## **BigAir Group Limited**

# ***BigAir exceeds \$300k in monthly EBITDA for April 2010 and upgrades 2010 Full Year EBITDA forecast to over \$3 million.***

**SYDNEY, Australia – May 7<sup>th</sup>, 2010** – BigAir Group Limited (ASX:BGL) announced today that based on preliminary unaudited accounts it has exceeded \$300,000 in EBITDA for the month of April 2010, and is upgrading its full year EBITDA forecast for the Financial Year ending 30 June 2010 from \$2.5 - \$2.8 million to \$3 million.

Jason Ashton, CEO of BigAir, said "the April result is an important milestone for BigAir and a reflection of the combination of our continued strong on-net, organic revenue growth as well as the earlier than expected successful integration of the recently acquired Wizz business".

## **About BigAir Group Limited**

BigAir owns and operates Australia's largest metropolitan fixed wireless broadband network. The Australian business market comprises nearly one million businesses and BigAir's network provides near blanket coverage across its six largest cities Sydney, Melbourne, Brisbane, Perth, Adelaide and Gold Coast. BigAir sells broadband and data services primarily through its channel partners who include ISPs, Carriers, and other IT service companies who have existing relationships with business customers in order to deliver BigAir's high speed, cost effective fixed wireless broadband solutions.

BigAir's competitive advantage includes its state-of-the-art business-grade fixed wireless network which allows it to install business-grade symmetric broadband services at speeds up to 1000Mbps and distances up to 30km from its base stations with installation taking just a few hours. Most of BigAir's competitor's rely on access to Telstra's copper network which can takes weeks to install a service and does not deliver fast symmetric speeds. Competing legacy wireless networks such as the 3G mobile phone networks are also not nearly fast enough to meet the demands of business Internet users in an office environment.
