

Significant gold mineralisation identified over 600 metres strike length at Chameleon Prospect

- Maiden 16 hole RC drilling programme (3,170 metres) completed by Scotia Gold Rights JV partner, Aphrodite Gold at the Chameleon Prospect.
- Results now received for all holes with a further intercept of 6m @ 4.48g/t gold from 92 metres.
- Significant gold mineralisation identified over 600 metres strike length to a vertical depth of approximately 200 metres.

Breakaway Resources Limited (ASX: **BRW**) has been advised by Aphrodite Gold Limited (ASX: **AQQ - Aphrodite**), its Scotia Project Gold Rights Joint Venture partner, that it has now received all outstanding results from its maiden Reverse Circulation drilling program (15 holes – 3,170 metres) at the Chameleon Prospect, which lies within the Scotia Project, located approximately 70km northwest of Kalgoorlie in the North Eastern Goldfields of Western Australia.

Significant gold mineralisation has now been identified over 600 metres strike length to a vertical depth of approximately 200 metres with a further intercept of **6m @ 4.48g/t gold** from 92 metres in CHR0016 returned.

This follows other significant intercepts previously reported (ASX announcement dated 2 August) including:

- **12m @ 10.99g/t gold** from 66 metres in CHR001,
- **11m @ 2.05g/t gold** from 129 metres in CHR002, and
- **8m @ 1.51g/t gold** from 227 metres in CHR009.

Further details on the results and drilling program are contained within Aphrodite’s ASX announcement dated 30 August 2011 (*See attached*).

At Scotia, Aphrodite can earn an 80% interest in the Gold Rights by spending \$1.5M over a period of up to 4 years.

Competent Persons Statement:

The information in this report that relates to Exploration Results and Mineral Resources is based on information compiled by Mr David Hutton (Managing Director), a full time employee of the Company. Mr Hutton is a Member of the Australasian Institute of Mining and Metallurgy (AusIMM). He has sufficient experience of relevance to the styles of mineralisation and the types of deposits under consideration, and to the activities undertaken, to qualify as a Competent Person as defined in the 2004 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.

Mr Hutton consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Information in this report that relates to the Scotia Project Gold Rights Joint Venture reflects information compiled by Leon Reisgys FAusIMM and Exploration and Development Director of Aphrodite Gold Ltd who has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is reporting on as a competent person as defined in the 2004 Edition of "The Australian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves."

Mr. Reisgys consents to the inclusion in this report of the matters based on the information compiled by him, in the form and context in which it appears.

About Breakaway Resources Limited:

Breakaway Resources aims to become one of Australia's leading mining and exploration companies with exploration focussed at our priority Eloise Exploration Project (copper – gold) within the Cloncurry District of North West Queensland and the Wildara and Miranda Projects (nickel) within the Leinster district of the North Eastern Goldfields of Western Australia; two areas that we believe offer the most attractive opportunities for future success.

Our objectives are the discovery and development of a high-quality stand alone mineral deposit and maximisation of shareholder wealth for non-priority assets.

Gold Mineralisation over 600 metre Strike at Chameleon Prospect

ASX: AQQ

30 August 2011

Company Announcements Office
Australian Securities Exchange Limited

Gold Mineralisation over 600 metre Strike at Chameleon Prospect

Aphrodite Gold Limited (ASX:AQQ) is pleased to announce that it has received the remaining gold assay results from its maiden Reverse Circulation (RC) drilling program over the Chameleon Gold Prospect located 5km NE of its 1.03Moz Aphrodite Gold Deposit (Figure 1 and Note 1).

The program has identified significant gold mineralisation over a strike length of 600 metres down to a vertical depth of close to 200 metres (Figure 2).

Gold intercepts from the program include 12m @ 10.99g/t (66-78m, Hole CHR0001), 6m @ 4.48g/t (92-98m, Hole CHR0016) and 11m @ 2.05g/t Au (129-140m, Hole 0002). Excellent historic gold intercepts have also been achieved at Chameleon including 34m @ 3.59g/t from 124 metres, 22m @ 5.43g/t from 150 metres and 8m @ 3.39g/t from 202 metres.

Aphrodite's Exploration and Development Director, Mr Leon Reisgys said, "these results give us strong confidence that Chameleon can deliver gold ounces to our overall Aphrodite Operations".

The RC drill program was completed in July 2011 and comprised 16 holes (3,170 metres) which tested the NNW trending Chameleon gold mineralised zone over a strike length of around 900 metres and down to a maximum vertical depth of 230 metres. One hole, CRC 0011, was abandoned for technical reasons. Results for the first eleven (11) assayed holes were presented to the ASX on 2 August 2011.

Chameleon forms part of the Scotia Gold Joint Venture Project which the Company recently farmed into with Breakaway Resources Ltd (ASX: BRW). Under the terms of the Joint Venture Agreement Aphrodite Gold Ltd can earn up to 80% of the gold rights in the Scotia Project tenements totally 217sq km. Details of the Agreement are contained in the Company's ASX release of 16 June 2011.

The Chameleon Prospect is one of numerous gold targets which have been identified within the Scotia Project. The trend of mineralisation at Chameleon extends SSE into Aphrodite's tenements and possibly represents the northern extension of Aphrodite's Hera Prospect (refer to Figure 1) which will be targeted in future exploration programs.

Significant results from the entire drill program are presented in Table 1 with hole locations shown in Figure 3. All assaying was conducted on one metre sample intervals with gold (Au) assayed by the Fire Assay 50 gram method with an AAS finish.

Table 1: Chameleon RC Drilling - Significant Intercepts (≥ 0.5 g/t gold)

Note: O = Oxide, T = Transitional, P= Primary Mineralisation

Yours Sincerely,

Leon Reisgys
Exploration and Development Director

Note1:

Existing JORC Resource for the Aphrodite Gold Project consists of 3.67Mt @ 3.83g/t Au for 451,000 ounces (Indicated) and 6.39Mt @ 2.83g/t Au for 582,000 ounces (Inferred) totalling 10.06Mt @ 3.19g/t Au for 1,033,000 ounces. This resource has been broken down into two domains; potential open pit (0 to 150m depth) and underground (150 to 440m depth). Potential open pit resources consist of 1.92Mt @ 1.96g/t Au for 121,000 ounces (Indicated) and 5.14Mt @ 1.81g/t Au for 299,000 ounces (Inferred) totalling 7.06Mt @ 1.85 g/t Au for 420,000 ounces at a cut-off grade of 0.5g/t. Potential underground resources consist of 1.75Mt @ 5.87g/t Au for 330,000 ounces (Indicated) and 1.25Mt @ 7.02g/t Au for 283,000 ounces (Inferred) totalling 3.0Mt @ 6.35 g/t Au for 613,000 ounces at a cut off grade of 3.0g/t. Full details of the JORC resource are contained in the Company's ASX announcement of 24 March 2011.

Competent Person Statement

Information in this report that relates to exploration targets, exploration results and resources reflects information compiled by Leon Reisgys FAusIMM and Exploration and Development Director of Aphrodite Gold Ltd who has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is reporting on as a competent person as defined in the 2004 Edition of "The Australian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves." Mr. Reisgys consents to the inclusion in this report of the matters based on the information compiled by him, in the form and context in which it appears.
