

ASX Announcement - Sales Disclosure

Agreement reached for Collections and Recoveries system

Rubik has signed a contract to provide a new Collections and Recoveries system for the retail business of one of Indonesia's top four financial institutions. This government bank is a new client for Rubik.

Rubik advises that:

- This customer will be replacing their current, separate technology platforms with the latest version of CWX, our flagship collections product, which will include the new integrated, web-based agency management module.
- CWX will manage collections operations for more than 2,000 staff and 50 third-party agencies located in many of Indonesia's cites and islands.
- Implementation will start in October and the system 'go live' is planned for mid 2013.
- This is the second use of the new module, which has potential with 20 existing customers in high-volume environments such as SE Asia, Pakistan and Australia.

Rubik CEO, Brent Jackson says "We are pleased to build long-term relationships with new customers, especially when we provide a product which will meet and cater for their projected portfolio growth over the next few years."
