

WORK-OVER OPERATIONS UPDATE – A-2 COMPLETE

14 July 2011. Triangle Energy (Global) Limited (Triangle Energy) (ASX: TEG) is pleased to provide an update on its work-over operations.

Pase A2 work-over drilling was completed at 24:00 on 13 July 2011. A new 4 1/2" tubing completion string has been successfully run to depth and pressure tested. A Production Tree has been installed ready for a production well flow testing program over the coming weeks.

The rig is currently being dismantled for transportation to Pase A-1 location to remove a blockage inside the existing 7" production string, providing access to an additional 442 feet of lower reservoir.

Triangle Energy looks forward to providing further updates with respect to its work-over program.

About Triangle Energy:

Triangle Energy is a gas production and exploration company based in Perth. Its wholly-owned subsidiary, TPI, is based in Jakarta and is the 100% holder and operator of the Pase PSC which covers an area of 922km² in Aceh Province, North Sumatra, Indonesia.

Triangle Energy has three producing wells. It has been cash-flow positive since early 2010 and continues to operate profitably. Approximately 70% of the gas produced is sold at premium LNG prices. Triangle Energy is continuing to review further acquisition opportunities in the area.
