## Forward Looking Statements

This presentation by Olympus Pacific Minerals Inc. ("Olympus") may include statements concerning future operations, prospects, strategies, plans, projections, forecasts, financial conditions and economic performance, as well as goals intentions and objectives, that are forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995. These statements are based upon a number of assumptions and estimates that are subject to significant risks and uncertainties, many of which are beyond our control. Such risks and uncertainties include fluctuations in precious metal prices, unpredictable results of exploration activities, uncertainties inherent in the estimation of mineral reserves and resources, fluctuations in the costs of goods and services, problems associated with exploration, development and mining operations, changes in legal, social or political conditions in the jurisdictions where Olympus operates, lack of appropriate funding and other risk factors, as discussed in Olympus' filings with Canadian and United States securities regulatory agencies. Should one or more of these risks or uncertainties materialize, or should underlying assumptions or estimates prove incorrect, actual results may vary materially from those anticipated, believed, estimated or expected. When used, words like "anticipates," "expects," "believes," "forecasts," "projects," "estimates," "seeks," "plans," "intends" and similar expressions are intended to identify forward-looking statements designed to fall within securities laws' safe harbors for forward-looking statements. Olympus cautions readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Olympus disclaims any obligation to subsequently revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events. Mr. Rod Murfitt, P.Geol. Chief Geologist for Olympus is our Qualified Person for the as defined by NI 43-101. Resource, reserve and production goals, estimates and forecasts may be based on data insufficient to support them. This presentation and the information contained herein do not constitute an offer or a solicitation of an offer for sale of any securities. None of the information contained herein is intended to be, and shall not be deemed to be, incorporated into any of Olympus' or its affiliates' securities related filings or documents. We Seek Safe Harbor."

### JORC Resource

Scientific or technical information in this presentation has been prepared under the supervision of Rod Murfitt, Chief Geologist for Olympus and a member of the Australasian Institute of Mining and Metallurgy (AusIMM). Mr. Murfitt has sufficient experience which is relevant to the style of mineralization under consideration and to the activity which he is undertaking to qualify as a Competent Person, as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (the JORC Code). Mr. Murfitt consents to the inclusion in this presentation of the information, in the form and context in which it appears.

The information in this presentation relating to the Bau JORC resource is based on information compiled by John Ashby who is a fellow of the Australasian Institute of Mining and Metallurgy and who is employed by Ashby Consultants Ltd. John Ashby has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and to resource estimation to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves." John Ashby consents to the inclusion in this presentation of the matters based on his information in the form and context in which it appears.

## Independent (SGS) onsite Assay Laboratory

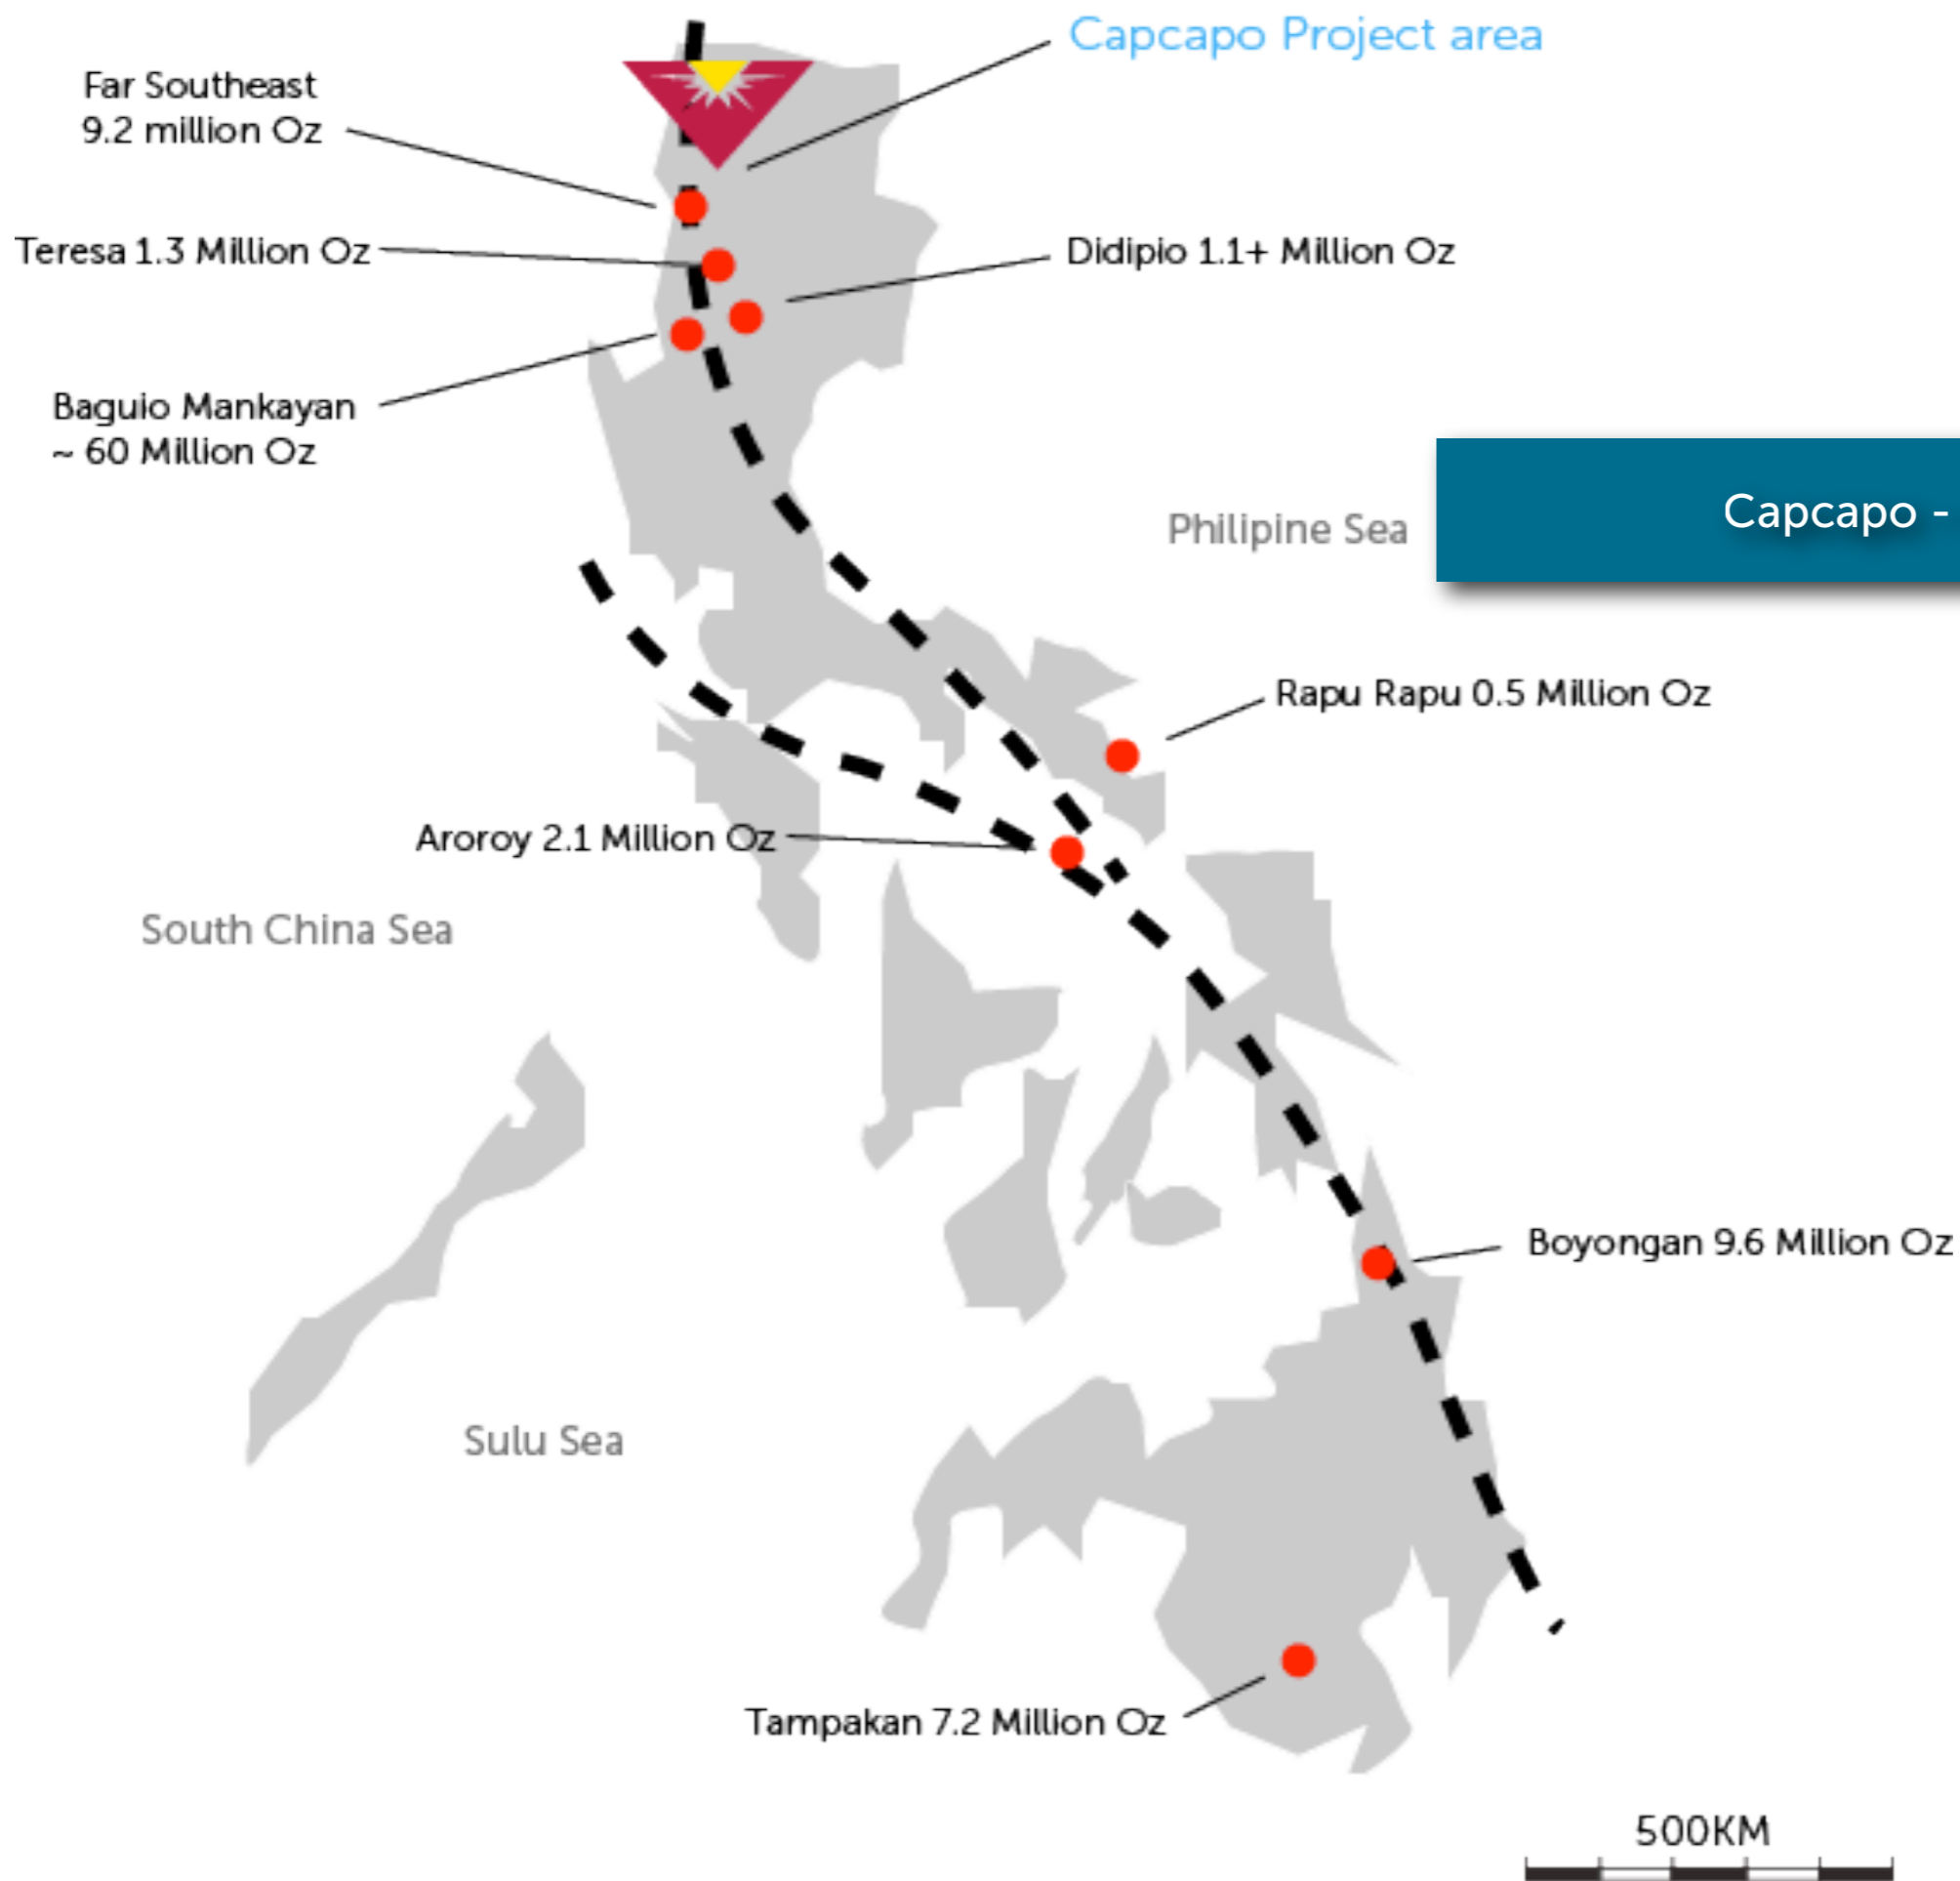

## The road ahead at BAU

During coming months, Taiton sector step-out and in-fill drilling will delineate the gross mineralization geometry and gold grade distribution within the main Taiton structures to depths of 200-300m. It is expected that by 4Q 2011, drilling will be adequately advanced to allow estimation of expanded resources for input into definitive mining feasibility studies during 2012.

## Capcapo - The Philippines

The next major Copper/Gold Discovery

Capcabo - in the middle of it all.

## Capcapo - The Philippines

The Capcapo property is located just to the north of the prolific Baguio-Mankayan Gold District, which has a combined production, current reserves and resources in excess of 60 million ounces of gold.

The project area exhibits many analogous features to those productive deposits to the south, but has remained relatively under explored.

## Capcapo

- Due Diligence Drilling intersects significant gold and copper at Capcapo
- Rights to earn up to 60% ( With affiliates)
- Gold and molybdenum potential associated with multiple intrusive centres.

## Capcapo - Intercepts
