Company Announcement

**Delta SBD commences longwall build at  
Whitehaven's Narrabri mine**

Delta SBD Limited (ASX code: DSB) is pleased to announce it has commenced the surface build of the longwall at Whitehaven Coal's Narrabri Mine. The work is being undertaken for Caterpillar Global Products which is supplying the longwall equipment to Whitehaven.

Mr Stephen Bizzaca, Delta SBD's Chief Executive Officer, commented: "The Narrabri longwall project is a significant milestone for Delta SBD as it establishes our relationship with both a longwall Original Equipment Manufacturer and a new mine operator, which we expect to further develop in coming years".

"This longwall project demonstrates our strong capability in this type of work, and our ability to forge relationships with new clients," he said.

Phase one of the project is the surface build while phase two is to dismantle the surface build and transport, and install the longwall underground. The second phase is expected to commence in early January 2012.

Delta SBD's responsibilities include project management and supply of all resources (personnel, equipment and machinery). The company's previously announced procurement of new longwall diesel machinery (60t extra heavy duty vehicle, 130t shearer transporter, 2 x 15t multifunction units and 3 x 55t hydraulic power assist chock trailers) will be immediately deployed for phase two of the project.

“The Narrabri project enhances our ability to undertake installation of the latest longwall technology which ensures Delta SBD continues to be well-placed to deliver further growth for this type of work,” Mr Bizzaca said.

#### Narrabri Longwall Surface build

Yours Faithfully

Tony McFadden  
Chief Financial Officer and Company Secretary

## **About Delta SBD Limited**

Delta SBD is one of the largest contract companies servicing the Australian underground coal mining industry. The Group is geographically diversified, with offices in Campbelltown NSW, Rutherford NSW and Mackay QLD.

The Group's objective is to provide value-add services to our clients by forging profitable long term partnerships. We provide each project/mine with competent work teams, fit for purpose equipment and excellent site management backed by a supportive corporate management group. We use safe and efficient work methods that enable on time completion of all works and services to the clients' requirements.

With improving demand and prices, the coal industry forecast looks positive. Structural changes in global coal markets and the cyclical rebound in global growth are driving increasing demand for thermal and metallurgical coal. For Australia this bodes well for increasing production and expansion projects. This should provide a continuing set of business opportunities for Delta SBD.
