## **ASX ANNOUNCEMENT**

**4 November 2011**

### **MIKOH Receives Orders from Singapore**

The Board of MIKOH Corporation Limited (**ASX: MIK**) wish to advise that it has received its first orders from Singapore. This is a market that we have been trying to penetrate for some time and although the order is small it represents quite a breakthrough in this market.

Intensecomp Pte Ltd in Singapore has ordered 1,000 Smart&Secure passive RFID AVI headlamp tags for their access control projects. The properties which will be utilising the headlamp tags are two condominiums and one industrial park in Singapore. A third condominium project is pending confirmation. "We are expecting more car parks to start using passive RFID for access control, and we look forward to working with MIKOH to bring the solution to our customers", said Mr Shawn Chua, Managing Director of Intensecomp.

Intensecomp Pte Ltd is a full service RFID system integrator with offices in Singapore and Malaysia. Working to a One Enterprise, One Solution ideology, Intensecomp combines leading edge hardware technology with a complete range of small but powerful software components. Intensecomp provides turnkey solutions in RFID, SmartCard Systems, SMS Communication Gateways, Wireless and Mobile Applications, as well as software development and system design services.
