## **COMPANY ANNOUNCEMENT 10<sup>th</sup> November 2010**

### **Another USA state selects basis2 for Revenue Management**

As part of the move to self funding government, the Arizona Department of Environmental Quality (ADEQ) has selected the basis2 software solution to drive efficient and effective Revenue Management for the state department. Based in Phoenix Arizona, ADEQ serves the Grand Canyon State with some 600 employees in 3 major program areas for Land, Air and Water quality. ADEQ bills and collect fees for a wide variety of fee types including storage tanks, recycling, pollutants, and clean ups. As part of its selection of basis2, ADEQ required an application that they themselves could implement, maintain, support and service, and integrate with standard State systems.

The success of basis2 at the Texas Commission of Environmental Quality (TCEQ) was a significant factor in the ADEQ's selection and as a result, Prophecy International is finding interest from several Revenue Management organizations, seeking to maximize revenues and cash flows from operations with a new solution.

Peter Barzen, EVP of Prophecy International said: " The ADEQ win was in part due to our success with the TCEQ implementation, but the key to our success with ADEQ was the high level of flexibility provided by the basis2 solution in the Revenue Management arena, coupled with its ease of implementation."

Basis2 is able to offer a range of configuration and integration settings to address the ADEQ business requirements, and demonstrates the flexibility to meet the ever changing needs of the organization as new environmental needs arise.
