ASX RELEASE

19 October 2011

Carbon Polymers awarded Victorian Government tender

..CBP expects this supply arrangement will reinforce our position as the largest listed manufacturer of crumb rubber products in Australia

Carbon Polymers Limited (CBP) is pleased to announce to shareholders that we have been awarded a Victorian Government tender to supply granular crumb rubber to Sprayline Services.

Sprayline is the commercial contracting arm of VicRoads and is responsible for bitumen resurfacing. Sprayline utilises rubber from recycled tyres and bitumen. This method is environmentally friendly, reduces water penetration, increases aggregate retention and reduces reflective pavement cracking.

The contract is to supply 2,000 tonnes of granulated rubber to Sprayline in Victoria, South Australia and New South Wales.

Sprayline operates from five Victorian delivery centres. SprayLine is a member of the Australian Asphalt Pavement Association, the Civil Contractors Federation and the Road marking Industry Association Australia.

SprayLine maintains a third party accredited quality standard, and is a pre-qualified supplier to the Victorian, New South Wales and South Australian road authorities.

CBP is negotiating with several manufacturers of bitumen products that utilise rubber and will have further updates for shareholders when this comes to hand. This supply arrangement will further build on our existing sales and reinforce our position as the largest listed manufacturer of crumb rubber products in Australia.

CBP operate a national footprint of manufacturing and processing facilities throughout Australia and are dedicated to providing its customers with high quality products with certainty of supply.
