

**ASX Announcement  
30 November 2011**

## **Monash University Research Agreement signed – Uley Graphite**

Strategic Energy Resources Ltd (ASX: SER) is pleased to announce that it has signed the Australian Research Council (“ARC”) Linkage Projects Research Agreement with Monash University, Victoria, Australia.

The project involves the utilization of Uley graphite fines in high performance graphene-based electrochemical energy storage. A postdoctoral researcher and two PhD students have joined the team to work towards the goals of the project.

During the first year, different grades of graphitic fines will be sent to Monash for the scientists to characterize this raw material. The next step will be to convert the raw material to graphene-based nanomaterials utilizing in-house processes for further characterization.
