

## **DRILLING RECOMMENCES AT ANDY WELL**

**Doray Minerals Limited** (ASX: DRM, Doray) is pleased to announce it has recommenced drilling at its Andy Well prospect, located with the Meekatharra North project (Doray 80%), approximately 45km north of Meekatharra in the Murchison region of Western Australia.

The primary aim of this second RC drilling programme is to test the extents of a potential shallow open pittable gold resource within the high-grade Wilber Zone, down to 100m vertical depth. Doray also plans to test a number of other prospective targets at Andy Well, including the recently announced Southern Zone.

In addition, a select number of diamond holes have been planned for Wilber to gain valuable information about the structure, geology and preliminary metallurgy of the high-grade mineralisation encountered in the company's first drilling programme.

It is expected the entire programme will take in the order of 4 weeks to complete.

-ENDS-

### **About Doray Minerals Ltd**

Minerals explorer, **Doray Minerals Limited** (ASX: DRM, Doray) was established in August 2009 and listed on the ASX in February 2010. Doray is currently focused on exploring for large economic gold deposits in two of Australia's potentially most attractive, but under-explored gold provinces: the Murchison Region of WA and the Central Gawler Gold Province in South Australia.
