About Kogi Iron Limited

Kogi Iron Limited (**ASX: KFE**) (“Kogi Iron” or the “Company”) is an ASX listed company focused on the exploration and development of its 100% owned Agbaja Plateau Iron Ore Project located in Kogi State, Republic of Nigeria, West Africa (“Agbaja” or “Agbaja Project”).

The Agbaja Project is a shallow, flat-lying channel iron deposit uniquely positioned with its proximity to existing, underutilised rail, and port infrastructure. It typically comprises iron-bearing nodules (ooids, 1-2mm and pisoids, 2-9mm) in an iron rich matrix. Iron mineralisation occurs predominantly as hematite, goethite, maghemite and limonite.

In October 2011, the Company commenced a reverse circulation drill program at Agbaja with the objective of defining a maiden JORC resource by late Q3 2012.

On September 28 2012, the Company announced a Maiden JORC compliant mineral resource at its Agbaja Project of 488 million tonnes with an in-situ iron grade of 42.7% classified as Inferred.

The Company is currently completing a metallurgical test program utilising representative composite samples prepared from diamond core and undertaking a number of high level transport infrastructure reviews to enable it to prepare a scoping study during 2013.

Kogi Iron has on issue 247,684,126 fully paid ordinary shares, and 16,537,329 listed and unlisted options.

Competent Person’s Statement:

The information in this report that relates to Exploration Results and Mineral Resources is based on information compiled by Mr Kim Bischoff, a member of The Australasian Institute of Mining and Metallurgy. Mr Bischoff is a consultant to Energio Limited and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2004 edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Bischoff consents to the inclusion in this report of the matters based on the information in the form and context in which it appears.
