and increased our resourcing capabilities that should increase our revenue and headcount. We have also been successful in being appointed to whole of government supply panels by DHS/Centrelink and Department of Defence. These panels open up new opportunities in these and other departments.

Managing Director's Review continued

Strategy

Our ongoing overall strategy is to continue growing revenue in all regions at improved margins, whilst keeping a tight control on costs.

Business development activities have been overhauled and a new focus has been brought to bear on service delivery. In addition, we have enhanced our capacity to keep and attract quality staff so as to deliver a better service to our Clients. A number of new client relationships have been established in Australia which should render a return in the near future.

With the bulk of our Mainframe Business opportunities being located overseas, our International Business development efforts are being stepped up and refined, with some encouraging signs of success having been seen recently. Our increased presence in Canada is a case in point.

As was the case last year, our 2 main overall areas of focus remain:

1) Market coverage

- a) Expand international client base including government
- b) Transition current international clients into annuity relationships
- c) Offer broader range of CPT services internationally, including mid-range services and testing
- d) Focus on Sydney marketplace growth
- e) Organically grow Melbourne market
- f) Expand our market coverage to new Federal Government Agencies given our acceptance to two major ICT panels in Canberra
- g) Access to new markets via additional international alliance partners

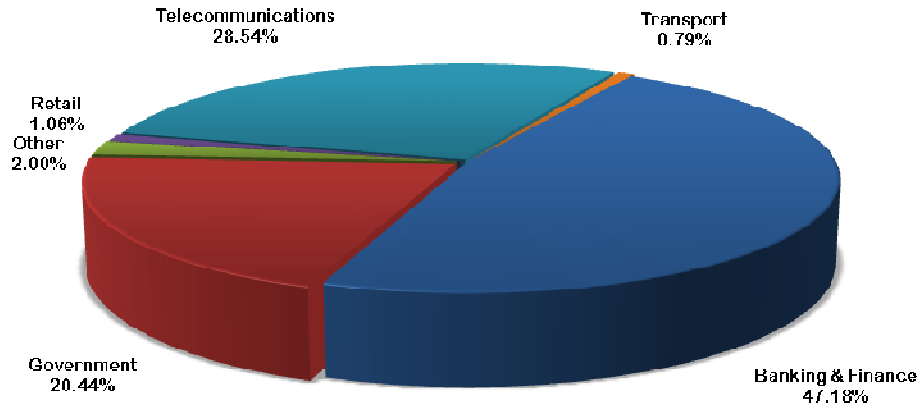

2) Services positioning

- a) Greater alignment with business outcomes
- b) Expand Data Centre optimization services into Green IT outcomes
- c) Consolidate and improve existing services
- d) Provide new services that leverage existing competencies
- e) Development of Oracle tools continue and focus on SAP with European clients
- f) Test coverage across mid-range

Managing Director's Review continued

CPT Global's Markets

Revenue by Sector (Worldwide)

CPT Global's Banking & Finance portfolio has increased from 43% to 47.1% as a percentage of revenue.

Telecommunications reduced from 31% to 28% due to reduced demand from a major client in Australia.

Government was stable with a slight improvement from 20% to 20.44%.

Controlled and sustainable growth remains our focus.

Managing Director's Review continued

Revenue by Line of Business (Worldwide)

Both CPT Southern region and CPT Federal region performed below levels achieved last year.

The CPT Northern region performed better than last year but still well below expectation.

International performance was disappointing with a strong Australian dollar having played a role in the below par performance. With a substantial forward load in the USA and potential in both USA and Europe, the main objective will be to convert such potential into Revenue.

Highlights for the year on the international front would include the following:

- 1) Increased presence in Canada.
- 2) Two out of our top five clients are international Companies.
- 3) Commencement of work in the USA with one of the largest global financial institutions.
- 4) Commencement of work in Europe at one of the largest global Mainframe sites.

Managing Director's Review continued

Our People

Despite the challenging trading and economic conditions, we have maintained our policy of retaining quality staff. In the USA we have employed more local resources, taking advantage of tough employment conditions to attract the best in their respective field.

We continue to view this approach as an investment in our collective future and Intellectual Property.

The CPT mantra remains that we are only as good as our people and will continue to invest in their training, development and wellbeing.

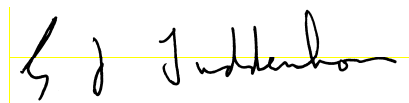

The end result will be our enhanced ability to deliver a better service more efficiently on a global scale.

Outlook

Our enhanced international business development efforts have shown early signs of success as evidenced by our increased presence in Canada and the recent commencement of work at one of the world's largest financial institutions and also at one of the largest mainframe sites in the world. We expect these efforts to deliver more results in the near future. We will continue using Austrade and Tori Global as routes to Market.

In Australia we have re-focussed business development and service delivery efforts across all regions. We are committed to our local markets and believe our efforts will have an impact on our recovery this year.

In 2010 CPT failed to maintain sufficient levels of activity to support its cost base. Plans have been put in place to address this, with business development, improved margins and cost control being at the forefront. Much still needs to be done but with the current people and plans in place, your Board is confident of returning CPT to a Profit and generating acceptable returns in the coming year.
