ASX RELEASE

WONARAH BULK SAMPLES LEAVE DARWIN

4 February 2010

Minemakers is pleased to advise that first bulk samples of Wonarah Direct Shipping Ore ("DSO") were exported from Darwin yesterday for fertiliser production trials by a potential customer in India.

The vessel carrying the containers of further samples destined for New Zealand trials is scheduled to depart this weekend.

While it was hoped that the despatch of these bulk samples would have occurred earlier, an unexpected problem with crusher availability and seasonal weather factors delayed the shipping of the samples until the next available vessels.

Minemakers looks forward to the results of the production trials.

The export of this DSO product is a significant milestone along Minemakers' intended development of a major export rock phosphate industry from Wonarah.
