## **ASX ANNOUNCEMENT**

**10 January 2012**

### **MIKOH Receives US Government Order**

The Board of MIKOH Corporation Limited (**ASX: MIK**) is pleased to announce it has received an order from a high security US government agency for 10,000 Smart&Secure tamper evident passive RFID tags. The order is for ultra-high frequency (UHF) headlamp tags and asset tags.

Both tag designs employ MIKOH's patented Smart&Secure™ technology that includes the MIKOH proprietary tamper layer, designed to render a tag inoperable on tampering. This prevents the tag from being successfully transferred from one asset to another or removed and replaced.

The order is as a result of Peter Atherton's on-going interaction with high security US Government agencies that commenced in 1998. It is pleasing to see that the US MIKOH team headed by Peter Atherton is now making inroads into this market.
