The Macquarie Winton Global Opportunities Trust (the "Trust") has exposure to the Alpha Select Winton FF Limited, a managed account with essentially the same trading strategy as the Winton Futures Fund, as outlined in section 3 of the Trust's Product Disclosure Statement (PDS)².

Comment from Winton Capital

The G20 meeting at the end of the month pledged to avoid competitive devaluations. This however only related to direct devaluation, and did not address the suggestion that China has been holding its currency at an artificially low rate. It seems likely therefore that the focus within financial markets will continue to be around further economic stimulus in the US and the knock on effect that this may have on the dollar.

The main contributors to the positive performance this month were stock indices, currencies, precious metals and agricultural markets. On a value-at-risk basis the bonds sector dropped this month from 30% of total portfolio risk to just below 20%. This has increased diversification in the portfolio, and reduced the previous dominance of this one sector. Despite these changes to the portfolio's composition, total value at risk has remained relatively constant over the month.

Note: Total return index with price at 1 December 2005 = 100.
All dates are as at month end.

How the Trust is managed

The Trust has been designed to offer investors a way to access the investment management expertise of Winton with the security of capital protection of the Trust's underlying investment at 30 November 2012.

The Trust's managed futures exposure is managed in accordance with the Alpha Select Winton FF Limited's investment strategy.

This strategy aims to identify a market trend, assess the likelihood of its continuation and extent, and invest to profit from that view. Winton's investment philosophy is that specific market behaviour and trends can be identified and profitably exploited.

Winton's trading model and research program studies the interaction between price and other data series to identify and assess trends with the aim of profiting from them.
