# COMMENCEMENT OF DRILLING

## HIGHLIGHTS

- **Drilling has commenced at the Spion Kop Prospect targeting high priority geochemical and geophysical targets.**

## BOOROWA PROJECT

### Spion Kop Licence (EL 7412)

The Company is very pleased to report that a programme of 3,000 metres of RC (Reverse circulation) percussion drilling at the Spion Kop Prospect has commenced. The Spion Kop Prospect has the potential to identify high grade and large tonnage deposits of gold ore and is located in an area that has outstanding infrastructure.

Reverse circulation drilling programme is targeting high order geochemical soil anomalies and Induced Polarisation (IP) chargeability targets. Co-incident gold and arsenic geochemical soil anomalies are to be drill tested as well as four IP chargeability targets (Figure 1).

## OAKLAND RESOURCES

- Aggressively exploring for gold deposits in the emerging Silurian Gold Province of New South Wales.
- Large ground position (Figure 3) of ~1,000 km<sup>2</sup> in similar Silurian stratigraphy to that which hosts the 2,960,000 ounce McPhillamys Gold Deposit in New South Wales<sup>1</sup>.
- All exploration licences 100% owned.
- The Day Dawn prospect occurs along strike from the McPhillamys Deposit.
- McPhillamys is the second largest gold discovery made in Australia over the last decade.
