Australian Securities Exchange

### EARNINGS UPDATE

Autodom Limited (Autodom) advises that due to the well publicised reduction in production levels at Toyota resulting from the natural disasters occurring in Japan coupled with similar reductions at Ford, its forecast earnings for the full year to 30 June 2011 are likely to be negatively impacted.

The Company is currently in the process of quantifying the effect of the reductions and ultimate impact on the Company's earnings.

The Board and management remain diligent in ensuring that cost reduction initiatives and productivity improvement measures are ongoing to assist in mitigating the forecast reduction in sales. The Company has also accelerated the integration of its Bayswater operations into existing Dandenong operations and will continue to further rationalise the total group operations. This will result in additional upfront integration costs but will ultimately underpin improved performance and efficiency across the group by removing the rental and overhead costs of the Bayswater plant.

As indicated in the Company's release in February 2011, the Board maintains its view that consolidation and restructuring of the automotive component manufacturing sectors will ensure the long term survival of its participants. To this end, the Board continues to assess opportunities which will provide synergistic benefits and critical mass to strengthen its position within the sector.

Yours faithfully

**Peter Torre**
