## ASX Announcement

26 November 2012

### Timetable for Delisting

At the CathRx Ltd (**Company**) annual general meeting held on 14 November 2012, approval was given by the Company's shareholders for the Company's shares to be delisted from the Australian Securities Exchange (**ASX**).

It is planned that, subject to ASX approval, the Company's shares be suspended from trading on the ASX at the close of trade on 21 December 2012 and the Company be removed from the official list of the ASX at the close of trade on 31 December 2012 (**Removal Date**).

Shareholders will not be able to trade their shares on the ASX following the suspension of trading on 21 December 2012. Shareholders who remains registered on the Company's CHESS sub-register as at 5:00pm (Sydney time) on the Removal Date will be transitioned to issuer sponsored and will be issued with an Issuer Sponsored statement reflecting their shareholding.

### About CathRx

CathRx is a medical device company which designs reprocessable cardiac catheter solutions for the treatment of people suffering from electrical problems of the heart known as cardiac arrhythmias. CathRx's proprietary diagnostic and therapeutic catheters are designed to give physicians the tools to cost effectively treat patients with speed, safety and precision.

### About cardiac arrhythmias

Cardiac arrhythmia describes a group of increasingly common conditions where there is abnormal electrical activity in the heart. The beating of a normal heart is controlled by electrical impulses. When these impulses are uncoordinated the heart fails to function properly. This can result in complications ranging from fatigue to stroke and even death. More than 10 million people worldwide suffer from abnormal heart rhythms. Atrial fibrillation is the most common form of arrhythmia and affects over 5 million people worldwide. Current drug therapies often fail to control the problem and can have side effects. Cardiologists worldwide are increasingly using cardiac catheters to diagnose and successfully treat arrhythmias.
