

iSonea Limited to Present at NYC Medtech Forum

Sydney, Australia and Severna Park, Md. — 16 February 2012:

Medical technology company iSonea Limited (ASX: ISN; OTCQX: ISOAY) will be showcased at a prestigious medical technology forum in New York this week.

The Company's innovative asthma monitoring systems and asthma management smartphone software will be outlined in a presentation by CEO Michael Thomas.

The slideshow to be shown at this presentation can be viewed from iSonea's website at www.iSoneaMed.com.

NYC Medtech is a professional platform bringing together collaborators in the life science, biotech, device and pharmaceutical industries.

Participants include companies and investors, as well as scientists, academia, potential international partners and trade organizations.

The forum will be held at the offices of Kaye Scholer, LLP, in New York City on Thursday 16 February at 7:20 p.m. EST.

About iSonea Limited

iSonea Limited (ASX:ISN; OTCQX:ISOAY) is an emerging medical technology company developing innovative, non-invasive devices and mobile health apps to improve the management of chronic, costly respiratory disorders such as asthma and COPD. By leveraging iSonea's proprietary Acoustic Respiratory Monitoring™ (ARM) technology with its AsthmaSense™ mobile applications, iSonea is turning smart phones into medical devices--enabling anyone, anywhere, at any time to monitor breathing distress symptoms, in order to take action.

iSonea's ARM devices have been cleared for use by the U.S. Food and Drug Administration, the Australian TGA and the European Union CE.
