## Quarterly Report (3rd Quarter) Jan to March 2010 Highlights

- **At the Horseshoe West project an additional 147 soil samples have been collected and analysed, returning gold values up to 24ppb and copper values up to 24ppm.**
- **A new Exploration Licence has been applied for south of the Horseshoe Lights old copper-gold mine.**

## Mineral Exploration

### Western Australia

#### **1. Horseshoe West ( E52/2016)**

The Exploration Licence 52/2016 lies between the Horseshoe Lights copper-gold deposit which is 10 km to the east and the Fortnum Gold Mine, a distance of some 12 km to the west. The main target sought is a copper-gold deposit

Three episodes of soil sampling have been completed and a total of 551 samples have been submitted to the laboratory. The best results are 38 ppb gold, 74 ppm copper, 74 ppm zinc and 110 ppm lead. The sample lines were designed to test magnetic high areas. Additional sampling has been completed and results have recently been obtained.

The anomalous areas will be tested by geophysical methods to determine if there are any underlying conductors. If there are any conductors these will be drilled, along with the gold in soil anomalies. The process to get to the drilling stage will be implemented very shortly.

#### **2. Horseshoe South (ELA52/2569)**

A new exploration licence has been applied for covering vacant ground approximately 5 km south of the old Horseshoe Lights copper-gold mine and approximately 5km north of the old Dominion open cut gold mine. Targets sought are gold and copper.

### **3. Victoria Desert (ELA39/1528)**

This newly applied for exploration licence lies on the edge of the Victoria Desert, north east of Kalgoorlie. The licence covers a large magnetic anomaly. Some past exploration has taken place including drilling but the presence of the magnetic feature has not been explained. The geology is that of a highly metamorphosed greenstone belt and the targets sought are nickel and gold.

### **4. Mt Vernon (E52/2338)**

The Mt Vernon property has been explored by UOG looking for uranium and base metals. The area was flown by helicopter searching for the past radiometric anomalies located by Geopeko in the eighties. These were located and sampled and analysed for similar metals to that of Geopeko plus palladium and platinum. These elements are known to occur in black shales associated with various other elements known to be anomalous in the area. Unfortunately the results were low.

It came to UOG's attention that another company had announced significant rock chip results for manganese to the west of E52/2338. This was ground checked recently to see if the manganese bearing trend continued into this licence. The manganese occurs as a back laterite. The trend extension eastwards into E52/2338 has a stripped laterite profile with no evidence of the development of laterite within the tenement. Thus manganese was not located.

### **5. Nabberu Basin (E69/2336, 69/2475, 69/2476)**

Research into past exploration activities is continuing

## **Northern Territory**

### **1. Treasure (EL25346)**

No work has been done on this project this quarter although Mithril is known to have a continuing interest in the tenement.

UOG will have 13 % interest after Mithril earn 80%. The other 7% is owned by Aluminex.

## Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
