GOLD DRILLING UNDERWAY AT CERRO CURUNDAY

Highlights

- **Drilling underway at flagship Cerro Curunday gold project in the La Libertad region of Peru**
- **6000m of diamond drilling planned to test oxide ore body at the summit of Cerro Curunday - 30 holes to be drilled**
- **Field activities underway across gold portfolio**

South American focused gold explorer Promesa Ltd (ASX:PRA) is pleased to advise that its maiden drilling program at Cerro Curunday located in the La Libertad region in Peru has commenced.

The initial drilling program, comprising 6000 meters of diamond drilling, will test a series of gold-bearing zones identified by channel sampling along a 2.1km strike length of epithermal gold mineralization.

Drilling will comprise diamond drilling from surface to enable detailed logging and sampling.

The commencement of drilling comes just one week after the readmission of Promesa to the ASX after the completion of an AUD\$7.515m capital raising.
