About Hot Rock Limited

Hot Rock Limited (ASX: HRL) is a geothermal energy company that offers investors an opportunity to participate in socially responsible and ethical investment choices through the development of sustainable, emission-free, base load power generation. Strategically, HRL has elected to focus on the commercially proven Hot Sedimentary Aquifer (HSA) and Volcanic Geothermal type projects in its quest to become a leading supplier of geothermal power.

In Australia, the company is focused on developing HSA projects in its large Otway Basin tenements in south-west Victoria. The flagship Koroit project is ready to drill and test and is awaiting the outcome of ongoing discussions with the Federal government and potential joint venture partners to fund this project.

HRL has expanded internationally into South America where high quality geothermal resources and attractive regulatory environments and market conditions are present. The Company established offices in Santiago and Lima in 2009. Exploration tenement applications covering exciting volcanic prospects have been granted to Hot Rock in both countries and exploration is now well advanced at a number of these tenements. Energy Development Corporation (EDC), the largest integrated geothermal company in the world has entered into a joint venture with HRL to fund two projects in Chile and two projects in Peru.
