

Copper and Gold Mining Prospect

September 2011

DOURADO RESOURCES LIMITED

DOURADO RESOURCES LTD – MID-WEST

- Land 29 tenements >2,800 km² highly prospective for copper and gold
- Emerging mining region with diverse mineral assets.
- Close proximity to major new copper and gold discoveries

KEY POINTS

- Dourado Resources Ltd has acquired highly prospective and under-explored copper and gold projects north of Meekatharra in the mid-west region of Western Australia
- A suite of **29** tenements covering over **2,800km²** of selected tenure that is highly prospective for **copper, gold, rare earth** and **uranium** mineralisation

DOURADO RESOURCES LTD – MID-WEST

- Over **2,800km²** of land in exciting and sought after gold and copper area
- Approximately 100km north-east of Meekatharra in Western Australia
- Excellent accessibility and infrastructure

DOURADO RESOURCES LTD – MID-WEST

- **Mooloogool/Diamond Well Project - Copper and Gold**
 - 13 tenements covering ~2,400km²
 - Encouraging results in highly prospective gold/copper province

- **Sabbath/Garden Gully Project – Gold**
 - 16 tenements covering 420km²
 - Maiden JORC compliant Measured Mineral Resource of 145,000 @ 2.21g/t

DOURADO RESOURCES LTD – MID-WEST

- Copper

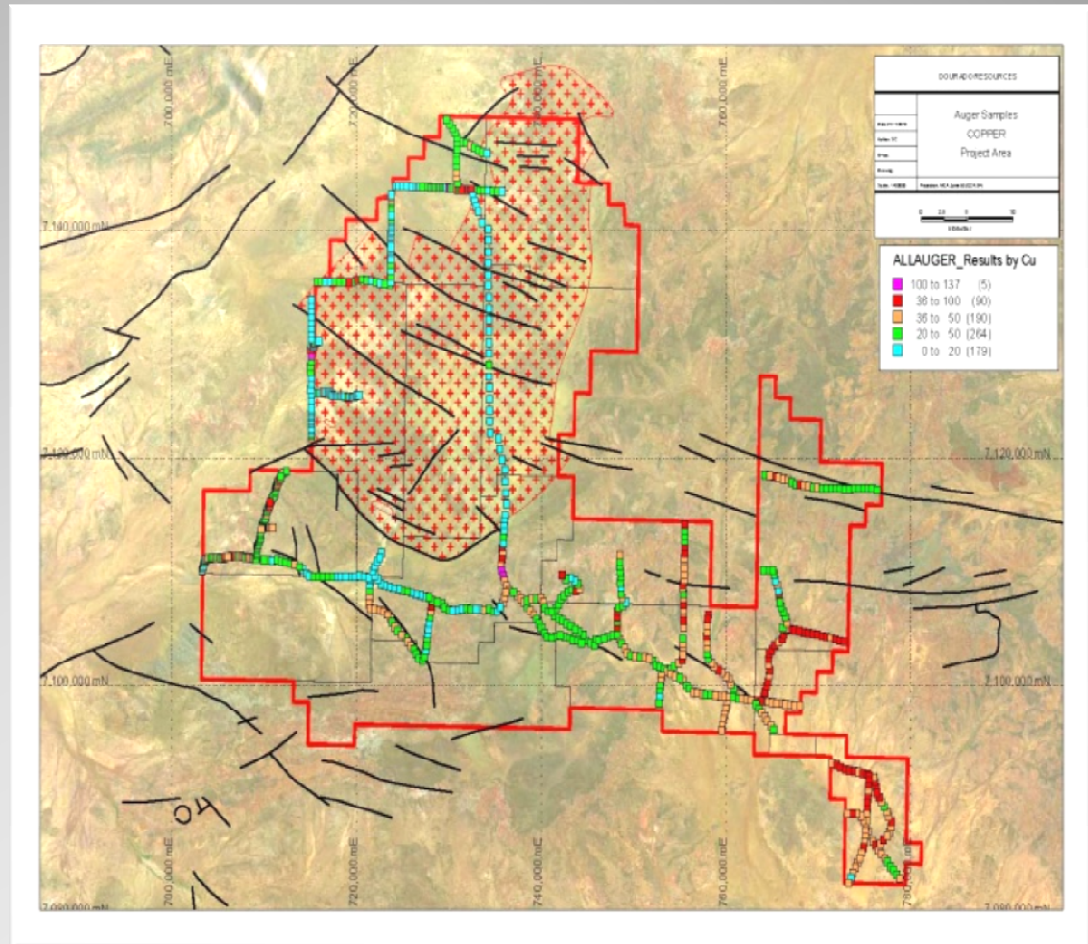

- Price more than tripled since late 2008 mainly due to rising demand from China (world's largest buyer)
- Copper experienced a 35% gain in 6 months during 2010
- Analysts predict strong growth year for copper which is supported by record prices on the London Metal Exchange of ~US\$9,945.25/tonne (as of 2nd February 2011).

- Gold

- Gold price has steadily increased (from below US\$600/ounce in 2006 to ~ US\$1,913.50/ounce (as of 23rd August 2011))

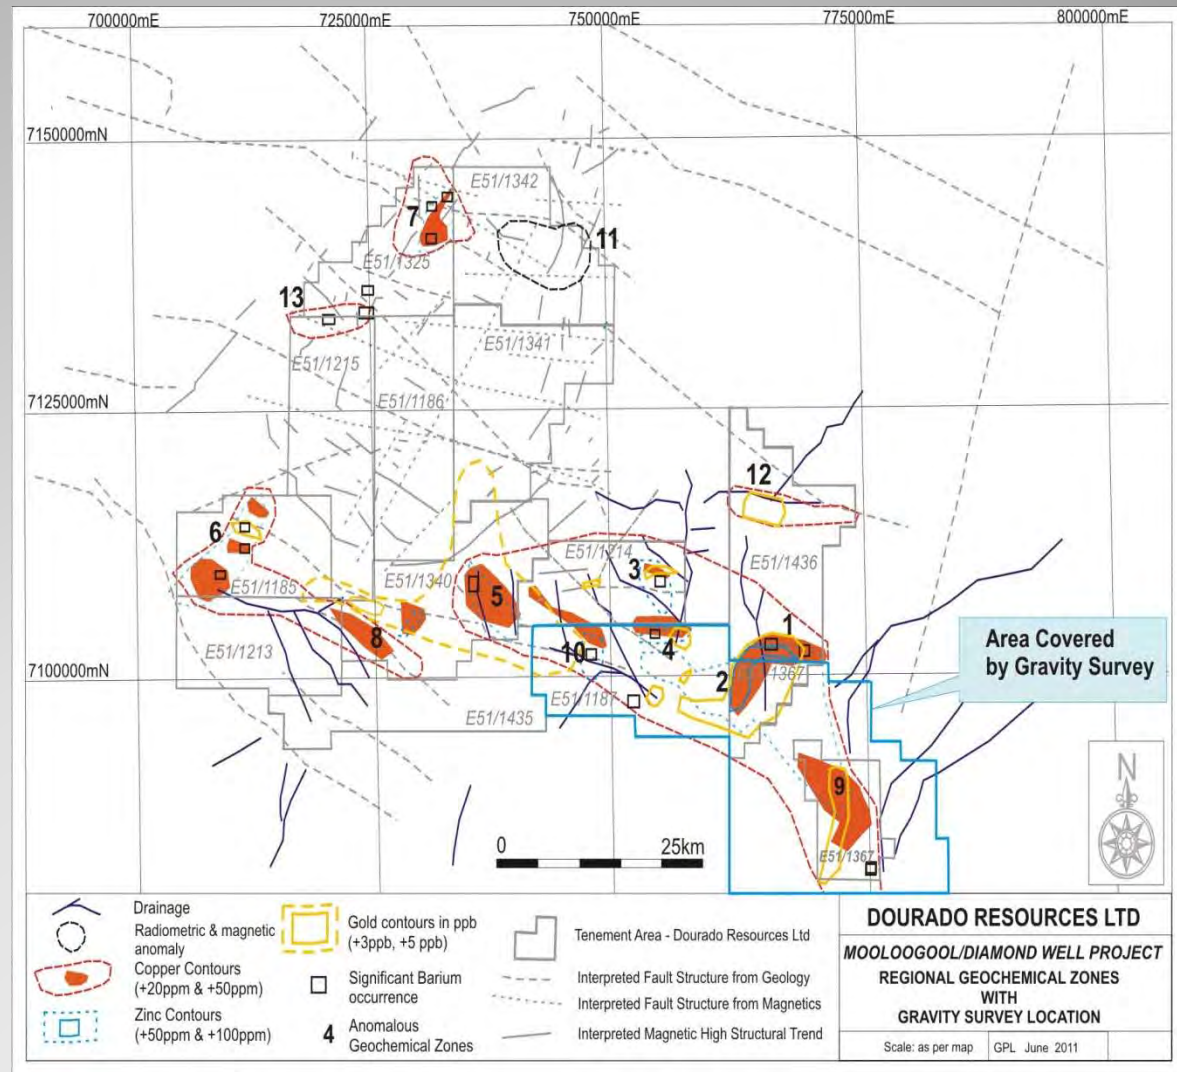

MINERAL PRICE HIGHLIGHTS

- **2,400km²** of exploration licenses
- Field campaigns conducted so far include **728 auger hole** program
- Results continue to be highly encouraging including results of **Cu @137ppm** and **Au @ 22ppb**

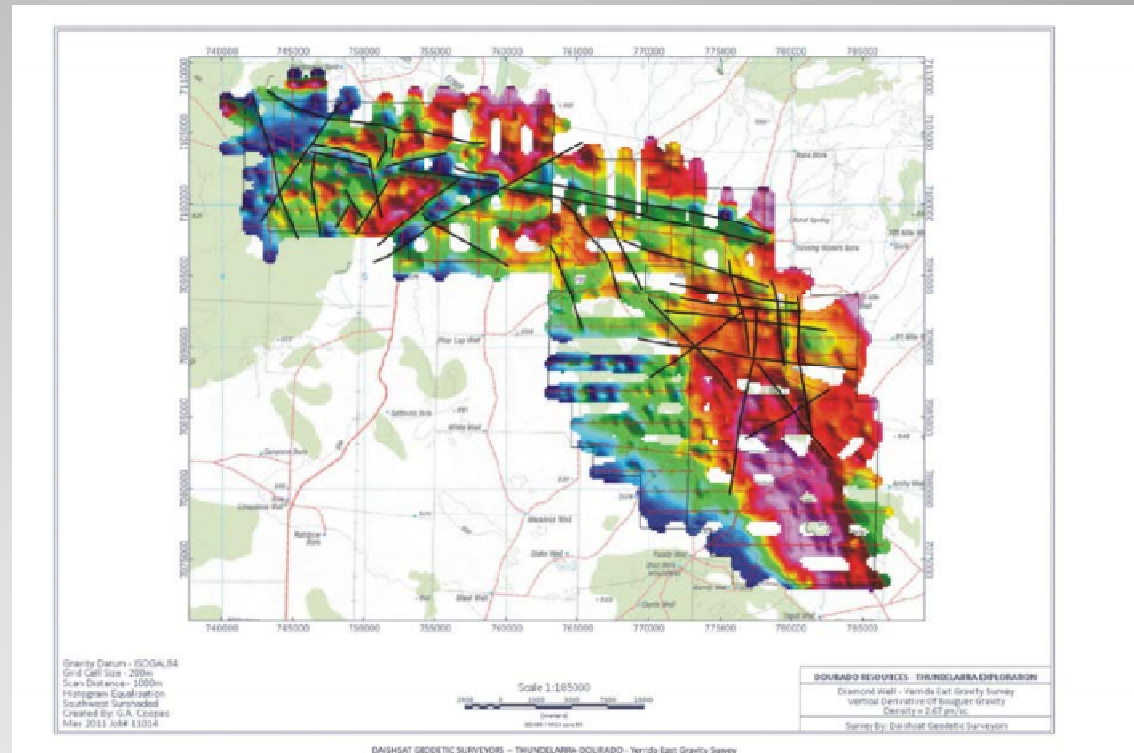

MOOLOOGOO – COPPER/GOLD PROJECT

- Analysis of geochemical sampling results in **13 anomalous geochemical zones**
- The identified Geochemical Zones extend over distances **exceeding 5 kilometres**
- Ground-based **gravity survey** completed - results received
- The geochemical zones show encouraging **copper and gold anomalies**, as well as, in some cases, strong magnetic and radiometric response

MOOLOOGOOL – COPPER/GOLD PROJECT

Interpretation of the ground based gravity survey indicated several significant WNW- trending and N - trending structures which are considered to be potential base metal targets where they are coincident with anomalous geochemistry

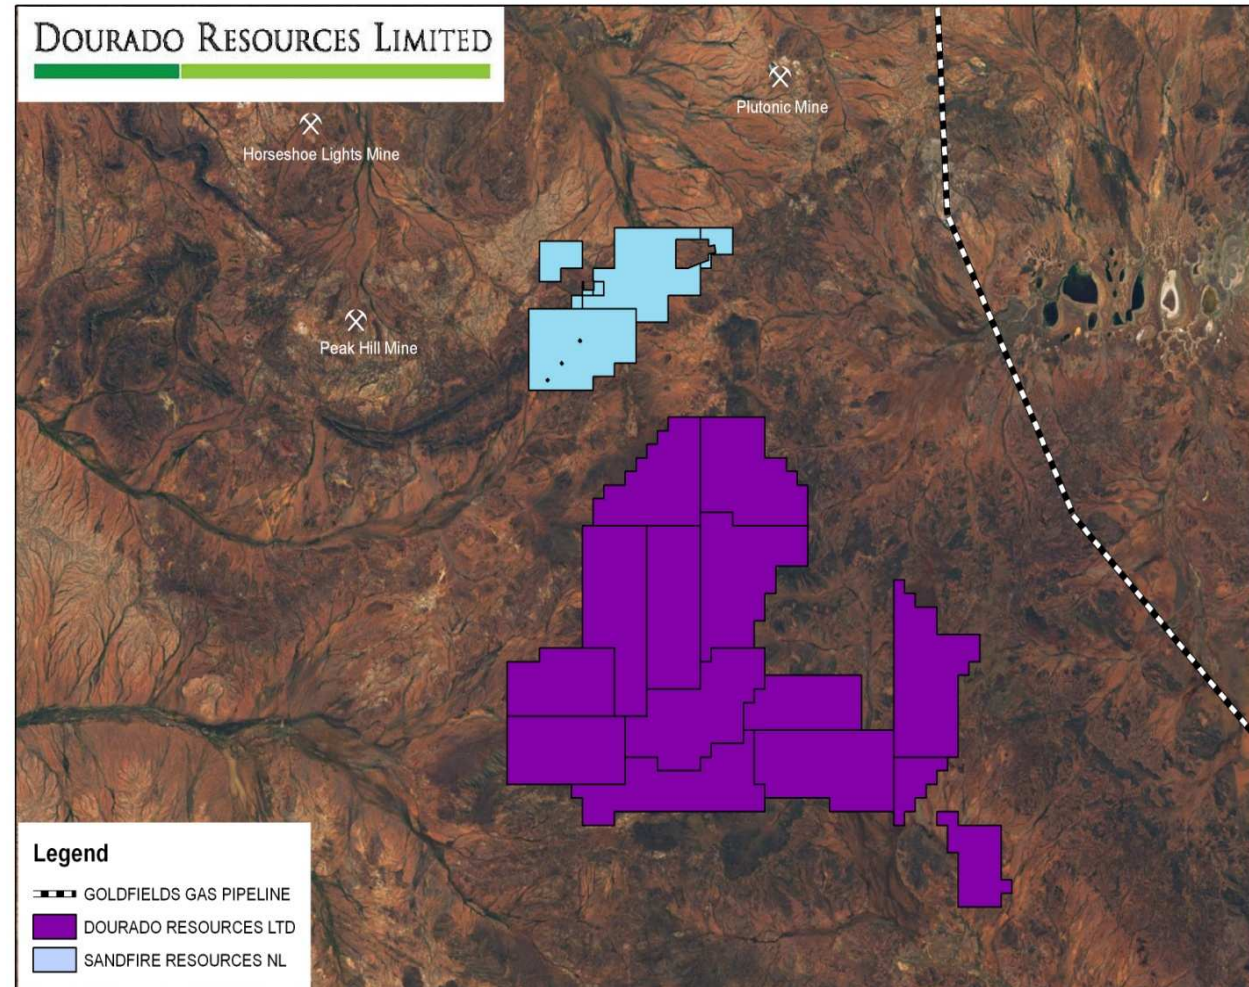

MOOLOOGOO – COPPER/GOLD PROJECT

- Surface sampling of geochemical zones to continue to identify **further potential drill sites**
- Activity in nearby projects continue to return very exciting results
- Sandfire Resources Ltd completed a **Bankable Feasibility Study** on its Doolgunna Project

MOOLOOGOOOL – COPPER/GOLD PROJECT

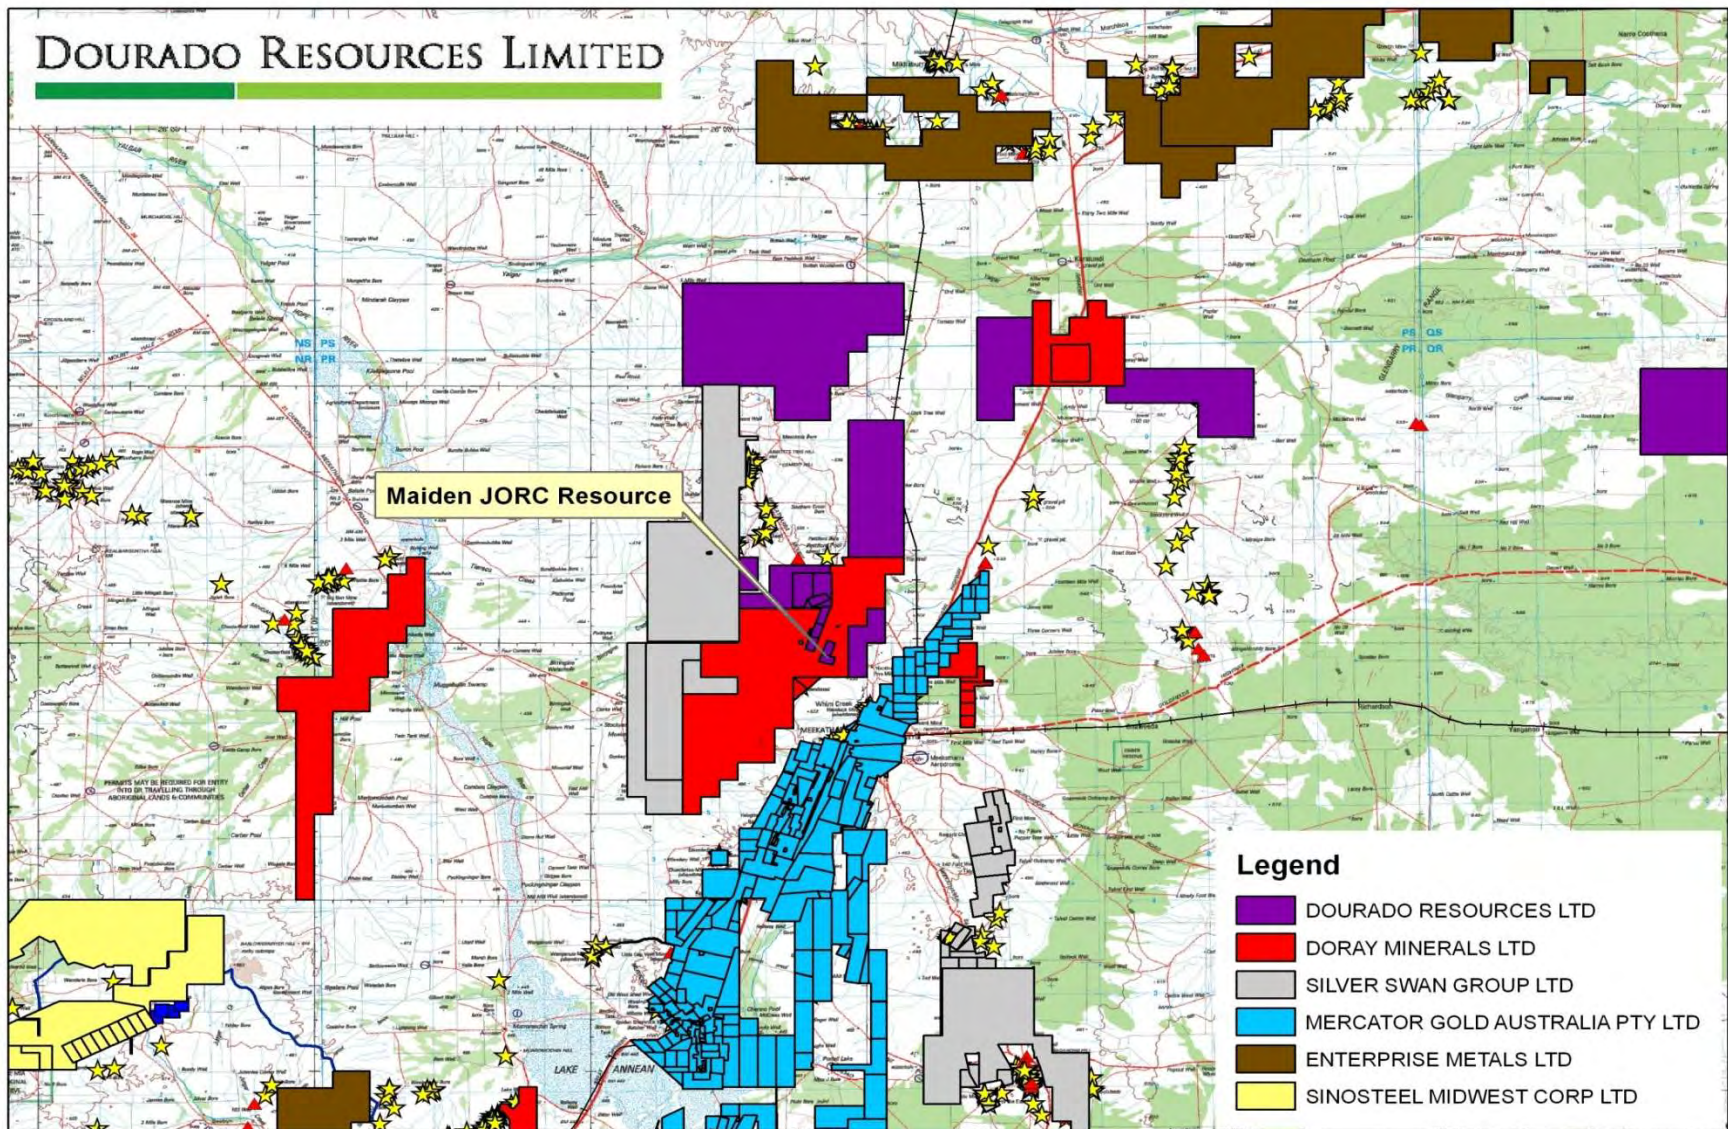

- Dourado's project is located **25km south** of the Sandfire DeGrussa deposit sharing similar geology

Proximity to Sandfire Resources Ltd

MOOLOOGOO – COPPER/GOLD PROJECT

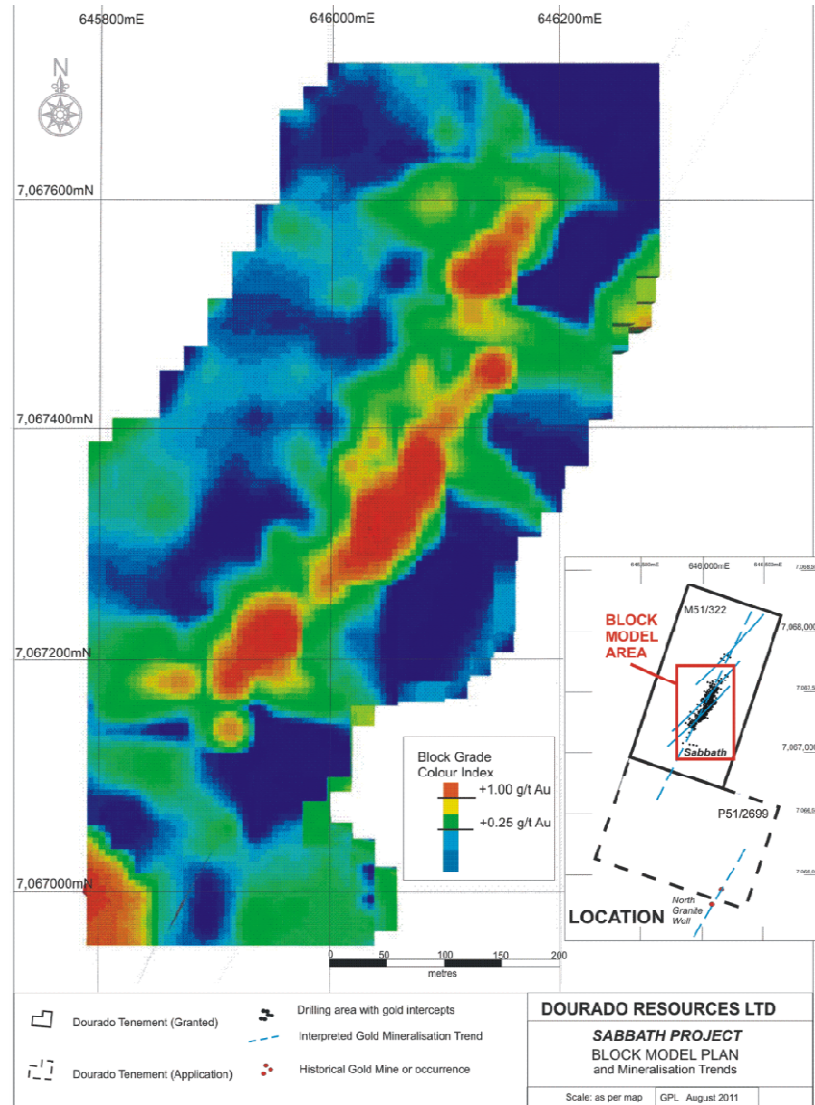

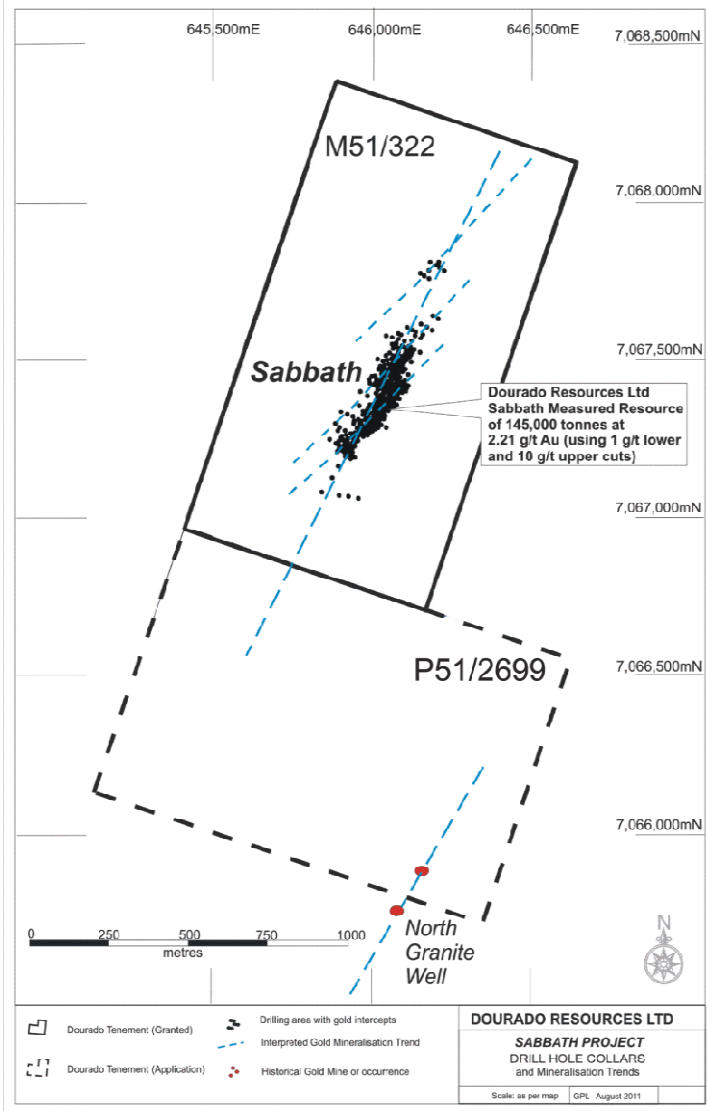

DOURADO RESOURCES LIMITED

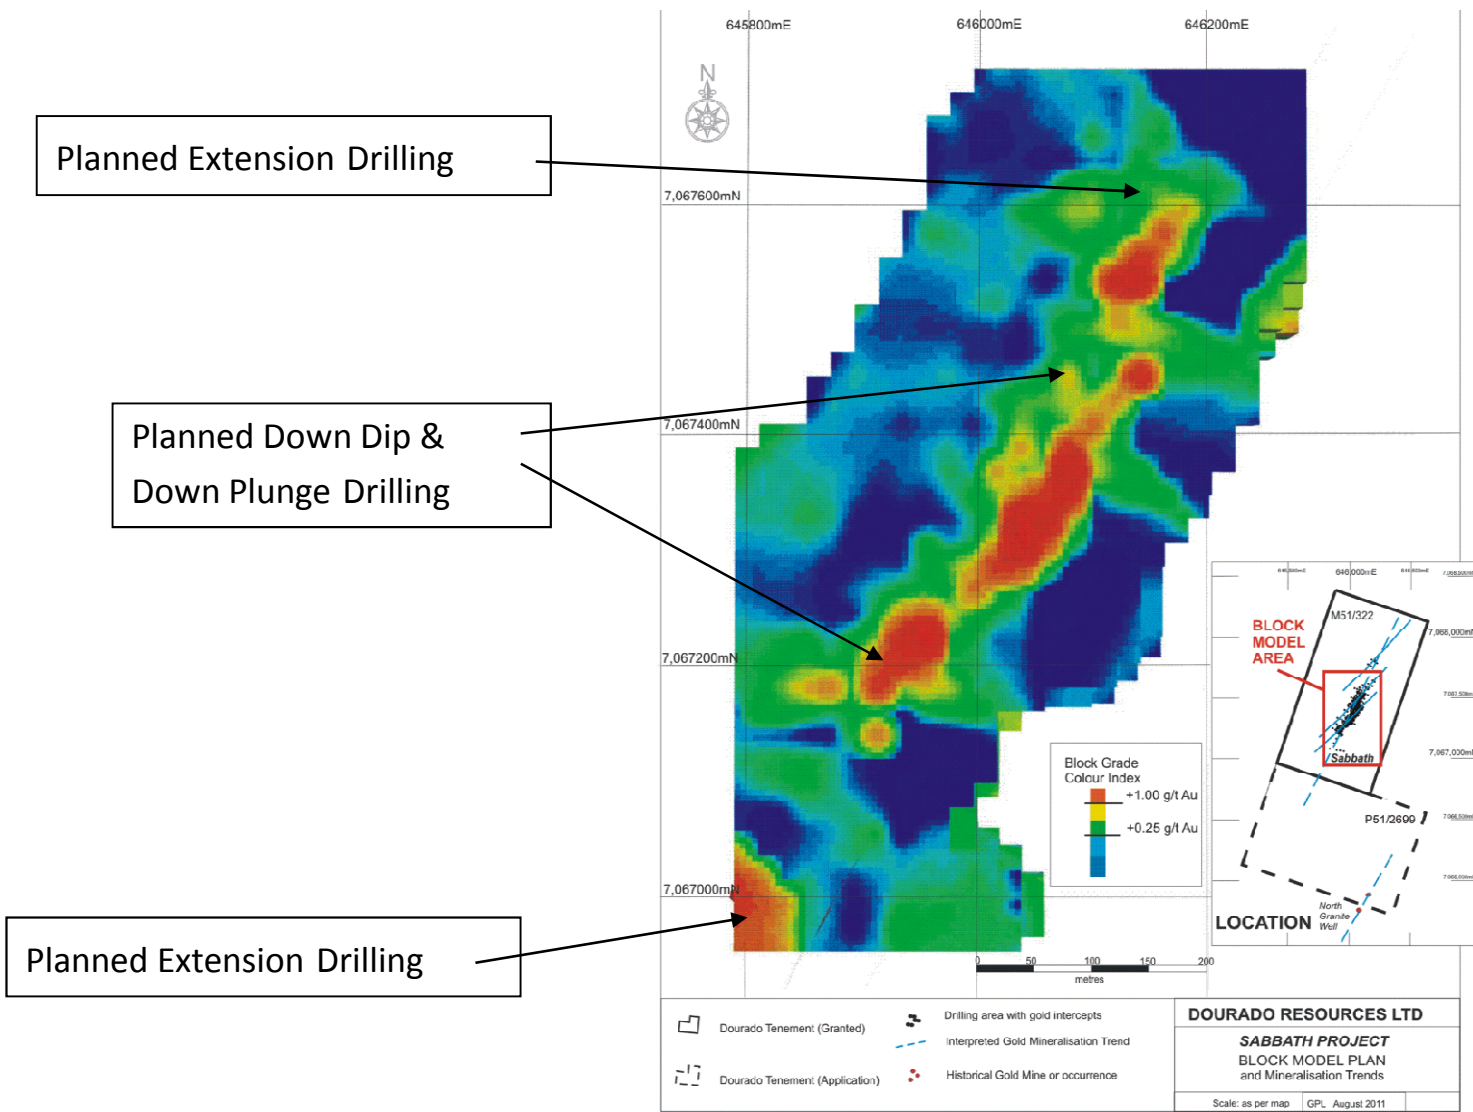

SABBATH/GARDEN GULLY - GOLD PROJECT

- Definition of a JORC Code Compliant Measured Mineral Resource of **145,000 @ 2.21g/t gold (equivalent to 9,156 oz of gold)** has been estimated for the Sabbath Gold Project to date
- The majority of this resource is within 50 metres of the surface and could potentially be brought into production within the near future
- Further RC drilling is planned to cover extensions of mineralisation along strike, parallel, down dip and down plunge
- Auger geochemical sampling program at Garden Gully to include 35 auger traverses for a total of 269 line kilometres and a mapping and sampling program is planned

SABBATH/GARDEN GULLY - GOLD PROJECT

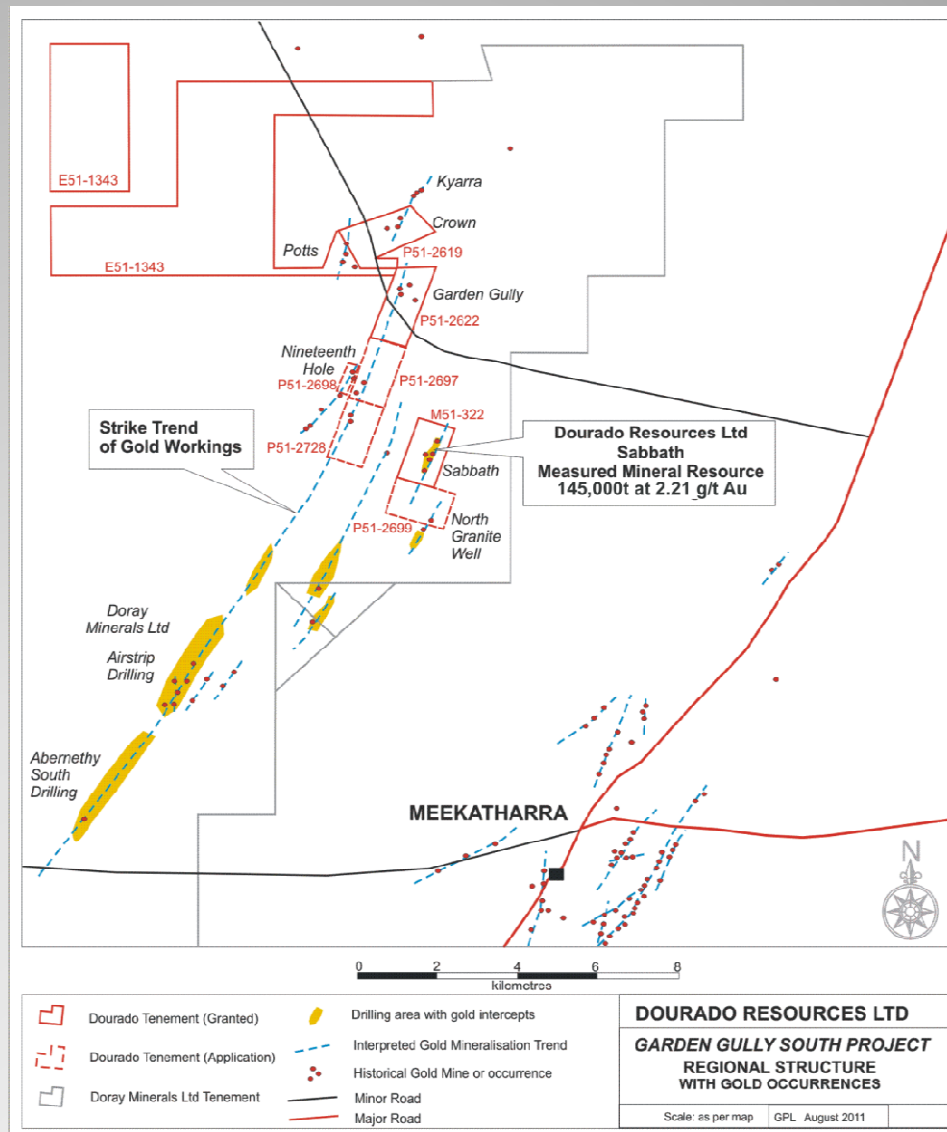

SABBATH/GARDEN GULLY - GOLD PROJECT

SABBATH/GARDEN GULLY - GOLD PROJECT

**Gold Strike Line –
Trend towards
Dourado Resources Ltd’s
Tenements**

SABBATH/GARDEN GULLY - GOLD PROJECT

- Dourado's Garden Gully and Sabbath tenements share contiguous borders with Doray Minerals Andy Well and Abbotts Gold Projects
- Doray Minerals published the maiden JORC resource for the Andy Well Project with the initial total resource of **311,000t @ 17.5g/t**
- Historic high grade intersections up to **10m @ 41.83g/t** at Doray Minerals Abbotts Project
- The Doray Minerals Wilber lode resource ranks amongst the highest grade deposits in Western Australia and is one of the highest grade virgin gold discoveries in Australia

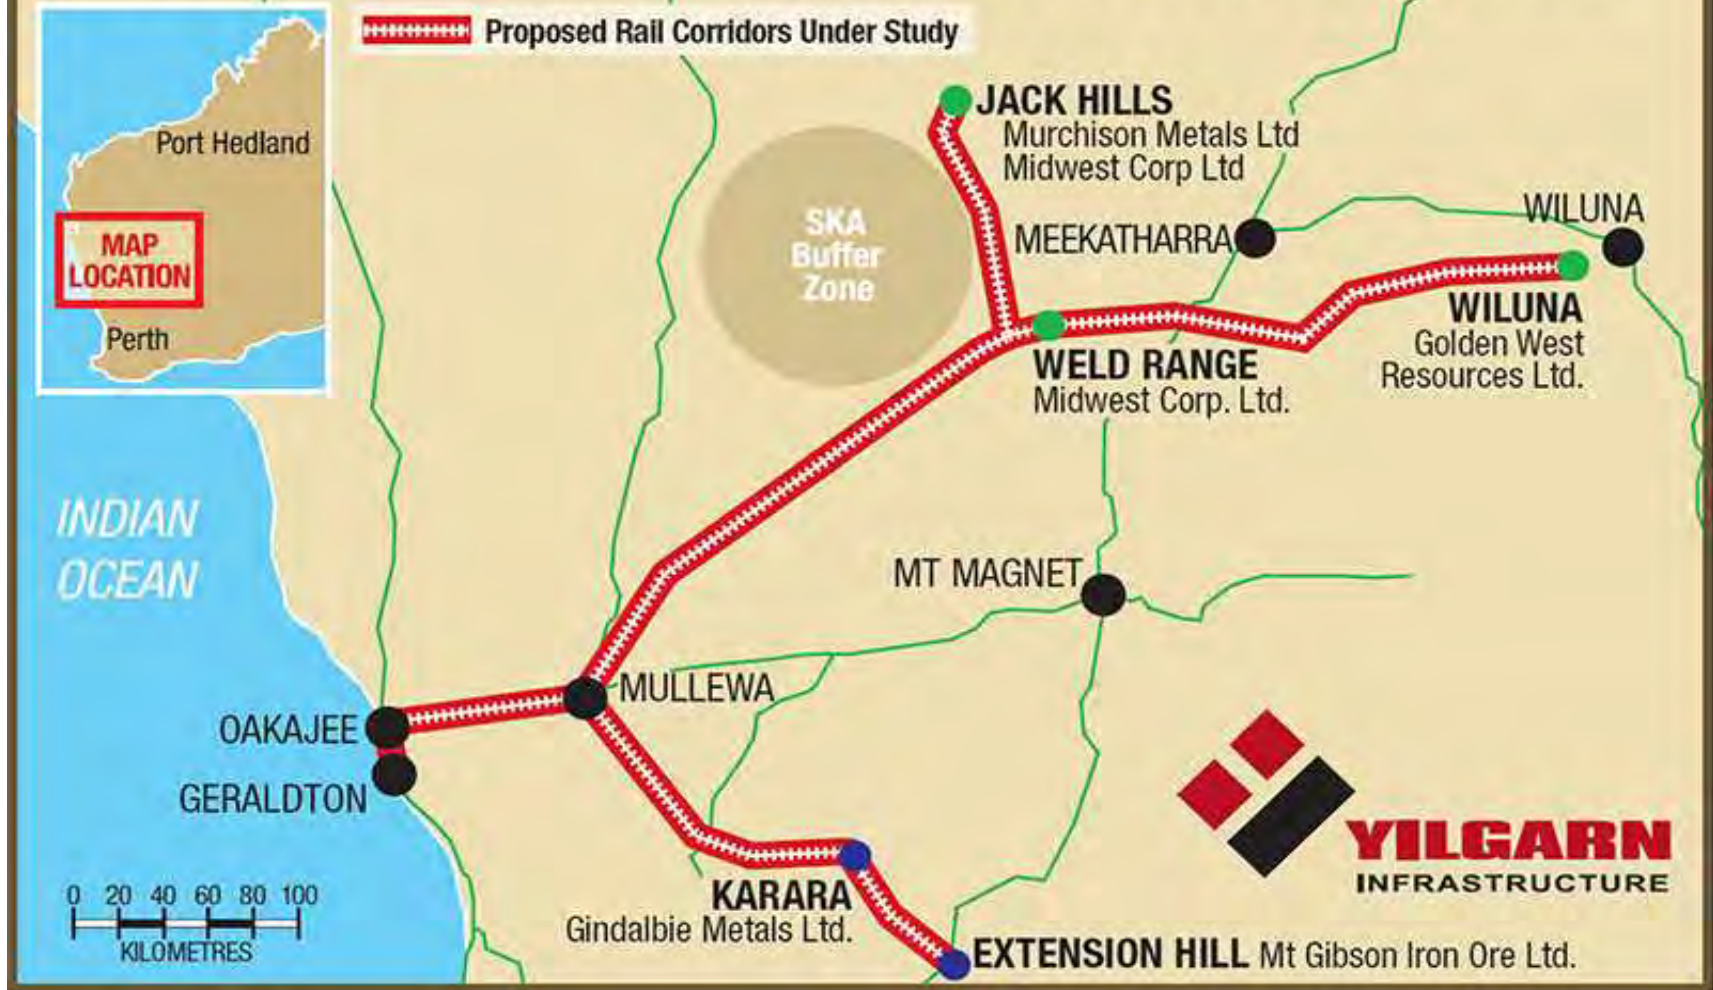

SABBATH/GARDEN GULLY - GOLD PROJECT

- Significant infrastructure (in operation or development) to assist in the transport of minerals to export locations
 - Oakajee Port & Rail Project
 - The Goldfields Gas Transmission Pipeline

MID-WEST INFRASTRUCTURE

OAKAJEE PORT & RAIL PROJECT - PROPOSED RAIL NETWORK

OAKAJEE PORT & RAIL (OPR) PROJECT

- Proposed railway aligned to service all Mid-West commercial mines
- Open-access based enabling delivery to export markets
- Potential to deliver up to AUD \$10 billion in mining investment into the Mid-West region

OAKAJEE PORT & RAIL (OPR) PROJECT

**DOURADO
PROJECT AREA**

This map illustrates the location of the pipeline throughout Western Australia.

Mainline = 1380km

GOLDFIELDS GAS TRANSMISSION PIPELINE (GGP)

- The pipeline supplies more than twelve (12) mines
- The pipeline was expanded by 20% in 2009
- Transports gas from source to producers to mining customers in the Mid-West

GOLDFIELDS GAS TRANSMISSION PIPELINE (GGP)

- 100% acquisition of Anuman Holdings Pty Ltd
- Acquisition of tenements E57/757, P58/1462 and E51/1491.
- Experienced Board and Management

MOVING FORWARD

MOOLOOGOO/DIAMOND WELL

- Preliminary results of geochemistry and structural trends indicate the presence of several copper and gold-bearing structures oriented in WSW-ESE, N-S and NNE-SSW directions.
- Results from the Gravity Survey confirm several significant basement structural trends, mainly in a WNW-ESE orientation extending through two tenements.
- Follow-up RAB drilling programs are being planned for each Geochemical Zone.

MOVING FORWARD

SABBATH - GARDEN GULLY

- Review of the Sabbath resource drilling highlights areas for additional drilling.
- A preliminary review of the tenement exploration potential has confirmed other target areas for sampling and drilling
- Follow-up RC drilling programs are being planned

MOVING FORWARD

Competent Person's Statement –

It is common practice for a company to comment on and discuss its exploration in terms of target size and type. In addition surface sampling assays and drill sample results may also be discussed in the context of information describing the presence of anomalous mineral content. The above information relating to an Exploration Target should not be misunderstood or misconstrued as an estimate of Mineral Resources or Mineral Reserves. Hence the terms Resource (s) or Reserve(s) have not been used in this context. The potential quantity and grade is conceptual in nature, since there has been insufficient exploration to define a Mineral Resource. It is uncertain if further exploration will result in the determination of a Mineral Resource.

The information in this statement that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by independent consulting geologist Brian Davis who is a Member of The Australian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists. Mr Davis is employed by Geologica Pty Ltd and has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and to the activity which is undertaken to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'.

Mr Davis consents to the inclusion in the report of the matters based on the information made available to him, in the form and context in which it appears”.

Forward-Looking Statement and Disclaimer –

This presentation has been prepared by Dourado Resources Ltd (“Dourado”, “DUO” or “The Company”). This document contains background information about Dourado current at the date of this presentation. The presentation is in summary form and does not purport to be all inclusive or complete. Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this presentation.
