4. CHAIRMAN'S INVESTMENT INVITATION

28 March 2011

United Orogen Limited is pleased to offer its Shareholders the opportunity to subscribe for New Shares by participating in a 1 for 2 Rights Issue.

The Rights Issue plans to raise up to a maximum of \$971,592.80 which will be used to progress exploration and development within the company's portfolio of wholly and majority owned mining tenements that are prospective for gold, base metals and other mineralisation.

The Company's Horseshoe West tenement, which is part of the Company's Horseshoe Project is situated 4 kms to the north of the old Horseshoe Mine. The Company believes this area is very prospective for gold and wishes to carry out a sampling programme targeting gold mineralisation.

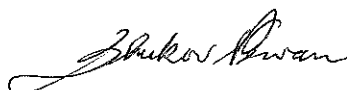

The Company's other gold and base metal projects are also regarded as prospective and cover areas with anomalous sampling and/or geochemical and geophysical anomalies which warrant further exploration.

The fact that ASX may admit the New Shares offered by this Prospectus to quotation is not to be taken in any way as an indication of the merits of the Company or the New Shares and Options.

6.8 Opening and Closing Dates

The Rights Issue will open for acceptances of Entitlements on 12 April 2011. The Closing Date for acceptances will be 27 May 2011. The Directors reserve the right to vary the Opening Date and Closing Date, subject to compliance with ASX Listing Rules.

6.11 Overseas Eligible Shareholders

No offer of New Shares will be made to Shareholders resident outside Australia and New Zealand.

New Shares to which any Shareholders who are not resident in Australia or New Zealand would otherwise be entitled will form part of the Shortfall.

This Prospectus and accompanying Entitlement and Acceptance Form do not, nor are they intended to constitute an offer in any place in which, or to any person to whom it would not be lawful to make such an offer.

- e. If the Company is listed on the ASX, the Company will within seven (7) days from the date of issue and allotment of Shares pursuant to the exercise of an Option, apply to the ASX for, and use its best endeavours to obtain, Official Quotation of all such Shares, in accordance with the Corporations Act and the Listing Rules.
- f. The Company will generally comply with the requirements of the Listing Rules in relation to the timetables imposed when quoted Options are due to expire. Where there shall be any inconsistency between the timetables outlined herein regarding the expiry of the Options and the timetable outlined in the Listing Rules, the timetable outlined in the Listing Rules shall apply.

7. Reconstruction

In the event of a reconstruction (including consolidation, sub-division, reduction or return) of the issued capital of the Company, all rights of the option holder will be changed to the extent necessary to comply with the Listing Rules applying to the reconstruction of capital, at the time of the reconstruction.

8. Participation in New Share Issues

There are no participating rights or entitlements inherent in the Options to participate in any new issues of capital which may be made or offered by the Company to its Shareholders from time to time prior to the Option Expiry Date unless and until the Options are exercised. The Company will ensure that during the exercise period of the Options, the Record Date for the purposes of determining Entitlements to any new such issue, will be at least 6 Business Days after such new issues are announced (or such other date if required under the Listing Rules) in order to afford the Option Holder an opportunity to exercise the Options held by the Option Holder.

9. Change of Options' Exercise Price or Number of Underlying Shares.

There are no rights to change the exercise price or the number of underlying Shares if there is a pro-rata issue or bonus issue to the holders of Shares.

8. ADDITIONAL INFORMATION

8.1 Risk Factors

An investment in the Company is not risk free and prospective new investors should consider the risk factors described below, together with information contained elsewhere in this Prospectus, before deciding whether to apply for Securities.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

Exploration Risk

The mineral tenements of the Company are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings. There can be no assurance that exploration of the project areas, or any other tenements that may be acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

Operating Risks

The operations of the Company may be affected by various factors, including:

- failure to locate or identify mineral deposits;
- failure to achieve predicted grades in exploration and mining;
- operational and technical difficulties encountered in mining;
- difficulties in commissioning and operating plant and equipment;
- mechanical failure or plant breakdown;
- unanticipated metallurgical problems which may affect extraction costs;
- adverse weather conditions and acts of God;
- industrial and environmental accidents;
- industrial disputes; and
- unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenement interests. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

Resource Estimates

Resource estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

Commodity Price Volatility and Exchange Rate Risks

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to

commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious, base and other metals, technological advancements, forward selling activities and other economic factors.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

Environmental Risks

The operations and proposed activities of the Company are subject to State and Federal laws and regulation concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Title Risks and Native Title

Interests in tenements in Australia are governed by the respective State legislation and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments.

It is also possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected. The Directors will closely monitor the potential effect of native title claims involving tenements in which the Company has or may have an interest.

Share Market Conditions

The market price of the Securities and the value of the Company will be subject to fluctuations in line with the volatility of the share market in general. The prices for the Securities on the ASX may rise or fall due to numerous factors such as general economic conditions, variations in the global and local markets for listed securities generally, movements in, or outlook on, interest rates and inflation rates, currency fluctuations, commodity prices, changes in investor sentiment towards particular market sectors and the demand for, and supply of, capital stock, securities or commodities.

The prices for shares for many companies have in recent times been subject to wild fluctuations which in many cases may reflect a diverse range of non-company specific influences such as global hostilities and tensions, acts of terrorism and the general state of the economy. Such market fluctuations may materially adversely affect the market price of the Securities.

There can be no guarantee that an active market in the Securities will develop or that the price of the Securities will increase. The number of buyers and sellers of the Securities on the ASX at any time may increase the volatility of the market price of the Securities and may also affect the prevailing market price at which Applicants are able to sell their Securities.

General Investment Risks

The Company's future possible revenue and operations may be affected by a number of factors which are beyond the control of the Company. Those factors include:

- local and world economic conditions;
- interest rates;
- levels of tax, taxation law and accounting practice;
- government legislation or intervention;
- inflation or inflationary expectations; and
- natural disasters, social upheaval or war in Australia or overseas.

New Resources Tax

The Commonwealth Government has announced a proposal to introduce legislation to establish a Minerals Resources Rent tax. It was announced that the proposed new tax will become operational from 1 July 2012 and apply to the mining of iron ore and coal.

Full details of the new tax have not been confirmed and in those circumstances the Company is not in a position to assess the impact, if any, of such tax on the Company going forward.

Regulatory

The introduction of new policies, legislation or amendments to existing policies or legislation by governments or the interpretation of those laws in any of the legal jurisdictions which govern the Company's operations or contractual obligations could impact adversely on the assets, operations and ultimately the financial performance of the Company and its Securities.

Additional Funding Requirements

The Directors expect that the proceeds of the Offer will provide sufficient working capital to enable the Company to achieve its initial business objectives. The Directors can, however, give no assurances that such objectives will in fact be met without future borrowings or further capital raisings and, if such borrowings or capital raisings are required, that they can be obtained on terms favourable to the Company.

In addition, expenditure may need to be incurred which has not been taken into account in the preparation of this Prospectus. Although the Company is not aware of any additional expenditure requirements, if such expenditure is subsequently incurred, this may adversely affect the expenditure proposals of the Company.

Uninsured Risks

Exploration for and development of minerals involves risks which could result in the Company incurring losses and liabilities to third parties. There is a risk that the Company may not be insured against all losses or liabilities which could arise from its operations. If the Company incurs losses or liabilities which are not covered by its insurance policies, the funds available for exploration and development will be reduced and the value and/or tenure of the Company's assets may be materially affected.

Specific Risks associated with the Company

There are also a number of specific risks associated with the Company which may adversely affect the Company's financial position, prospects and price of its Securities. In particular, the Company is subject to risks relating to the exploration and development of mineral properties which are not generally associated with other businesses.

Set out below are specific risks that may adversely affect the Company:

- the Company cannot guarantee that those tenements that are applications for tenements will ultimately be granted in whole or in part pursuant to the Mining Act;
- the Western Australian Department of Mines and Petroleum (“Department”) from time to time reviews the environmental bonds that are placed on tenements. The Directors are not in a position to state whether a review is imminent or whether the outcome of such a review would be detrimental to the funding needs of the Company;
- the estimated exploration costs of the Company described in section 6.3 of this Prospectus are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice and this may materially and adversely affect the Company’s viability;
- the approval processes for uranium mining are more rigorous than for the mining of other metals, as both Commonwealth and State Government legislation needs to be satisfied. There is a risk that, should economic deposits of uranium be discovered, the necessary government approvals may not be granted, or may be significantly delayed.

8.2 Interests of Directors

Other than as set out below or elsewhere in this Prospectus, no Director (whether individually or in consequence of a Director’s association with any company or firm or in any material contract entered into by the Company) has or had within 2 years before the lodgement of this Prospectus with the ASIC, any interest in:
