### **Gold Equivalent reporting**

Gold Equivalent = gold assay + (silver assay / 50) where the number 50 represents the ratio where 50g/t Ag = 1 g/t Au. This ratio was calculated from the average of the 12 months of Financial Year 2011 from July 2010 to June 2011 taken from published World Bank Commodity Price Data and rounded up from 47 to 50.

The metal prices thus used in the calculation are the average gold price of US\$1,500 per ounce and average silver price of US\$30 per ounce. Metal recoveries assumptions are 90% for gold and 80% recovery for silver for Belinau.
