2. LETTER FROM CHAIRMAN

26 May 2011

Dear Investor

On behalf of the Directors of Facilitate Digital Holdings Limited ("FAC"), I invite you to consider the offer of Shares as set out in this rights issue.

The offer is one new share for every 14 shares that you presently have, at a price of \$0.08 for each new share that you subscribe for. This rights issue is being fully underwritten by certain parties, including one of the directors, and their associated entities. Key dates for receipt of subscriptions and completion of the offer are set out in the offer document.

It is proposed to raise approximately \$700,000, less offer expenses, by this rights issue. The funds raised will assist the Company to offset pressures arising from currency movements, and assist with cashflow requirements for ongoing operations including supporting the Company's significant growth potential in key global markets.

The Company has made considerable progress in recent months with both the large international agency groups and tier two prospects in markets such as North America and Europe. We believe the global agency community is on the cusp of a rapid uplift in the adoption of process, trading and workflow automation technology, of which Facilitate Digital's Symphony platform is an undisputed market leader.

This increasing urgency from industry for trading and workflow automation, combined with the Company's best-in-market technology and global footprint, and a significantly developed sales pipeline, means the Company is well positioned for FY12 and beyond.

The Australian Dollar strengthening to record levels has impacted the Company, in combination with the timing of revenue commencing from major contracts. In light of this the Company anticipates the following:

- FY11 revenues of \$7.5m (previous guidance being 'circa \$8.0m'). This would represent a small increase over the prior year and a 12 per cent increase after adjustment for the currency impact.
- FY11 Net Loss Before Tax of approximately \$0.25m (previous guidance being 'circa break even'). This would represent a Net Profit Before Tax of \$0.35m after adjustment for the currency impact, versus a Net Profit Before Tax of \$0.04m in FY10.

Pleasingly strong progress has been made in recent weeks on major deployment projects for international contracts including GroupM and Mediabrands. Revenue from these contracts will be substantially realised in the FY12 year and beyond. Significant progress in the April/May period has also been made with major sales opportunities in North America, Europe, North Asia and APAC.

The Company has continued to invest in product development, which has resulted in a number of major enhancements to the Symphony platform in recent months. These enhancements are in combination significant, and will ensure Symphony remains a global industry leader, including:

- Translating the entire platform into Chinese (in time for May 2011 China rollout to all four GroupM agencies);
- Management of complex taxation and multiple discount levels;
- Campaign performance forecasting;
- Electronic trading - purchase (insertion) order generation and sign-off;
- Integration of campaign audit data and performance reporting for all major international adservers.

The company also expects in the near future to execute a renewed agreement with EyeWonder LLC (a US based global rich media ad serving vendor). The new agreement will incorporate a payment schedule for remittance of previously accrued funds collected by Facilitate on behalf of EyeWonder. Payments will be timed so as to not to put undue pressure on the company's cash position.

I also note that the Company has previously stated that interest has been growing in its technologies and products from a number of global groups. The Company can now advise that, in recent months, it has received informal and incomplete approaches from a number of parties regarding the company's interest in being acquired or being party to a merger. Discussions are ongoing and no formal offer has been made.

The Company has decided to seek advice as to how best to progress these discussions, and to consider all available scenarios. To this end the Company has appointed M H Carnegie & Co as Advisor.

The information in this Rights Issue is very important and should be read in detail. We believe that the prospects for the Company are encouraging, but any investment of this nature should be considered as speculative. Shareholders should seek their own independent investment advice on this Rights Offer.

On behalf of the Directors, I look forward to welcoming your subscriptions under the terms of this Rights Issue.

Sincerely

A handwritten signature in cursive script that reads "Stuart Simson".

Stuart Simson
Chairman

5.9 Optionholders

Existing Optionholders will not be entitled to participate in the Offer unless they:

- are eligible to participate in the Offer as a result of being a holder of Shares on the Record Date and otherwise satisfying the eligibility requirements, and then only may participate to the extent of their shareholding, not their option-holding.

A CHESS statement or issuer sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their holding changes.

6. RISK FACTORS

An investment in New Shares should be regarded as speculative and is a decision which is subject to the same type of risks which are ordinarily associated with purchasing company shares in ASX listed companies.

The brief summary of risk factors set out below is not exhaustive.

Eligible Shareholders should consider these risks carefully and, if they are in any doubt, should consult their financial, legal or other professional adviser.

6.1 General risk factors

As is the case with any investment listed on ASX, the value of New Shares may rise above or fall below the Issue Price. Movement in the Company's share price may be attributable to any number of factors associated with financial and operating conditions. Similarly, external factors may have a bearing on the value of New Shares, over which the Company has no control.

These external factors include (but are not limited to):

- economic conditions in Australia and overseas;
- share market fluctuations;
- interest and inflation rates;
- changes in investor sentiment toward particular market sectors;
- the demand for, and supply of, capital;
- liquidity of Shares and the lack of an active market for Shares;
- changes in fiscal, monetary, regulatory and other government policies;
- geo-political conditions such as acts or threats of terrorism or military conflicts; and
- any future changes to tax laws or accounting standards.

6.2 Key personnel

The Company's success depends to a significant extent upon its key management personnel as well as other management and technical personnel. The loss of services of any such personnel could have a material adverse effect on the Company and its share price.

6.3 Liquidity risk

There can be no guarantee that there will continue to be an active market for Shares. There may be relatively few buyers or sellers of Shares on ASX at any given time, particularly as some of the Directors hold substantial shareholdings in the Company. This may affect the volatility of the market price of Shares and the prevailing price at which Shareholders will be able to sell their Shares. This may result in Shareholders receiving a market price for their Shares which is less or more than the price paid for the New Shares.

6.4 Capital funding risk

In order to achieve growth and invest in further technology, the Company may need additional equity or debt in the future. There is no assurance that the Company will be able to raise such funding when it is required or that the terms associated with the provision of such capital will be satisfactory to the Company.

6.5 Intellectual property risk

The Company relies heavily on its intellectual property (**IP**). Successful exploitation of its research and development program depends upon the Company being able to secure its IP and/or defend challenges to its IP from third parties.

6.6 Investment risk

An investment in New Shares is a speculative investment. New Shares carry no guarantee in relation to the payment of dividends, returns of capital or market value on those New Shares.

6.7 Technology risk

The Company operates in an industry that relies on accurate and innovative products. Technology changes occur rapidly. There is a risk that the products offered by the Company may become technically inferior to other products in the market. The Company must continually update its products to remain competitive. Failure to do so will have a material adverse impact on the Company.

6.8 Law, regulatory and policy risk

Changes in government legislation, regulation and policy in jurisdictions in which the Company operates may adversely affect the operations of the Company, future earnings of the Company, the timing of revenues and the market value of Shares quoted on the ASX.

6.9 International business

The Company operates in several countries around the world. The Company's reporting currency is Australian dollars. The Company's global operations give rise to an exposure to changes in foreign exchange rates as revenue from countries other than Australia are denominated in currencies other than Australian dollars. As such, changes in exchange rates, restrictions on repatriation of earnings and changes in a specific country or region's political or economic conditions could adversely affect the Company's profitability and financial position.
