The Macquarie Winton Global Opportunities Trust (the "Trust") has exposure to the Alpha Select Winton FF Limited, a managed account with essentially the same trading strategy as the Winton Futures Fund, as outlined in section 3 of the Trust's Product Disclosure Statement (PDS)².

Comment from Winton Capital

Stock markets fell and the U.S. dollar rallied in a reversal of the moves that we saw in April, albeit with a slight recovery in the final week of the month. In the commodity sector, precious metals, base metals and oil also reversed their earlier rise. Only in the fixed income sector was there a continuation of the moves that happened last month.

Silver fell by 27% in the first week of May, the catalyst for this move was not clear, but it did coincide with the Commodity Exchange (COMEX) raising the margin requirements on this futures contract.

The Fund posted modest gains in the fixed income sector, with losses concentrated in currencies, energies and stock indices.

Note: Total return index with price at 1 December 2005 = 100. All dates are as at month end.

How the Trust is managed

The Trust has been designed to offer investors a way to access the investment management expertise of Winton with the security of capital protection of the Trust's underlying investment at 30 November 2012.

The Trust's managed futures exposure is managed in accordance with the Alpha Select Winton FF Limited's investment strategy.

This strategy aims to identify a market trend, assess the likelihood of its continuation and extent, and invest to profit from that view. Winton's investment philosophy is that specific market behaviour and trends can be identified and profitably exploited.

Winton's trading model and research program studies the interaction between price and other data series to identify and assess trends with the aim of profiting from them.
