

16 November 2012

The Manager  
ASX Market Announcements  
Australian Stock Exchange Limited  
PO Box H224 Australia Square  
SYDNEY NSW 2000

Dear Sir/Madam,

**Updated Presentation**

I refer to the Company's most recent corporate & investor presentation, as lodged with the ASX on 9<sup>th</sup> November & 13<sup>th</sup> November 2012. Further updates and clarifications have been made to the presentation since the Galilee Basin Conference.

An updated corporate and investor presentation is now attached and lodged with the ASX.

Yours faithfully

A handwritten signature in blue ink, appearing to read "Ranko Matic", is written over a light blue horizontal line.

# Blackall Coal Project

- **EPC1149** granted by Queensland's Department of Mines and Energy on 22 April 2008.
- Located in Central Western Queensland, 25km south of the township of Blackall in the eastern part of the **Eromanga Basin**.
- The total surface area of EPC1149 is approximately **900 square kilometres**.
- **Drilling commenced in June 2008 – more than 350 holes completed to date**
- The most advanced of the coal projects in the Eromanga region.

# Project Location

# Blackall Coal Geology

- **The Blackall Project lies within the Eromanga Basin, an intracratonic basin which is early Jurassic to late Cretaceous in age.**
- Coal is developed in the **Late Cretaceous Winton Formation.**
- **Six main coal intervals** (designated seams 1 to 6) are identified as being present in the broader Project area.

# Resource Update

- Updated **JORC Resource estimate totalling 1.74Bt** after completion of the 2011-2012 drilling program
- **Geological model** indicates seam continuity to the north of the current Resource - supported by information pertaining to neighbouring tenements immediately to the north of EPC 1149 in which the Winton Formation coals are present.
- All resource is within EPC 1149 with a cut-off depth of 150m.
- Company believes that the resource is sufficient to support a large scale open-cut thermal coal mine with long mine life.

# Resource Update

## SRK 2012 - Total Resource of 1.74Bt

- **Points of Observation** for this Resource estimate are HQ cored boreholes with down hole geophysical logging and >95% core recovery
- **JORC Indicated Resource** of 627.5Mt based on points of observation up to 1km apart
- **JORC Inferred Resource** of 1,113.0Mt based on points of observation up to 3km apart.

### Legend

- Point of Observation for seam quality and thickness
- Point of Observation for seam thickness
- Modelled seam subcrop
- - - - 150 m depth limit
- Indicated Resource
- Inferred Resource

### Seam 3L2 Resource

GDA94 zone 55

0 1,250,500 5,000 7,500 10,000 Meters

srk consulting

**Legend**

- EPC 1149 Lease
- Existing geophysically logged chip hole
- Existing slim core hole

Cumulative seam thickness to 4L seam  
Max depth 150 m

# Coal Quality

- Suitable for Thermal Power Projects in China and India.
- Indonesian sub-bituminous coal of similar quality (CV of 5,000k/cal) used in power stations in Japan, Korea, Taiwan, Thailand, India, China and Europe.
- Limited expansion capabilities for Newcastle and South African exports.
- **Eromanga and Galilee Basin to take up new demand.**

## Raw Coal

- Ash (ad) 22%
- Moisture (ad) 18 % to 22%
- Specific Energy 15 to 17 MJ/kg
- Sulphur 0.54%

## F1.60 Product Coal

- Yield 81%
- Ash (ad) 13%
- Moisture (ad) 17.9%
- Specific Energy 19 to 21 MJ/kg

# Recent progress

- Drilling for JORC update completed – new resource statement completed on 31 August by SRK.
- Study has commenced into using the existing rail easement from Blackall to Jericho.
- Application pending for Mineral Development Licence (MDL) over the Blackall Coal Resource.
- Plan to negotiate with Preferred Respondents on Port of Abbot Point expansion for third party access. Aim to secure up to 20Mtpa capacity.
- Ongoing work by GVK in the Galilee advances infrastructure prospects and highlights potential for region.

***East Energy is well positioned to leverage the infrastructure options being considered for the Galilee Basin and the projected expansion of Queensland's coal ports.***

# Noble Group and EER

- Noble Group holds a direct interest of **30.47%** in EER.
- One Non-Executive Director.
- Provides experience and first-hand knowledge across all aspects of coal industry.
- Particular expertise in coal marketing, pricing, international networks and long term trends.

## About Noble Group

- One of the world's largest commodity traders with a market capitalisation of S\$7.6Bn (April 2012)
- Based in Hong Kong and listed on the Singapore Stock Exchange.
- Global network spanning 38 countries across five continents.
- Specialises in the origination and delivery of strategic raw materials.
- Coal focus includes sophisticated supply chain management, strong sourcing and distribution capabilities.
- Active in Australia in coal and iron ore.

# Opportunities Ahead

- Located in a **major new thermal coal basin** with significant resource growth expected over the next 10 years.
- Thermal **coal demand underpinned by global growth** in new coal fuelled power generation.
- Very large deposit, targeting bulk tonnage of **up to 20Mtpa over 30+ year mine life**.
- **Well positioned** to gain access to **new and expanded port and rail infrastructure**; sea freight advantage to meet **burgeoning demand from Asian and sub-continent consumers**.
- **Experienced management team** with strong support from Noble Group.

# Highlights

#1

**First mover advantage in a significant new growth area for the Australian coal industry – the Eromanga Basin, located next to the emerging Galilee Basin**

#2

**Close proximity to other projects being developed, with potential infrastructure access via the Galilee**

#3

**Current JORC Resource for the Blackall Project of 1.74Bt  
627.5 Mt Indicated and 1,113Mt Inferred – as at 31 Aug 2012**

#4

**Company's opinion that the resource would support a large scale open cut mine**

#5

**Supportive major shareholder in Noble Group – 30.5%**

#6

**Application for Mineral Development Licence lodged**
