#### **About Eneabba Gas Limited**

Eneabba Gas is focused on the development of its 168MW gas-fired Centauri 1 Power Station on Company-owned land near Dongara in the Mid West of Western Australia. Eneabba Gas proposes to market power from Centauri 1 to the fast growing Mid West region of Western Australia.

The Company's strategic position is to convert the coal in its highly prospective tenement package in the Mid West Region of Western Australia into UCG Syngas for fuel. While UCG is the gasification of burning coal underground, it is the Company's intention to capture the resultant CO<sub>2</sub> (geo-sequestration), which may potentially be injected into an existing geological formation. This process will significantly reduce the total carbon footprint of the project, farming of land will remain relatively uninterrupted and water resources will be preserved. In other words, energy in the coal is extracted without the environmental impacts associated with traditional coal-mining.
