The Manager Company Announcements Office ASX Level 4 20 Bridge Street SYDNEY NSW 2000

Dear Sir

2011-2012 FULL YEAR RESULT & PRELIMINARY FINAL REPORT

In accordance with ASX Listing Rule 4.3A, the following documents are attached for release to the market:

- Appendix 4E Preliminary Final Report
- Directors' Comments on Preliminary Final Report
- Financial Statements and Accounting Policies
- Directors' Declaration
- Directors' Report
- Auditor's Independence Declaration
- Independent Audit Report

Yours faithfully

RODNEY HEATH Company Secretary

24 September, 2012

Preliminary announcement

Results for the year ended 31 July, 2012

Nufarm reports strong growth in earnings

Highlights

- Group revenues: \$2.18 billion, up by 5%
- Statutory net profit after tax of \$72.6 million, compared to statutory net loss after tax of \$49.9 million in 2011
- Underlying EBIT⁽¹⁾⁽²⁾ of \$206 million (up 20%)
- Underlying net profit after tax⁽³⁾ of \$115.4 million (up 17%)
- Gross profit margin improves to 28.0% (2011: 27.0%)
- Lower net working capital and average net debt
- Final dividend: 3 cents per share, fully franked
- Further positive progress on execution of strategic plan, including strong recovery in Brazil and continued growth of the seed technologies segment

Year ended 31 July	2012	2011	Change

The financial information contained within our statutory accounts has been prepared in accordance with IFRS. Refer to page 11 for footnotes, including explanations of the non-IFRS measures used in this announcement. All references to the prior period are to the year ended 31 July 2011 unless otherwise stated. This report is based on financial statements which have been audited by KPMG. Non-IFRS measures have not been subject to audit or review. Refer to the 31 July 2012 Nufarm Limited Financial Report for the independent auditor's report to the members of Nufarm Limited.

Nufarm Limited today announced a statutory profit after tax of \$72.6 million for the 12 months to 31 July, 2012. This compares to a statutory loss after tax of \$49.9 million in the previous financial year.

The company reported an underlying net profit after tax of \$115.4 million. This represents a 17% increase on the underlying net profit after tax of \$98.3 million generated in the previous year.

Underlying earnings before interest and tax (EBIT) was \$206.0 million, an increase of 20% on the \$171.8 million recorded in the 2011 financial year.

Group revenues increased by just under 5% to \$2.18 billion (2011: \$2.08 billion). On a constant currency basis⁽³⁾, revenues increased by almost 10%.

Material items amounted to a net loss of \$42.8 million, including an after tax impact of \$30.5 million associated with the proposed settlement of a shareholder class action (refer to 'Subsequent Events' in this report).

Earnings per share were 22.3 cents (2011: a loss of 23.7 cents per share). Excluding material items, earnings per share were 38.7 cents (2011: 32.9 cents).

The underlying result represents strong growth on the previous year and further progress in respect of the company's strategic growth plan.

Net working capital at 31 July was \$771 million (31 July, 2011: \$814 million) while net debt increased marginally to \$468 million from \$465 million at the same time in the previous year. This small increase included the impact of a debt funded US\$55 million acquisition to support growth in the seeds business. Average net debt was lower in 2012 and reflects more efficient management of working capital through the course of the full year.

Final Dividend

Directors declared a fully franked final dividend of 3 cents per share, resulting in a full year dividend of 6 cents. No dividend was paid in the previous year.

The final dividend will be paid on 16 November, 2012 to the holders of all fully paid shares in the company as at the close of business on 19 October, 2012. There is no conduit foreign income attributed to the dividend.

The Dividend Reinvestment Plan (DRP) will be made available to shareholders for the final dividend.

Directors have determined that the Issue Price will be calculated on the volume weighted average of the company's ordinary shares on the ASX over a period of 10 consecutive trading days commencing after the record date and concluding prior to the date of allotment of ordinary shares under the plan. The last election date for shareholders who are not yet participants in the DRP is October 19. The Board has determined that, for this dividend payment, no discount will apply to shares issued under the DRP.

Business review

The business performed solidly in the 2012 financial year, against a backdrop of mixed seasonal and market conditions in the various geographies in which Nufarm operates.

Australia experienced average seasonal conditions; market conditions in Brazil were mostly positive although areas of the country were impacted by drought; while the US – after a good start to the season - was impacted by severe drought. Most European markets had challenging climatic conditions during key periods of the year, while economic and credit risks were also elevated in Europe.

In the 2012 financial period, the company continued to implement important changes in support of its strategic growth plan. This included a review and realignment of development programs; the further diversification of product offerings; additional resources to support higher value growth segments; and the strengthening of business systems and management at both a corporate head office and regional level.

Corporate (head office) costs were higher in 2012 at \$41.4 million (2011: \$30.5 million). This reflected investment in additional management resources and systems as well as increased incentive payments made in parallel with the earnings recovery in the business.

Nufarm's crop protection business, which accounts for 94% of group revenues, grew sales by 3% to \$2.06 billion and generated an average gross margin⁽³⁾ of 27% (2011: 27%). The company's seed technologies business grew sales by 39% to \$121.0 million and generated an average gross margin of 53%, slightly up on the previous year (52%).

Underlying EBIT is a measure used internally that excludes material items. The difference between underlying EBIT and operating profit is set out in the following table:

Year ended 31 July	2012	2011
	\$000	\$000
Underlying EBIT	205,973	171,779
Material items impacting operating profit	(61,001)	(143,690)
Operating profit	144,972	28,089

Material items

The after tax loss associated with material items was \$42.8 million (2011: net loss \$148.1 million).

Major items included \$30.4 million in costs associated with the settlement of a shareholder class action; \$5 million in restructuring costs; just under \$7 million in refinancing costs; and the final amortisation charge associated with the phase-out of several products in Brazil (\$3.7 million). Other one-off costs related to litigation expenses and an impairment charge of just under \$2 million relating to Nufarm's minority equity investment in Excel Crop Care Ltd in India.

A \$7.7 million gain was booked in relation to the mark to market revaluation of Nufarm's Step-Up Securities (NSS).

Year ended 31 July 2012	Pre-tax	After-tax
	\$000	\$000
Material items by category		
Class action settlement	(43,500)	(30,450)
Restructuring costs	(7,295)	(5,013)
Due diligence and litigation costs	(3,552)	(2,427)
Investment in associate write down	(1,993)	(1,993)
Intangibles write off - Brazil	(3,708)	(3,708)
Debt re-financing costs	(9,931)	(6,952)
Net foreign exchange gains/(losses) on Nufarm Step-up Securities financing	11,050	7,697
Total material items	(58,929)	(42,846)
add back material items impacting net finance costs		
Debt re-financing costs impacting net finance costs only	8,978	6,285
Net foreign exchange gains/(losses) on Nufarm Step-up Securities financing	(11,050)	(7,697)
Total material items impacting operating profit	(61,001)	(44,258)

Interest / tax / cash flow

Net external interest costs⁽³⁾ were lower (\$40.9 million versus \$48.9 million) due to lower average net debt and more cost effective facilities.

The reported effective tax rate is 34%. Excluding material items, the underlying effective tax rate is 31.7% (2011: 31.0%) which has been impacted by a number of non-recurring items including tax related write-offs in France and Argentina. Adjusting for those non-recurring items, the effective tax rate for the year was 30%.

The business generated net operating cash flow of \$166.5 million, which was in line with the previous year (\$165.2 million).

Operating segments summary

The following table provides a summary of the performance of the operating segments for the 2012 financial year and the corresponding period.

Year ended 31 July		Revenue	Underlying EBIT ⁽¹⁾⁽²⁾			2)
(\$000s)	2012	2011	Change %	2012	2011	Change %
Crop protection						
Australia and New Zealand	701,022	674,827	3.9%	105,982	94,723	11.9%
Asia	125,586	142,297	-11.7%	16,735	22,319	-25.0%
Europe	431,095	435,794	-1.1%	43,223	38,346	12.7%
North America	470,243	418,931	12.2%	33,327	16,456	102.5%
South America	332,636	324,544	2.5%	17,526	4,107	326.7%
Total Crop protection	2,060,582	1,996,393	3.2%	216,793	175,951	23.2%
Seed Technologies - global	120,969	87,196	38.7%	30,589	26,318	16.2%
Corporate	-	-	n/a	(41,409)	(30,490)	35.8%
Nufarm Group	2,181,551	2,083,589	4.7%	205,973	171,779	19.9%

Australia / New Zealand

The Australian and New Zealand businesses generated \$701.0 million in segment sales, representing 34% of total crop protection revenues. This compares with 2011 sales of \$674.8 million (also 34% of total). Underlying EBIT increased from \$94.7 million in the 2011 financial year to \$106.0 million in 2012, with the majority of the improvement contributed by New Zealand and the Croplands spray machinery business.

Seasonal conditions in Australia were average, with generally good rainfalls in most of the Eastern and Southern states, and a late and dry season in Western Australia. Both pest and disease pressure was below that of the previous year.

A solid first half performance was driven by higher value herbicide sales into the cotton and horticulture segments. Glyphosate margins experienced increased pressure with the high level of formulated Chinese imports, but there was solid demand for the company's post emergent herbicide range, and the launch of a new 2,4-D formulation – Amicide Advance – was very successful.

A number of other new products were launched under both the Nufarm and Crop Care brands, and Crop Care's proprietary 'suSCon' controlled release technology continued to secure increased market support.

The Croplands machinery business benefitted from increased capital expenditure in the farm sector and generated strong sales and an improved margin.

Nufarm's New Zealand business also generated higher sales and improved profitability on the previous year with the important pasture and horticulture markets performing solidly. The company's New Zealand based insecticide and fungicide manufacturing facility, which produces product for export to Nufarm's global markets, contributed strongly in its first full year of operation.

Asia

Asian crop protection sales were \$125.6 million in 2012 (6% of total revenues), compared to \$142.3 million in the previous year (7% of total revenues). Underlying EBIT was \$16.7 million, down from \$22.3 million in 2011.

Nufarm's Indonesian business was negatively impacted by a prolonged dry season which reduced applications in major crops, including the important plantation segment. Increased pressure on glyphosate margins also contributed to lower sales and a lower EBIT result.

A number of new products were launched during the year as the Nufarm businesses in Asia further diversified their portfolios in the rice and fruit and vegetable segments.

North America

North American crop protection sales increased by just over 12% to \$470.2 million. Measured in local currency, the increase in US sales was slightly higher. The region generated 23% of total crop protection revenues (2011: 21%). Underlying EBIT was up strongly, increasing to \$33.3 million from \$16.5 million in the previous year. After a positive

and early start to the major cropping season in the US, conditions deteriorated significantly, with key agricultural regions experiencing the worst drought in many years. Nufarm was able to capitalise on the strong early season conditions with large plantings of corn and soybeans supporting positive demand for herbicides during that period. Glyphosate pricing remained competitive in the US.

The dry conditions negatively impacted the turf and ornamental segment, particularly opportunities for fungicide sales in the latter months of the financial year. Despite this, Nufarm increased its sales in this segment, reflecting its strong market position and customer relationships. The company also performed strongly in the industrial vegetative management (IVM) segment.

Seasonal conditions in Canada were mixed, but increased cropping activity drove stronger demand for crop protection inputs after several years of flood-affected below average plantings. Nufarm Canada benefited from the addition of the Valent range of products in the second half of the financial year. Valent is a subsidiary of Sumitomo Chemical Company.

South America

South American crop protection sales increased slightly to \$332.6 million (2011: \$324.5 million), but generated a much stronger underlying EBIT, \$17.5 million versus \$4.1 million in 2011. Regional sales comprised 16% of total crop protection revenues, the same proportion as in the previous year.

Seasonal impacts in Brazil were mixed during the year, with drought conditions in the south of Brazil affecting demand in the first half of the period and dry conditions in the north east of the country negatively impacting some sales in that region in the latter months of the second half. Conditions in the important central cropping regions were positive, however, and supported a very large 'safrinha' corn crop. Brazilian growers looked to capitalise on strong crop prices, and this generated positive demand for crop protection inputs.

Nufarm's Brazilian business strengthened its positions in pasture and sugar cane and introduced new products into several segments, including vegetable crops. In local currency, Brazil sales were up by nearly 14% to R\$488 million. Improved margins were driven by new product introductions and a more balanced portfolio.

Dry conditions in the north of Argentina affected summer cropping activity, however Nufarm generated increased sales and an improved margin. The business in Chile also performed well but a combination of seasonal impacts and increased competition in some segments resulted in Nufarm's Colombian operations generating a result in line with the previous year.

Europe

European sales were \$431.1 million, down slightly on the previous year (2011:\$435.8 million) and represented 21% of total crop protection revenues (2011: 22%). Underlying EBIT improved to \$43.2 million, up 13% on the prior year (\$38.3 million).

Climatic conditions were varied across Europe, with a dry autumn and very cold winter negatively impacting demand in the first half of the year in Northern and Eastern markets before conditions improved in the spring and summer seasons. Southern Europe also

experienced mixed seasonal conditions and the UK recorded its wettest summer in 100 years.

A number of European markets were also impacted by challenging economic and credit conditions and this required careful risk management in relation to receivables exposure.

On a local currency basis, Nufarm sales were higher in Germany, France, Romania, Hungary and Ukraine and the company reinforced its strong position in the corn herbicide market. Most Mediterranean markets, including Spain and Italy, recorded lower sales

In Italy, Nufarm entered into an agreement with Sumitomo Chemical Company's local subsidiary and will now sell its crop protection portfolio via Sumitomo's larger distribution platform. The agreement took effect from 1 August, 2012.

Nufarm's European based phenoxy herbicide manufacturing facilities made a significant contribution to the regional result. Global demand for this range of products was strong and the facilities in Holland, Austria and the UK all produced increased volumes on the previoius year and generated improved overhead recoveries.

Major product segments

Crop Protection

Nufarm's crop protection business, which accounts for 94% of group revenues, grew sales by 3% to \$2.06 billion and generated an average gross margin of 27% (2011: 27%).

Herbicide sales were up 5% on the previous year to \$1.43 billion and generated an average gross margin of 26% (2011: 26%).

Glyphosate sales were 22% of crop protection revenues, slightly higher than in the previous year (21%). Pricing and margins improved in some markets, including South America, but increased competitive pressure in Australia and Indonesia led to a fall in glyphosate profitability. Phenoxy herbicides were in strong demand in most markets and Nufarm's leadership position in this segment helped facilitate both higher sales and an increase in margins. Several new formulations and mixtures were successfully launched and a new production facility for a proprietary dry formulation of 2,4-D, was commissioned in India. An expanded position in the pasture market in Brazil helped drive increased sales of picloram, and several other herbicides – including bromoxynil and trifluralin – also recorded increased sales.

Insecticide sales were down on the previous year (\$184 million v \$197 million) but when these numbers are adjusted to reflect several products that were phased out at the end of last financial year, the segment generated 8% growth. These sales generated an average gross margin of 35% (2011: 36%).

Insect pressure in South America was relatively high, leading to strong demand for Nufarm's insecticide portfolio, in particular products based on imidacloprid. Two insecticides that had generated \$27.5 million in sales for Nufarm in 2011 were phased out in Brazil at the end of that year, however replacement products generating improved margins have been introduced into the portfolio. Insect pressure in Europe was below average in most markets and Australia did not see a repeat of the locust infestation that generated very high sales of

products such as fipronil in the previous year. Other insecticide products to perform strongly in 2012 included lambda-cyhalothrin, on which several new product launches were based, and abamectin.

Fungicide sales in 2012 were \$213 million versus \$244 million in the previous year. A lower average gross margin (28% versus 32%) was achieved.

The 2012 financial year was characterised by lower fungal disease pressure in most of Nufarm's major geographic markets. Dry conditions in the South of Brazil, severe drought through the major cropping regions of the United States and the severe winter experienced in much of Europe all contributed to softer demand for fungicide products in those markets and increased competition for lower sales. Australia also had a lower incidence of fungal disease. Initial registration approvals were secured by Nufarm in France and the UK for azoxystrobin, a major fungicide with global sales in excess of \$1 billion. Additional registrations, and related product launches, will follow in other markets.

Sales of plant growth regulators (PGRs) were up by just over 12% year on year to \$76 million, with a number of niche products positioned in the horticulture segment performing strongly and generating good margins.

Nufarm's spray machinery business, Croplands (Australia and New Zealand), also recorded higher sales (\$57 million versus \$47 million) and a stronger EBIT contribution.

Seed Technologies

The company's seed technologies business grew sales by 39% to \$121.0 million and generated an average gross margin of 53%, slightly up on the previous year (52%). Underlying EBIT was \$30.6 million, up from \$26.3 million in the previous corresponding period. This segment includes the global Nuseed business and Nufarm's seed treatment applications.

Generally positive seasonal conditions and strong oilseed prices drove growth in canola and sunflower markets in Australia. Nuseed Australia realised excellent growth in all segments including Roundup Ready canola, triazine tolerant canola, and high oleic sunflower. The Monola specialty canola oil business experienced a strong lift in demand with several new end-use customers, including KFC Australia, committing to the product for its high stability, low saturate and trans fat free profile.

Nuseed's sorghum business achieved record volume and improved margin, driven by growth in the US domestic market and the establishment of demand for elite hybrids in emerging markets. Increased investment in product development, sales, and marketing within South America and Mexico resulted in improved market presence and branded sales growth. The company also invested in the development of its food grade, milling quality grain sorghum, which is attracting strong international interest and the emergence of a completely new high value segment.

The Nuseed sunflower business experienced strong organic and acquisition growth in 2012. With the purchase during the year of Seeds 2000 USA, Seeds 2000 Argentina, and the breeding assets of Super Seeds in Serbia, Nuseed has established a global breeding and development sunflower platform. Seeds 2000 experienced strong growth in its oilseed sunflower segments in the USA and in European markets. The China confection sunflower

market saw a drop in total plant acreage in 2012 due to carry over grain stocks from the record crops in 2011. Despite this, Nuseed continued to gain total share of this high value segment.

Sales of seed treatment chemistry grew strongly in 2012, with the US, Brazil and European markets contributing the majority of that growth. Several new products were launched and registration approvals were secured to support additional product launches over the next 12 months. Nufarm supplied seed treatment solutions to a number of major seed companies and is increasingly seen as a reliable supply partner in this expanding market segment.

During 2012, Nuseed's global headquarters were relocated to Chicago, reflecting its expanding operations in North America. The company invested in strengthening management; in the optimisation of its seed technologies R&D pipeline; and in the establishment of the Nuseed brand.

Balance Sheet Management

Net debt at year end was \$468 million, slightly above that recorded on 31 July of the previous year (\$465 million). Average net debt was down from \$672 million in 2011 to \$614 million in 2012, reflecting more efficient management of working capital through the course of the year. This calculation excludes the impact of the Seeds 2000 acquisition (US\$55 million) in December 2011.

Net working capital at 31 July reduced to \$771 million from \$814 million at the end of the previous year. While receivables were up on the prior period due to the late timing of sales in some markets, this was more than offset by improvements on the inventories and payables lines. The payables position at 31 July includes the settlement (\$43.5 million) relating to a shareholder class action (refer to 'Subsequent Events' in this report).

Average net working capital as a proportion of sales was 45%, down from 50% in the previous year. This was particularly pleasing given the growth of the business in markets such as Brazil, where industry standard terms place increased pressure on working capital.

Gearing (net debt to net debt plus equity) was 24.6% (2011: 22.9%).

Capital expenditure in 2012 was \$47.6 million, representing a return to more normal levels, compared to the \$30.6 million expended in 2011 when the company was subject to a refinancing.

People and organisation

During the 2012 financial year, the company continued to invest in the strengthening of management and the enhancement of business systems. At a head office level, key appointments were made in areas including global product management; finance; risk management; information services; and global procurement and supply chain. Several senior appointments were also made at a regional level and within the seed technologies business.

Subsequent events

On 1 August, 2012, the company entered into a conditional settlement agreement in relation to the class action proceedings commenced by Maurice Blackburn and Slater & Gordon in early 2011. The settlement covers claims made on behalf of group members who acquired shares during the period from September 2009 to August 2010.

The settlement agreement was reached 14 months before the scheduled trial date in September 2013, as part of a court ordered mediation process.

Nufarm has agreed to pay \$43.5 million, which covers the claims, interest, the costs of the litigation funders and applicants' legal fees. The settlement is subject to court approval and, if court approval is obtained, the class action will be dismissed without admission of liability by Nufarm.

The settlement payment was recorded as a material item in Nufarm's 2012 financial year accounts.

In agreeing to the settlement, the Nufarm Board carefully considered risks and costs associated with a protracted litigation, and demand on management's time as the company implements its strategic growth plans.

Outlook

With considerable supply pressure on a number of key soft commodities, the pricing outlook in relation to those crops is very strong. If seasonal conditions are supportive, growers will look to take advantage of high crop prices by maximizing their yields and this is generally a positive driver of crop protection and seed technology sales.

Nufarm will continue to remain very focused on its strategic growth plans and will implement initiatives and make appropriate changes to support those plans. This will include an investment of capital in areas that are seen to deliver higher and more sustainable returns over the medium to long term.

The Australian business is expected to perform approximately in line with 2012, given seasonal conditions are similar over the course of the year.

The North American business is expected to generate modest growth at an EBIT level, with the benefit of several new product launches not scheduled to impact regional results until the 2014 financial year.

South America – and in particular, Brazil – is positioned for another year of strong growth and improved profit performance. Key drivers will be the very buoyant local market conditions, together with further diversification of Nufarm's portfolio.

While there remains considerable uncertainty in relation to market conditions in Europe, the company is expecting some improvement in its regional performance as structural changes and a more focused management approach begin to yield benefits.

The seeds technologies segment is again expected to deliver top line and EBIT growth, although 2013 will see additional investment in these businesses to strengthen and consolidate Nufarm's position. This additional investment will help deliver more secure long term profit growth in the seeds technologies segment.

Given at least average seasonal conditions in Nufarm's major geographic markets, the company is well positioned to generate an improved underlying earnings result in the 2013 financial year.

D J Rathbone Managing Director

IFRS and Non-IFRS financial information

Nufarm results are reported under International Financial Reporting Standards (IFRS) including Underlying EBIT and Underlying EBITDA which are used to measure segment performance. This release also includes certain non-IFRS measures including Underlying net profit after tax and Gross profit margin. These measures are used internally by management to assess the performance of our business, make decisions on the allocation of our resources and assess operational management. Non-IFRS measures have not been subject to audit or review.

The following notes explain the terms used throughout this profit release:

- (1) Underlying EBIT is earnings before net finance costs, taxation and material items. Underlying EBITDA is Underlying EBIT before depreciation and amortisation of \$61.781 million for the year ended 31 July 2012 and \$60.057 million for the year ended 31 July 2011. We believe that Underlying EBIT and Underlying EBITDA provide useful information, but should not be considered as an indication of, or an alternative to, Profit / (loss) for the period as an indicator of operating performance or as an alternative to cash flow as a measure of liquidity.
- (2) Underlying EBIT is used to reflect the underlying performance of Nufarm's operations. Underlying EBIT is reconciled to Operating profit on page 3.
- (3) Non-IFRS measures are defined as follows:
 - Underlying net profit after tax comprises Profit / (loss) for the period attributable to the equity holders of Nufarm Limited less material items as described on pages 3 and 4.
 - Average gross margin defined as average gross profit as a percentage of revenue.
 - Average gross profit defined as revenue less a standardized estimate of production costs excluding material items and non-product specific rebates and other pricing adjustments.
 - Net external interest expense comprises Interest income external, Interest expense external and Lease expense – finance charges as described in note 10 to the 31 July 2012 Nufarm Limited financial report.
 - Constant currency revenue reconciled as per the below whereby "(a)" represents the impact from the fluctuation in exchange rates between all foreign currency denominated amounts and the Australian dollar. Constant currency results exclude any benefit or loss caused by foreign exchange fluctuations between foreign currencies and the Australian dollar which would not have occurred if there had been a constant exchange rate.

Year ended 31 July	\$000
FY 2011 Revenue as reported	2,083,589
Foreign currency translation impact (a)	(97,570)
Revenues constant currency adjusted	1,986,019
FY 2012 Revenue as reported	2,181,551
Change %	10%

The statement of changes in equity is to be read in conjunction with the attached notes.

Nufarm Limited Notes to the financial statements

1 Reporting entity

Nufarm Limited (the 'company') is a company limited by shares and domiciled in Australia that is listed on the Australian Securities Exchange. The address of the company's registered office is 103-105 Pipe Road, Laverton North, Victoria, 3026. The consolidated financial statements of the company as at and for the year ended 31 July 2012 comprise the company and its subsidiaries (together referred to as the 'group' and individually as 'group entities') and the group's interest in associates and jointly controlled entities. The group is a for-profit entity and is primarily involved in the manufacture and sale of crop protection products used by farmers to protect crops from damage caused by weeds, pests and disease.

2 Basis of preparation

(a) Statement of compliance

The consolidated financial statements are general purpose financial statements which have been prepared in accordance with Australian Accounting Standards (AASBs) adopted by the Australian Accounting Standards Board (AASB) and the Corporations Act 2001. The consolidated financial statements comply with International Financial Reporting Standards (IFRSs) adopted by the International Accounting Standards Board (IASB).

The consolidated financial statements were authorised for issue by the Board of Directors on 24 September 2012.

(b) Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for derivative financial instruments which are measured at fair value. The methods used to measure fair values are discussed further in note 4.

The group's financial report has been prepared on the going concern basis, which assumes the realisation of assets and extinguishment of liabilities in the ordinary course of business. The going concern basis is considered appropriate by the Directors having regard to the group's access to appropriate lines of credit to support the group's working capital and general corporate financing requirements through its three year \$625 million syndicated bank facility and a debtors' securitisation facility, entered into in November 2011 and August 2011 respectively.

(c) Functional and presentation currency

These consolidated financial statements are presented in Australian dollars, which is the company's functional currency. The company is of a kind referred to in ASIC Class Order 98/100 dated 10 July 1998 and, in accordance with that Class Order, all financial information presented in Australian dollars has been rounded to the nearest thousand unless otherwise stated.

(d) Use of estimates and judgements

The preparation of financial statements in conformity with AASBs requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant impact on the amount recognised in the financial statements are described below.

Nufarm Limited Notes to the financial statements (continued)

2 Basis of preparation (continued)

(d) Use of estimates and judgements (continued)

(i) Business combinations

Fair valuing assets and liabilities acquired in a business combination involves making assumptions about the timing of cash inflows and outflows, growth assumptions, discount rates and cost of debt. Refer to note 14 for details of acquisitions made during the period.

(ii) Impairment testing

The group determines whether goodwill and intangibles with indefinite useful lives are impaired on an annual basis or at each reporting date if required. This requires an estimation of the recoverable amount of the cash-generating units, using a value in use discounted cash flow methodology. The estimation of future cash flows requires management to make significant assumptions concerning the identification of impairment indicators, earnings before interest and tax, growth rates, applicable discount rates and useful lives. Further details can be found in note 23 on intangibles. Other non-current assets are also assessed for impairment indicators.

(iii) Income taxes

The group is subject to income taxes in Australia and overseas jurisdictions. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. Where the final tax outcome of these matters is different from the amounts initially recorded, such differences will impact the current and deferred tax provisions in the period in which the tax determination is made. Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the assets can be utilised. The assessment of probability involves estimation of a number of factors including future taxable income.

(iv) Defined benefit plans

A liability in respect of defined benefit pension plans is recognised in the balance sheet, and is measured as the present value of the defined benefit obligation at the reporting date less the fair value of the pension plan's assets. The present value of the defined benefit obligation is based on expected future payments which arise from membership of the fund at the reporting date, calculated annually by independent actuaries. Consideration is given to expected future salary levels, experience of employee departures and periods of service. Refer note 26 for details of the key assumptions used in determining the accounting for these plans.

(v) Valuation of inventories

Inventories of finished goods, raw materials and work in progress are valued at lower of cost and net realisable value. The net realisable value of inventories is the estimated market price less costs to sell at the time the product is expected to be sold.

(vi) Capitalised development costs

Development expenditures are recognised an an intangible asset when the group judges and is able to demonstrate: (a) the technical feasibility of completing the intangible asset so that it will be available for use

- (b) intention to complete
- (c) ability to use the asset

(d) how the asset will generate future economic benefits and the ability to measure reliably the expenditure during development

(e) Reclassification - Foreign exchange gains or losses and debt establishment transaction costs

Foreign exchange gains of \$8.189 million (2011: \$20.006 million) and debt establishment transaction costs of \$12.972 million (2011: \$10.838 million) are classified within net financing costs in the income statement and attached notes having previously been disclosed within cost of sales and general and administrative expenses respectively. Debt establishment cash outflows of \$26.960 million (2011: \$10.838 million) are classified within cash flows from financing activities having previously been disclosed within cash flows from operating activities.

Net foreign exchange gains on proceeds from Nufarm step-up securities financing of \$11.505 million (2011: loss \$20.951 million) are also classified within net financing costs in the income statement and attached notes.

Comparatives have been adjusted to present them on the same basis as current period figures.

3 Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements, and have been applied consistently by group entities.

(a) Basis of consolidation

(i) Business combinations

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the group. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, the group takes into consideration potential voting rights that currently are exercisable.

Nufarm Limited Notes to the financial statements (continued)

3 Significant accounting policies

(a) Basis of consolidation (continued)

(i) Business combinations (continued) Acquisitions on or after 1 July 2009

For acquisitions on or after 1 July 2009, the group measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; plus
- the recognised amount of any non-controlling interests in the acquiree; plus if the business combination is achieved in stages, the fair value of the existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

When the excess is negative, a bargain purchase gain is recognised immediately in profit or loss.

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in profit or loss.

Costs related to the acquisition, other than those associated with the issue of debt or equity securities, that the group incurs in connection with a business combination are expensed as incurred.

Any contingent consideration payable is recognised at fair value at the acquisition date. If the contingent consideration is classified as equity, it is not remeasured and settlement is accounted for within equity. Otherwise, subsequent changes to the fair value of the contingent consideration are recognised in profit or loss.

Acquisitions between 1 July 2004 and 1 July 2009

For acquisitions between 1 July 2004 and 1 July 2009, goodwill represents the excess of the cost of the acquisition over the group's interest in the recognised amount (generally fair value) of the identifiable assets, liabilities and contingent liabilities of the acquiree. When the excess was negative, a bargain purchase gain was recognised immediately in profit and loss.

Transaction costs, other than those associated with the issue of debt or equity securities, that the group incurred in connection with business combinations were capitalised as part of the cost of the acquisition.

Acquisitions prior to 1 July 2004 (date of transition to IFRSs)

As part of its transition to IFRSs, the group elected to restate only those business combinations that occurred on or after 1 July 2003. In respect of acquisitions prior to 1 July 2003, goodwill represents the amount recognised under the Group's previous accounting framework, Australian GAAP.

Acquisitions of non-controlling interests are accounted for as transactions with owners in their capacity as owners and therefore no goodwill is recognised as a result of such transactions. The adjustments to non-controlling interests are based on a proportionate amount of the net assets of the subsidiary.

(ii) Subsidiaries

Subsidiaries are entities controlled by the group. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

The accounting policies of subsidiaries have been changed where necessary to align them with the policies adopted by the group. Losses applicable to the non-controlling interests in a subsidiary are allocated to the non-controlling interests even if doing so causes the non-controlling interests to have a deficit balance.

(iii) Investments in equity accounted investees

Associates are those entities in which the group has significant influence, but not control, over the financial and operating policies. Significant influence is presumed to exist when the group holds between 20 and 50 percent of the voting power of another entity. Jointly controlled entities are those entities over whose activities the group has joint control, established by contractual agreement and requiring unanimous consent for strategic financial and operating decisions.

Investments in associates and jointly controlled entities are accounted for using the equity method and are initially recognised at cost. The group's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the group's share of the income and expenses and equity movements of equity accounted investees, after adjustments to align the accounting policies with those of the group, from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. When the group's share of losses exceeds its interest in an equity accounted investment, the carrying amount of that interest, including any long-term investments, is reduced to nil, and the recognition of further losses is discontinued except to the extent that the group has an obligation or has made payments on behalf of the investee.

3 Significant accounting policies (continued)

(a) Basis of consolidation (continued)

(iv) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

(b) Foreign currency

(i) Foreign currency transactions

Transactions in foreign currencies are translated to the respective functional currencies of group entities at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the foreign exchange rate at that date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognised in profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Foreign currency gains and losses are included in net financing costs as they are mostly derived from financing arrangements.

Proceeds from the Nufarm Step-up Securities (note 29) have been utilised to provide funding throughout the group. This has provided a foreign currency exposure when the funding currency denomination differs from the respective entity's functional currency. Foreign exchange gains and losses arising on these proceeds have been disclosed as a material item in finance costs (note 6 and note 10).

(ii) Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated to Australian dollars at exchange rates at the reporting date. The income and expenses of foreign operations are translated to Australian dollars at exchange rates at the dates of the transactions.

Foreign currency differences are recognised in other comprehensive income. Since 1 August 2004, the group's date of transition to AIFRS, such differences have been recognised in the foreign currency translation reserve (FCTR). When a foreign operation is disposed of, in part or in full, the relevant amount in the FCTR is transferred to profit or loss as part of the profit or loss on disposal.

When the settlement of a monetary item receivable from or payable to a foreign operation is neither planned nor likely in the foreseeable future, foreign exchange gains and losses arising from such a monetary item are considered to form part of a net investment in a foreign operation and are recognised in other comprehensive income, and are presented within equity in the FCTR.

(c) Financial instruments

(i) Non-derivative financial assets

The group initially recognises loans and receivables on the date that they are originated. All other financial assets (including assets designated at fair value through profit or loss) are recognised initially on the trade date at which the group becomes a party to the contractual provisions of the instrument.

The group derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risk and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the group is recognised as a separate asset or liability.

Financial assets and liabilities are offset and the net amount presented in the balance sheet when, and only when, the group has the legal right to offset the amounts and intends to settle on a net basis or to realise the asset and settle the liability simultaneously.

The group has the following non-derivative financial assets: financial assets at fair value through profit or loss, loans and receivables and available-for-sale financial assets.

Nufarm Limited Notes to the financial statements (continued)

3 Significant accounting policies (continued)

(c) Financial instruments (continued)

(i) Non-derivative financial assets (continued) Financial assets at fair value through profit or loss

A financial asset is classified as at fair value through profit or loss if it is classified as held for trading or is designated as such upon initial recognition. Financial assets are designated at fair value through profit or loss if the group manages such investments and makes purchases and sale decisions based on their fair value in accordance with the group's documented risk management or investment strategy. Upon initial recognition attributable transaction costs are recognised in profit and loss when incurred. Financial assets at fair value through profit or loss are measured at fair value, and changes therein are recognised in profit or loss.

Financial assets designated at fair value through profit or loss comprise equity securities that otherwise would have been classified as available for sale.

Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognised initially at fair value plus any direct attributable transaction costs. Subsequent to initial recognition loans and receivables are measured at amortised cost using the effective interest method, less any impairment losses. Loans and receivables comprise trade and other receivables.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits with original maturities of three months or less. Bank overdrafts that are repayable on demand and form an integral part of the group's cash management are included as a component of cash and cash equivalents for the purposes of the statement of cash flows.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are designated as available-for-sale or are not classified as another category of financial asset. Available-for-sale financial assets are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at fair value and any changes other than impairment losses are recognised in other comprehensive income and presented in the fair value reserve in equity. When an investment is derecognised, the cumulative gain or loss in equity is reclassified to profit or loss.

(ii) Non-derivative financial liabilities

The group initially recognises debt securities and subordinated liabilities on the date they are originated. All other financial liabilities (including liabilities designated at fair value through profit or loss) are recognised initially on the trade date at which the group becomes a party to the contractual provisions of the instrument. The group derecognises a financial liability when its contractual obligations are discharged or cancelled or expired. Financial assets and liabilities are offset and the net amount presented in the balance sheet when, and only when, the group has the legal right to offset the amounts and intends to settle on a net basis or to realise the asset and settle the liability simultaneously.

The group has the following non-derivative financial liabilities: loans and borrowings, bank overdrafts and trade and other payables. Such financial liabilities are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition these financial liabilities are measured at amortised cost using the effective interest rate method.

(iii) Share capital

Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any related income tax benefit. Dividends on ordinary shares are recognised as a liability in the period in which they are declared.

Hybrid securities

The group has on issue a hybrid security called Nufarm Step-up Securities (NSS). The NSS are classified as equity instruments but as non-controlling interests as they are issued by a subsidiary. After-tax distributions thereon are recognised as distributions within equity.

3 Significant accounting policies (continued)

(c) Financial instruments (continued)

(iv) Derivative financial instruments, including hedge accounting

The group holds derivative financial instruments to manage its foreign currency and interest rate risk exposures.

Derivatives are recognised initially at fair value, with attributable transaction costs recognised in profit or loss as incurred. Subsequent to initial recognition, derivatives continue to be measured at fair value, with changes therein accounted for in profit or loss.

Cash flow hedges

The group has not entered into any cash flow hedging transactions in the current or comparative periods.

(d) Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the asset to a working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located, and capitalised borrowing costs. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment and are recognised net in general and administrative expenses.

(ii) Subsequent costs

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the group and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

(iii) Depreciation

Depreciation is calculated over the depreciable amount, which is the cost of an asset, less its residual value. Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives, unless it is reasonably certain that the group will obtain ownership by the end of the lease term. Land is not depreciated.

The estimated useful lives for the current and comparative periods are as follows:

* buildings	15-50 years
* leasehold improvements	5 years
* plant and equipment	10-15 years
* motor vehicles	5 years
* computer equipment	3 years

Depreciation methods, useful lives and residual values are reassessed at each reporting date.

(e) Intangible assets

(i) Goodwill

Goodwill that arises upon the acquisition of business combinations included in intangible assets. Subsequent to initial recognition, goodwill is measured at cost less accumulated impairment losses. In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment, and an impairment loss on such an investment is not allocated to any asset, including goodwill, that forms part of the carrying amount of the equity accounted investee.

3 Significant accounting policies (continued)

(e) Intangible assets (continued)

(ii) Research and development

Expenditure on research activities, undertaken with the prospect of gaining new scientific or technical knowledge and understanding, is recognised in profit or loss when incurred.

Development activities involve a plan or design for the production of new or substantially improved products and processes. Development expenditure is capitalised only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the group has sufficient resources to complete development and to use or sell the asset. The expenditure capitalised includes the cost of materials, direct labour and overhead costs that are directly attributable to preparing the asset for its intended use and capitalised borrowing costs. Development expenditure that does not meet the above criteria is recognised in profit or loss as incurred.

Capitalised development expenditure is measured at cost less accumulated amortisation and accumulated impairment losses.

(iii) Intellectual property

Intellectual property consists of product registrations, product access rights, trademarks, task force seats, product distribution rights and product licences acquired from third parties. Generally, product registrations, product access rights, trademarks and task force seats, if purchased outright, are considered to have an indefinite life. Other items of acquired intellectual property are considered to have a finite life in accordance with the terms of the acquisition agreement. Intellectual property intangibles acquired by the group are measured at cost less accumulated amortisation and impairment losses. Expenditure on internally generated goodwill and brands is expensed when incurred.

(iv) Other intangible assets

Other intangible assets that are acquired by the group, which have finite useful lives, are measured at cost less accumulated amortisation and accumulated impairment losses.

(v) Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognised in profit or loss when incurred.

(vi) Amortisation

Amortisation is calculated over the cost of the asset, less its residual value. With the exception of goodwill, intangibles with a finite life are amortised on a straight-line basis in profit and loss over the estimated useful lives of the intangible assets from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life for intangible assets with a finite life, in the current and comparative periods, are as follows:

* capitalised development costs	5 to 10 years
* intellectual property - finite life	over the useful life in accordance with the acquisition agreement terms
* computer software	3 to 7 years

Amortisation methods, useful lives and residual values are reassessed at each reporting date.

(f) Leased assets

Leases where the group assumes substantially all of the risks and rewards of ownership are classified as finance leases. Upon initial recognition, the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

Other leases are operating leases and the leased assets are not recognised in the group's balance sheet.

Nufarm Limited Notes to the financial statements (continued)

3 Significant accounting policies (continued)

(g) Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on the first-in first-out principle and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of overheads based on normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

(h) Impairment

(i) Non-derivative financial assets

A financial asset, not carried at fair value through profit or loss, is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably.

Objective evidence of impairment includes default or deliquency by a debtor, indications that a debtor will enter bankruptcy, and, in the case of an investment in an equity security, a significant or prolonged decline in its fair value.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount, and the present value of estimated future cash flows discounted at the original effective interest rate.

An impairment loss on an available-for-sale financial asset is recognised by reclassifying the losses accumulated in the fair value reserve in equity to profit and loss. The cumulative loss that is reclassified from equity to profit and loss is the difference between the acquisition cost and the current fair value less any impairment loss previously recognised in profit and loss. If, in a subsequent period, the fair value of an impaired available-for-sale financial asset increases and the increase relates to an event occurring after the impairment loss was recognised then the impairment loss is reversed, with the amount of the reversal recognised in profit and loss.

(ii) Non-financial assets

The carrying amounts of the group's non-financial assets, other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For goodwill and intangible assets that have indefinite lives or that are not yet available for use, the recoverable amount is estimated at each reporting date.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the cash-generating unit'). The goodwill acquired in a business combination, for the purpose of impairment testing, is allocated to cash-generating units that are expected to benefit from the synergies of the combination.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its estimated recoverable amount. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of other assets in the unit on a pro-rata basis.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Goodwill that forms part of the carrying amount of an investment in an associate is not recognised separately, and therefore is not tested for impairment separately. Instead, the entire amount of the investment in an associate is tested for impairment as a single asset when there is objective evidence that the investment in an associate may be impaired.

(i) Non-current assets held for sale

Non-current assets, or disposal groups comprising assets and liabilities, that are expected to be recovered primarily through sale rather than continuing use are classified as held for sale. Immediately before classification as held for sale, the assets, or components of a disposal group, are remeasured in accordance with the group's accounting policies. Thereafter generally the assets, or disposal group, are measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on a pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets and employee benefit assets, which continue to be measured in accordance with the group's accounting policies.

3 Significant accounting policies (continued)

(i) Non-current assets held for sale (continued)

Impairment losses on initial classification as held for sale and subsequent gains or losses on remeasurement are recognised in profit or loss. Gains are not recognised in excess of any cumulative impairment loss.

Intangible assets and property, plant and equipment once classified as held for sale or distribution are not amortised or depreciated. In addition, equity accounting of equity accounted investees ceases once classified as held for sale or distribution.

(j) Employee benefits

(i) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in profit or loss in the periods during which services are rendered by employees. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

(ii) Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The group's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value. Any unrecognised past service costs and the fair value of any plan assets are deducted. The discount rate is the yield at the reporting date on government bonds that have maturity dates approximating the terms of the group's obligations and that are denominated in the same currency in which the benefits are expected to be paid. The calculation is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a benefit to the group, the recognised asset is limited to the net total of any unrecognised past service costs and the present value of any future refunds from the plan or reductions in future contributions to the plan. In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements that may apply to any plan in the group. An economic benefit is available to the group if it is realisable during the life of the plan, or on settlement of the plan liabilities.

When the benefits of a fund are improved, the portion of the increased benefit relating to past service by employees is recognised in profit or loss on a straight-line basis over the average period until the benefits become vested. To the extent that the benefits vest immediately, the expense is recognised immediately in profit or loss.

The group recognises all actuarial gains and losses arising from the defined benefit plans directly in other comprehensive income.

The group recognises gains and losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on curtailment comprises any resulting change in the fair value of plan assets, change in the present value of defined obligation and any related actuarial gains and losses and past service cost that had not previously been recognised.

(iii) Other long-term employee benefits

The group's net obligation in respect of long-term employee benefits, other than defined benefit plans, is the amount of future benefit that employees have earned in return for their service in the current and prior periods plus related oncosts; that benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The discount rate is the yield at the reporting date on government bonds that have maturity dates approximating the terms of the group's obligations. The calculation is performed using the projected unit credit method. Any actuarial gains or losses are recognised in profit or loss in the period in which they arise.

(iv) Termination benefits

Termination benefits are recognised as an expense when the group is demonstrably committed, without a realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognised as an expense if the group has made an offer encouraging voluntary redundancy, it is probable that the offer will be accepted and the number of acceptances can be estimated reliably. If benefits are payable more than twelve months after the reporting period, then they are discounted to their present value.

Nufarm Limited Notes to the financial statements (continued)

3 Significant accounting policies (continued)

(j) Employee benefits (continued)

(v) Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(vi) Share-based payment transactions

The group has a global share plan for employees whereby matching and loyalty shares are granted to employees. The fair value of matching and loyalty shares granted is recognised as expense in the profit or loss over the respective service period, with a corresponding increase in equity, rather than as the matching and loyalty shares are issued. Refer note 27 for details of the global share plan.

The group has a short term incentive plan (STI) available to key executives, senior managers and other managers globally. A pre-determined percentage of the STI is paid in cash with the remainder deferred into shares which have either a one or two year vesting period. The cash portion is recognised immediately as an expense at the time of performance testing. The expense relating to deferred shares is expensed over the vesting period. Refer to note 27 for further details on this plan.

The group has a long term incentive plan (LTIP) which is available to key executives and certain selected senior managers. Peformance rights have been granted to acquire ordinary shares in the company subject to the achievement of global performance hurdles. The expense in relation to the LTIP is recognised over the vesting period of 3 years. Refer note 27 for further details on this plan.

(k) Provisions

A provision is recognised if, as a result of a past event, the group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as a finance cost.

A provision for restructuring is recognised when the group has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating losses are not provided for.

(I) Revenue

(i) Goods sold

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates. Revenue is recognised when persuasive evidence of an arrangement exists, usually in the form of an executed sales agreement, that the significant risks and rewards of ownership have been transferred to the buyer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing management involvement with the goods and the amount of revenue can be measured reliably. If it is probable that discounts will be granted and the amount can be measured reliably, then the discount is recognised as a reduction of revenue as the sales are recognised.

(ii) Dividend income

Dividend income is recognised when the right to receive the payment is established. This is generally at the point the dividend has been formally declared.

(m) Lease payments

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent lease payments are accounted for by revising the minimum lease payments over the remaining term of the lease when the lease adjustment is confirmed.

Determining whether an arrangement contains a lease

At the inception of an arrangement, the group determines whether such an arrangement is or contains a lease. A specific asset is the subject of a lease if fulfilment of the arrangement is dependent on the use of that specified asset. An arrangement conveys the right to use the asset if the arrangement conveys to the group the right to control the use of the underlying asset. At inception or upon reassessment of the arrangement, the group separates payments and other consideration required by such an arrangement into those for the lease and those for other elements on the basis of their relative fair values. If the group concludes for a finance lease that it is impracticable to separate the payments reliably, an asset and liability are recognised at an amount equal to the fair value of the underlying asset. Subsequently the liability is reduced as payments are made and an imputed finance charge on the liability is recognised using the group's incremental borrowing rate.

Nufarm Limited Notes to the financial statements (continued)

3 Significant accounting policies (continued)

(n) Finance income and finance costs

Finance income comprises interest income on funds invested, changes in the fair value of financial assets at fair value through profit or loss, and gains on hedging instruments that are recognised in profit or loss. Interest income is recognised as it accrues in profit or loss, using the effective interest method.

Finance costs comprise interest expense on borrowings, transaction costs, unwinding of the discount on provisions, changes in the fair value of financial assets classified as fair value through profit or loss, dividends on preference shares classified as liabilities, impairment losses recognised on financial assets and losses on hedging instruments that are recognised in profit or loss. Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest rate method.

(o) Income tax

Income tax expense comprises current and deferred tax. Current and deferred taxes are recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that they will probably not reverse in the foreseeable future. In addition, deferred tax is not recognised for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional income taxes that arise from the distribution of cash dividends are recognised at the same time as the liability to pay the related dividend is recognised. The group does not distribute non-cash assets as dividends to its shareholders.

(i) Tax consolidation

The company and its wholly-owned Australian resident entities are part of a tax-consolidated group. As a consequence, all members of the tax-consolidated group are taxed as a single entity. The head entity within the tax-consolidated group is Nufarm Limited.

Current tax expense/income, deferred tax liabilities and deferred tax assets arising from temporary differences of the members of the tax-consolidated group are recognised in the separate financial statements of the members of the tax-consolidated group using the 'separate taxpayer within group' approach by reference to the carrying amounts of assets and liabilities in the separate financial statements of each entity and the tax values applying under tax consolidation.

Any current tax liabilities (or assets) and deferred tax assets arising from unused tax losses of the subsidiaries are assumed by the head entity in the tax-consolidated group and are recognised by the company as amounts payable/ (receivable) to/(from) other entities in the tax-consolidated group in conjunction with any tax funding arrangement amounts (refer below). Any difference between these amounts is recognised by the company as an equity contribution or distribution.

3 Significant accounting policies (continued)

(o) Income tax (continued)

(i) Tax consolidation (continued)

The company recognises deferred tax assets arising from unused tax losses of the tax-consolidated group to the extent that it is probable that future taxable profits of the tax-consolidated group will be available against which the asset can be utilised.

Any subsequent period adjustments to deferred tax assets arising from unused tax losses as a result of revised assessments of the probability of recoverability is recognised by the head entity only.

(ii) Nature of tax funding arrangements and tax sharing agreements

The head entity, in conjunction with other members of the tax-consolidated group, has entered into a tax funding arrangement which sets out the funding obligations of members of the tax-consolidated group in respect of tax amounts. The tax funding arrangements require payments to/from the head entity equal to the current tax liability/(asset) assumed by the head entity and any tax-loss deferred tax asset assumed by the head entity, resulting in the head entity recognising an inter-entity receivable/(payable) equal in amount to the tax liability/(asset) assumed. The inter-entity receivables) are at call.

Contributions to fund the current tax liabilities are payable as per the tax funding arrangement and reflect the timing of the head entity's obligation to make payments for tax liabilities to the relevant tax authorities.

The head entity, in conjunction with other members of the tax-consolidated group, has also entered a tax sharing agreement. The tax sharing agreement provides for the determination of the allocation of the income tax liabilities between the entities should the head entity default on its tax payment obligations. No amounts have been recognised in the financial statements in respect of this agreement as payment of any amounts under the tax sharing agreement is considered remote.

(p) Goods and services tax

Revenue, expenses and assets are recognised net of the amount of goods and services tax (GST or equivalent), except where the GST incurred is not recoverable from the taxation authority. In these circumstances, the GST is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the ATO is included as a current asset or liability in the balance sheet.

Cash flows are included in the statement of cash flows on a gross basis. The GST components of cash flows arising from investing and financing activities which are recoverable from, or payable to, the relevant tax authorities are classified as operating cash flows.

(q) Earnings per share

The group presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all potential dilutive ordinary shares, which comprise convertible notes and share options granted to employees.

(r) Segment reporting

Determination and presentation of operating segments

An operating segment is a component of the group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the group's other components. All operating segments' results are reviewed regularly by the group's CEO to make decisions about resources to be allocated to the segment and to assess its performance.

3 Significant accounting policies (continued)

(r) Segment reporting (continued)

Determination and presentation of operating segments (continued)

Segment results that are reported to the CEO include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items comprise mainly loans and borrowings and related expenses, corporate assets and head office expenses, and income tax assets and liabilities.

Segment capital expenditure is the total cost incurred during the period to acquire property, plant and equipment and intangible assets other than goodwill.

(s) New standards and interpretations not yet adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 July 2012, and have not been applied in preparing these consolidated financial statements. None of these is expected to have a significant effect on the consolidated financial statements of the Group, except for AASB 9 Financial Instruments, which becomes mandatory for the group's 2016 consolidated financial statements and could change the classification and measurement of financial assets. The group does not plan to adopt this standard early and the extent of the impact has not been determined.

4 Determination of fair values

A number of the group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

(i) Property, plant and equipment

The fair value of property, plant and equipment recognised as a result of a business combination is based on market values. The market value of property is the estimated amount for which a property could be exchanged on the date of valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, and willingly. The market value of items of plant, equipment, fixtures and fittings is based on the market approach and cost approaches quoted market prices for similar items when available and replacement cost when appropriate.

(ii) Intangibles assets

The fair value of patents and trademarks acquired in a business combination is based on the discounted estimated royalty payments that have been avoided as a result of the patent or trademark being owned. The fair value of other intangible assets is based on the discounted cash flows expected to be derived from the use and eventual sale of the assets.

(iii) Inventories

The fair value of inventories acquired in a business combination is determined based on its estimated selling price in the ordinary course of business less the estimated costs of completion and sale, and a reasonable profit margin based on effort required to complete and sell the inventories.

(iv) Trade and other receivables

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. This fair value is determined for disclosure purposes.

(v) Derivatives

The fair value of forward exchange contracts is based on their listed market price, if available. If a listed market price is not available, then fair value is estimated by discounting the difference between the contractual forward price and the current forward price for the residual maturity of the contract using a risk-free interest rate (based on government bonds).

Nufarm Limited Notes to the financial statements (continued)

4 Determination of fair values (continued)

(v) Derivatives (continued)

The fair value of interest rate swaps is based on broker quotes. Those quotes are tested for reasonableness by future cash flows based on the terms and maturity of each contract and using market interest rates for a similar instrument at the measurement date.

(vi) Non-derivative financial liabilities

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date. For finance leases, the market rate of interest is determined by reference to similar lease agreements.

(vii) Share-based payment transactions

The fair value of the performance rights issued under the Nufarm Long Term Incentive Plan have been measured using Monte Carlo Simulation and the Binomial Tree. The fair value of the deferred shares granted to participants under the Nufarm Short Term Incentive will be measured using the volume weighted average price for the five day period subsequent to year end results announcement. Measurement inputs include the share price on the measurement date, the exercise price of the instrument, expected volatility, expected term of the instruments, dividends, and the risk-free rate (based on government bonds).

5 Operating segments

Segment information is presented in respect of the group's key operating segments. The operating segments are based on the group's management and internal reporting structure.

Operating segments

The group operates predominantly along two business lines, being crop protection and seed technologies.

The crop protection business deals in the manufacture and sale of crop protection products used by farmers to protect crops from damage caused by weeds, pests and disease. It is managed by major geographic segments, being Australia and New Zealand, Asia, Europe, North America and South America. The North America region includes Canada, USA, Mexico and the Central American countries. The South America region includes Brazil, Argentina, Chile, Uruguay, Paraguay, Bolivia, Columbia and the Andean countries.

The seed technologies business deals in the sale of seeds and seed treatment products. The seed technologies business is managed on a worldwide basis.

Information regarding the results of each operating segment is included below. Performance is measured based on underlying EBIT as included in the internal management reports that are reviewed by the group's CEO. Underlying EBIT is used to measure performance as management believes that such information is the most relevant in evaluating the results of each segment. Segment revenue is based on the geographic location of customers. Segment results include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. The corporate segment comprises mainly corporate expenses, interest-bearing loans, borrowings and corporate assets.

Change in operating segments

In 2011, the group's operating segments were presented purely on an geographic basis. In 2012, the group's operating segments are presented on a crop protection and seed technologies basis. The change is an evolution of our segmental reporting reflecting the relative size of our seed technologies business.

	(58,929)	(42,846)	(175,479)	(148,130)	

Class action settlement

On 1 August 2012 the company announced that it had entered into a conditional settlement agreement in relation to the class action proceedings originally issued in January 2011 by Maurice Blackburn and Slater & Gordon. The company agreed to pay \$43.500 million, which covers the claims, interest, costs of the litigation funders and the applicants' legal fees. The settlement is subject to court approval and, if court approval is obtained, the class action will be dismissed without the admission of liability by the company. In accordance with Accounting Standards the settlement amount, along with related legal costs, has been provided for in the financial statements in the current year.

Restructuring costs

After tax restructuring costs of \$5.013 million (2011: \$6.310 million) mainly relate to the reorganisation of the European business. The prior year costs related to the reorganisation of the sales force in Brazil.

Debt re-financing costs

The company incurred significant debt refinancing costs associated with a 12 month facility that was put in place in December 2010. These costs were treated as a material item and were partially recognised in the prior year (\$17.238 million) with the balance recognised in the current year (\$6.952 million). Costs associated with the new financing arrangements drawn down in November 2011 are being amortised over the respective terms of these arrangements and are included within net financing costs.

Due diligence and litigation costs

The 2012 financial year due diligence and litigation costs largely relate to the settlement of the class action, the Seeds 2000 acquisition and arbitration proceedings against the previous owner of the Brazilian business. The prior year due diligence and litigation costs largely relate to the settlement of the receivable dispute, the class action and arbitration proceedings against the previous owner of the Brazilian business.

Investment in associate write down

The company has written down by \$1.993 million (2011: \$4.919 million) the value of a minor equity investment in an Indian crop protection company Excel Crop Care Ltd. The remaining carrying value of this investment at 31 July 2012 is \$2.658 million.

Net foreign exchange gains/(losses) on Nufarm Step-up Securities financing

The company benefited from a net after tax gain of \$7.697 million (2011: \$14.666 million net loss) associated with the year end mark-to-market revaluation of proceeds from Nufarm Step-up Securities.

Nufarm Limited Notes to the financial statements

6 Items of material income and expense (continued)

Goodwill impairment loss / Intangibles write off - Brazil

In 2011 company recognised an impairment of goodwill of the Brazil CGU due to a number of market, product and economic factors that have impacted the business. Whilst the business did record a strong earnings recovery in the 2011 year relative to the previous year, after discussions with advisors, it was determined that a higher discount rate should be applied to the business projections in recognition of the risks attached to the acheivement of the forecast. A total impairment charge of \$70.004 million was recognised in the year ended 31 July 2011.

Several older insecticide products have been phased out of the Brazilian product portfolio due to regulatory requirements. The company took a write down in the carrying value of the intangible assets associated with these products in the prior year (\$4.340 million) with the balance of \$3.708 million written down in the current financial year. Replacement products have been introduced into the portfolio.

Receivable write down

7

In the prior year the company announced that it had executed a binding settlement agreement in relation to a receivables dispute. The settlement resulted in a partial recovery and the subsequent write down of unrecovered funds resulting in an after tax loss of \$27.671 million.

Material items are classified by function as follows

Year ended 31 July 2012 \$'000s	Cost of sales	Selling, marketing and distribution expense	General & administrative expense	Net financing costs	Total Pre-tax

14 Acquisition of businesses and acquisition of non-controlling interests

Business acquisitions

On 1 December 2011, the group acquired 100% of the shares in Seeds 2000 Inc. at a total cost of US\$55.2 million. Seeds 2000 is a sunflower seed research and production company based in Minnesota, USA and has activities in the USA, Canada, China, Argentina, and a number of European markets.

On 31 March 2012 the group acquired 100% of the shares in Seeds 2000 Argentina SRL, a related company of Seeds 2000 Inc, at a total cost of US\$1.4 million. On 24 October 2011, the group acquired the breeding and germplasm assets of the Super Seeds sunflower business in Serbia. The Seeds 2000 Argentina SRL and Super Seeds acquisitions are individually immaterial.

These acquisitions have been made to expand the seeds business in the regions of North America, South America and Europe. Management believes that the purchase of these will complement and result in synergies with the existing seeds businesses in these regions and expand our market share.

Cash acquired	(1,382)	(462)
Net cash outflow	50,674	3,239

The Seeds 2000 Inc net assets recognised in the 31 January 2012 interim financial statements were based on a provisional assessment of fair value as the Group sought an independent assessment of Seeds 2000 Inc's taxation position. The results of the assessment had not been received at the date the 31 January 2012 interim financial statements were approved for issue by the Board of Directors.

Subsequent to the issuance of the 31 January 2012 interim financial statements, the taxation assessment was completed and showed that the fair value of income tax liability was \$462,000 lower than the provisional value, and deferred tax assets were \$284,000 lower than the provisional value. There was a a corresponding reduction in goodwill of \$178,000, to give total goodwill arising on the acquisition of \$19,334,000.

For Seeds 2000 Inc, the trade receivables comprise gross contractual amounts due of \$1,733,000.

Total goodwill of \$19,355,000 from business acquisitons is attributable mainly to the synergies expected to be achieved from integrating the respective companies into the group's existing seeds business.

There were no business acquisitions for the year ended 31 July 2011.

14 Acquisition of businesses and acquisition of non-controlling interests (continued)

Acquisition of non-controlling interest

On 1 May 2012, the group acquired an additional 49% interest in the voting shares of Nufarm Technologies (M) Sdn Bhd, increasing its ownership interest to 100%. A cash consideration of \$50,000 was paid to the non-controlling interest shareholders. The carrying value of the net assets of Nufarm Technologies (M) Sdn Bhd at the acquisition date was \$102,000, and the carrying value of the additional interest acquired was \$50,000. The group recognised a decrease in non-controlling interests of \$50,000.

There were no acquisitions of non-controlling interests for the year ended 31 July 2011.

18 Tax assets and liabilities

Current tax assets and liabilities

The current tax asset for the group of \$37,664,065 (2011: \$40,659,419) represents the amount of income taxes recoverable in respect of prior periods and that arose from the payment of tax in excess of the amounts due to the relevant tax authority. The current tax liability for the group of \$14,833,945 (2011: \$2,297,832) represents the amount of income taxes payable in respect of current and prior financial periods.

Deferred tax assets and liabilities

Recognised deferred tax assets and liabilities

Deferred tax assets and liabilities are attributable to the following:

		(

The carrying value of deferred tax assets relating to tax losses and tax credits is largely dependent on the generation of sufficient future taxable income. The Brazilian business carries total deferred tax assets of \$59.1 million (2011: \$72.1 million). Based on the group's accounting policy of recouping tax losses and tax credits within a maximum time frame of 8 years, the carrying value of the deferred tax asset would be impaired if aggregate earnings over the 8 year period are 12% below management's forecasts. The carrying value of this asset will continue to be assessed at each reporting date.

Deferred tax assets and liabilities

Unrecognised deferred tax liability

At 31 July 2012, a deferred tax liability of \$17,589,702 (2011: \$21,060,570) relating to investments in subsidiaries has not been recognised because the company controls the repatriation of retained earnings and it is satisfied that it will not be incurred in the foreseeable future. This amount represents the theoretical withholding tax payable if all overseas retained earnings were paid as dividends.

Unrecognised deferred tax assets

At 31 July 2012, there are unrecognised tax losses and timing differences of \$30,805,379 (2011: \$38,888,650). These losses do not have an expiry date.

19 Investments accounted for using the equity method

The group accounts for investments in associates using the equity method.

The group had the following significant investments in associates during the year:

			Balance date	Ownersh voting ir	
		Country	of associate	2012	2011
Excel Crop Care Ltd	Agricultural cho manufacturer	emicals India	31 March	14.69%	14.69%
F&N joint ventures	Agricultural che distributor	emicals Eastern Europe	31 December	50.00%	50.00%

The 14.69% investment in Excel Crop Care Ltd is equity accounted as Nufarm has the ability to appoint two directors to the board and, together with an unrelated partner, has significant influence over nearly 34% of the shares of the company. The relationship also extends to manufacturing and marketing collaborations.

The F&N joint ventures represents the group's interest in three joint ventures with FMC Corporation, which operate in Poland, Czech Republic and Slovakia. The joint ventures sell Nufarm and FMC products within their country.

The major intangibles with an indefinite economic life are the product registrations that Nufarm owns. These registrations are considered to have an indefinite life because, based on past experience, they will be renewed by the relevant regulatory authorities, the underlying products will continue to be commercialised and available for sale in the foreseeable future, the company will satisfy all of the conditions necessary for renewal and the cost of renewal is minimal. In determining that the registrations have indefinite useful life, the principal factor that influenced this determination is the expectation that the existing registration will not be subject to significant amendment in the foreseeable future.

The group has determined that operating unit by country is the appropriate method for determining the cash-generating units (CGU) of the business. This level of CGU aligns with the cash flows of the business and the management structure of the group. The goodwill and intellectual property with an indefinite life are CGU specific, as the acquisitions generating goodwill and the product registrations that are the major indefinite intangible are country specific in nature. There is no allocation of goodwill between CGUs.

The major CGUs and their intangible value is as follows: Brazil \$158 million (2011: \$202 million), USA \$146 million (2011: \$142 million), Seeds business \$166 million (2011: \$105 million), UK and Holland \$76 million (2011: \$82 million) and Australia \$57 million (2011: \$55 million). The balance of intangibles is spread across multiple CGUs, with no individual amount being material relative to the total intangibles at balance date.

Impairment testing for cash-generating units containing goodwill

For the impairment testing of these assets, the carrying amount of the asset is compared to its recoverable amount at a CGU level. The group uses the value-in-use method to estimate the recoverable amount. In assessing value-in-use, the estimated future cash flows are derived from the five year plan for each cash-generating unit with a growth factor applied to extrapolate a cash flow beyond year five. A perpetuity factor is then applied to the normalised cash flow beyond year five in order to include a terminal value in the value-in-use calculation. The terminal growth rate assumed for each CGU is generally a long term inflation estimate, ranging from 1.4% to 5.0% (2011: 0% to 5%). The cash flow is then discounted to a present value using a discount rate which is the company's weighted average cost of capital, but then adjusted for country risk and asset-specific risk associated with each CGU. The nominal post-tax discount rate applied to the group's CGU's ranges from 8.5% to 12.8% (2011: 9.8% to 16.3%).

23 Intangible assets (continued)

Brazil cash generating unit (CGU)

The Brazil CGU has the following intangible assets:

···· =· == ·· = • ··· = ····· ··· ··· ··		
	2012	2011
	\$000	\$000
Goodwill	47,374	60,959
Indefinite life intangibles	102,908	134,235
Capitalised development costs	7,619	6,434
Computer software	397	558
Total	158,298	202,186

The indefinite life intangibles relates to the product registrations and trade marks acquired in June 2007.

In 2012, the company has assessed the recoverable amount of the Brazil CGU and determined the CGU's recoverable amount exceeds its carrying value.

In 2011, the company recognised an impairment of goodwill of the Brazil CGU due to a number of market, product and economic factors that have impacted the business. Whilst the business did record a strong earnings recovery in the 2011 year relative to the 2010 year, after discussions with advisors, it was determined that a higher discount rate should be applied to the business projections in recognition of the risks attached to the acheivement of the forecast. A total impairment charge of \$70.004 million was recognised in the year ended 31 July 2011.

Considering the 2011 impairment of the Brazil CGU, the amount by which the CGU recoverable amount exceeds the carrying value in 2012 is minimal.

Should the Brazil CGU fail to meet its forecast operating result going forward, this may necessitate a revision to the future forecasts or alternatively a further increase in the discount rate used in the valuein-use modelling. By way of sensitivity and all other things being equal: (a) a 1% increase in the discount rate would result in a reduction in recoverable amount of approximately \$61 million; or (b) a 5% decrease in EBITDA compared to budget for all years in the forecast period and also in the terminal value calculation would result in a reduction in recoverable amount of approximately \$41 million.

Financing facilities

On 22 November 2011, the company executed a \$625 million senior secured syndicated bank facility (SFA) with a term of 3 years. As at 31 July 2012, the amount of funding drawn under the syndicated bank facility was \$336 million with loans being advanced in multiple currencies.

On 23 August 2011, Nufarm executed a \$300 million trade receivables securitisation facility. Subsequent to execution, the facility size has been reduced to \$250 million to reflect the current value of trade receivables being used to secure funding under this program. As at 31 July 2012, the amount of funding drawn under the securitised facility by the participating Nufarm entities was \$202 million. Funding from the securitisation facility and the syndicated bank facility was used to repay the amount outstanding under the previous 12 month \$900 million bank facility that had been established on 15 December 2010.

The syndicated bank facility and trade receivables securitisation facility provide access to committed lines of credit to support the group's seasonal working capital demands and general corporate financing requirements. The SFA includes covenants of a type normally associated with facilities of this kind, and the group was in compliance with these covenants throughout the financial year.

The majority of debt facilities that reside outside the SFA and the trade receivables securitisation facility are regional working capital facilities, primarily located in Brazil and Europe, totalling \$152 million (2011: \$178 million).

Total net debt (interest bearing liabilities net of cash) at 31 July 2012 of \$467.8 million (2011: \$465.2 million) includes the draw down of an additional US\$55 million of debt funding for the Seeds 2000 acquisition.

	Cumulative amount at 31 July	(16,998)	(11,504)

	Conso	olidated
The major categories of fund assets as a percentage of total fund assets are	2012	2011
as follows:	%	%
European equities	48.0%	62.8%
European bonds	46.6%	34.9%
Property	1.5%	1.6%
Cash	3.9%	0.7%
Principal actuarial assumptions at the reporting date (expressed as weighted averages):		
Discount rate at 31 July	4.2%	5.4%
Expected return on fund assets at 31 July	6.3%	6.4%
Future salary increases	2.8%	3.6%
Future pension increases	2.2%	2.8%

The overall expected long-term rate of return on assets is 6.3%. The expected rate of return on plan assets reflects the average rate of earnings expected on the funds invested to provide for the benefits included in the projected benefit obligation.

The group expects to pay \$3,609,000 in contributions to defined benefit plans in 2013.

27 Share-based payments

Nufarm Executive Share Plan (2000)

The Nufarm Executive Share Plan (2000) offers shares to executives. The executives may select an alternative mix of shares (at no cost) and options at a cost determined under the 'Black Scholes' methodology. These benefits are only given when a predetermined return on capital employed is achieved over the relevant period. The shares and options are subject to forfeiture and dealing restrictions. The executive cannot deal in the shares or options for a period of between three and ten years without board approval. An independent trustee holds the shares and options on behalf of the executives. At 31 July 2012 there were 61 participants (2011: 70 participants) in the scheme and 989,830 shares (2011: 1,127,034) were allocated and held by the trustee on behalf of the participants. The cost of issuing shares is expensed in the year of issue. From 1 August 2011, it was decided that there will be no further awards under this share plan and that it would be replaced by the Nufarm Short Term Incentive plan (refer below). Any unvested equities held in the executive share plan will remain and be subject to the vesting conditions under the rules of the plan.

Nufarm Short Term Incentive Plan (STI)

The STI is available to key executives, senior managers and other managers globally. The first awards under the plan will be at the end of the current financial year. The STI is measured as follows:

- 80 per cent of the potential is based on budget measures of EBIT and return on operating assets (ROA)

- 20 per cent of the potential is based on strategic and business improvement objectives

A pre-determined percentage of the STI is paid in cash at the time of performance testing and the balance is deferred into shares in the company for nil consideration. The number of shares granted is based on the volume weighted average price (VWAP) of Nufarm Limited shares in the 5 days subsequent to the results announcement. Vesting will occur after a two year period, although for the first year 50 per cent of the shares will vest on the first anniversary and 50 per cent of the shares will vest on the second anniversary.

27 Share-based payments (continued)

Nufarm Executive Long Term Incentive Plan (LTIP)

On 1 August 2011, the LTIP commenced and is available to key executives and certain selected senior managers. Awards are granted to individuals in the form of performance rights, which comprise rights to acquire ordinary shares in the company for nil consideration, subject to the achievement of global performance hurdles. Under the plan, individuals will receive an annual award of performance rights as soon as practical after the announcement of results in the preceding year. The initial awards were granted to executives (excluding the managing director) on 9 February 2012. The performance and vesting period for the awards will be three years. Awards will vest in two equal tranches as follows:

- 50 per cent of the LTIP grant will vest subject to the achievement of a relative total shareholder return (TSR) performance hurdle measured against a selected comparator group of companies; and

- the remaining 50 per cent will vest subject to meeting an absolute return on funds employed (ROFE) target.

Global Share Plan (2001)

The Global Share Plan commenced in 2001, and is available to all permanent employees. Participants contribute a proportion of their salary to purchase shares. The company will contribute an amount equal to 10% of the number of ordinary shares acquired with a participant's contribution in the form of additional ordinary shares. Amounts over 10% of the participant's salary can be contributed but will not be matched. For each year the shares are held, up to a maximum of five years, the company contributes a further 10% of the value of the shares acquired with the participant's contribution. An independent trustee holds the shares on behalf of the participants. At 31 July 2012 there were 722 participants (2011: 756 participants) in the scheme and 1,783,289 shares (2011: 1,602,481) were allocated and held by the trustee on behalf of the participants.

The power of appointment and removal of the trustees for the share purchase schemes is vested in the company.

	2012	2011
Employee expenses	\$000	\$000
Total expense arising from share-based payment transactions	2,829	457

Measurement of fair values

Nufarm STI plan

The grant date of the shares awarded under the STI plan was subsequent to 31 July 2012. As the services received in consideration for these shares commenced on 1 August 2011, an estimate of the fair value of the awards has been recognised as an expense in the year ended 31 July 2012. The weighted average fair value and associated fair value assumptions of the awards granted subsequent to 31 July 2012 will be disclosed in the 2013 annual report.

Nufarm LTI plan

The fair value of the rights granted through the LTIP was measured as follows:

Award type Performance rights	Vesting conditions Relative TSR ROFE performance condition	Valuation methodology Monte-Carlo simulation Binomial tree		
				ROFE
Vesting condition			Relative	performance
			TSR	condition
Fair value at grant date			\$2.91	\$4.51

Parent Company

The Company does not have authorised capital or par value in respect of its issued shares.

On 23 November 2011, 114,560 shares at \$4.15 were issued under the executive share plan. On 3 January 2012, 70,492 shares at \$4.16 were issued under the global share plan. On 30 April 2012, 124,190 shares at \$4.85 were issued under the dividend reinvestment program.

On 5 January 2011, 57,274 shares at \$5.44 were issued under the global share plan. The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the company.

29 Capital and reserves (continued)

Nufarm Step-up Securities

In the year ended 31 July 2007 Nufarm Finance (NZ) Limited, a wholly owned subsidiary of Nufarm Limited, issued a new hybrid security called Nufarm Step-up Securities (NSS). The NSS are perpetual step up securities and on 24 November 2006, 2,510,000 NSS were allotted at an issue price of \$100 per security raising \$251 million. The NSS are listed on the ASX under the code 'NFNG' and on the NZDX under the code 'NFFHA'. The after-tax costs associated with the issue of the NSS, totalling \$4.1 million, were deducted from the proceeds.

Distributions on the NSS are at the discretion of the directors and are floating rate, unfranked, non-cumulative and subordinated. However, distributions of profits and capital by Nufarm Limited are curtailed if distributions to NSS holders are not made, until such time that Nufarm Finance (NZ) Limited makes up the arrears. The first distribution date for the NSS was 16 April 2007 and on a six-monthly basis after this date. The floating rate is the average mid-rate for bills with a term of six months plus a margin of 3.9% (2011: 1.9%). On 23 September 2011, Nufarm announced that it would 'step-up' the NSS. This resulted in the interest margin attached to the NSS being stepped up by 2.0 per cent, with the new interest margin being set at 3.9 per cent as at 24 November 2011. No other terms were adjusted and there are no further step-up dates. Nufarm retains the right to redeem or exchange the NSS on future distribution dates.

Translation reserve

The translation reserve comprises all foreign exchange differences arising from the translation of the financial statements of foreign operations where their functional currency is different from the presentation currency of the reporting entity.

Capital profit reserve

This reserve is used to accumulate realised capital profits.

Other reserve

This reserve represents the accrued employee entitlements to share awards that have been charged to the income statement and have not yet been exercised.

Dividends

An interim dividend of 3 cents per share, totalling \$7,864,874 was declared on 27 March 2012, and was paid on 30 April 2012 (2011: Nil).

Distributions Distributions recognised in the current year by Nufarm Finance (NZ) Ltd on the Nufarm Step-up Securities are:	Distribution rate	Consolidated Total amount \$000	Payment date
2012			
Distribution	6.61% and 8.61%*	10,253	16-Apr-12
Distribution	6.94%	8,829	17-Oct-11
		19,082	
2011			
Distribution	6.94%	8,686	15-Apr-11
Distribution	6.71%	8,444	15-Oct-10
		17,130	

* Refer to discussion titled "Nufarm Step-up Securities" above.

The distribution on the Nufarm Step-up Securities reported on the equity movement schedule has been reduced by the tax benefit on the gross distribution, giving an after-tax amount of \$14.044 million (2011: \$12.220 million).

Franking credit/(debit) balance The amount of franking credits available for the subsequent financial year are:	2012 \$000	2011 \$000
Franking account balance as at the end of the year		
at 30% (2011: 30%)	30,421	25,746
Franking credits/(debits) that will arise from the		
payment of income tax payable/(refund) as at		
the end of the year	(4,923)	(9,971)
Balance at 31 July	25,498	15,775

The ability to utilise the franking credits is dependent upon there being sufficient available profits to declare dividends. In accordance with the tax consolidation legislation, the company as the head entity in the tax-consolidated group has also assumed the benefit of \$25,498,018 (2011: \$15,775,833) franking credits.

Financial risk management and financial instruments 31

The group has exposure to the following financial risks:

- * credit risk;
- * liquidity risk; and
- * market risk.

This note presents information about the group's exposure to each of the above risks, the objectives, policies and processes for measuring and managing risk, and the management of capital.

The Board of Directors has responsibility to identify, assess, monitor and manage the material risks facing the group and to ensure that adequate identification, reporting and risk minimisation mechanisms are established and working effectively. To support and maintain this objective, the audit committee has established detailed policies on risk oversight and management by approving a global risk management charter that specifies the responsibilities of the general manager global risk management (which includes responsibility for the internal audit function). This charter also provides comprehensive global authority to conduct internal audits, risk reviews and system-based analyses of the internal controls in major business systems operating within all significant company entities worldwide.

The general manager global risk management reports to the chairman of the audit committee and functionally to the chief financial officer. He provides a written report of his activities at each meeting of the audit committee. In doing so he has direct and continual access to the chairman and members of the audit committee.

31 Financial risk management and financial instruments (continued)

Credit risk

Credit risk is the risk of financial loss to the group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the group's receivables from customers and other financial assets.

Exposure to credit risk

The group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the group's customer base, including the default risk of the industry and country in which the customers operate, has less of an influence on credit risk.

The group has credit policies in place and the exposure to credit risk is monitored on an ongoing basis. Credit evaluations are performed on all customers before the group's standard payment and delivery terms and conditions are offered. Purchase limits are established for each customer, which represents the maximum open amount without requiring further management approval.

The group's maximum exposure to credit risk at the reporting date was:

	Consolidated	
Carrying amount	2012	2011
	\$000	\$000
Trade and other receivables	764,395	713,234
Cash and cash equivalents	191,317	257,706
Forward exchange contracts:		
Assets	7,196	74
	962,908	971,014

The group's maximum exposure to credit risk for trade and other receivables at the reporting date by geographic region was:

	Consolidated	
Carrying amount	2012	2011
	\$000	\$000
Australia/New Zealand	199,740	173,917
Asia	22,476	22,825
Europe	192,943	223,998
North America	122,663	52,513
South America	226,573	239,981
Trade and other receivables	764,395	713,234

The group's top five customers account for \$150.6 million of the trade receivables carrying amount at 31 July 2012 (2011: \$110.1 million). These top five customers represents 22 per cent (2011: 17 per cent) of the total receivables.

Impairment losses

The ageing of the group's customer trade receivables at the reporting date was:

Consolidated	Consoli	Consolidated		
Receivables ageing	2012	2011		
	\$000	\$000		
Current	578,876	511,303		
Past due - 0 to 90 days	85,681	58,280		
Past due - 90 to 180 days	1,801	8,906		
Past due - 180 to 360 days	4,809	6,145		
Past due - more than one year	16,892	30,176		
	688,059	614,810		
Provision for impairment	(22,278)	(26,587)		
Trade receivables	665,781	588,223		

Some of the past due receivables are secured by collateral from customers such as directors guarantees, bank guarantees and charges on fixed assets. The past due receivables not impaired relate to customers that have a good credit history with the group. Historically, the bad debt write-off from trade receivables has been very low. Over the past nine years, the bad debt write-off amount has averaged 0.03 percent of sales, with no greater than 0.11 percent of sales written off in any one year.

In the crop protection industry, it is normal practice to vary the terms of sales depending on the climatic conditions experienced in each country.

The movement in the allowance for impairment in respect of trade receivables during the year was as follows:

	Co	Consolidated	
	2012	2011	
	\$000	\$000	
Balance at 1 August	26,587	26,677	
Provisions made during the year	410	2,413	
Provisions used during the year	(410)	(346)	
Provisions acquired through business combinations	-	-	
Exchange adjustment	(4,309)	(2,157)	
Balance at 31 July	22,278	26,587	

The allowance account for trade receivables is used to record the impairment losses unless the group is satisfied that no recovery of the amount owing is possible. At that point the amount is considered irrecoverable and is written off against the receivable directly.

Liquidity risk

Liquidity risk is the risk that the group will not be able to meet its financial obligations as they fall due. The group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the group's reputation.

On 23 August 2011, Nufarm executed a \$300 million trade receivables securitisation facility. Subsequent to execution, the facility size has been reduced to \$250 million to reflect the current value of trade receivables being used to secure funding under this program. The facility provides funding that aligns with the working capital cycle of the company.

In November 2011, the group finalised a three year \$625 million syndicated bank facility. The amount drawn down under the facility at 31 July 2012 is \$336 million.

At 31 July 2012, the group had access to facilities of \$1,029 million (2011: \$1,078 million) under the SFA, trade receivables securitisation facility and with other lenders.

The majority of debt facilities that reside outside the SFA and the trade receivables securitisation facility are regional working capital facilities, primarily located in Brazil and Europe, totalling \$152 million (2011: \$178 million).

The SFA is secured by assets in the primary geographies in which Nufarm operates including Australia, United States, Canada, United Kingdom and France. A parent guarantee is provided to support working capital facilities in Brazil. Total net debt (net of cash) at 31 July 2012 was \$467.8 million (2011: \$465.2 million). The Senior Facility Agreement (SFA) includes covenants of a type normally associated with facilities of this kind, and the group was in compliance with these covenants throughout the financial year.

The following are the contractual maturities of the group's financial liabilities:

Consolidated	Carrying amount \$000	Contractual cash flows \$000	Less than 1 year \$000	1-2 years \$000	More than 2 years \$000
			2012

Interest on borrowings is denominated in currencies that match the cash flows generated by the underlying operations of the group. This provides an economic hedge and no derivatives are used to manage the exposure.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Currency risk

The group uses derivative financial instruments to manage specifically identified foreign currency risk on sales, purchases and borrowings that are denominated in a currency other than the functional currency of the individual group entity. The currencies giving rise to this risk are primarily the US Dollar, the Euro, the British Pound and the Brazilian Real. The group uses forward exchange contracts and options to hedge its foreign currency risk.

The group uses foreign exchange contracts and options to manage the foreign currency exposures between the Nufarm Step-up Securities issued in Australia and New Zealand, and related group funding to several jurisdictions to which the funds were advanced. During the period, the funding, which was previously advanced to these jurisdictions in US dollars, the Euro and the British pound, was converted to Australian dollars. The foreign currency contracts therefore primarily cover the exposure of the lenders to movements in the Australian dollar against their local currencies.

For accounting purposes, the group has not designated any derivatives in hedge relationships and all movements in fair value are recognised in profit or loss during the period. The net fair value of forward exchange contracts in the group used as economic hedges of forecast transactions at 31 July 2012 was a \$5,067,000 asset (2011: \$555,080 liability) comprising assets of \$7,196,000 (2011: \$74,300) and liabilities of \$2,129,000 (2011: \$629,380) that were recognised as derivatives measured at fair value.

Exposure to currency risk

The group's translation exposure to major foreign currency risks at balance date was as follows, based on notional amounts:

	Net financial asse	ets/(liabilities) - b	y currency of a	denomination
Consolidated	AUD	USD	Euro	GBP
2012	\$000	\$000	\$000	\$000
Functional currency of Group operation				
Australian dollars	-	(24,448)	(12,396)	(24,665)
US dollars	39,618	-	(1,715)	-
Euro	336	38,132	-	(9,498)
UK pounds sterling	-	56,172	(5,682)	-
	39,954	69,856	(19,793)	(34,163)

	Net financial ass	ets/(liabilities) - b	y currency of d	enomination
Consolidated	AUD	USD	Euro	GBP
2011	\$000	\$000	\$000	\$000

Currency risk (continued)

Sensitivity analysis

Based on the aforementioned Group's net financial assets/(liabilities) at 31 July, a 1 percent strengthening or weakening of the following currencies at 31 July would have increased/(decreased) profit or loss by the amounts shown below. This analysis assumes all other variables, including interest rates, remain constant. The analysis is performed on the same basis for 2011.

	Strengthening	Weakening	Strengthening	Weakening
	Profit or (loss)	Profit or (loss)	Profit or (loss)	Profit or (loss)
	after tax	after tax	after tax	after tax
	2012	2012	2011	2011
Currency movement	\$000	\$000	\$000	\$000
1% change in the Australian dollar exchange rate	185	(189)	(1,061)	1,082
1% change in the US dollar exchange rate	(728)	743	(992)	1,012
1% change in the Euro exchange rate	(54)	55	(58)	59
1% change in the GBP exchange rate	(139)	142	(259)	264

The Group's financial asset and liability profile may not remain constant, and therefore these sensitivities should be used with care.

The following significant exchange rates applied during the year:

	Avera	ge rate	Repor	ting date
AUD	2012	2011	2012	2011
US Dollar	1.033	1.017	1.051	1.099
Euro	0.783	0.733	0.854	0.763
GBP	0.654	0.634	0.671	0.669
BRL	1.900	1.669	2.151	1.704

Interest rate risk

The group has the ability to use derivative financial instruments to manage specifically identified interest rate risks. Interest rate swaps, denominated in AUD, are entered into to achieve an appropriate mix of fixed and floating rate exposures. However, at 31 July 2012 and at 31 July 2011, there were no interest rate swaps in place.

Cash flow risk on Nufarm Step-up Securities

The group uses interest rate caps to protect the cash flow impact of a movement in the distribution base rate. The distribution rate is the average mid-rate for bank bills with a term of six months plus a margin of 3.90%.

Profile

At the reporting date the interest rate profile of the group and company's interest-bearing financial instruments was:

	Consolidated			
	Carrying	Carrying amount		
	2012	2011		
	\$000	\$000		
Variable rate instruments				
Financial assets	87,795	128,686		
Financial liabilities	(673,109)	(722,926)		
	(585,314)	(594,240)		

31 Financial risk management and financial instruments (continued)

There were no fixed interest rate instruments during the year ended 31 July 2012 (2011: Nil).

Sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have increased/(decreased) profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The sensitivity is calculated on the debt at 31 July. Due to the seasonality of the crop protection business, debt levels can vary during the year. This analysis is performed on the same basis for 2011.

	Profit or loss		
	100bp	100bp	
	increase	decrease	
2012	\$000	\$000	
Variable rate instruments	(5,853)	5,853	
Total sensitivity	(5,853)	5,853	
2011			
Variable rate instruments	(5,942)	5,942	
Total sensitivity	(5,942)	5,942	

Fair values

Fair values versus carrying amounts

The fair values of financial assets and liabilities, together with the carrying amounts shown in the balance sheet, are as follows:

		Carrying	Fair	Carrying	Fair
Consolidated		amount	value	amount	value
		2012	2012	2011	2011
	Note	\$000	\$000	\$000	\$000
Cash and cash equivalents	15	191,317	191,317	257,706	257,706
Trade and other receivables	16	764,395	764,395	713,234	713,234
Forward exchange contracts:					
Assets	16	7,196	7,196	74	74
Liabilities	24	(2,129)	(2,129)	(629)	(629)
Trade and other payables	24	(483,108)	(483,108)	(406,424)	(406,424)
Bank overdraft	15	-	-	(10,881)	(10,881)

Unsecured bank loans	25	(86,402)	(86,402)	(119,839)	(119,839)
Other loans	25	(1,373)	(1,373)	(2,134)	(2,134)
Finance leases	25	(10,572)	(10,572)	(10,326)	(10,326)
		(195,438)	(195,438)	(158,965)	(158,965)

Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

* Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

* Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or

- liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- * Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

	Consolidated				
2012	Level 1 \$000	Level 2 \$000	Level 3 \$000	Total \$000	
Derivative financial assets	-	7,196	-	7,196	
	-	7,196	-	7,196	
Derivative financial liabilities	-	(2,129)	-	(2,129)	
	-	5,067	-	5,067	

		Consolida	ated	
2011	Level 1 \$000	Level 2 \$000	Level 3 \$000	Total \$000
Derivative financial assets	-	74	-	74
	-	74	-	74
Derivative financial liabilities	-	(629)	-	(629)
	_	(555)	-	(555)

There have been no transfers between levels in either 2012 or 2011.

Capital management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Board of Directors monitors the group's return on funds employed (ROFE). Return is calculated on the group's earnings before interest and tax and adjusted for any material items. Funds employed is defined as shareholder's funds plus total interest bearing debt. The Board of Directors determines the level of dividends to ordinary shareholders and reviews the group's total shareholder return with similar groups.

The Board believes ROFE is an appropriate performance condition as it ensures management is focused on the efficient use of capital and the measure remains effective regardless of the mix of equity and debt, which may change from time to time. ROFE objectives are set by the Board at the beginning of each year. There is a target and a stretch hurdle. These numbers will based on the budget and growth strategy. The ROFE return for the year ended 31 July 2012 was 10.4 per cent (2011: 8.5 per cent).

There were no changes in the group's approach to capital management during the year.

32 Operating leases

Non-cancellable operating lease rentals are payable as follows:

	Consolidated	
	2012	2011
	\$000	\$000
Not later than one year	8,569	10,474
Later than one year but not later than two years	9,429	9,797
Later than two years but not later than five years	17,956	13,955
Later than five years	127,427	127,234
	163,381	161,460

Operating leases are generally entered to access the use of shorter term assets such as motor vehicles, mobile plant and office equipment. Rentals are fixed for the duration of these leases. There is a small number of leases for office properties. These rentals have regular reviews based on market rentals at the time of review.

33 Capital commitments

The Group had contractual obligations to purchase plant and equipment for \$8.253 million at 31 July 2012 (2011: \$10.828 million).

34 Contingencies

The directors are of the opinion that provisions are not required in respect of the following matters, as it is not probable that a future sacrifice of economic benefits will be required or the amount is not capable of reliable measurement.

	Conse	olidated
	2012	2011
	\$000	\$000
Shareholder class action proceedings (refer to note 41).	n/a	-
Guarantee facility for Eastern European joint ventures with FMC Corporation.	6,983	6,279
Environmental guarantee given to the purchaser of land and buildings at Genneviliers for EUR 8.5 million. The guarantee expires in 2014, 18 months after the expiry of the business tenancy contract.	9,953	11,136
Insurance bond for EUR 2.717 million established to make certain capital expenditures at Gaillon plant in France. The insurance bond is for a three year term and expires in		
December 2013.	3,182	3,560
Brazilian taxation proceedings ^(a)	86,163	60,312
Contingent liabilities	106,281	81,287

(a) The group has a contingent liability for an amount of \$86.163 million (July 2011: \$60.312 million) in respect of arbitration proceedings against the previous owner of the Brazil business (acquired in 2007). The arbitration is in regard to potential pre-acquisition related tax liabilities and seeks to confirm that the tax indemnification clauses contained in the initial Investment Agreement are effective in allowing Nufarm to recover amounts from the previous owner.

Based on indemnification clauses in the agreement together with related legal advice, management is confident that the Arbitration Tribunal will find the previous owner responsible for indemnifying Nufarm in respect of the potential liabilities.

The Arbitration Tribunal hearing has been completed and the outcome is expected to be known within the calendar year. The contingent liability comprises potential primary tax liabilities, inflation and interest adjustments.

Advice obtained by the company to date indicates that there is a high likelihood of successfully defending the claims made by the tax authorities. Nufarm will only be liable to the extent that the tax authorities are ultimately successful in pursuing the claims for primary tax and related interest and inflation adjustments, and the company is unsuccessful in enforcing the tax indemnities provided by the former owner. Nufarm Limited

Note (a). These entities have entered into a deed of cross guarantee dated 10 July 2000 with Nufarm Limited which provides that all parties to the deed will guarantee to each creditor payment in full of any debt of each company participating in the deed on winding-up of that company. As a result of a class order issued by the Australian Securities and Investment Commission, these companies are relieved from the requirement to prepare financial statements.

36 Deed of cross guarantee

Under ASIC Class Order 98/1418, the Australian wholly-owned subsidiaries referred to in note 35 are relieved from the Corporations Act 2001 requirements for preparation, audit and lodgement of financial reports and director's reports.

It is a condition of the class order that the company and each of the subsidiaries enter into a deed of cross guarantee. The parent entity and all the Australian controlled entities have entered into a deed of cross guarantee dated 10 July 2000 which provides that all parties to the deed will guarantee to each creditor payment in full of any debt of each company participating in the deed on winding-up of that company.

A consolidated income statement and consolidated balance sheet, comprising the company and controlled entities which are a party to the deed, after eliminating all transactions between parties to the deed of cross guarantee, at 31 July 2012 is set out as follows:

Accumulated losses	(30,344)	-	
Retained earnings	193,237	201,102	
Total equity	1,258,770	1,294,660	

Parent entity contingencies

The parent entity is one of the guarantors of the Senior Facility Agreement (SFA) and would be obliged, along with the other guarantors, to make payment on the SFA in the unlikely event of a default by one of the borrowers. The parent entity also provides corporate guarantees to support several of the regional working capital facilities located in Brazil and Europe.

In the prior year, the parent entity had a contingent liability as a result of the class action proceedings. On 1 August 2012, Nufarm Limited entered into a conditional settlement agreement in relation to the class action proceedings. Subject to court approval, Nufarm has agreed to pay \$43.5 million, which has been recorded as a expense at 31 July 2012. Refer note 6.

Parent entity capital commitments for acquisition of property, plant and equipment

There are no capital commitments for the parent entity in 2012 or 2011.

Restatement of prior year comparatives

The prior year parent entity comparatives have been restated as a result of the omission of the AUD 4.919 million impairment in Excel Crop Care Ltd, an equity investment held by the parent. This has resulted in a restatement of total comprehensive income from \$29.586 million to \$24.667 million and total assets from \$1,435.717 million to \$1,430.798 million.

39 Key management personnel disclosures

The following were key management personnel of the consolidated entity at any time during the reporting period and were key management personnel for the entire period (except where denoted otherwise).

Non-executive directors	Executives	Title
DG McGauchie AO (Chairman)	BF Benson	Group general manager agriculture
AB Brennan	P Binfield ⁽¹⁾	Chief financial officer
GR Davis	BJ Croft	Group executive HR and organisation development
Dr RJ Edgar (retired 27 March 2012)	R Heath	Group general manager corporate services and
Dr WB Goodfellow		company secretary
GA Hounsell	G Hunt ⁽²⁾	Group general manager global marketing and business development
PM Margin (appointed 3 October 2011)	DA Mellody ⁽³⁾	Group general manager supply chain and strategic procurement
Dr JW Stocker AO (retired 1 December	RF Ooms ⁽⁴⁾	Group general manager chemicals
2011)	MJ Pointon	Group general manager innovation and development
	DA Pullan	Group general manager operations
	RG Reis	Group general manager corporate strategy and external affairs

Concolidated

Executive director

DJ Rathbone AM

Managing director and chief executive

1 Mr P Binfield was appointed as CFO with effect from 6 November 2011.

2 Mr G Hunt was appointed as group general manager of global marketing and business development with effect from 6 February 2012. 3 Mr DA Mellody, formerly the group general manager global marketing, moved into a new executive role of group general manager supply chain and strategic procurement with effect from 1 February 2012.

4 Mr RF Ooms resigned as group general manager chemicals with effect from 29 February 2012.

39 Key management personnel disclosures (continued)

Key management personnel compensation

The key management personnel compensation included in personnel expenses (see note 9) are as follows:

	Consolidated			
	2012 2			
	\$	\$		
Short term employee benefits	10,051,964	7,049,406		
Post employment benefits	483,344	480,384		
Equity compensation benefits	1,141,807	720,000		
Termination benefits	1,525,000	2,026,238		
Other long term benefits	267,505	256,927		
	13,469,620	10,532,955		

Individual directors and executives compensation disclosures

Information regarding individual directors and executives compensation is provided in the remuneration report section of the director's report.

Apart from the details disclosed in this note, no director has entered into a material contract with the company or entities in the group since the end of the previous financial year and there were no material contracts involving director's interest existing at year-end.

Loans to key management personnel and their related parties

There were no loans to key management personnel at 31 July 2012 (2011: Nil).

Other key management personnel transactions with the company or its controlled entities

A number of key management persons, or their related parties, hold positions in other entities that result in them having control or significant influence over the financial or operating policies of those entities. A number of these entities transacted with the company or its subsidiaries in the reporting period. The terms and conditions of the transactions with management persons and their related parties were no more favourable than those available, or which might reasonably be expected to be available, on similar transactions to non-director related entities on an arms-length basis.

From time to time, key management personnel of the company or its controlled entities, or their related entities, may purchase goods from the group. These purchases are on the same terms and conditions as those entered into by other group employees or customers and are trivial or domestic in nature.

39 Key management personnel disclosures (continued)

Options and rights over equity instruments granted as compensation

The movement during the reporting period in the number of rights over ordinary shares in Nufarm Limited held directly, indirectly or beneficially, by each key management person, including their related parties, is as follows

39 Key management personnel disclosures (continued)

- 1 The shareholdings of Dr WB Goodfellow, GA Hounsell, DG McGauchie and Dr JW Stocker include shares issued under the company's non-executive director share plan and are held by Pacific Custodians Pty Ltd as trustee of the plan.
- 2 The shareholding of Dr WB Goodfellow includes his relevant interest in:

(i) St Kentigern Trust Board (430,434 shares and 19,727 Nufarm Step-up Securities) - Dr Goodfellow is chairman of the Trust Board. Dr Goodfellow does not have a beneficial interest in these shares or step-up securities.

(ii) Sulkem Company Limited (120,000 shares).

(iii) 531 Trust (400,861 shares). Dr Goodfellow and EW Preston are trustees of 531 Trust.

(iv) Auckland Medical Research Foundation (26,558 Step-up Securities). Dr Goodfellow does not have a beneficial interest in these step-up securities.

(v) Trustees of the Goodfellow Foundation (33,854 shares and 1,338 Step-up Securities). Dr Goodfellow is chairman of

the Foundation Board and does not have a beneficial interest in these shares or step-up securities.

- (vi) Archem Trading (NZ) Ltd (700 step up securities)
- 3 The shareholding of Dr JW Stocker, Dr RJ Edgar and GDW Curlewis has been removed under the 'net change other' column due to their retirement as a director on 1 December 2011, 27 March 2012 and 2 December 2010 respectively. The shareholding of KP Martin has been removed under the 'net change other' column due to his resignation from the company on 30 June 2011.
- 4 DJ Rathbone holds 1,500 step up securities at 31 July 2012 (2011: nil).

40 Non-key management personnel disclosures

Transactions with related parties in the wholly-owned group a)

- The parent entity entered into the following transactions during the year with subsidiaries of the group:
- loans were advanced and repayments received on short term intercompany accounts; and
- management fees were received from several wholly-owned controlled entities.

These transactions were undertaken on commercial terms and conditions.

Transactions with associated parties b)

Transactions with associated parties		Cons	olidated
		2012	2011
		\$000	\$000
Excel Crop Care Ltd	purchases from	-	2,860

These transactions were undertaken on commercial terms and conditions.

41 Subsequent events

On 1 August 2012 the company announced that it had entered into a conditional settlement agreement in relation to the class action proceedings originally issued in January 2011 by Maurice Blackburn and Slater & Gordon.

In accordance with Accounting Standards the class action settlement amount, along with related legal costs, has been provided for in the financial statements and is reported in the items of material income and expense (refer to note 6 for further information).

On 21 September 2012, Nufarm announced that it intended to offer, subject to market and other conditions, US\$300 million aggregate principal amount of Senior Unsecured Notes. If successful, the net proceeds would be used to repay existing indebtedness outstanding under the \$625 million senior secured syndicated bank facility (SFA) entered into in November 2011. Concurrent with this, US\$250 million of the commitments under the \$625 million SFA would be cancelled.

Directors' declaration

- 1 In the opinion of the directors of Nufarm Limited (the company):
 - (a) the consolidated financial statements and notes, and the Remuneration report in the Directors' report, are in accordance with the Corporations Act 2001 including:
 - (i) giving a true and fair view of the group's financial position as at 31 July 2012 and of its performance for the financial year ended on that date; and
 - (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the Corporations Regulations 2001; and
 - (b) there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.
- 2 There are reasonable grounds to believe that the company and the group entities identified in note 36 will be able to meet any obligations or liabilities to which they are or may become subject to by virtue of the deed of cross guarantee between the Company and those group entities pursuant to ASIC Class Order 98/1418.
- 3 The directors have been given the declarations required by Section 295A of the Corporations Act 2001 from the chief executive officer and chief financial officer for the financial year ended 31 July 2012.
- 4 The directors draw attention to Note 2 to the consolidated financial statements, which includes a statement of compliance with International Financial Reporting Standards.

Signed in accordance with a resolution of the directors:

Dated at Melbourne this 24th day of September 2012

DG McGauchie Director

DJ Rathbone Director

DIRECTORS' REPORT

The directors present their report together with the financial report of Nufarm Limited ('the company') and of the group, being the company and its subsidiaries and the group's interests in associates and jointly controlled entities, for the financial year ended 31 July 2012 and the auditor's report thereon.

Directors

The directors of the company at any time during or since the end of the financial year are:

DG McGauchie AO (Chairman) DJ Rathbone AM (Managing Director) AB Brennan GR Davis Dr WB Goodfellow GA Hounsell PM Margin (appointed 3 October 2011) Dr JW Stocker AO (retired 1 December 2011) Dr RJ Edgar (retired 27 March 2012)

Unless otherwise indicated, all directors held their position as a director throughout the entire period and up to the date of this report. Details of the qualifications, experience and responsibilities and other directorships of the directors are set out in the company's 2012 annual report.

Company secretary

The company secretary is Mr R Heath.

Details of the qualifications and experience of the company secretary are set in the company's 2012 annual report.

Directors' interests in shares and step-up securities

Principal activities and changes

Nufarm is a leading global crop protection company and has operated in the industry for over 50 years. Nufarm develops, manufactures and sells a wide range of crop protection products, including herbicides, insecticides and fungicides that help crop producers protect their crops against damage caused by weeds, pests and disease. Nufarm sells its products in most of the world's major agricultural regions, and operates primarily in the off-patent segment of the crop protection market, which consists of products using technical active ingredients for which the patent has expired. Nufarm's focus is on creating products that use off-patent active ingredients within a differentiated formulation, delivery system or other technology that provide additional benefits to farmers. The Company also has a proprietary seeds business with a portfolio covering canola, sorghum and sunflower crops, and is developing a global presence in the fast growing and high value seed treatment segment.

Nufarm employs approximately 3,400 people at its various locations in Australasia, Africa, the Americas and Europe. The company is listed on the Australian Securities Exchange (symbol NUF). Its head office is located at Laverton in Melbourne.

Results

The net profit attributable to members of the Group for the 12 months to 31 July 2012 is \$72.6 million. The comparable figure for the 12 months to 31 July 2011 was a loss of \$49.9 million.

Dividends

The following dividends have been paid declared or recommended since the end of the preceding financial year.

	\$000
The Interim dividend for 2011-2012 of 3 cents paid 30 April 2012.	7,865

The Final dividend for 2011-2012 of 3 cents as declared and recommended by the directors is payable 16 November 2012.

\$000

Nufarm Step-up Securities distributions

The following Nufarm Step-up Securities distributions have been paid since the end of the preceding financial year:

Distribution for the period 15 April 2011 – 16 October 2011 at the rate of 6.94 per cent per annum paid 17 October 2011	8,829
Distribution for the period 17 October 2011 – 15 April 2012 at the rate of (i) 6.61 per cent for the period 17 October 2010 – 23 November 2011, and (ii) 8.61 per cent for the period 24 November 2011 – 15 April 2012 paid 16 April 2012	10,253

Review of operations

The review of the operations during the financial year and the results of those operations are set out in the managing director's review and the business review in the company's 2012 annual report.

State of affairs

The state of the group's affairs are set out in the managing director's review and the business review in the company's 2012 annual report.

Operations, financial position, business strategies and prospects

The directors believe that information on the group, which enables an informed assessment of its operations, financial position, strategies and prospects, is contained in the financial accounts, managing director's review and the business review.

Events subsequent to reporting date

On 24 September 2012, the Directors declared a final franked dividend of 3 cents per share payable 16 November 2012.

On 1 August 2012 the company announced that it had entered into a conditional settlement agreement in relation to the class action proceedings originally issued in January 2011 by Maurice Blackburn and Slater & Gordon. In accordance with Accounting Standards the class action settlement amount, along with related legal costs, has been provided for in the financial statements and is reported in the items of material income and expense (refer to note 6 for further information).

On 21 September 2012, Nufarm announced that it intended to offer, subject to market and other conditions, US\$300 million aggregate principal amount of Senior Unsecured Notes. If successful, the net proceeds would be used to repay existing indebtedness outstanding under the \$625 million senior secured syndicated bank facility (SFA) entered into in November 2011. Concurrent with this, US\$250 million of the commitments under the \$625 million SFA would be cancelled.

Likely developments

The directors believe that likely developments in the group's operations and the expected results of those operations are contained in the managing director's review and the business review.

Environmental performance

Details of Nufarm's performance in relation to environmental regulations are set out in the company's 2012 annual report. The group did not incur any prosecutions or fines in the financial period relating to environmental performance. The group publishes annually a health, safety and environment report. This report can be viewed on the group's website or a copy will be made available upon request to the company secretary.

Non-audit services

During the year KPMG, the company's auditor, has performed certain other services in addition to their statutory duties. Details of the audit fee and non-audit services are set out in note 43 to the financial report.

The board has considered the non-audit services provided during the year by the auditor and in accordance with written advice provided by resolution of the audit committee, is satisfied that the provision of those non-audit services during the year by the auditor is compatible with, and did not compromise, the auditor independence requirements of the Corporations Act 2001 for the reason that all non-audit services were subject to the corporate governance procedures adopted by the company and have been reviewed by the audit committee to ensure they do not impact the integrity and objectivity of the auditor.

Remuneration report

Introduction

Nufarm's Remuneration Report is for the year ended 31 July 2012. The Report details remuneration information as it applies to Nufarm nonexecutive directors (NED) and Nufarm's Executives (referred to as Key Management Personnel (KMP)).

KMP include the managing director and the group executives who have the authority and responsibility for successfully planning, directing and controlling Nufarm's business.

Remuneration Governance

The human resources (HR) committee is responsible for reviewing and making recommendations to the board on remuneration policies and packages applicable to KMP. The committee is comprised of three independent non-executive directors and is tasked with ensuring that remuneration policies and packages retain and motivate high calibre executives and have a clear relationship between company performance and executive remuneration. The committee charter can be found at <u>www.nufarm.com</u>.

The board measures financial performance under the Short Term Incentive (STI) and Long Term Incentive Plan (LTIP) using audited numbers. The relative total shareholder return (TSR) will be measured by an independent external advisor. Within this framework the board has discretion to 'clawback' deferred STI prior to vesting where: payment is contrary to the financial soundness of the company; in circumstances where the financial performance of Nufarm over the relevant period (including the initial STI performance period) has been mis-stated; and/or for individual gross misconduct.

KMP are not permitted to hedge any shares issued to them under the STI while those shares remain held in trust.

Key outcomes for the 2012 year detailed in this report include:

- fixed remuneration increases for KMP;
- STI awards to KMP in line with performance;
- initial LTIP awards to KMP; and
- fee increases for NEDs

Remuneration Advice

The HR committee engaged Mercer as advisors to provide executive remuneration benchmarking data through comparisons to organisations of similar size and complexity to Nufarm and through detailed analysis of KMP compensation trends. This advice covered both fixed and variable components of compensation.

Mercer was paid \$35,222 for the provision of this advice. No other services were provided by Mercer during the year.

The HR committee appointed Mercer with a set of clear criteria including the requirement for all reporting to be delivered directly to the chairman of the HR committee. A process was established to ensure that Mercer would be able to carry out its work, including information capture and the formation of its recommendations, free from undue influence from KMP to whom the recommendations would apply. The HR committee undertook a full and independent review of the advice.

The board was satisfied that the remuneration recommendations made by Mercer were free from undue influence by members of the KMP to whom the recommendations would apply.

The remuneration recommendations were provided to the Nufarm board as an input into decision making only. The board considered the recommendations, along with other factors, in making its remuneration decisions.

Principles of remuneration for the period ended 31 July 2012

As disclosed in last year's remuneration report, the board undertook a major review of the executive remuneration structure which resulted in:

- a change to the target remuneration mix and a plan to move all KMP to this mix over a defined period;
- a change to the STI measures to be more directly aligned to financial accountabilities;
- the addition of strategic and business improvement objectives to ensure focus on the ongoing health and profitability of the business; and
- the introduction of the LTIP to better align executive remuneration with shareholder returns.

The company's remuneration policy for the period ended 31 July 2012 was based on total target reward (TTR) structured to align overall remuneration spend with business performance.

TTR was composed of total fixed remuneration (TFR), a variable component of STI linked to current year performance and a LTIP linked to longer term performance and business outcomes.

Remuneration mix

The TTR for the majority of the KMP (excluding the managing director) will have a mix at target of 55% fixed, 25% STI (50% paid cash and 50% retained in equity) and 20% LTIP (retained in performance rights). New KMP are employed on this basis. For longer serving KMP a case by case transition plan is being implemented to arrive at the target remuneration mix. Individual plans are necessary given different salary levels and contractual arrangements.

The effect of this transition is that an increasing percentage of the KMP's remuneration is 'at risk' and is directly linked to company performance in the short, medium and longer term.

Fixed Remuneration

The company's policy for the fixed reward was benchmarked against Australian executives with reference to the 62.5th percentile of companies of similar size and complexity excluding retail, utilities, financial and resources companies.

The 62.5th percentile positioning reflects the reality that while the current KMP are Australian based they have significant international responsibility and operate in a globally competitive employment market where remuneration levels are often higher than in the Australian market.

Short Term Incentive (STI)

Nufarm's strategy focuses on growth and increased participation in high value markets with sustainable returns. Therefore our STI program is heavily biased to growth in profitability and strong focus on balance sheet management. 20% of STI potential was attached to strategic objectives focused on the development of innovation capability and increased business discipline, both of which the company sees as integral to delivering targeted financial outcomes and returning the company to acceptable returns for shareholders.

In 2012 the STI, which rewards annual performance, was delivered through a combination of cash incentive and shares which were retained and will vest 50% on the 1^{st} anniversary and 50% on the 2^{nd} anniversary. Future awards will vest on the 2^{nd} anniversary.

Who participates in the STI?	Plan participants include KMP and senior managers globally.						
When are awards made?	Awards under the plan are made at the end of the financial year.						
	The board sets measures at the start of each year focused on profitability, balance sheet management and overall return. Noted below are the measures used in 2012 and the measures to be applied in 2013.						
What measures are used in the plan?	No80% of the potential is based on budget measures of underlying EBIT and return on operating assets (ROA).				20% of the potential is based on strategic and business improvement objectives		
used in the plan :					potential is based on strategic and ess improvement objectives

	Awards are assessed annually at the end of the financial year. Awards are based on the percentage achievement against the budget and strategic measures.						the percentage
When and how are the STI payments determined?		entage of Target award realised	Nil	259	%	100%	150%
	Straight line vesting between 85 per cent and budget and between budget and 120 per cent budget achievement. Strategic and business improvement objectives are assessed on a merit basis against stated objectives.						
Are payments in cash or shares?	50% of STI paid in cash at time of performance testing and 50% deferred into shares or rights in the company for nil consideration						
When do the shares vest?	subj	Vesting will occur on the second anniversary subject to continued employment. The unvested awards are subject to the clawback provisions of the Plan. 2012 awards will vest 50% on the 1 st anniversary and 50% on the 2 nd anniversary. Future awards will vest in full on the 2 nd anniversary.					

* In respect of the ANWC/Sales measure in FY13, the maximum potential budget achievement will be set at 110%

Long Term Incentive Plan (LTIP)

Nufarm's LTIP commenced in 2012 and is based on the principle of aligning executive interests and reward with those of shareholders. Return on Funds Employed (ROFE) has long been held as an important metric for Nufarm and it was considered important to include a return measure in the LTIP. Relative TSR recognises that investors will choose to invest their money in industries and companies with acceptable returns. This plan rewards executives to the degree the company performs against two hurdles over three years.

Why have a LTIP?	This plan aligns executive interests and earnings with the longer term Nufarm strategy and the interests of shareholders.
Who participates in the LTIP	The current participants in the plan are KMP and other selected senior managers (together, the LTIP participants)

Are the awards cash or shares?	Awards are granted to Australian executives in the form of performance rights, which comprise rights to acquire ordinary shares in the company for nil consideration, subject to the achievement of global performance hurdles. The plan rules provide the flexibility to use other instruments to comply with local regulations and sound practice.						
	Under the plan, Australian LTIP participants receive practical after the announcement of results for the pr

	To be eligible the LTIP participant needs to be emplo	yed by Nufarm on the vesting date.					
	The performance / vesting period for awards is 3 yea	rs. Awards will vest in two equal tranches as follows:					
When do the awards vest?	Fifty percent (50%) of the LTIP grant will vest subject to the achievement of a relative TSR performance hurdle measured against a selected comparator group of companies; and						
	The remaining fifty percent (50%) of the LTIP grant will vest subject to the 3 year average of an absolute ROFE target.						
Why have ROFE and relative TSR been chosen as the hurdles?	ROFE is used to track progress towards the goal to re Nufarm (ROFE). Strong Relative TSR performance shareholders.						
What is the comparator group for the assessment of relative TSR?	Based on the results of research and modelling carried out by Ernst and Young, the board approved the adoption of the 'S&P ASX 200 excluding those companies in the Financial, Materials and Energy groups' as the TSR comparator group. This provides a group which is large enough for sound measurement with exclusions that reduce the volatility by removing companies which are in significantly different industries to Nufarm. This comparator group is also seen as an appropriate representation of Nufarm's competitors for investment.						
How is relative TSR measured?	TSR will be measured over the performance period. For the purposes of this measurement, each company's share price will be measured using the average closing price over 60 days up to (but excluding) the first day of the performance period, and the average closing price over 60 days up to and including the last day of the performance period						
	TSR of Nufarm relative to the TSR of comparator group companies	Proportion of TSR grant vesting					
What is the relative	Less than 50 th percentile	0%					
TSR performance required for	50 th percentile	50%					
vesting?	Between 51 st percentile and 75 th percentile	Straight line vesting between 50% and 100%					
	75 th percentile	100% vesting					
How is the ROFE measure set?	ROFE objectives are set by the board at the beginning of each year. There is both a 'target' and a 'stretch' hurdle. These numbers are based on the budget and growth strategy.						

How is ROFE measured?	Return is calculated on the group's earnings before interest and taxation and adjusted for any non- operating items. Funds employed are represented by shareholder's funds plus total interest bearing debt. For the purposes of measuring ROFE performance in the LTIP, ROFE will be averaged over the life of the plan.					
	Percentage of ROFE target achieved	Proportion of ROFE grant vesting				
	Less than Target	0%				
What ROFE result is required for	Target	50%				
vesting?	Between Target and Stretch	Straight line vesting between 50% and 100%				
	Stretch	100%				
What was the result for the 2012 year?	There is no partial vesting of the LTI before the 3 rd anniversary which will be 31 July 2014. However the 2012 ROFE result of 10.4% is currently tracking at a level of performance required to achieve the 2014 ROFE target hurdle rate.					
What happens if the awards do not vest?	To the extent the TSR and ROFE performance hurdles are not met at the end of the initial 3-year performance period and full vesting is not achieved, performance will not be re-tested and the award will lapse.					

Link between performance and KMP remuneration outcomes

- Fixed and variable remuneration review Given the financial performance of the group and the contribution to the continued recovery of the business, KMP were granted a 4% increase in fixed remuneration and short term incentive potential. Salary benchmarking carried out by Mercer confirmed that a 4% increase was in line with market movement in executive salaries.
- STI Based on an underlying EBIT result at 100.2% of target and a Return on Operating Assets result at 105.4% of target and performance against individual strategic and business improvement objectives, KMP were awarded an STI.
 - Individual objectives were driven by Nufarm's strategy and the goals to deliver on sustainable innovation and business discipline across the business. These objectives included organisation restructuring, management and board renewal, business process and systems improvements and the implementation of initiatives to support growth in higher value segments.
- LTIP The LTIP vests on the 3rd anniversary. While both measures are tested on the 3rd anniversary, the 2012 ROFE result of 10.4% is currently tracking at a level to achieve the 2014 ROFE target hurdle rate.

	UNDERLYING EBIT *	ROFE achieved	EPS	Dividend rate	Dividends paid	Change in share price**	Share price 31 July	Total shareholder return***
	\$M	%	cer	nts per share	\$000	\$	\$	%

2009	312.5	13.0	33.5	35	65,297	(6.01)	10.84	(33.8)
2010	148.4	6.0	(15.0)	15	32,709	(7.02)	3.82	(62.7)
2011	171.8	7.6	(23.7)	-	-	0.52	4.34	13.6
2012	206.0	10.4	22.3	3	7,865	1.13	5.47	26.8

The table below summarises the company's performance and shareholder wealth statistics over the last five years.

- * Underlying EBIT (previously Operating EBIT) is earnings before net finance costs, taxation and material items. Underlying EBIT is a non-IFRS measure used to reflect the underlying performance of Nufarm's operations. Underlying EBIT is reconciled to Operating Profit in the managing director's review and the business review in the company's 2012 annual report. Refer to note 2(e) of the Nufarm Limited Financial Statements for a discussion of the classification of foreign exchange gains or losses and debt establishment costs as net finance costs in 2012 and all prior periods.
- ** This column reflects the change in share price from 1 August to 31 July in the relevant financial year.

Service contracts

The company has employment contracts with the KMP. These contracts formalise the terms and conditions of employment. The contracts are for an indefinite term. The contracts of the managing director and most other KMP named in this report were entered into prior to the announcement of legislation to change termination payment limits for executives.

- The company may terminate the contract of the managing director, either immediately or by giving 12 months notice, in which case the managing director will be paid a termination payment equivalent to 24 months TFR (base salary plus value of benefits such as motor vehicle and superannuation and any fringe benefits tax in relation to those benefits). The contract also provides for the company to be able to make a payment in lieu of notice should it wish, for payment of any entitlements due under existing STI and LTI plans and for payment of applicable statutory entitlements.
- The managing director may terminate the contract by giving the company 12 months notice. In this event, the contract provides an entitlement for the managing director to a termination payment equal to any part of the notice period, paid in lieu, by the company. In addition, the managing director will be paid any entitlements due under existing STI and LTI plans and all applicable statutory entitlements.
- In certain limited circumstances, the managing director may also terminate his contract on immediate notice. This includes where there is a change of duties or responsibilities without the managing director's agreement which has the effect of material change in status and in certain other limited circumstances. If the contract is terminated in these circumstances, the managing director will, in general, be entitled to the payments outlined above where the company terminates on immediate notice. In extremely limited circumstances, the managing director may also be entitled to an additional amount equal to 24 months entitlement under the STI and LTI plans.
- The company may terminate the contract of other KMP by 6 months notice in which case a termination payment equivalent to 12 months total employment cost will be paid. In addition, the contracts provide for payment of any part of the applicable notice period paid in lieu, plus any entitlements due under existing STI and LTI plans (including any entitlements which would have been payable under the STI and LTI plans in the period ending on the later of i) the last day of the financial year following notice of termination or ii) 6 months following notice of termination) and applicable statutory entitlements.
- The company may terminate the employment contacts immediately for serious misconduct.

Termination Benefits

- Under the rules of the STI plan if a KMP leaves before the vesting anniversary under 'Qualifying leaver' provisions the equity will remain in the plan until the vesting date. If the KMP leaves under other than 'Qualifying leaver' circumstances the equity will be forfeited.
- To be eligible under the LTI plan the KMP must be employed by Nufarm on the 1st anniversary of the allocation. If the executive leaves before this date the allocation is forfeited. If the executive leaves under 'Qualifying leaver' provisions after the 1st anniversary and before the 3rd anniversary of the plan the allocation will be pro-rated and the pro-rated allocation will remain 'on foot' in the plan subject always to certain overriding discretions set out in the plan, and to supervening provisions in certain executive contracts, which extend or alter the manner in which the pro-rating is undertaken.
- 'Qualifying leaver' provisions include participants who cease employment due to retirement, death, ill health/disability, redundancy, or contract severance without cause by Nufarm.
- The rules of the plans provide the flexibility, in special circumstances (eg. health or severe personal hardship), to accelerate the vesting. In the case of the STI this would result in the shares being released from the trust to the KMP. In the case of the LTI plan the qualifying allocation will be tested against the hurdles to determine the value (if any) of the allocation.

Non-Executive Directors (NED)

The board's policy with regard to NED remuneration is to position board remuneration at the market median with comparable sized listed entities.

The board determines the fees payable to non-executive directors within the aggregate amount approved from time to time by shareholders. At the company's 2009 AGM, shareholders approved an aggregate of \$1,600,000 per year (excluding superannuation costs).

Set out below are details of the annual fees payable for the year ending 31 July 2012 (including superannuation costs) Increases in these fees were effective as of the 1st February 2012 and bring board remuneration in line with market practice.

The board's decision in relation to NED fee increases was informed by independent advice received from the Godfrey Remuneration Group. The fee changes remained well within the approved cap.

	Fees applicable for the period to 31 st January 2012 \$	Fees applicable from 1 st February 2012 to the 31 st July 2012 \$
Chairman ¹	319,000	330,000

1 Represents total remuneration in the financial year

2 Peter Margin was appointed a director on 3 October 2011

3 Dr RJ Edgar retired as a director on 27 March 2012

4 Dr. JW Stocker retired as a director on 1 December 2011

5 Paul Binfield was appointed chief financial officer on 6 November 2011

6 Greg Hunt was appointed as group executive global marketing on 6 February 2012

7 Robert Ooms left Nufarm on 29 February 2012

The payments to Mr. Ooms comprised his entitlements and termination under the conditions of his employment contract

8 Kevin Martin left Nufarm on 30 June 2011

Remuneration options: granted and vested during the year

During the year 465,677 performance rights were granted to executives under the LTIP. No options vested or were exercised by the specified executives.

Shares issued as a result of the exercise of options

There were no shares issued as a result of the exercise of options during the year.

Unissued shares under option

There are no unissued shares under option.

Indemnities and insurance for directors and officers

The company has entered into insurance contracts, which indemnify directors and officers of the company, and its controlled entities against liabilities. In accordance with normal commercial practices, under the terms of the insurance contracts, the nature of the liabilities insured against and the amount of premiums paid are confidential.

An indemnity agreement has been entered into between the company and each of the directors named earlier in this report. Under the agreement, the company has agreed to indemnify the directors against any claim or for any expenses or costs, which may arise as a result of the performance of their duties as directors. There are no monetary limits to the extent of this indemnity.

Lead auditor's independence declaration

The lead auditor's independence declaration is set out in the company's 2012 annual report and forms part of the directors' report for the financial year ended 31 July 2012.

Rounding of amounts

The company is of a kind referred to in Australian Securities and Investment Commission Class Order 98/100 dated 10 July 1998 and, in accordance with that class order, amounts in the financial statements and the directors' report have been rounded off to the nearest thousand dollars, unless otherwise stated.

This report has been made in accordance with a resolution of directors.

Lead Auditor's Independence Declaration under Section 307C of the Corporations Act 2001

To: the directors of Nufarm Limited

I declare that, to the best of my knowledge and belief, in relation to the audit for the financial year ended 31 July 2012 there have been:

- (i) no contraventions of the auditor independence requirements as set out in the Corporations Act 2001 in relation to the audit; and
- (ii) no contraventions of any applicable code of professional conduct in relation to the audit.

Independent auditor's report to the members of Nufarm Limited

Report on the financial report

We have audited the accompanying financial report of Nufarm Limited (the Company), which comprises the consolidated balance sheet as at 31 July 2012, consolidated income statement and consolidated statement of comprehensive income, consolidated statement of changes in equity and statement of cash flows for the year ended on that date, notes 1 to 42 comprising a summary of significant accounting policies and other explanatory information and the directors' declaration of the Group comprising the Company and the entities it controlled at the year's end or from time to time during the financial year.

Directors' responsibility for the financial report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement whether due to fraud or error. In note 2(a), the directors also state, in accordance with Australian Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements of the Group comply with International Financial Reporting Standards.

Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of the financial report that gives a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We performed the procedures to assess whether in all material respects the financial report presents fairly, in accordance with the Corporations Act 2001 and Australian Accounting Standards, a true and fair view which is consistent with our understanding of the Group's financial position and of its performance.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence

In conducting our audit, we have complied with the independence requirements of the Corporations Act 2001.

Auditor's opinion

In our opinion:

(a) the financial report of the Group is in accordance with the Corporations Act 2001, including:

- (i) giving a true and fair view of the Group's financial position as at 31 July 2012 and of its performance for the year ended on that date; and
- (ii) complying with Australian Accounting Standards and the Corporations Regulations 2001.

(b) the financial report also complies with International Financial Reporting Standards as disclosed in note 2(a).

Report on the remuneration report

We have audited the Remuneration Report included under the heading "remuneration report" of the directors' report for the year ended 31 July 2012. The directors of the Company are responsible for the preparation and presentation of the remuneration report in accordance with Section 300A of the Corporations Act 2001. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with auditing standards.

Auditor's opinion

In our opinion, the remuneration report of Nufarm Limited for the year ended 31 July 2012, complies with Section 300A of the Corporations Act 2001.
